# 1 INTRODUCTION

## 1.1 Purpose of this Noise Assessment

This Noise Assessment has been prepared to identify and assess the additional work areas / scenarios required to support and enable the wider scope of activities associated with the Kemp Street Works and September 2025 possession. This Construction Noise and Vibration Impact Statement Addendum (CNVIS Addendum) forms an addendum to the endorsed Kemp Street Works CNVIS (Doc No: 6-0052-210-EEC-J2-AS-0001).

This CNVIS Addendum should be reviewed in conjunction with the Kemp Street Works CNVIS (Doc No: 6-0052-210-EEC-J2-AS-0001) including adopted rating background levels (RBL), noise management levels (NMLs) and assessment criteria in accordance with the Infrastructure Approval (SSI-10055).

The following figures identify the scenarios assessed in this CNVIS Addendum:

- Figure 1: W.002B – a new scenario to assess the operation of a reduced number of compounds, Western Compound Seignior St (3), Eastern Compound (2) and a portion of Endeavour Park (1). The Kemp Street Works CNVIS assesses the operation of compounds at six distinct locations (including these locations);
- Figure 2: W.007B – a new scenario and work area to assess the construction and deconstruction of a temporary access track and crane pad to enable removal of the Kemp Street bridge during possession works;
- Figure 3: W.012B – an extended works area for the track works scenario (W.012). This Addendum CNVIS includes an additional expanded area to the south, compared to the Kemp Street Works CNVIS, and amended equipment list for the possession works.

**FIGURE 1: WORK AREA REQUIRED FOR KEMP STREET WORKS – COMPOUND OPERATION (W.002B)**

FIGURE 2: WORKS AREA REQUIRED FOR KEMP STREET WORKS – EARTHWORKS (ACCESS TRACK) (W.007B)

FIGURE 3: WORK AREA REQUIRED FOR KEMP STREET WORKS – TRACK WORK (W.012B)

## 2 NOISE ASSESSMENT

The potential construction noise levels from the proposed works have been predicted using SLR Predict, the A2I project-specific noise and vibration tool. This CNVIS Addendum assesses the work scenarios identified in Table 2.

**TABLE 2: WORK SCENARIO DESCRIPTION**

ID	Scenario	Description	Total Lw
W.002B	Compound operation	Operation of the site compound and delivery of materials / equipment	113
		Vehicle parking (Compound 1 / Endeavour Park)	93
W.007B	Earthworks (access track)	Construction and demolition of a temporary access track and crane pad	117
W.012B	Track Work - Peak	Track work including highly noise intensive work	118

### 2.1 Compound operation

#### 2.1.1 Scope

The new scenario is a reduced work area compared to that assessed in the Kemp Street Works CNVIS. W.002B utilises three of the six construction compounds and an amended plant and equipment list. Endeavour Park is proposed to be used for vehicle parking.

##### Plant and equipment

1x Excavator - Tracked (20T)  
 1x Elevated Work Platform  
 1x Front End Loader  
 1x Generator  
 4x Light Vehicle  
 1x Positrack  
 2x Truck - Medium Rigid (20T)  
 1x Watercart

##### Construction hours

- Standard approved Hours:
  - 7am to 6pm Monday to Friday, inclusive
  - 7am to 6pm Saturday
- Day Out-of-Hours (OOH):
  - 8am to 6pm Sunday and public holidays
- Evening OOH:
  - 6pm to 10pm Monday to Sunday (including public holidays)
- Night OOH:
  - 10pm to 7am Monday to Saturday
  - 10pm to 8am Sunday (including public holidays)

## 2.1.2 Assessment

Three construction compounds identified in the Kemp Street Works CNVIS are currently proposed for operation. SLR Predict was utilised to assess the proposed scenario to allow for a comparison with the impacts identified in the endorsed Kemp Street Works CNVIS:

- The proposed construction compounds (Figure 1) with the plant and equipment list identified in Section 2.1.1. Endeavour Park is assessed for vehicle parking only.

All plant and equipment identified above was considered in the assessment at the utilisation rates identified in Appendix A.

