Glossary

Specific terms and acronyms used throughout this consistency assessment are listed and described in the table below.

TERM	DEFINITION
Action Management Plan	*EPBC Act:* In relation to an action, means a plan for managing the impacts of the action on a matter protected by a provision of Part 3, such as a plan for conserving habitat of a species.
AHD	Australian Height Datum
AHIMS	Aboriginal Heritage Information Management System
A2I	Albury to Illabo section of the Inland Rail Program
ARTC	Australian Rail Track Corporation
ASP1	Accredited Service Provider Level 1
ASS	Acid Sulfate Soils
BARM	Biodiversity Assessment Report Memo
CBD	Central Business District
CEMF	Construction Environmental Management Framework
CEMP	Construction Environmental Management Plan
CBMP	Construction Biodiversity Management Plan
CHMP	Construction Cultural Heritage Management Plan
CNVIS	Construction Noise and Vibration Impact Statement
CNVMP	Construction Noise and Vibration Management Plan
CSWMP	Construction Soil and Water Management Plan
CTTAMP	Construction Traffic, Transport, and Access Management Plan
CWCHMMP	Construction Waste, Contamination and Hazardous Materials Management Plan
Change	Macquarie Dictionary: A variation, adjustment, alteration, deviation or transformation to the Project scope, construction methodology or design.
CoA	Condition(s) of Approval
Construction	Includes work required to construct the CSSI as defined in the Project Description described in the documents listed in Condition A1 including commissioning trials of equipment and temporary use of any part of the CSSI but excluding Low Impact Work which is carried out or completed prior to approval of the CEMP.
Consistent	Macquarie Dictionary: Agreeing or accordant; compatible; not self-opposed or self-contradictory; constantly adhering to the same principles, course, etc.
Consistent with	Means that carrying out the Project (as approved) will comply with the terms of the approval despite the Proposed Change. (See Barrick Australia Ltd v. Williams [2009] NSWCA 275)
Compatible	Macquarie Dictionary: Capable of existing in harmony. Capable of orderly, efficient integration with other elements in a system.
DoE	Department of Education
Division 5.2 Approval	An approval under Division 5.2 of the NSW *Environmental Planning and Assessment Act 1979* for State Significant Infrastructure / Critical State Significant Infrastructure.

EAD	Environmental Assessment Documentation
EIS	Environmental Impact Statement
IRPL	Inland Rail Pty Ltd (subsidiary of ARTC)
LEP	Local Environment Plan
MEOP	Miscellaneous Ecosystem - ornamental plantings
MEHD	Miscellaneous Ecosystem - highly disturbed areas with no or limited native vegetation
MR	Martinus Rail, the principal contractor appointed by IRPL to construct the A2I section of the Inland Rail program.
Modification of an Approval	Section 5.25 *Environmental Planning and Assessment Act 1979*: Means changing the terms of the Division 5.2 approval, including revoking or varying a condition of the approval or imposing an additional condition on the approval.
PIR	Preferred Infrastructure Report
PM10	Particles with a diameter of 10 micrometres or less
PM2.5	Particles with a diameter of 2.5 micrometres or less
PMST	Protected Matters Search Tool
Proposed Change	Construction work for the Albury to Illabo (A2I) section of the Inland Rail—program requires the relocation or adjustment of utilities due to conflicts with the location of infrastructure.
SHR	State Heritage Register
SWPS	South Wagga Public School
WWHA	Wagga Wagga Heritage Assessment

1 Introduction

1.1 Background

1.1.1 Division 5.2 approval

ARTC prepared an Environmental Impact Statement (EIS) for the Inland Rail – Albury to Illabo Project which was placed on public exhibition from 17 August 2022 to 28 September 2022. The EIS identified a range of environmental, social and planning issues associated with the construction and operation of the Albury to Illabo (A2I) Project and proposed measures to mitigate and manage those potential impacts.

In accordance with section 5.17(6)(b) of the EP&A Act, on 13 April 2023 the Planning Secretary directed ARTC to submit a Preferred Infrastructure Report (PIR) that provides further assessment of traffic and transport, noise and vibration, and air quality impacts. The PIR was also prepared to consider changes to the exhibited Project that have arisen as a consequence of these further assessments and related submissions.

The Inland Rail – Albury to Illabo Project was assessed as part of the following documents:

- Inland Rail – Albury to Illabo Environmental Impact Statement (ARTC, August 2022);
- Albury to Illabo Response to Submissions (ARTC, November 2023);
- Albury to Illabo Preferred Infrastructure Report (ARTC, November 2023);
- Albury to Illabo Preferred Infrastructure Report Response to Submissions (ARTC, February 2024);
- Inland Rail – Albury to Illabo (SSI-10055) Response to request for additional information – Air Quality Assessment (letter dated 1 May 2024);
- Part 1 - Revised Technical Paper 8: Biodiversity Development Assessment Report (WSP, February 2024);
- Part 2 - Revised Technical Paper 8: Biodiversity Development Assessment Report (WSP, February 2024).

The Minister for Planning and Public Spaces approved the Albury to Illabo Project under section 5.19 of the *Environmental Planning and Assessment Act 1979* (EP&A Act) on 8 October 2024. The approval incorporated the Minister's Conditions of Approval.

For the purposes of this consistency assessment, the approval issued by the NSW Minister for Planning and Public Spaces for the A2I Project is referred to as the Division 5.2 approval.

1.1.2 EPBC Act referral

The A2I Project was referred to the Australian Government Minister for the Environment under the Commonwealth *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) due to potential for impacts on protected matters on 2 June 2020 (EPBC Referral No 202/8670). On 29 June 2020, the former Australian Government Department of Agriculture, Water and Environment (DAWE) notified that the proposal is not a controlled action, and hence approval under the EPBC Act is not required.

1.1.3 Project changes

The Project has not been subject to a modification under section 5.25 of the EP&A Act.
The following consistency assessments have been prepared to support the undertaking of the Project:

- EIS Consistency Assessment Report (Minor) Wagga Wagga Utilities (MR, January 2025)
- EIS Consistency Assessment Report (Minor) Kildare Catholic College (MR, April 2025)
- EIS Consistency Assessment Report (Minor) Junee to Illabo Clearances (MR, April 2025)

- EIS Consistency Assessment Report (Minor) Cassidy Parade and Pearson Cassidy (MR, May 2025)
- EIS Consistency Assessment Review (Small Scale) Traffic Diversion and Mitigation Investigations (MR, May 2025)
- EIS Consistency Assessment Report (Minor) Edmondson Street Bridge (Stage B) (July 2025)

1.2 Purpose of consistency assessment

This consistency assessment has been prepared in accordance with the Inland Rail Pty Ltd (IRPL) specification for NSW Consistency Assessments (0-0000-902-EEC-00-SP-0001_1). The purpose of this consistency assessment is to:

- Describe the Proposed Change relative to the Division 5.2 approval.
- Assess the environmental impacts associated with the Proposed Change relative to the Division 5.2 approval.
- Determine if the Proposed Change is consistent with the Division 5.2 approval or whether further approval is required either for a modification application or a new Project.

2 Proposed Change

2.1 Description of Proposed Change

The EAD identified the indicative proposal sites to enable construction of the reference design for the Albury to Illabo (A2I) section of the Inland Rail program. Further detailed design, construction planning, and site surveys have identified refinements to the construction methodology and resulted in the requirement to adjust the construction boundary as defined in the Division 5.2 approval and described in the EAD.

The Proposed Change relates to the construction footprint at the following enhancement sites:

- Pearson Street Bridge
- Cassidy Parade Pedestrian Bridge
- Wagga Wagga Yard and Pedestrian Bridge

This Consistency Assessment report (CA) considers the Proposed Change, which involves extending the area proposed to be physically affected by the Project, outside of the approved construction boundary. This includes adjustments to the Construction Boundary to allow for localised stockpiling of material, storage of plant, and to accommodate additional footprint required for detailed design.

For the purpose of this consistency assessment, the construction boundary, as proposed to be expanded, is referred to as the construction impact zone extension (CIZ extension). The proposed CIZ extension areas fall within the rail existing corridor and adjoining areas including roads and park space. The proposed CIZ extension areas are noted in Table 2-1and shown in Figure 2-1,Figure 2-2and Figure 2-3 below.

2.1.1 Pearson Street Bridge

Detailed design of the Pearson Street bridge requires additional space for:

- Service relocation to facilitate main scope of works
- Stockpile area
- Safe access

Changes to the construction boundary are described in Table 2-1. The additional area required to complete these works are shown in Figure 2-1.

2.1.2 Cassidy Parade Pedestrian Bridge

Detailed design of the Cassidy Parade pedestrian bridge requires additional space for:

- Pedestrian bridge piling and FRP works (space for piling rig, concrete boom pumps etc).
- Assembly of steel structures
- Construction of the temporary, scaffold pedestrian bridge including cranage
- Establishment and use of an ancillary facility

Changes to the construction boundary are described in Table 2-1. The additional area required to complete these works are shown in Figure 2-2.

2.1.3 Wagga Wagga Station Yard and Mothers Pedestrian Bridge

Detailed design of the Wagga Wagga Station Yard and Mothers Pedestrian bridge requires additional space for:

- Pedestrian bridge piling and FRP works (space for piling rig, concrete boom pumps etc).
- Wagga Wagga Station car park improvements

- Proposed ancillary facility

Changes to the construction boundary are described in Table 2-1. The additional area required to complete these works are shown in Figure 2-3.

Table 2-1 - Proposed Construction Boundary Changes

SITE	ADDITIONAL CIZ AREA REFERENCE	ACTIVITIES	INDICATIVE AREA (HA)
Pearson Street bridge	W2-001	Stockpile area for spoil generated during possession	0.60
	W2-002	Enable safe access	<0.01
	W2-003	Enable safe access	0.65
	W2-004	Emergency access and adequate space for stockpiling.	0.70
			1.96
Cassidy Parade pedestrian bridge	W4-001	Proposed site compound to allow adequate space for light vehicle and plant toilets, offices, and laydown area	0.48
	W4-002	Enable safe access	<0.01
	W4-003	Enable construction and use of temporary pedestrian bridge	0.28
			0.29
Wagga Wagga Yard and Mothers Pedestrian Bridge	W7.001	Proposed site compound to allow adequate space for light vehicle and plant parking, toilets, offices, stockpile and laydown areas.	0.50
	W7.002	Enable safe access	0.04
	W7.003	Enable safe access	<0.01
	W7.004	Enable construction of new pedestrian bridge.	0.02
	W7.005	Enable carpark improvements and construction of new pedestrian bridge.	0.15
			0.72

2.1.4 Methodology

Pearson Street Bridge

The works at Pearson Street Bridge would involve the following activities in the CIZ extension area are:

1. Site establishment activities:
   - Site mobilisation and installation of site compound facilities (i.e., site/lunch sheds, portable toilets) at Urana Street
   - Laydown and parking areas to be sheeted in road base or similar.
2. Piling:
   - Bulk Earthworks & Pavement Construction at Site Entry.
   - Installation of temporary piling platforms.

- Construction of temporary concrete drilling templates on both sides of the alignment.

