

Design changes at Glencairn Road, Purga

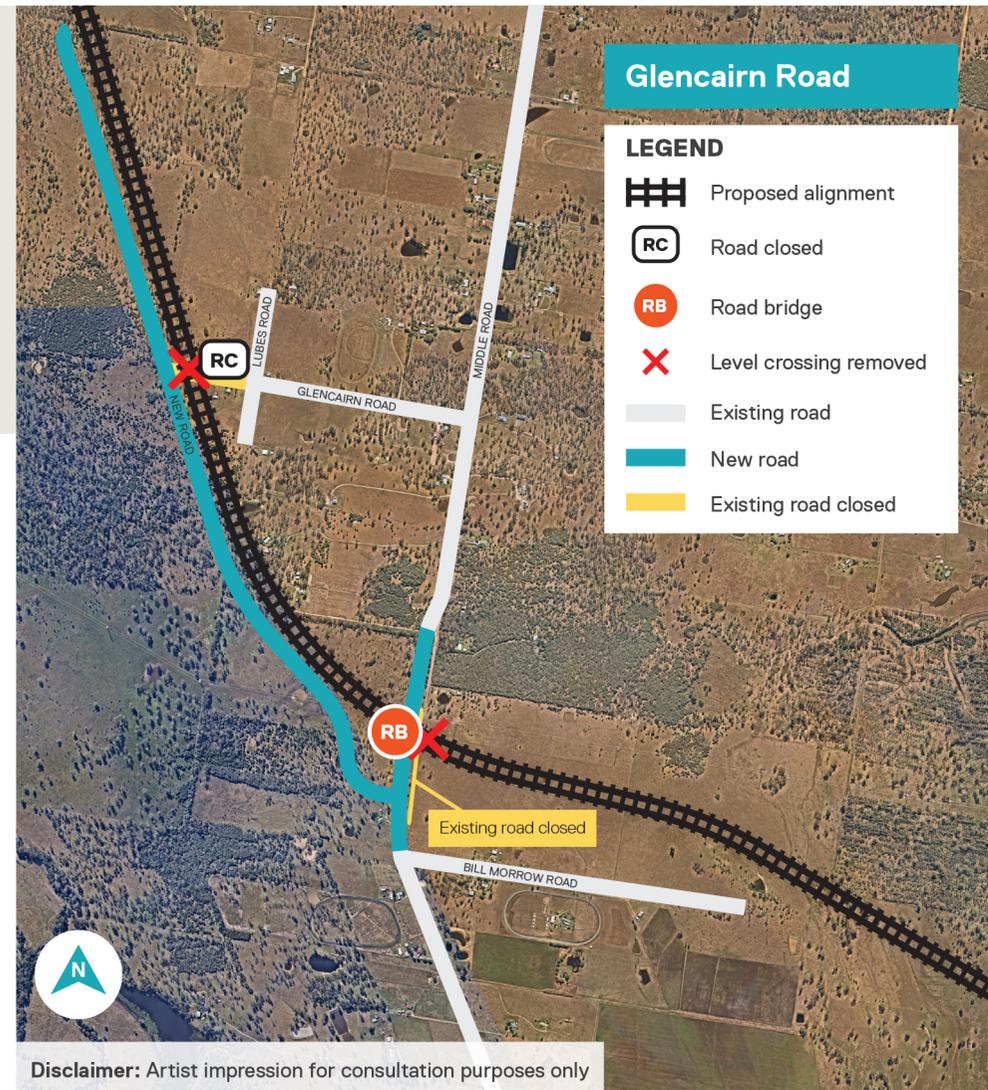

The Inland Rail Calvert to Kagaru project team has consulted with the community on the proposed project design since 2017.

The proposed change at this location is a result of the extensive engagement with landowners, key stakeholders and community members on the proposed rail alignment and associated infrastructure. We have also reviewed, and incorporated feedback from, the submissions to the Queensland Government Coordinator-General's Calvert to Kagaru Environmental Impact Statement process.

We used information from residents, government agencies and road authorities, as well as traffic counts to develop the proposed Glencairn Road redesign.

Glencairn Road changes

- The Glencairn Road reference design level crossing will be removed.
- Alternate access provided via a new road to the west of and running parallel to the rail alignment.
- The new road connects to Middle Road at a new T intersection.
- The intersection will provide Glencairn Road users local connections to the north and south.
- The new road is designed to minimise impacts on adjacent properties.
- Road will match existing terrain levels.