## 2.1.3 Results

The SLR Predict results are presented in Appendix A, for nighttime out of hours, as the most affected period. Table 3 provides a summary of the exceedances identified through various assessments. It compares the following:

- W.002 exceedances identified in the Kemp Street Works CNVIS (CNVIS locations (6) and equipment list)
- W.002B exceedances assessed in SLR Predict in the proposed locations (3), with an amended plant and equipment list (the current proposed scenario, however, the operation of additional construction compounds may be required in future, in accordance with the endorsed Kemp Street Works CNVIS).

**TABLE 3: EXCEEDANCE COMPARISONS FOR W.002B**

ASSESSMENT RESULTS (NIGHT OOH)	NUMBER OF RESIDENTIAL RECEIVERS WITH NML EXCEEDANCE	
	W.002 CNVIS	W.002B Sept Possession 2025 Compounds Proposed Equipment SLR Tool
Total Lw (dBA)	114	113
Noticeable (1-5 dB)	178	219
Clearly Audible (6-15 dB)	292	296
Moderately Intrusive (16-25 dB)	118	52
Highly Intrusive (>25 dB)	59	7
Above Sleep Disturbance (>Screening level)	469	131
Above Sleep Awake (>65 dB)	144	16

Table 3 shows an overall decrease in the intensity of impacts resulting from the current proposed scenario W.002B (last column). Although there is an increased number of receivers experiencing a noticeable level of noise (1-5 dB exceedance), there is a substantial decrease in the number of receivers experiencing moderately intrusive and highly intrusive (>25 dB exceedance) noise levels.

## 2.2 Earthworks (access track)

### 2.2.1 Scope

The discrete scenario and distinct work area (W.007B) required for the Kemp Street Works will enable the construction and removal of a temporary access track and crane pad to facilitate the removal of the Kemp Street bridge during the September 2025 possession. The access track and crane pad will be removed prior to the completion of the September 2025 possession.

### Plant and equipment

1x Excavator - Tracked (40T)  
 2x Excavator - Tracked (20T)  
 1x Front End loader  
 1x Hand tools (electric)  
 2x Light Vehicle  
 3x Lighting Tower  
 1x Roller (7 to 13 tonne / <300 kN) – Vibratory  
 2x Plate Compactor  
 1x Positrack  
 2x Truck - Medium Rigid (20T)  
 2x Watercart

### Construction hours

- Standard approved hours:
  - 7am to 6pm Monday to Friday, inclusive
  - 7am to 6pm Saturday
- Day OOH:
  - 8am to 6pm Sunday and public holidays
- Evening OOH:
  - 6pm to 10pm Monday to Sunday (including public holidays)
- Night OOH:
  - 10pm to 7am Monday to Saturday
  - 10pm to 8am Sunday (including public holidays)

## 2.2.2 Assessment

A discrete scenario in a distinct location is required for the September 2025 possession. SLR Predict was utilised to assess various scenarios to allow for a comparison with the impacts identified in the endorsed Kemp Street Works CNVIS:

- W.007 location and equipment list from the Kemp Street Works CNVIS (daytime OOH)
- W.007 location and equipment list from the Kemp Street Works CNVIS (nighttime OOH, this scenario was not considered in the Kemp Street Works CNVIS)
- W.007B location identified in Figure 2 with the plant and equipment list identified in Section 2.2.1 (daytime OOH);
- W.007B location identified in Figure 2 with the plant and equipment list identified in Section 2.2.1 (nighttime OOH).

All plant and equipment identified above was considered in the assessment at the utilisation rates identified in Appendix B.

## 2.2.3 Results

The SLR Predict results are presented in Appendix B for approved hours and out of hours. Table 4 provides a summary of the exceedances identified through various assessments. It compares the following:

- W.007 (daytime OOH) exceedances identified in the Kemp Street Works CNVIS (CNVIS location and equipment list);
- W.007 (daytime OOH) exceedances assessed in SLR Predict with the Kemp Street Works CNVIS location and equipment list. These results show comparable exceedances with those identified in the CNVIS. The exact values differ due to minor discrepancies in the work areas assessed;
- W.007 (nighttime OOH) exceedances assessed in SLR Predict with the Kemp Street Works CNVIS location and equipment list, This scenario was not assessed in the Kemp Street Works CNVIS, but is provided to allow a better comparison with the proposed W.007B scenario;

- W.007B (daytime OOH) exceedances assessed in SLR Predict with the proposed equipment list, in the proposed location (Figure 2);
- W.007B (nighttime OOH) exceedances assessed in SLR Predict with the proposed equipment list, in the proposed location (Figure 2).