Cassidy Parade Pedestrian Bridge

The works at Cassidy Parade Pedestrian Bridge would involve the following activities in the CIZ extension area are:

1. Site establishment:
   - Establishment of site access, laydowns and cranage pads,
   - Construction of temporary pedestrian diversion scaffold including cranage
2. Bridge piling:
   - Installation of temporary drilling pads for pile drilling rig
   - Construction of piles, bridge pile caps and piers
3. Main span:
   - Installation of temporary crane pads
   - Construction of structural span over the rail during rail possession
4. Spans and ramps:
   - Final steel girder spans installed and fastened to structures
   - Retaining wall ramped structure installed
   - Concrete footpath poured
   - Handrail and lights fitted to bridge
5. Demobilisation:
   - At the completion of works that require the pedestrian diversion, the temporary, scaffold pedestrian bridge will be demobilised.

Wagga Wagga Yard and Mothers Pedestrian Bridge

The works at Wagga Wagga Yard and Mothers Pedestrian Bridge would involve the following activities in the CIZ extension area are:

1. Site establishment activities:
   - Establishing access to the rail corridor and access to Mothers Bridge
   - Minor trimming and clearing of vegetation to accommodate for site compound facilities (i.e., laydown area, parking for construction vehicles) at Railway Street
2. Bridge piling:
   - Installation of temporary drilling pads for pile drilling rig
   - Construction of piles, bridge pile caps and piers
3. Main span:
   - Installation of temporary crane pads
   - Construction of structural span over the rail during rail possession
4. Spans and ramps:
   - Final steel girder spans installed and fastened to structures
   - Retaining wall ramped structure installed

- Concrete footpath poured
- Handrail and lights fitted to bridge

Plant and equipment

Plant and equipment required for these works includes:

- Hand tools (power tools such as drop saws, drills)
- Franna
- Mobile Crane
- Light vehicles
- EWP
- Portable generator
- Chainsaws
- Mulcher
- Water cart
- Tipper trucks
- Concrete truck
- Rigid truck
- Dump trucks
- Vacuum trucks
- Excavators
- Excavator with hammer attachment
- Road saw
- Rail saw
- Positrack
- Plate compactor
- Smooth drum roller
- Horizontal directional drill
- Auger bore
- Surveying equipment
- Pipe cutting and welding equipment
- Truck and dog
- Compressor
- Semi-trailer

2.2 Need

The EAD identified the ‘Proposal site area’ consisting of each of the enhancement sites to enable construction of the reference design, which forms the construction boundary, as defined in the Division 5.2 approval and referred to as the ‘approved CIZ’ for the purpose of this CA. Further detailed design and site surveys resulted in the requirement to adjust the approved CIZ to better allow for site access from the public road network, safe manoeuvring, and sufficient space for construction of ancillary facilities.

The Proposed Change is required for constructability of the Project and safe public and construction personnel access, which is not adequately considered as part of the reference design in the EIS.

2.3 Location and setting

The Proposed Change is located in Wagga Wagga and relates to the Pearson Street bridge, Cassidy Parade pedestrian bridge, Wagga Wagga Yard and Mothers Pedestrian Bridge enhancement sites on the Main Southern Railway Line.

Aspect specific location and setting information as it relates to the Proposed Change is contained in the subsections below and shown in Figures 2-1 to 2-3