**TABLE 4: EXCEEDANCE COMPARISONS FOR W.007B**

ASSESSMENT RESULTS	NUMBER OF RESIDENTIAL RECEIVERS WITH NML EXCEEDANCE				
	W.007 CNVIS (Day OOH)*	W.007 CNVIS using SLR Tool (Day OOH)*	W.007 CNVIS using SLR Tool (Night OOH)	W.007B SLR Tool (Day OOH)*	W.007B SLR Tool (Night OOH)
Total Lw (dBA)	118	118	118	117	117
Noticeable (1-5 dB)	206	204	369	191	297
Clearly Audible (6-15 dB)	202	208	382	199	355
Moderately Intrusive (16-25 dB)	67	62	153	49	142
Highly Intrusive (>25 dB)	39	42	76	8	29
Above Sleep Disturbance (>Screening level)	-	-	312	-	256
Above Sleep Awake (>65 dB)	-	-	76	-	29

Table 4 shows a comparable impact between the new earthworks (access track) scenario (W.007B) and the earthworks scenario (W.007) assessed in the Kemp Street Works CNVIS at the lower value exceedances and a decrease in the number of exceedances experiencing highly intrusive noise impacts. These impacts will be limited to the September 2025 possession.

## 2.3 Track work

### 2.3.1 Scope

This amended scenario (W.012) extends the work area for the track works scenario identified in the Kemp Street Works CNVIS. This Addendum CNVIS includes an additional expanded area to the south, compared to the Kemp Street Works CNVIS.

#### Plant and equipment

2x Excavator - Tracked (20 tonne)

### Construction hours

- Standard approved hours:
  - 7am to 6pm Monday to Friday, inclusive
  - 7am to 6pm Saturday
- Day OOH:
  - 8am to 6pm Sunday and public holidays
- Evening OOH:
  - 6pm to 10pm Monday to Sunday (including public holidays)
- Night OOH:
  - 10pm to 7am Monday to Saturday
  - 10pm to 8am Sunday (including public holidays)

### 2.3.2 Assessment

A southern extension of the work area for track work – peak scenario (W.012) has been identified. SLR Predict was utilised to assess various scenarios to allow for a comparison with the impacts identified in the endorsed Kemp Street Works CNVIS:

- The proposed extended work area (Figure 1 3) with the plant and equipment list from the CNVIS
- The proposed extended works area (Figure 1 3) with the plant and equipment list in Section 2.3.1 (the current proposed scenario).

All plant and equipment identified above was considered in the assessment at the utilisation rates identified in Appendix C.

### 2.3.3 Results

The SLR Predict results are presented in Appendix C for out of hours night period. Table 5 provides a summary of the exceedances identified through various assessments. It compares the following:

- W.012 exceedances identified in the Kemp Street Works CNVIS (CNVIS locations and equipment list);
- W.012 exceedances assessed in SLR Predict with the CNVIS equipment list, in the proposed extended work area (Figure 3);
- W.012B exceedances assessed in SLR Predict with the proposed equipment list and the proposed extended work area (Figure 3) (this scenario appropriately assesses the intended works).

Above Sleep Disturbance (>Screening level)	567	576	576
Above Sleep Awake (>65 dB)	98	131	131

Table 5 shows a comparable impact between the impacts assessed in the Kemp Street Works CNVIS and the extended area and proposed plant and equipment assessed in this Addendum CNVIS.

## 3 VIBRATION ASSESSMENT

### 3.1 Compound operation

There will be no vibration intensive plant and equipment proposed as part of W.002B; therefore, no vibration impacts are expected.

### 3.2 Earthworks (access track)

A 7-13 tonne vibratory roller is proposed for use in the W.007B scenario. The scenario does not result in the potential exceedance of the cosmetic damage criteria at any identified structures. The human comfort criteria may be exceeded at 35 residential and 35 non-residential properties.

Respite to be provided in accordance with Figure 5.

### 3.3 Track work

No vibration intensive plant and equipment are proposed as part of the W.012B scenario.

## 4 CONCLUSION

### 4.1 Mitigation and Management Measures

As this Assessment is an addendum to the endorsed CNVIS for Kemp Street Works, the same mitigation and management measures apply as noted in Section 8 of the CNVIS.

### 4.2 Additional mitigation measures

As noted in Figure 4 and Figure 5 below and under Appendix A, Appendix B and Appendix C, the SLR Predict noise results include a section on all applicable additional mitigation measures. These additional mitigation measures will be implemented where appropriate.

## SLR Predict (W.002B)

## **W.002B Reduced compounds with proposed equipment list (proposed scenario)**

## Construction Noise and Vibration Impact Statement (CNVIS)

This report presents the outcomes of detailed noise/vibration modelling relating to specific construction activities proposed on site in accordance with the methodology outlined in the *Construction Noise and Vibration Management Plan* (CNVMP) and overarching *Construction Noise and Vibration Impact Statement* (CNVIS).

Prior to detailed noise/vibration modelling being undertaken, work activities are reviewed and considered in relation to industry best practice, consistent with the requirements of the CNVMP. Consideration is first given to eliminating the noise/vibration emissions so far as reasonably practicable. Where elimination is not practicable, efforts are been made to reduce the risk as far as practical by implementing noise and vibration management measures as outlined in the overarching CNVIS and CNVMP.

Examples of these measures include selecting the quietest equipment and processes to complete the works, considering staging and periods of respite to minimise prolonged periods of noise and vibration exposure, and maximising distances between construction activities and sensitive receivers.

### Consultation with Affected Receivers

In accordance with CoA E78, the CNVIS must include specific mitigation measures identified through consultation with affected sensitive land user(s) and the mitigation measures must be implemented for the duration of the Work. Details of this consultation are provided in the overarching CNVIS for each enhancement site.

## Recommended Mitigation Measures

This assessment has been conducted with regard to the relevant CNVIS and CNVMP. To manage noise and vibration impacts, project specific mitigation measures may be considered such as reviewing construction staging methodology to identify opportunities to schedule intensive works during less sensitive time periods and by providing a clear process for community engagement and complaints. Likewise, the requirements and actionable items within the overarching CNVIS and CNVMP should be considered and adopted where appropriate. Following the consideration of project specific noise mitigation measures, additional noise mitigation measures to be explored are described in the Inland Rail NSW Construction Noise and Vibration Framework (CNVF) and summarised below.

Airborne Noise - Additional Mitigation Measures Matrix				
Time Period	Exceedance of NML	Perception	Duration	Communication Category/Management Measure
OOHW Daytime Period Sunday 7am - 6pm (including public holidays)	<5	Noticeable	Any	CO1
	5 - 15	Clearly audible	Any	CO1
	16 - 25	Moderately intrusive	Any	CO1, CO2
	>25	Highly intrusive	Any	CO1, CO2
OOHW Evening Period Monday - Sunday 6pm - 10pm (including public holidays)	<5	Noticeable	Any	CO1
	5 - 15	Clearly audible	Any	CO1
	16 - 25	Moderately intrusive	Any	CO1, CO2
	>25	Highly intrusive	Any	CO1, CO2
			>2 consecutive rest periods	CO1, CO2, RO
OOHW Night Period Monday - Sunday 10pm - 7am (including public holidays)	<5	Noticeable	Any	CO1
	5 - 15	Clearly audible	Any	CO1
	16 - 25	Moderately intrusive	Any	CO1, CO2
			>2 consecutive sleep periods	CO1, CO2, RO, AO
	>25	Highly intrusive	Any	CO1, CO2, RO
			>2 consecutive sleep periods	CO1, CO2, RO, AO, AltA

**Note 1:** CO1: Communication to provide information on the OOHW via methods such as letter box drop, email, newsletter, media advertisements and/ or website prior to the works commencing.

**Note 2:** CO2: Communication should be personalised (e.g. door knock, meeting, telephone call). Contact with these residents should commence early to enable feedback to be considered by the proposal.

**Note 3:** RO are not applicable to non-residential receivers. RO may comprise of pre-purchased movie tickets, dinner vouchers or similar. RO can also be provided by limiting high noise generating works and allowing at least a one-hour respite period between blocks of work. Where possible, the timing of this respite should be discussed with the impacted community.