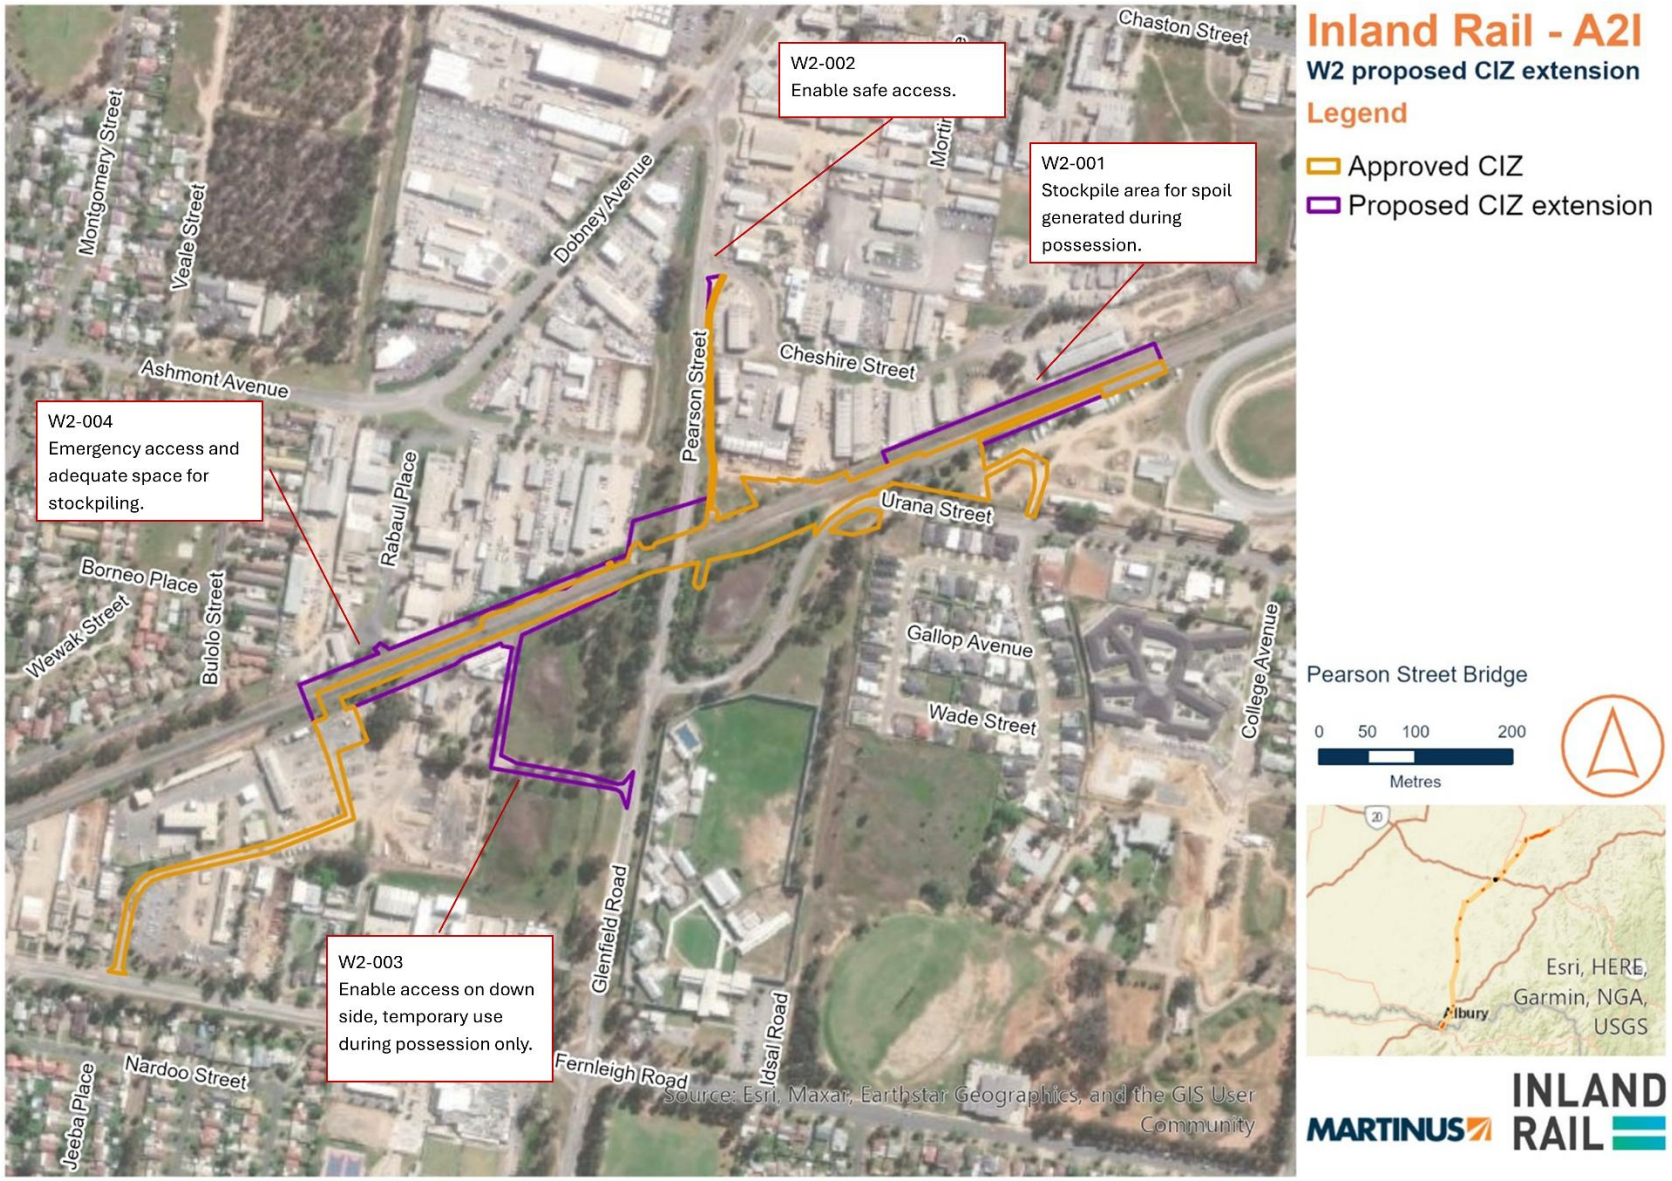

Figure 2-1: Indicative Proposed CIZ Extension - Pearson Street Bridge

6-0052-210-EAP-W0-AS-0001_0

UNCONTROLLED WHEN PRINTED | CONFIDENTIAL

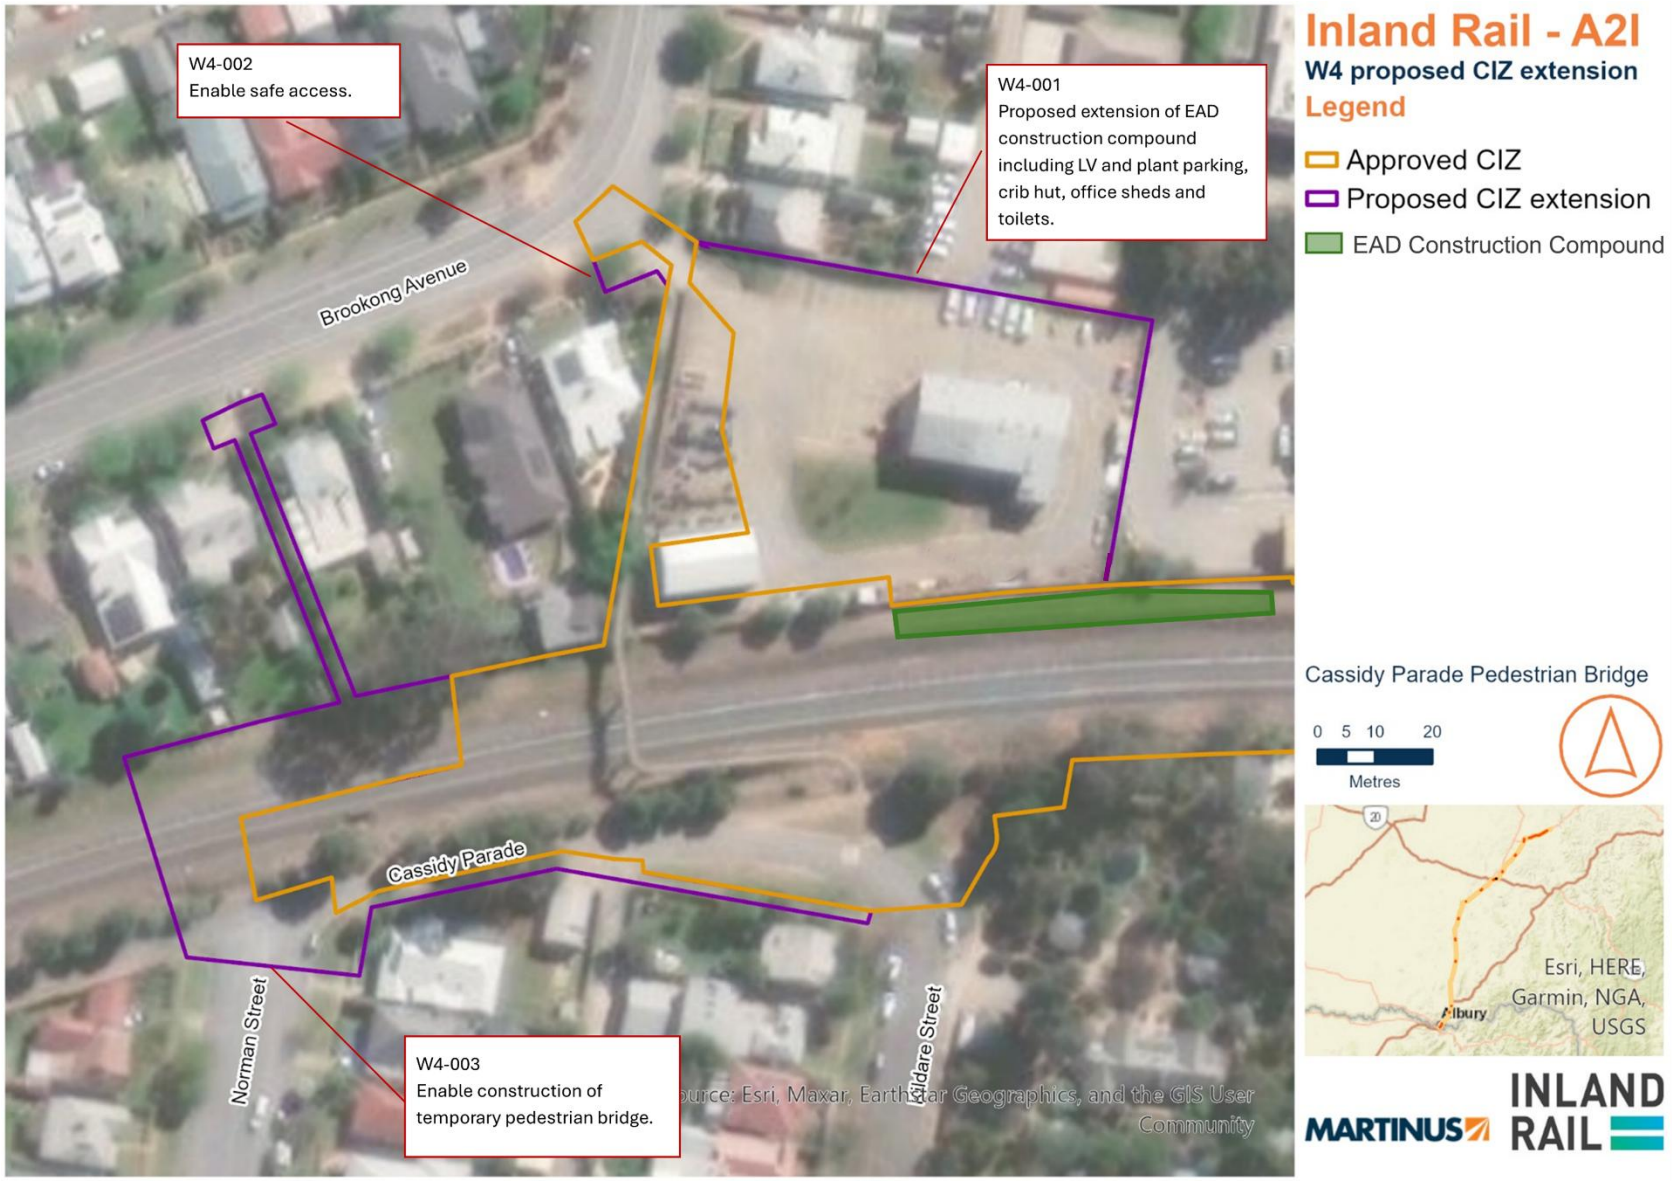

Figure 2-2: Indicative Proposed CIZ Extension - Cassidy Parade Pedestrian Bridge

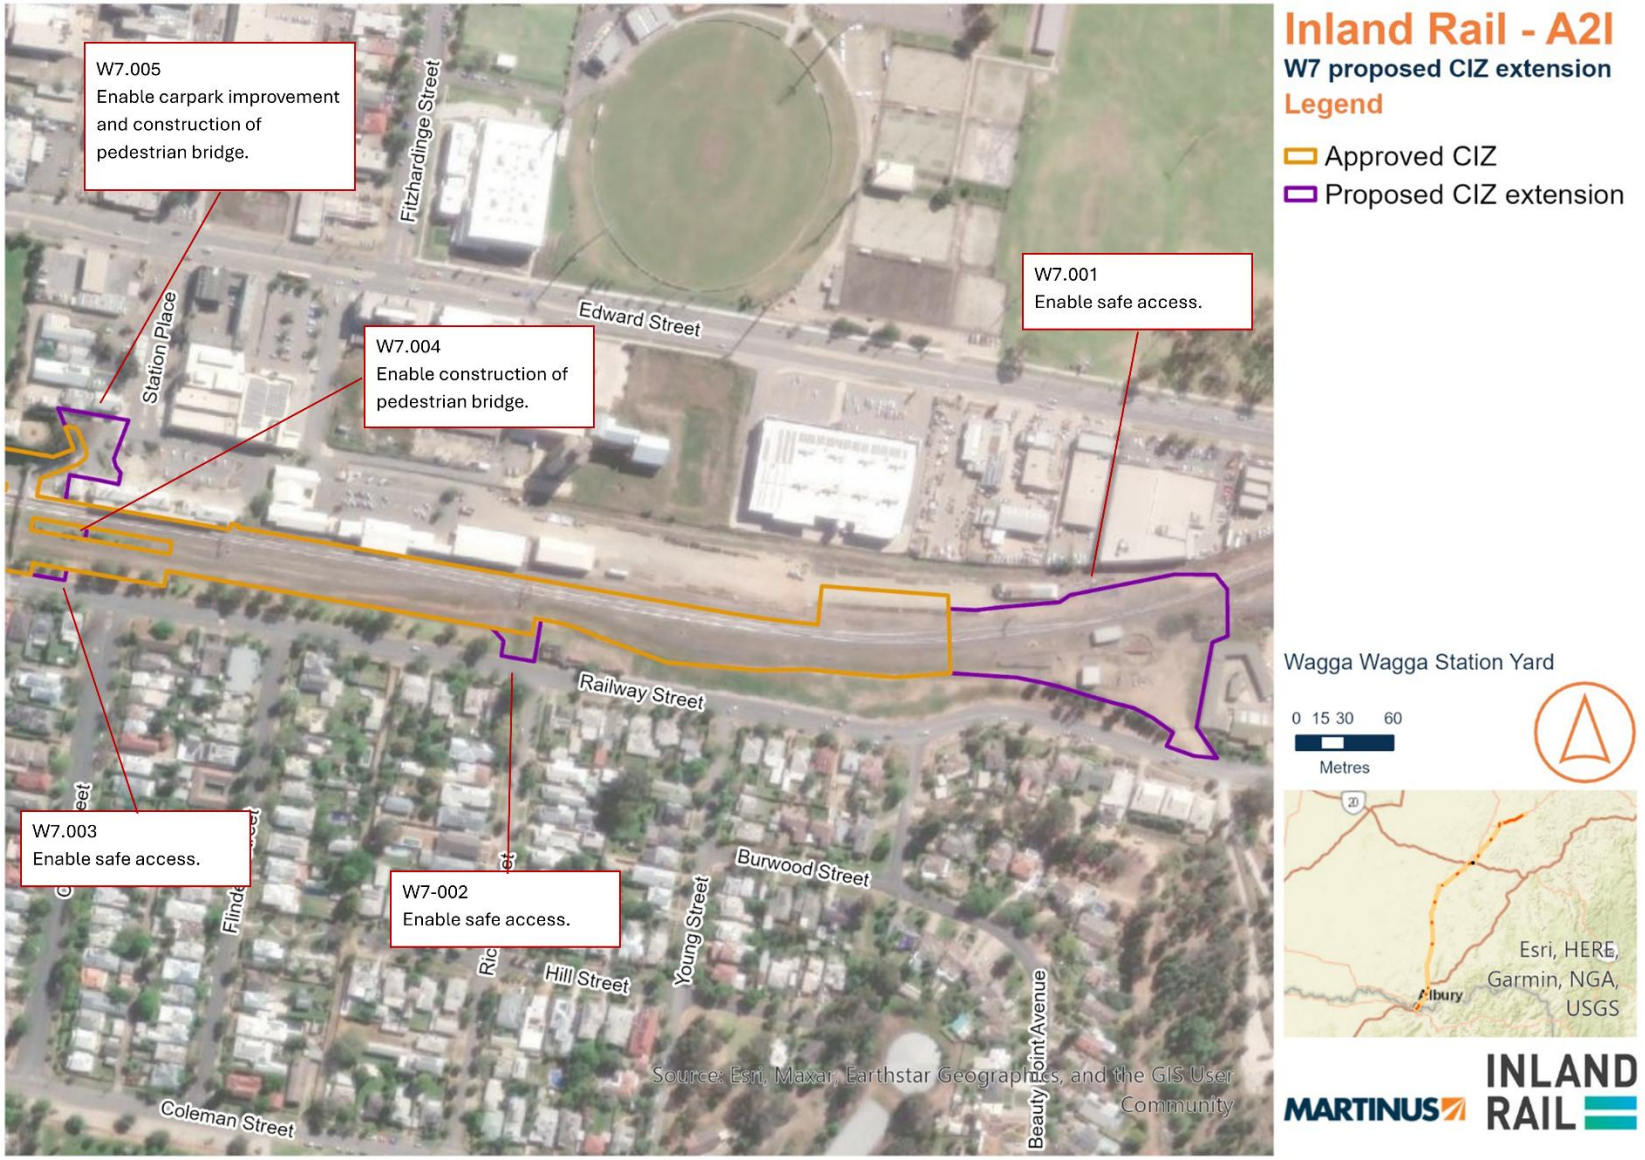

Figure 2-3: Indicative Proposed CIZ Extension - Wagga Wagga Yard

6-0052-210-EAP-W0-AS-0001_0

UNCONTROLLED WHEN PRINTED | CONFIDENTIAL

2.4 Construction hours

The works associated with the Proposed Change will be timetabled to be carried out during the approved standard construction hours as per the Project's Environment Protection Licence #21984 (EPL) and CoA E69, where possible. The standard construction hours are as follow:

- 7:00am to 6:00pm Monday to Friday, inclusive;
- 7:00am to 6:00pm Saturday and
- At no time on Sundays or public holidays.