## Construction Noise and Vibration Impact Statement (CNVIS)

This report presents the outcomes of detailed noise/vibration modelling relating to specific construction activities proposed on site in accordance with the methodology outlined in the *Construction Noise and Vibration Management Plan* (CNVMP) and overarching *Construction Noise and Vibration Impact Statement* (CNVIS).

Prior to detailed noise/vibration modelling being undertaken, work activities are reviewed and considered in relation to industry best practice, consistent with the requirements of the CNVMP. Consideration is first given to eliminating the noise/vibration emissions so far as reasonably practicable. Where elimination is not practicable, efforts are made to reduce the risk as far as practical by implementing noise and vibration management measures as outlined in the overarching CNVIS and CNVMP.

Examples of these measures include selecting the quietest equipment and processes to complete the works, considering staging and periods of respite to minimise prolonged periods of noise and vibration exposure, and maximising distances between construction activities and sensitive receivers.

### Consultation with Affected Receivers

In accordance with CoA E78, the CNVIS must include specific mitigation measures identified through consultation with affected sensitive land user(s) and the mitigation measures must be implemented for the duration of the Work. Details of this consultation are provided in the overarching CNVIS for each enhancement site.

## Recommended Mitigation Measures

This assessment has been conducted with regard to the relevant CNVIS and CNVMP. To manage noise and vibration impacts, project specific mitigation measures may be considered such as reviewing construction staging methodology to identify opportunities to schedule intensive works during less sensitive time periods and by providing a clear process for community engagement and complaints. Likewise, the requirements and actionable items within the overarching CNVIS and CNVMP should be considered and adopted where appropriate. Following the consideration of project specific noise mitigation measures, additional noise mitigation measures to be explored are described in the Inland Rail NSW Construction Noise and Vibration Framework (CNVF) and summarised below.

Airborne Noise - Additional Mitigation Measures Matrix				
Time Period	Exceedance of NML	Perception	Duration	Communication Category/Management Measure

**Note 1:** CO1: Communication to provide information on the OOHW via methods such as letter box drop, email, newsletter, media advertisements and/ or website prior to the works commencing.

**Note 2:** CO2: Communication should be personalised (e.g. door knock, meeting, telephone call). Contact with these residents should commence early to enable feedback to be considered by the proposal.

**Note 3:** RO are not applicable to non-residential receivers. RO may comprise of pre-purchased movie tickets, dinner vouchers or similar. RO can also be provided by limiting high noise generating works and allowing at least a one-hour respite period between blocks of work. Where possible, the timing of this respite should be discussed with the impacted community.

## Construction Noise and Vibration Impact Statement (CNVIS)

This report presents the outcomes of detailed noise/vibration modelling relating to specific construction activities proposed on site in accordance with the methodology outlined in the *Construction Noise and Vibration Management Plan* (CNVMP) and overarching *Construction Noise and Vibration Impact Statement* (CNVIS).

Prior to detailed noise/vibration modelling being undertaken, work activities are reviewed and considered in relation to industry best practice, consistent with the requirements of the CNVMP. Consideration is first given to eliminating the noise/vibration emissions so far as reasonably practicable. Where elimination is not practicable, efforts are been made to reduce the risk as far as practical by implementing noise and vibration management measures as outlined in the overarching CNVIS and CNVMP.

Examples of these measures include selecting the quietest equipment and processes to complete the works, considering staging and periods of respite to minimise prolonged periods of noise and vibration exposure, and maximising distances between construction activities and sensitive receivers.

### Consultation with Affected Receivers

In accordance with CoA E78, the CNVIS must include specific mitigation measures identified through consultation with affected sensitive land user(s) and the mitigation measures must be implemented for the duration of the Work. Details of this consultation are provided in the overarching CNVIS for each enhancement site.

## Recommended Mitigation Measures

This assessment has been conducted with regard to the relevant CNVIS and CNVMP. To manage noise and vibration impacts, project specific mitigation measures may be considered such as reviewing construction staging methodology to identify opportunities to schedule intensive works during less sensitive time periods and by providing a clear process for community engagement and complaints. Likewise, the requirements and actionable items within the overarching CNVIS and CNVMP should be considered and adopted where appropriate. Following the consideration of project specific noise mitigation measures, additional noise mitigation measures to be explored are described in the Inland Rail NSW Construction Noise and Vibration Framework (CNVF) and summarised below.