The Proposed Change activities may occur outside of standard construction hours and the hours approved as part of CoA E69 and EPL L4.1 condition. Any out-of-hours works (OOHW) within the extended CIZ would be implemented in accordance with CoA E71 and EPL L4.3, L4.4, L4.5 and L4.6.

3 Consultation

Inland Rail does not always carry out consultation for consistency assessments. However, in some cases consultation may be carried out to:

- Help identify the nature and scale of the impacts.
- Involve the community in the options considerations for the Proposed Change.
- Manage community expectations for the Project.
- Provide the best design outcome that minimises environmental impacts.

Consultation with each of the affected landowners where works are proposed outside the construction boundary would be undertaken prior to commencement of works.

Where a proposed CIZ extension is subject to the preparation of a land licence/agreement, works will only occur following the approval of that land licence/agreement. Any land licence/agreements required as part of this CA and will be provided to IRPL prior to commencement of works.

Where vegetation removal is proposed on land not owned by Inland Rail, consultation will be carried out with the property owner including confirming any revegetation/rehabilitation requirements. This will be undertaken in accordance with the Community Communication Strategy (IRPL, 2024), prior to the removal of vegetation.

The community would be notified in accordance with Section 7.1 of the Community Communication Strategy (IRPL, 2024), including where works may be required outside of the approved construction hours for A2I, prior to commencement of works. Any complaints, feedback or enquiries would be handed in accordance with Section 8 of the Community Communication Strategy.

4 Environmental assessment

4.1 Environmental risk review

An environmental risk review of the proposed activities has been undertaken and is provided below in Table 4-1. Assessments of potential impacts are provided in greater detail for:

- Traffic and transport (Section 4.2)
- Noise and vibration (Section 4.3)
- Non-Aboriginal heritage (Section 4.4)
- Aboriginal heritage (Section 4.5)
- Biodiversity (Section 4.6)
- Flood risk (Section 4.7)
- Soils and contamination (Section 4.8)
- Air quality (Section 4.9), and
- Landscape and visual (Section 4.10)

Table 4-1: Consistency assessment review

ISSUE	Y/N	NOTES
Are works required outside the IR property acquisition boundary, or land not previously impact on by Project works?	Y	No land acquisition required, only access licence agreements/ temporary occupation licence for the following: - Access points on road reserve – all through council via s138 process to complete works not acquire property. - Access licence agreement for the Glenfield Animal Shelter access road. - Access licence agreement for the Telstra compound at Cassidy Parade - Land Access Agreement with Wagga Wagga City Council via s138 process for temporary pedestrian bridge at Cassidy Parade For works occurring outside of the IRPL acquisition boundary, land licence/agreements will be prepared where required. These will be managed by the MR Communications Team (as discussed in Section 3 above).
Will the works result in any changes to form or functionality of the approved Project?	N	The proposed additional CIZ would not impact on the form of functionality of the approved Project.
Are there any potential impacts on traffic and transport associated with the works?	Y	The Proposed Change would result in minor and short-term traffic and transport impacts in that they would require temporary closure of small sections of public footpaths and roads, and temporary alternative routes for pedestrians during the construction phase. These impacts are therefore considered in greater detail in Section 4.2.
Are there any potential noise and vibration impacts associated with the works?	Y	The Proposed Change would result in short-term noise and vibration impacts. A CNVIS for these works is provided in Appendix B. These impacts are considered in greater detail in Section 4.3.
Are there any potential impacts on known Aboriginal heritage items or sites located in the vicinity of the works?	Y	There are no known Aboriginal heritage items or sites located within the Proposed Change area. The Wagga Wagga Heritage Memo (WWHA) (Appendix C) has been developed which includes Aboriginal heritage. These impacts are considered in greater detail in Section 4.5.

Are there any potential impacts on non-Aboriginal heritage items or sites located in the vicinity of the works?	Y	The Proposed Change is located in proximity to known non-Aboriginal heritage items and sites. he Wagga Wagga Heritage Memo (WWHA) (Appendix C) has been developed which includes non-Aboriginal heritage. These impacts are considered in greater detail in Section 4.4.
Are the works within 50m of an EEC or threatened species?	N	The Proposed Change is located in an area where several threatened species have been sighted. A Biodiversity Assessment Report Memo (BARM) for these works will be provided in the next revision in Appendix D. These impacts are therefore considered in greater detail in Section 4.6
Do the works require clearing of native vegetation or habitat trees?	N	Trimming and clearing of vegetation is required within the scope of works for the Proposed Change. A Biodiversity Assessment Report Memo (BARM) for these works will be provided in the next revision in Appendix D. The impacts associated with trimming and clearing of vegetation are considered in greater detail in Section 4.6..
Are the works within 40m of a waterway or water body?	N	There are no waterways located within the Proposed Change area. The nearest waterway, being the Murrumbidgee River, is located approximately 1,200m away from the Proposed Change.
Are the works located on flood prone land?	Y	The Proposed Change is located in flood prone land. The impacts associated with a flooding risk, are discussed in greater detail in Section 4.7.
Are the works located on bushfire prone land?	N	The Proposed Change is not located on bushfire prone land.
Do the works involve ground disturbance of more than 2 hectares?	N	The overall sum of all additional CIZ proposed is 2.97Ha with the additional construction impact zone required as part of the Proposed Change at each site is under 2 hectares; Pearson Street Bridge 1.96Ha, Cassidy Parade Pedestrian Bridge 0.29Ha and Wagga Wagga Yard and Mothers Bridge 0.72Ha (Table 2-1). The extent of ground disturbance required for the Proposed Change would be less than the proposed construction impact zone as a majority of the additional CIZ proposed will be used as for access.
Are the works in an area of known salinity hazard risk?	Y	The Proposed Change is located in an area of low salinity hazard. The impacts associated with salinity are discussed in greater detail in Section 4.8.
Are the works in an area of known acid sulfate soil risk?	Y	The Proposed Change is located in an area of a low probability for acid sulfate soils occurrence. The impacts associated with acid sulfate soils are discussed in greater detail in Section 4.8.
Will works require temporary or permanent placement of surplus spoil material?	Y	The Proposed Change would require temporary placement of surplus spoil material, this material will be accommodated within the proposed stockpile/laydown sites and reused/disposed of in accordance with Chapter 23 of the EIS.
Are the works in an area of known contamination risk?	Y	The Proposed Change is located in an area noted as a general contamination risk. The impacts associated with contamination are discussed in greater detail in Section 4.8.
Are there any potential air quality impacts associated with the works?	Y	The Proposed Change would result in potential minor and short-term air quality impacts. These impacts are discussed in greater detail in Section 4.9.
Are there any potential landscape and visual impacts associated with the works?	Y	The Proposed Change would result in landscape and visual impacts. These impacts are discussed in greater detail in Section 4.10.
Will works result in any operational impacts further to those detailed in the approved Project?	N	The Proposed Change would not represent an increase in operational impact to what was assessed in the approved Project. Additional CIZ proposed is for Construction only.

4.2 Traffic and transport

4.2.1 Existing environment

As noted in Section 2.3, the Proposed Changes are located in Wagga Wagga Railway Station on the Main Southern Railway Line and to the west of the station within the Cassidy Parade pedestrian bridge and Pearson Street bridge enhancement sites.

Wagga Wagga Station pedestrian bridge and Wagga Yard

Edward Street/Sturt Highway provides access to the Wagga Wagga Station carpark and is a two-way, four lane state-controlled road that runs east-west through Wagga Wagga. In the vicinity of the Wagga Wagga Station and surrounds the highway is generally urban and features 3.4m wide lanes, sealed shoulders with parking, and has a posted speed limit of 60km/h.

Station Place is a two-way, two lane urban locally controlled street that runs north-south from Edward Street and provides access to the heritage-listed Wagga Wagga Railway Station, the Multicultural Council of Wagga Wagga, and the carpark area that will be utilised for the construction of the pedestrian bridge. The road generally features 3.4m wide lanes, sealed shoulders with parking, and has a posted speed limit of 50km/h.

Railway Street provides access to the proposed ancillary facility and construction areas on the south side of the rail line. Railway Street is a two-way, two lane urban locally controlled street that runs east-west from Macleay Street to Lake Albert Road and provides access to the rail line, industrial and residential areas. In the vicinity of the Wagga Wagga Station and surrounds the road generally features a 12m sealed width, sealed shoulders with parking, and a posted speed limit of 50km/h.

There is existing pedestrian and public transport infrastructure located adjacent and within the Wagga Wagga Station pedestrian bridge and Yard enhancement sites, with footpaths present on most roads.

Cassidy Parade

Cassidy Parade runs adjacent to the south side of the rai line providing access to the rail line, Kildare Catholic College via Kildare Street, and residential areas. Cassidy Parade is estimated to carry a relatively low daily traffic volume of 664 with 3% being heavy vehicles (HV). Norman Street runs north-south connecting Coleman Street to Cassidy Parade, with an estimated daily traffic volume of 332, and 3% HVs. On the north side of the rail line, the enhancement site is accessible from Brookong Avenue, which is estimated to have a daily traffic volume of 1,215, with 8% being HVs (EIS, Chapter 9 and Technical Paper 1).

There is existing pedestrian and public transport infrastructure located within and around Cassidy Parade pedestrian bridge enhancement site, with footpaths present on most roads and the pedestrian bridge providing a north-south crossing over the rail corridor.

Pearson Street

At Pearson Street, Urana Street provides access to the rail line from the south, Showgrounds, and residential areas. Urana Street is estimated to carry a daily traffic volume of 4,758, with 2% being HVs. On the North side, Pearson Street bridge enhancement site is accessed off Cheshire Street. Cheshire Street provides access to commercial and industrial areas adjacent to the northern side of the rail line and has a daily traffic volume of 491 with 5% being HVs (EIS, Chapter 9 and Technical Paper 1).

There is existing pedestrian and public transport infrastructure located within the vicinity of Pearson Street bridge enhancement site.

Active Transport Routes

The EIS Technical Paper 1 assesses the impact of the closure of the Wagga Wagga Station pedestrian bridge (Mothers Bridge) and Cassidy Parade pedestrian bridge during construction.

4.2.2 Impact assessment

The Proposed Change at Wagga Wagga Station pedestrian bridge includes extending the CIZ into the station carpark to allow adequate space to safely construct the new pedestrian bridge.

The Proposed Change at Cassidy Parade includes the construction of a temporary pedestrian bridge to mitigate impacts to pedestrian traffic following the demolition of the bridges that provide crossings over the rail and throughout construction of the new bridges in the Wagga Wagga precinct.

The Proposed Change at Pearson Street includes an additional access on the Down Side off Glenfield Road via the Glenfield Animal Shelter. This access would be used primarily during possession periods. An emergency access is also proposed off Rabaul Place on the Up Side.

The footpath and road closures will be set up as per the Traffic Guidance Schemes (TGS) and will be implemented during the construction hours (as noted in Section 2.4). There are no 24/7 footpath or road closures anticipated for these construction works.

The Proposed CIZ extension does not change the EIS assessment of the temporary closure of Cassidy Parade and Mothers Bridge pedestrian bridges during construction (EIS Technical Paper 1 therefore there is no change to walking or cycling distances or times.

4.2.3 Conclusion

Land Access Agreements will be established for the change in access points on the Down Side of Glenfield Road via the Glenfield Animal Shelter and the compound location at the Telstra compound at Cassidy Parade. Any land licence/agreements required as part of this CA and will be provided to IRPL prior to commencement of works (Section 3.0).

The impacts of the Proposed CIZ extension would be generally in accordance with the impacts considered as part of the EAD and would be managed as per all applicable mitigation measures in the Conditions of Approval (CoAs) and Updated Mitigation Measures (UMMs), with any identified additional mitigation measures outlined in Table 4-11.

4.3 Noise and vibration

4.3.1 Existing environment

Common noise and vibration sources in the subject area are train movements along the operational rail corridor, major road traffic and local traffic. Potentially sensitive receivers are those that may be affected by changes in noise and vibration levels within the work area. Consistent with the adopted standards and guidelines, sensitive receivers in the work areas include residential dwellings, schools and education institutions, places of worship, childcare centres, medical facilities, commercial property and industrial premises. A summary of noise sensitive receivers in each NCA is shown below in Table 4-2.

Table 4-2: Summary of noise sensitive receivers by NCA

NCA	RESIDENTIAL	EDUCATIONAL	MEDICAL	COMMERCIAL	INDUSTRIAL	ACTIVE RECREATION	PASSIVE RECREATION	PLACE OF WORSHIP
NCA10	5,675	45	9	161	205	40	0	6
NCA11	4,950	63	12	584	245	37	16	15

The existing vibration environment in close proximity to the railway line includes vibration from existing freight train movements on the alignment. Additional sources of vibration may be associated with operation of industrial premises, road traffic operations and construction activities typical of the environment. Adjacent heritage structures are considered as vibration sensitive receivers due to the potential for cosmetic damage; however, a heritage structure should not be assumed to be more sensitive to vibration, unless it is structurally unsound.

Noise catchment areas

Noise catchment areas (NCA) were defined in the EIS to classify groups of sensitive receivers that are likely to have a similar existing noise environment and experience similar impacts from construction of the Project. These were determined through reference to aerial imagery and land use maps and verified during background noise monitoring.

The Proposed Change area is surrounded by a combination of residential and commercial receivers. The corresponding NCAs, approximate number of receivers and noise management levels (NMLs) are noted below in Table 4-3 and Table 4-4, and shown in Figure 4-1.

Table 4-3: NCAs and background noise information

ENHANCEMENT SITE	NCA ID	APPROXIMATE NUMBER OF RECEIVERS IN NCA	DESCRIPTION	RBL (dBA)		
				Day	Evening	Night
PEARSON STREET BRIDGE, CASSIDY PARADE PEDESTRIAN BRIDGE	NCA 10	6,141	The urban areas of western Wagga Wagga include industrial land uses located in the vicinity of the proposal site, with residential properties further from the rail corridor and in the west. Noise sources in this area include the Hume Highway, rail corridor and industrial areas of Wagga.	46	45	38
WAGGA WAGGA STATION PEDESTRIAN BRIDGE WAGGA YARD CLEARANCES	NCA 11	5,922	The urban areas of eastern Wagga Wagga have industrial land uses located directly to the north and east of the proposal site; however, numerous residential properties are adjacent to the southern side of the rail corridor. Residential properties extend to the north and south at a greater distance. Noise sources in this area include the Hume Highway, rail corridor and industrial areas of Wagga Wagga and Bomen.	48	47	37

Table 4-4: NCAs and noise management levels

NCA ID	NOISE MANAGEMENT LEVEL (NML)			
	APPROVED HOURS (RBL + 10 DB)	OUT OF HOURS		
		Daytime (RBL + 5 dB)	Evening (RBL + 5 dB)	Night-time (RBL + 5 dB)
NCA 10	56	51	50	43
NCA 11	58	53	52	42

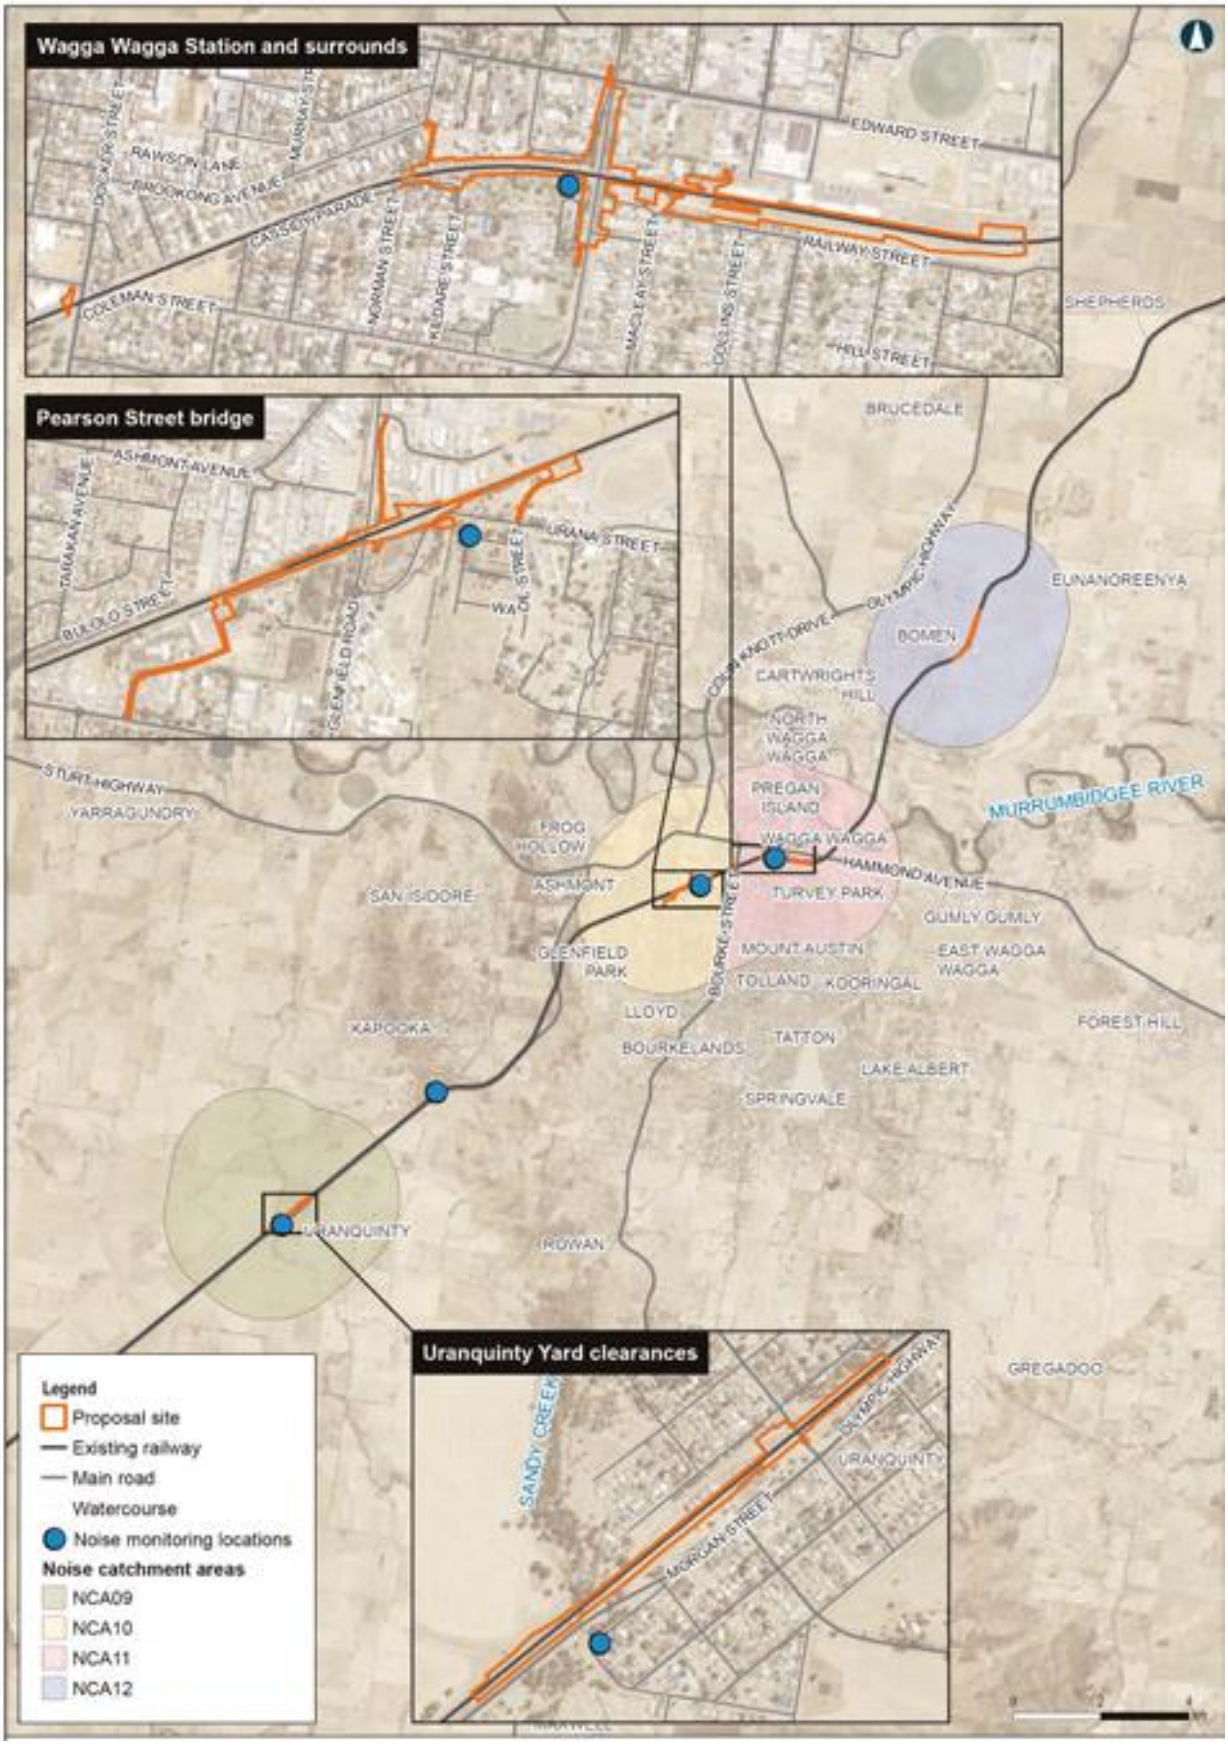

Figure 4-1: EAD mapped NCA 10 AND 11 in relation to the Proposed Change in the Wagga Wagga Precinct

4.3.2 Impact assessment

Construction Noise and Vibration Impact Statements (CNVIS) were undertaken for the Cassidy and Pearson enhancement sites (6-0052-210-EEC-W0-AS-0002_0.1, August 2025) and the Wagga Wagga enhancement site (6-0052-210-EEC-W7-AS-0001_1.1, August 2025).

Construction hours

Construction hours are as discussed in Section 2.4, with the following also noted:

'Highly noise intensive works' as per the Project Approval are defined as:

- use of power saws, such as used for cutting timber, rail lines, masonry, road pavement or steel work;
- grinding metal, concrete or masonry;
- rock drilling;
- line drilling;
- vibratory rolling;
- bitumen milling or profiling;
- jackhammering, rock hammering or rock breaking;
- impact piling; and
- tamping (for rail Projects).