Airborne Noise - Additional Mitigation Measures Matrix

**Note 1:** CO1: Communication to provide information on the OOHW via methods such as letter box drop, email, newsletter, media advertisements and/ or website prior to the works commencing.

**Note 2:** CO2: Communication should be personalised (e.g. door knock, meeting, telephone call). Contact with these residents should commence early to enable feedback to be considered by the proposal.

**Note 3:** RO are not applicable to non-residential receivers. RO may comprise of pre-purchased movie tickets, dinner vouchers or similar. RO can also be provided by limiting high noise generating works and allowing at least a one-hour respite period between blocks of work. Where possible, the timing of this respite should be discussed with the impacted community.

# Construction Noise and Vibration Impact Statement (CNVIS)

This report presents the outcomes of detailed noise/vibration modelling relating to specific construction activities proposed on site in accordance with the methodology outlined in the *Construction Noise and Vibration Management Plan* (CNVMP) and overarching *Construction Noise and Vibration Impact Statement* (CNVIS).

Prior to detailed noise/vibration modelling being undertaken, work activities are reviewed and considered in relation to industry best practice, consistent with the requirements of the CNVMP. Consideration is first given to eliminating the noise/vibration emissions so far as reasonably practicable. Where elimination is not practicable, efforts are been made to reduce the risk as far as practical by implementing noise and vibration management measures as outlined in the overarching CNVIS and CNVMP.

Examples of these measures include selecting the quietest equipment and processes to complete the works, considering staging and periods of respite to minimise prolonged periods of noise and vibration exposure, and maximising distances between construction activities and sensitive receivers.

## Consultation with Affected Receivers

In accordance with CoA E78, the CNVIS must include specific mitigation measures identified through consultation with affected sensitive land user(s) and the mitigation measures must be implemented for the duration of the Work. Details of this consultation are provided in the overarching CNVIS for each enhancement site.

## SLR Predict (W.012B)

## **W.012B Extended work area with proposed equipment list (proposed scenario)**

# Construction Noise and Vibration Impact Statement (CNVIS)

This report presents the outcomes of detailed noise/vibration modelling relating to specific construction activities proposed on site in accordance with the methodology outlined in the *Construction Noise and Vibration Management Plan* (CNVMP) and overarching *Construction Noise and Vibration Impact Statement* (CNVIS).

Prior to detailed noise/vibration modelling being undertaken, work activities are reviewed and considered in relation to industry best practice, consistent with the requirements of the CNVMP. Consideration is first given to eliminating the noise/vibration emissions so far as reasonably practicable. Where elimination is not practicable, efforts are been made to reduce the risk as far as practical by implementing noise and vibration management measures as outlined in the overarching CNVIS and CNVMP.

Examples of these measures include selecting the quietest equipment and processes to complete the works, considering staging and periods of respite to minimise prolonged periods of noise and vibration exposure, and maximising distances between construction activities and sensitive receivers.

## Consultation with Affected Receivers

In accordance with CoA E78, the CNVIS must include specific mitigation measures identified through consultation with affected sensitive land user(s) and the mitigation measures must be implemented for the duration of the Work. Details of this consultation are provided in the overarching CNVIS for each enhancement site.

Author Name	
Author Email	noiseassessments@martinus.com.au
Author Organisation	Martinus Rail
Project Name	A2I - Albury to Illabo
Assessment Name	W.012b Extended Work Area Proposed Equipment SLR Tool
Stage	A2I Construction
Permit Number	17.001
Start Date	2025-09-12
End Date	2025-09-15
Assessment Period	Night - out of hours

### Equipment Details

Plant/Equipment	Equipment Sound Power Level (Unadjusted), dBA	Number of Units	Temporary Noise Barrier
<b>1: Track work</b> (Height: Ground)	Total: 118		
Excavator - Tracked (20T) 50% operation	105	2	No
Grinder 30% operation	105	1	No
Hand tools (electric) 75% operation	102	2	No
Hydraulic / Pneumatic Tools 75% operation	116	1	No
Light Vehicle (steady state) 25% operation	87	2	No
Lighting Tower 100% operation	80	4	No
Compactor (plate) 100% operation	104	1	No
Saw - rail 25% operation	118	1	No

**Note 1:** Equipment classed as 'annoying' in the *Interim Construction Noise Guideline (DECC, 2009)* include a 5 dB correction.

**Note 2:** Equipment sound power levels consider the mitigation measures outlined in the overarching CNVIS to provide mitigated results.

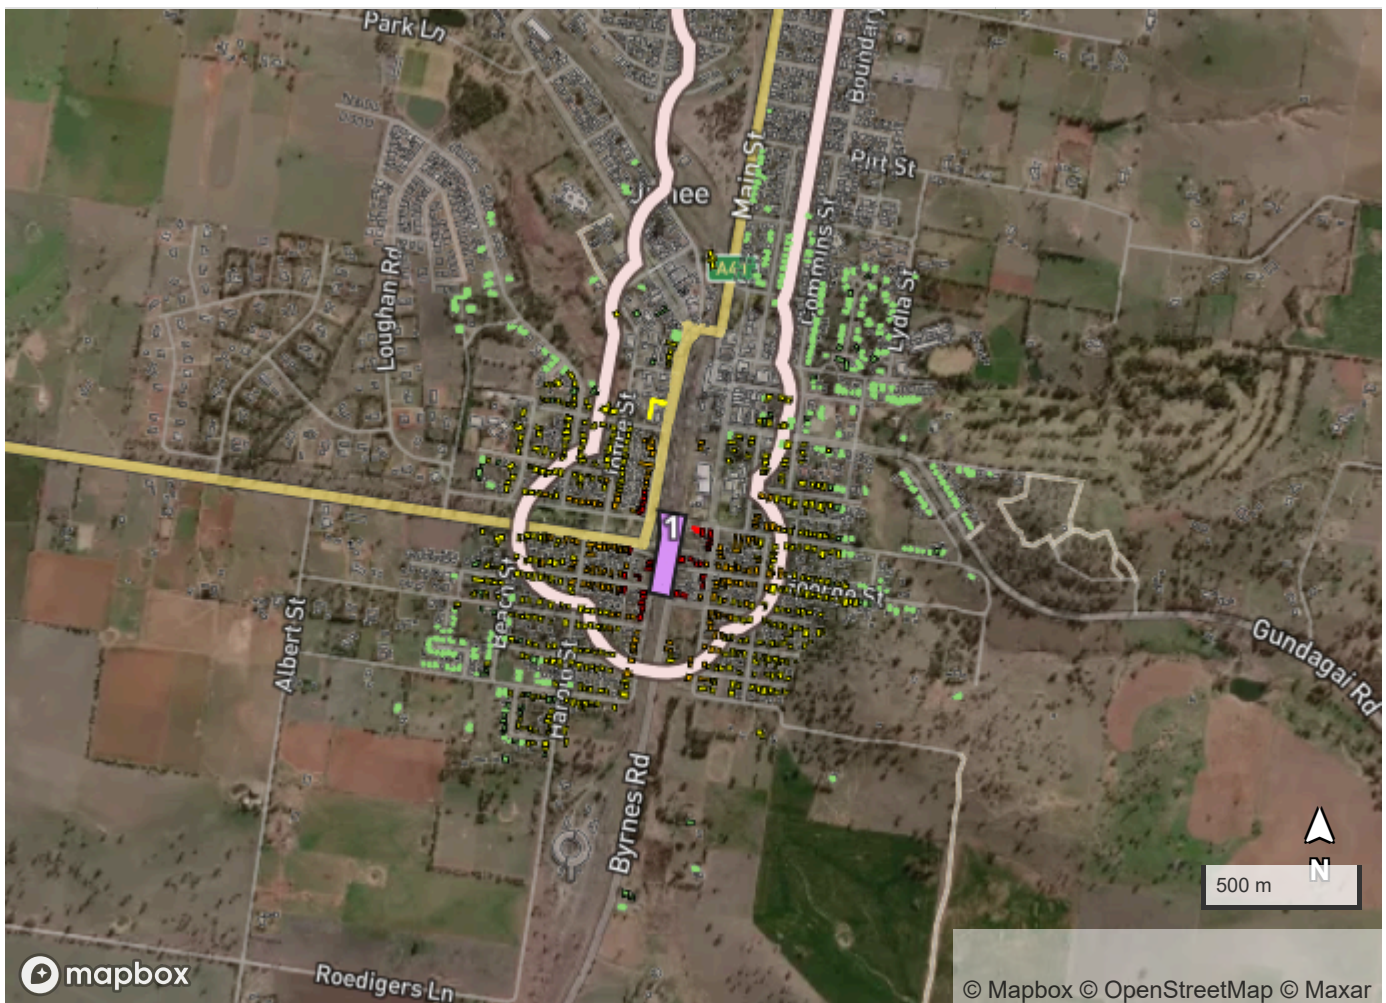

### Equipment Details

Plant/Equipment	Equipment Sound Power Level (Unadjusted), dBA	Number of Units	Temporary Noise Barrier
Truck - medium rigid (20T) 25% operation	103	2	No
Water Cart 75% operation	107	1	No
Crane Franna (20 tonne) 100% operation	98	1	No
Positrack 100% operation	104	1	No
Generator - attenuated 100% operation	92	2	No

**Note 1:** Equipment classed as 'annoying' in the *Interim Construction Noise Guideline (DECC, 2009)* include a 5 dB correction.

**Note 2:** Equipment sound power levels consider the mitigation measures outlined in the overarching CNVIS to provide mitigated results.

## Recommended Mitigation Measures

This assessment has been conducted with regard to the relevant CNVIS and CNVMP. To manage noise and vibration impacts, project specific mitigation measures may be considered such as reviewing construction staging methodology to identify opportunities to schedule intensive works during less sensitive time periods and by providing a clear process for community engagement and complaints. Likewise, the requirements and actionable items within the overarching CNVIS and CNVMP should be considered and adopted where appropriate. Following the consideration of project specific noise mitigation measures, additional noise mitigation measures to be explored are described in the Inland Rail NSW Construction Noise and Vibration Framework (CNVF) and summarised below.

Airborne Noise - Additional Mitigation Measures Matrix				
Time Period	Exceedance of NML	Perception	Duration	Communication Category/Management Measure
OOHW Daytime Period Sunday 7am - 6pm (including public holidays)	<5	Noticeable	Any	CO1
	5 - 15	Clearly audible	Any	CO1