In accordance with CoA E73, where OOHW is required for:

- For carrying out work that if carried out during standard hours would result in a high risk to construction personnel or public safety based on a risk assessment carried out in accordance with AS/NZS ISO 31000:2009: "Risk management; or
- Where the relevant roads authority has advised the Proponent in writing that carrying out the work during standard hours would result in a high risk to road network performance and a road occupancy licence will not be issued; or
- Where the relevant utility service operator has advised the Proponent in writing that carrying out the work during standard hours would result in a high risk to the operation and integrity of the utility network; or
- Work undertaken in a rail possession for operational or safety reasons.

This will be regulated through the Out of Hours Work (OOHW) Protocol except as permitted by the Project's EPL.

Predicted noise levels

The Pearson and Cassidy CNVIS (Appendix B) work scenarios relevant to the proposed CIZ extension at Pearson Street (Figure 2-1) are:

- W.010 access road construction in terms of the widening of the construction footprint along the rail corridor and access points at Glenfield Road and Pearson Street and the associated reduction of distance to receivers.
- W.011 delivery of materials along the access roads from access points proposed at Glenfield Road and Pearson Street
- W.014 earthworks in the form of stockpiling at W2-001 and W2-004 (Figure 2-1).

The Pearson and Cassidy CNVIS (Appendix B) work scenarios relevant to the proposed CIZ extension at Cassidy Pedestrian Bridge (Figure 2-2) are:

- W.001 site establishment / demobilisation including the extension of the EAD compound and the resulting change is distance of the approved activity closer to receivers.

- W.002 compound operation including the extension of the EAD compound and the resulting change is distance of the approved activity closer to receivers.
- W.006 temporary pedestrian bridge work including ground preparation and scaffold erection along the proposed CIZ extension particularly the access route change at Brookong Avenue and the area at Norman Street now closer to residential receivers.

The Wagga Wagga Yard CNVIS (Appendix B) work scenarios relevant to the proposed CIZ extension at Wagga Wagga Clearances and Yard (Figure 2-3) are:

- W.001 as delivery and setup areas to enable EAD activities including the bridge demolition

The predicted noise level impacts are summarised from Appendix B as follows:

- Pearson Street W.010 – Worst-case, moderately intrusive noise impacts are expected during approved daytime and daytime OOHW periods.
- Pearson Street W.011 – Worst-case, moderately intrusive noise impacts are expected during approved daytime and daytime OOHW periods. Highly intrusive noise impacts are predicted at the nearest residential receivers during the night-time OOHW period.
- Pearson Street W0.14 – Worst-case, moderately intrusive noise impacts are expected during approved daytime and daytime OOHW periods. The closest residential receivers to works in scenario W.014 are predicted to be 'Highly noise affected' (HNA). These impacts are predicted when works occur at the closest location to each receiver. When works occur further from these receivers, impacts are expected to be lower.
- Cassidy Pedestrian Bridge W.001 – Highly intrusive noise impacts are predicted at the closest other sensitive receiver during approved daytime periods.
- Cassidy Pedestrian Bridge W.002 – Compound operations outlined in W.002 are generally expected to be limited to approved daytime hours.
- Cassidy Pedestrian Bridge W.006 – Clearly audible impacts are predicted
- Wagga Wagga Clearances and Yard W.001 – Moderately intrusive noise impacts are predicted at the nearest residential receivers to the site compound for *W.001* during approved daytime and daytime OOH periods. Noting this is worst-case as the Proposed CIZ extension is only to enable access to Mother Bridge and not compound operation. Therefore, impacts below moderately intrusive can be assumed for closest receivers.

Predicted ground-borne noise levels

Ground-borne construction noise impacts from the Project at Pearson Street, Cassidy Pedestrian Bridge and Wagga Wagga Yard proposed CIZ extension works are not anticipated as vibration intensive work with the potential to generate perceptible ground-borne noise, is not included in the scope of work. Vibration intensive work for the Project will be completed outdoors meaning airborne noise levels at the nearest receivers are expected to be higher than the corresponding internal ground-borne noise levels (Appendix B). Predicted vibration impacts

The CNVISs (6-0052-210-EEC-W0-AS-0002 and 6-0052-210-EEC-W7-AS-0001) are currently being updated to include the Proposed additional CIZs. Predicted vibration levels will be included in the next revision.

Predicted vibration levels

Wagga Wagga Railway Station and Yard is listed on the State Heritage Register. Sections of the Proposed Change area is part of the Wagga Wagga Conservation Area as shown in Appendix A.

No vibration intensive equipment has been identified in the CNVIS for:

- Pearson Street scenarios W.010, W.011 and W.014,
- Cassidy Pedestrian Bridge scenarios W.001, W.002 and W.006, or
- Wagga Wagga Yard W.001.

For most construction activities, vibration emissions are intermittent in nature and for this reason, higher vibration levels occurring over shorter time periods are allowed.

In the event that additional work is undertaken which requires the use of other items of plant identified than those identified in Appendix B, a vibration impact assessment must be conducted prior to the commencement of work.

4.3.3 Conclusion

No specific mitigation measures are proposed in the CNVISs (Appendix B). The CNVIS show that the predicted impacts would be generally in accordance with the impacts considered as part of the EAD and would be managed as per all applicable mitigation measures in the CoAs and UMMs, with any identified additional mitigation measures outlined in Table 4-11.

4.4 Non-Aboriginal heritage

4.4.1 Existing environment

Potential non-Aboriginal heritage impacts were assessed within Chapter 11 of the EIS, Technical Paper 3 (Non-Aboriginal heritage) and has been assessed in the Wagga Wagga Heritage Assessment (WWHA) (Appendix C) to be provided in the next revision.

The study area for EIS Technical Paper 3 (Non-Aboriginal heritage) included the length of the existing railway corridor from Albury to Illabo, with a specific focus on the 14 enhancement sites, including heritage items and conservation areas within and in the vicinity of the enhancement sites that could be directly or indirectly impacted by the Project.

The Proposed Change intersects or is adjacent to the curtilage for the heritage items listed in Table 4-5 and shown in Appendix A.

Table 4-5: Heritage items that intersect or are adjacent to the Proposed Change

NAME	HERITAGE LISTING	ENHANCEMENT SITE	DISTANCE FROM PROPOSED CHANGE
Wagga Wagga Showground, Kyeamba Smith Hall & grandstand	LEP listed heritage (I246)	Pearson Street bridge	In proximity (< 20m)
Mt Erin Convent, Chapel, High School and Grounds	LEP listed heritage (I260)	Cassidy Parade pedestrian bridge	Within curtilage (partially)
Wagga Wagga Railway Station and Yard Group	State listed heritage (SHR 01279)	Wagga Wagga Yard and pedestrian bridge	Within curtilage (partially)
Wagga Wagga Heritage Conservation Area (WWHCA)	LEP listed heritage (listing number not available in LEP)	Cassidy Parade pedestrian bridge, Wagga Wagga Yard and pedestrian bridge	Within curtilage (partially)
Wagga Wagga Railway Station	LEP listed heritage (I98)	Wagga Wagga Yard and pedestrian bridge	Within curtilage (partially)
Former Stationmaster's House (Wagga Wagga)	LEP listed heritage (I99)	Wagga Wagga Yard and pedestrian bridge	Adjacent

4.4.2 Impact assessment

The impacts have been assessed in the WWHA (Appendix C) which concludes that based on the temporary and low impact nature of the proposed works the heritage fabric and values of items within the LEP and SHR listings will not be impacted this includes the following items:

- Heritage items located in proximity to the proposal could be vulnerable to the effects of vibration from the proposed works, if not properly managed. This translates to a safe working distance of around 15 m for vibratory piling and 20 m for vibratory compaction.
- Views of construction activities would be temporary and short-term. This would not have a material impact on heritage items that have views to the proposal site. Viewsheds from heritage items are unlikely to be impacted by the proposal.
- There is potential for accidental damage to heritage items in proximity to construction activities. Movement of heavy machinery and intrusive works near heritage structures presents a low risk of inadvertent damage to heritage structures adjacent to the proposal.
- It is assessed that impact to the heritage values of the Wagga Wagga Showground complex in relation to the Pearson Street CIZ extension will be negligible.
- It is assessed that impact to the heritage values of the former CSU South Campus in relation to the CIZ extension will be negligible.
- It is assessed that impact to the heritage values of the Wagga Wagga Conservation Area in relation to the CIZ extension will be negligible due to the temporary nature of the proposed activities.
- As the proposed works for this area primarily involve pedestrian and traffic management it is consider that the impact to the Mount Erin Complex in relation to the CIZ extension will be negligible.
- It is assessed that impact to the Wagga Wagga Railway Station in relation to the CIZ extension will be negligible.
- It is assessed that impact to the former Stationmaster's residence in relation to the CIZ extension will be negligible.
- It is assessed that impact to the Wagga Wagga Railway Station and Yard Group in relation to the Eastern Yard CIZ extension is negligible.
- It is assessed that impact to the Murrumbidgee Milling Company Flour Mill in relation to the Eastern Yard CIZ extension is negligible.
- It is assessed that impact to the Robertson Oval gates and ticket boxes in relation to the Eastern Yard CIZ extension will be negligible.
- Potential impacts to the Beauty Pint Avenue residence are approximately 130 metres from the Eastern Yard CIZ extension, and therefore it is assessed that impact to the heritage listed residences will be negligible.

4.4.3 Conclusion

The WWHA, to be provided, will confirm whether the impacts would be generally in accordance with the impacts considered as part of the EAD and would be managed as per all applicable mitigation measures in the CoAs and UMMs, with any identified additional mitigation measures outlined in Table 4-11.

Specific mitigation measures to protect heritage items within or that abut the CIZ extension are as follows:

- The rail corridor gardens in front of the museum hold significance to the volunteers at the museum. Impact to these gardens should be as minimal as possible.
- The heritage-listed 1891 turntable within the Eastern Yard extension should be protected by an exclusion buffer zone and demarcated with bunting.

- The proposed works within the Eastern Yard extension should only be placed in areas where there is already a highly disturbed ground surface and must avoid any rail related relics visible on the surface of the yard. This area must be returned to its current state following the construction period.

4.5 Aboriginal heritage

4.5.1 Existing environment

As per the EIS Chapter 10, no Aboriginal heritage items or sites were identified within or in proximity to the Proposed Change areas in the Wagga Wagga precinct.

4.5.2 Impact assessment

The WWHA (Appendix C) was developed to assess heritage impacts of the Proposed Change including impacts on Aboriginal heritage. , The WWHA assessed impacts on Aboriginal heritage including undertaking and Aboriginal Heritage Information Management System (AHIMS) search on 6 August 2025 showing:

- There are no Aboriginal heritage sites within the four CIZ Extensions or in close proximity.
- There are no other sources of information to indicate that Aboriginal objects are likely within the collective CIZ extension proposed for Wagga Wagga.
- Four Aboriginal heritage sites located in the Wagga Wagga Botanic Gardens that are approximately 1km south of the Eastern Yard CIZ extension. These sites will not be impacted by the Proposed Change.

4.5.3 Conclusion

The WWHA, concludes that impacts would be generally in accordance with the impacts considered as part of the EAD and would be managed as per all applicable mitigation measures in the CoAs and UMMs, with any identified additional mitigation measures outlined in Table 4-11.

4.6 Biodiversity

4.6.1 Existing environment

A Biodiversity Assessment Report Memo (BARM) was prepared to assess the impact from the Proposed Change. The following subsection outlines the existing environment as per the BARM's database searches and visual assessment.

Native vegetation and Threatened Ecological Communities:

Three Threatened Ecological Communities (TECs) have potential to be in or near the subject site. A summary of these TECs is shown in Table 4 of the BARM (Appendix D).

No mapped PCTs were found to be within the subject site, with the closest mapped PCTs approximately 200 to 1000 metres from the subject site, shown in Figure 4-2. Therefore, there are no associated TECs associated within the site and the land within the subject site is mapped as 'not classified' Figure 4-2).

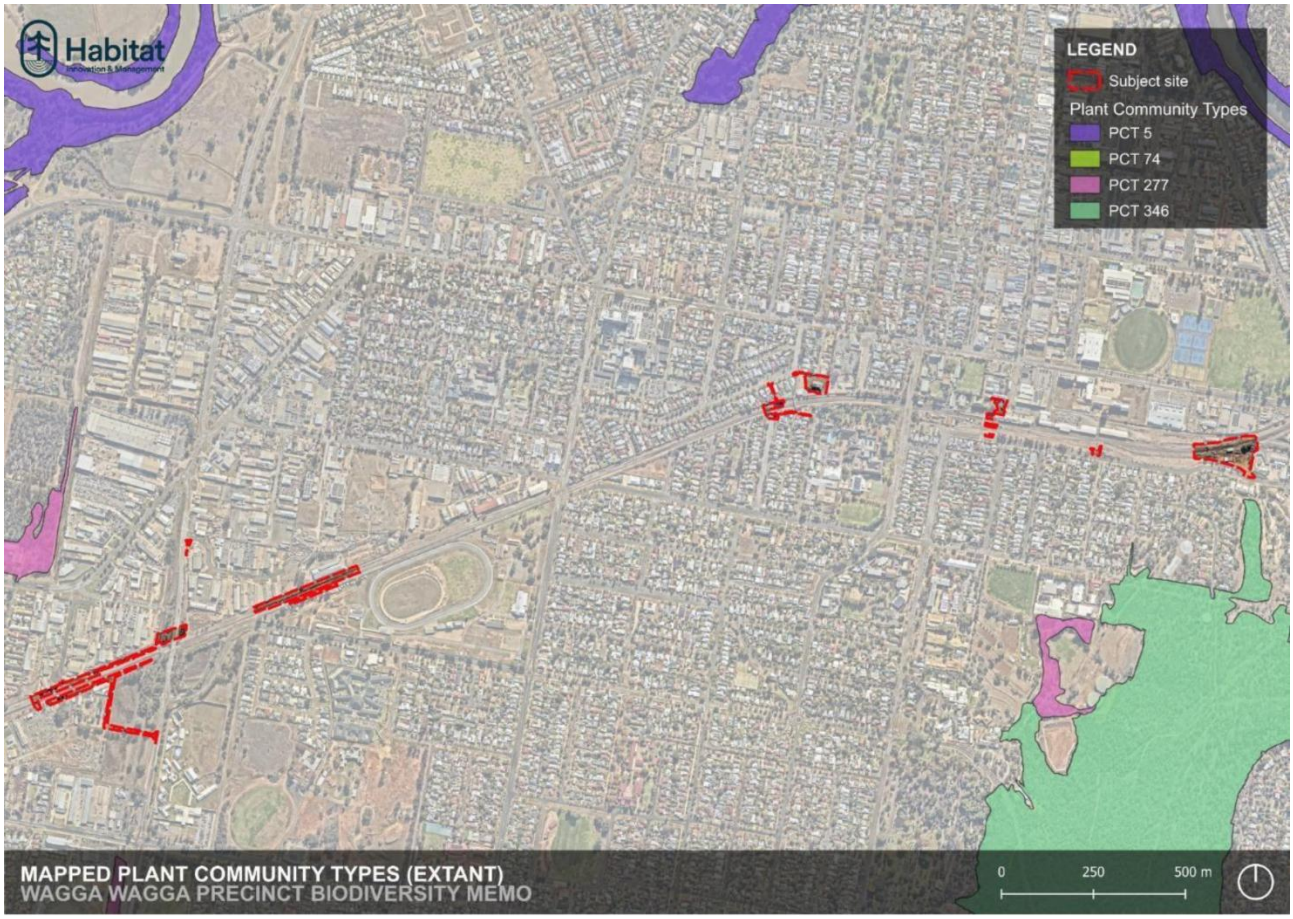

Figure 4-2 Plant Community Types

Three PCTs were mapped within proximity to the subject site and classified in the BioNet Vegetation Classification portal. These are:

- PCT 5 – River Red Gum herbaceous-grassy very tall open forest wetland on inner floodplains in the lower slopes sub-region of the NSW South Western Slopes Bioregion and the eastern Riverina Bioregion
- PCT 277 – Blakely's Red Gum – Yellow Box grassy tall woodland of the NSW South Western Slopes Bioregion
- PCT 346 – White Box – Blakely's Red Gum – White Cypress Pine shrubby woodland on metamorphic hills in the Wagga Wagga – Cootamundra region of the NSW South Western Slopes Bioregion.

PCT 277 is associated with BC Act and EPB Act TECs.

Threatened flora:

Six threatened flora species were identified as 'may' occur in or near the subject site, as outlined in Table 5 of the BARM (Appendix D).

Four threatened vegetation species have previously been recorded within a 10km radius of the subject site and uploaded to the NSW BioNet Atlas database. Details of these are in Table 6 of the BARM (Appendix D).

The only TEC identified in proximity to the Proposed Change area is White Box – Yellow Box – Blakely's Red Gum Grassy Woodland which is endangered under the BC Act and EPBC Act and is associated with PCT 277.

No PCTs or TECs are mapped to occur within the subject site.

Threatened Fauna

A search of the PMST listed 30 threatened fauna species listed under the EPBC Act which were categorised as 'known', 'may' or 'likely' to occur on or near the site. Details of these are outlined in Table 8 of the BARM (Appendix D).

A search on the NSW BioNet Atlas database within a 10km radius of the Proposed Change area showed that 42 threatened species listed under the NSW BC Act and Commonwealth EPBC Act have previously been recorded in the area. These are outlined in Table 9 of the BARM (Appendix D).

Endangered Populations

The BioNet Atlas identified one BC Act Endangered population for the Squirrel Glider *(Petaurus norfolcensis)* in the Wagga Wagga Local Government Area.

Habitat Connectivity

The subject site is in central Wagga Wagga, borders major roads, residential and commercial properties. There is variable connectivity among the three subject sites of Pearson Street, Wagga Wagga Yard and Cassidy Parade.

The Pearson Street site does have some connectivity to the greater landscape through the waterway and drainage line which provides temporary and seasonal habitat for native frogs, reptiles and invertebrates. Some of the trees for potential trimming and removal are also generally connected to a small patch of planted native vegetation near the entry to the Glenfield Animal Shelter off Pearson Street/Glenfield Road.

The Wagga Wagga Yard site has limited connectivity due to the railway corridor already being highly disturbed and cleared. Existing shrubs and trees are mostly isolated, in planted rows or in contained garden beds. They may provide stepping stone habitat for larger bird species but other similar habitat exists outside this subject site.

The Cassidy Parade site has some connectivity to the Erin Earth sustainable living education centre which has an abundance of planted native vegetation.

Field Assessment

Eleven bird species and one frog species were recorded within the subject site, none of which are listed as threatened species.

The vegetation surveyed for the Proposed Change area is located within the existing railway corridor and is highly disturbed due to historical development and clearing. There are no classified PCTs within the survey area and majority of the vegetation consists of highly disturbed ground cover species.

There are scattered large trees across all three site locations, although majority are not native. Wagga Wagga Yard has one large Callistemon species, Pearson Street has approximately 10 large eucalypts for removal and several others on the boundary of the Proposed Change area and Cassidy Parade has some Melaleuca species for removal and other natives for trimming on the boundary of the Proposed Change area.

Various potential habitat features were recorded on site during the field surveys, including two small bird nests, various wood/rock stockpiles, cracks/crevices in a large Eucalypt tree, culverts and creeks/drainage lines. Other potential habitat features include the variety of ornamental plantings and artificial habitat such as log piles and garden beds.

4.6.2 Impact assessment

The footprint of the Proposed Change will occupy a highly modified landscape that has existing rail and road infrastructure, drainage lines, mowed and maintained ornamental landscapes. The vegetation present is dominated by exotic and native ornamental plantings. No native Plant Community Types were identified. No threatened species or threatened ecological communities were identified in this assessment.

Though the majority of the potential habitat was of temporary nature or low quality, native fauna may still use the planted and artificial features on occasion. Key habitat features have been mapped and are to be included

in pre-clearance assessments, though other lower quality habitat features should also be surveyed if they are intended for removal or impact. This can be included as a pre-clearance mitigation activity.

Figure 4-3, Figure 4-4 and Figure 4-5 shows the location of habitat features that may be impacted by the Proposed Change.

The Proposed Change area covers 3.70 Ha comprised of:

- Disturbed aquatic vegetation (0.106 Ha)
- Large native trees (0.151 Ha)
- Highly disturbed vegetation (2.293 Ha)
- No vegetation (1.022 Ha)
- Ornamental vegetation (0.135 Ha), and
- Areas assessed by desktop only considered to be highly disturbed or containing no vegetation but likely to contain log/sleeper piles, ballast stockpiles and at least two mature trees (0.789 Ha).
  - Though it is unlikely to contain habitat or threatened flora or fauna that triggers additional assessment or offsets, the areas considered these may provide habitat for fauna species and will need to be inspected as part of pre-clearing surveys.