	16 - 25	Moderately intrusive	Any	CO1, CO2
	>25	Highly intrusive	Any	CO1, CO2
OOHW Evening Period Monday - Sunday 6pm - 10pm (including public holidays)	<5	Noticeable	Any	CO1
	5 - 15	Clearly audible	Any	CO1
	16 - 25	Moderately intrusive	Any	CO1, CO2
	>25	Highly intrusive	Any	CO1, CO2
			>2 consecutive rest periods	CO1, CO2, RO
OOHW Night Period Monday - Sunday 10pm - 7am (including public holidays)	<5	Noticeable	Any	CO1
	5 - 15	Clearly audible	Any	CO1
	16 - 25	Moderately intrusive	Any	CO1, CO2
			>2 consecutive sleep periods	CO1, CO2, RO, AO
	>25	Highly intrusive	Any	CO1, CO2, RO
			>2 consecutive sleep periods	CO1, CO2, RO, AO, AltA

**Note 1:** CO1: Communication to provide information on the OOHW via methods such as letter box drop, email, newsletter, media advertisements and/ or website prior to the works commencing.

**Note 2:** CO2: Communication should be personalised (e.g. door knock, meeting, telephone call). Contact with these residents should commence early to enable feedback to be considered by the proposal.

**Note 3:** RO are not applicable to non-residential receivers. RO may comprise of pre-purchased movie tickets, dinner vouchers or similar. RO can also be provided by limiting high noise generating works and allowing at least a one-hour respite period between blocks of work. Where possible, the timing of this respite should be discussed with the impacted community.

Vibration - Additional Mitigation Measures Matrix			
Time Period	Duration	Exceedance of 'preferred' value	Exceedance of 'maximum' value
OOHW Daytime Period Sunday 8am-6pm	Any	CO1, CO2	CO1, CO2, RO
OOHW Evening Period Mon-Sun 6pm-10pm	Any	CO1, CO2	CO1, CO2, RO
OOHW Night Period Mon-Sat 10pm-7am Sun 10pm-8am	Any	CO1, CO2, RO	CO1, CO2, RO, AltA

Additional Mitigation Measures	
Measure	Abbreviation
Communication (Category 1)	CO1
Communication (Category 2)	CO2