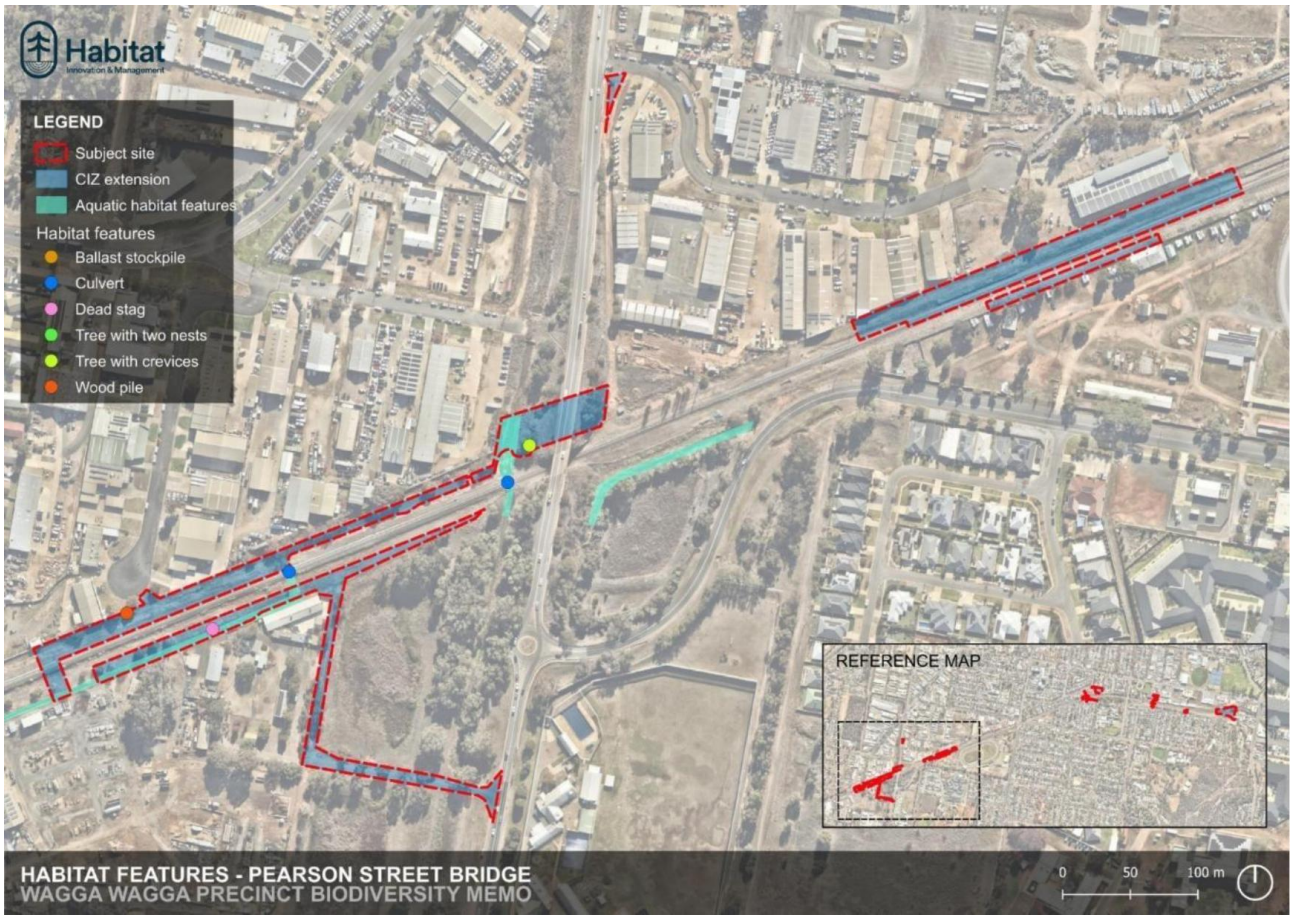

Figure 4-3 Pearson Street CIZ extension area habitat features

Figure 4-4 Wagga Wagga Yard CIZ extension area habitat features

Figure 4-5 Cassidy Parade CIZ extension area habitat features

Results of the assessment found no threatened fauna species are expected to inhabit the site due to the low foraging habitat this area provides and the presence of higher quality habitat further afield in the surrounding landscape.

4.6.3 Conclusion

The BARM concludes that no significant impacts to threatened species, populations or ecological communities are likely as a result of the Proposed Change.

The impacts would be generally in accordance with the impacts considered as part of the EAD and would be managed as per all applicable mitigation measures in the CoAs and UMMs, with any identified additional mitigation measures outlined in Table 4-11. Recommendations outlined in the BARM are in accordance with the Construction Biodiversity Management Plan, CoAs and UMMs.

4.7 Flood risk

4.7.1 Existing environment

The Proposed Change areas are located within the Murrumbidgee catchment of the Murray-Darling Basin. The Murrumbidgee catchment extends from the Kosciuszko National Park in eastern NSW to Balranald in western NSW, with inflows primarily sourced from the Great Dividing Range (EIS, Chapter 18). There are no watercourses located within the Proposed Change area.

The frequency of flood events is generally referred to in terms of their annual exceedance probability (AEP). For example, for a 5% AEP flood, there is a five per cent probability (or a one in 20 chance) that there would be floods of a greater magnitude in any given year. For a 1% AEP flood, there is a one per cent probability (or a one in 100 chance) that there would be floods of greater magnitude each year. The probable maximum flood (PMF) is the largest flood that could be expected to occur at a particular location, usually estimated from probable maximum precipitation.

The Proposed Change area is located within flood prone land, with existing flood conditions shown in Table 4-6 below.

Table 4-6: Existing flood conditions

ENHANCEMENT SITE	EXISTING FLOOD CONDITIONS	DRAINAGE	FLOOD RISK WITHIN AND AROUND THE ENHANCEMENT SITE FOR EVENTS UP TO THE 1% AEP	PMF FLOOD DEPTH
Pearson Street bridge	▸ Overland flooding depth of up to 1m within the rail corridor to the west of the rail line from Glenfield Drain in the 1% AEP	▸ Glenfield Drain allowing water to pass under the rail corridor at chainage 523.56 km ▸ Cut-off channels west of Pearson Street bridge directing flows into the Glenfield Drain ▸ Concrete culvert at Chainage 523.52 km ▸ Overland flow path south of the rail corridor	▸ Not affected	▸ Up to 0.7m in overland flooding events

		flowing towards a council operated basin.		
Cassidy Parade pedestrian bridge **Wagga Wagga Station pedestrian bridge** **Wagga Yard clearances**	▸ Overland flooding within rail corridor ▸ Peak flood depth of 0.15-0.3m within the rail corridor in the 1% AEP. ▸ Rail corridor within the study area categorised as 'flood storage' and 'floodway' in the 1% AEP.	▸ No formal drainage infrastructure at sites	▸ 5% AEP and greater events	▸ Greater than 0.75m in overland flooding events. ▸ Not affected by Murrumbidgee River flooding

4.7.2 Impact assessment

Construction activities on flood-prone land, including earthworks, concrete works, compounds, stockpiles, have the potential to temporarily affect flooding behaviour. Without the implementation of appropriate management measures, potential impacts include:

- cause damage to construction sites, machinery, plant and equipment
- detrimentally impact downstream watercourses through increased flow rates in drainage lines, changes in scour, bank erosion and transport of sediments, and
- obstruct the passage of floodwater and overland flow, which could exacerbate existing flooding conditions and pose a safety risk to the public.

Considering scope of the works in the Proposed Change areas and the limited peak flood depth of 0.15-0.3m within the rail corridor in a 1% AEP and the existing elevation of the areas adjacent to the rail corridor within the Proposed Change area no significant impacts to flood behaviour are anticipated for events up to and including the 1% AEP.

The Proposed Change at Cassidy Parade pedestrian bridge includes the construction of a temporary pedestrian bridge which will be in place for approximately 18 months from September 2026 to March 2027. As per Figure 2-1, the temporary pedestrian bridge is located in a drainage channel between residential properties on Brookong Avenue. The scaffold platform and walkway will sit above the existing drainage culvert and ramp down onto the footpath at the end of the channel. The scaffold does not form a solid barrier and is not anticipated to impede existing water flow. Furthermore, the design team modelled water depths inside the drainage channel, and the channel below the walkway does not overflow in the 1% AEP event.

4.7.3 Conclusion

Construction activities at the Proposed Change area would be short term and would be prepared with consideration of flooding behaviour. Where temporary obstruction of overland flows or drainage systems cannot be avoided, further consideration of flood risk would be undertaken to develop the staging of works to ensure proper management of a flood event at all stages of construction. The Proposed Change area has been designed to minimise the duration of onsite work, which would enable increased flexibility when scheduling works around forecast rain periods (EIS, Chapter 8).

Considering the limited duration and scope of the works, the limited peak flood depth of 0.15-0.3m within the rail corridor in a 1% AEP and the existing elevation of the areas adjacent to the rail corridor within the Proposed Change area no significant impacts to flood behaviour are anticipated for events up to and including the 1% AEP which is consistent with the flood risk/behaviour of the approved works.

These impacts would be generally in accordance with the impacts considered as part of the EAD and would be managed as per all applicable mitigation measures in the CoAs and UMMs, with any identified additional mitigation measures outlined in Table 4-11.

4.8 Soils and contamination

4.8.1 Existing environment

The Proposed Change areas are located within the Wagga Wagga precinct at an elevation of about 190 to 200 m Australian Height Datum (AHD) at the south of the Murrumbidgee River. The topography generally slopes to the north to the Murrumbidgee River; however, there are localised high points along the Olympic Highway that drain to various tributaries of the Murrumbidgee River (EIS, Chapter 20).

Existing soil characteristics within the Proposed Change area are shown in Table 4-6 below.

Table 4-7: Existing soil characteristics

ENHANCEMENT SITE	LANDSCAPE	SOIL	CHARACTERISTICS
Pearson Street bridge	Becks Lane soil landscape	Moderately deep red and brown Chromosols and Dermosols.	High erosion hazard, acidity and localised foundation hazards.
Cassidy Parade pedestrian bridge, Wagga Wagga Station pedestrian bridge and Wagga Wagga Yard clearance	Becks Lane soil landscape	Moderately deep red and brown Chromosols and Dermosols.	High erosion hazard, steep slopes, localised foundation hazards and mass movement, stoney and strongly acid soils on ridges and upper slopes.
	Lloyd soil landscape to the eastern end of the site	Eastern end of the site likely comprises red Chromosols and brown Sodosols.	

Saline soils

The Proposed Change area is located on land mapped as having ‘low’ land salinity hazard. As per the EIS Chapter 20, more significant excavation required for track lowering at Pearson Street bridge is associated with a moderate-to-high potential risk for salinity.

Acid sulfate soils

The Proposed Change area is located within areas described as low probability of acid sulfate soils (ASS).

Contamination

The Proposed Change area is located within an existing rail corridor, which is considered to contain a general level of risk associated with contamination from historical development and activities associated with its operation. A range of sites adjacent to the rail corridor that would be considered to have associated contaminated risk were identified, including agricultural land.

The sources for these general contamination risks include:

- fill used in construction of the existing rail line, which may be contaminated
- weed-suppression activities
- buildings potentially containing hazardous materials
- rail line ballast potentially containing heavy metals and other contaminants
- contamination from maintenance activities undertaken at sidings and near silos or other areas
- use of chemicals on agricultural land

- machinery storage and maintenance, refuelling and spray rig filling, agricultural sheds and silos

The Proposed Change area is located within Areas of Environmental Concern (AEC). Description of the AECs and potential contaminants of concern are shown in Table 4-8 below and in Figure 4-6.

Table 4-8: Description of AEC and potential contaminants of concern

ENHANCEMENT SITE	AEC	DESCRIPTION OF AEC	POTENTIAL CONTAMINANTS OF CONCERN
Pearson Street bridge	AEC 32	Wagga Wagga Showground campground; storage of unknown minor chemicals	Heavy metals, OCPs and OPPs
	AEC 33	Potential ACM on the ground surface and fill containing anthropogenic material	TRH, BTEX, PAHs, asbestos, lead containing dust and/or paint
	AEC 34	Former council depot, storage of unknown chemicals or fuel, machinery maintenance	TRH, BTEX, PAHs, heavy metals and/or asbestos
	AEC 35	Potential ACM on the ground surface	TRH, BTEX, PAHs, asbestos, lead containing dust and/or paint
Cassidy Parade pedestrian bridge **Wagga Wagga Station pedestrian bridge**	AEC 36	Potential USTs, formerly storage of firefighting storage tanks and former fuel store (not part of the site)—Former District Engineers Office, workshop and branch depot.	TRH, BTEX, PAHs, PFAS and asbestos
Wagga Wagga Yard clearances	AEC 37	Former gang shed - historical storage of gas cylinders, grease and drums, transformers, rail components and battery acid containers, and potential asbestos in buildings.	TRH, BTEX, PAHs, and asbestos

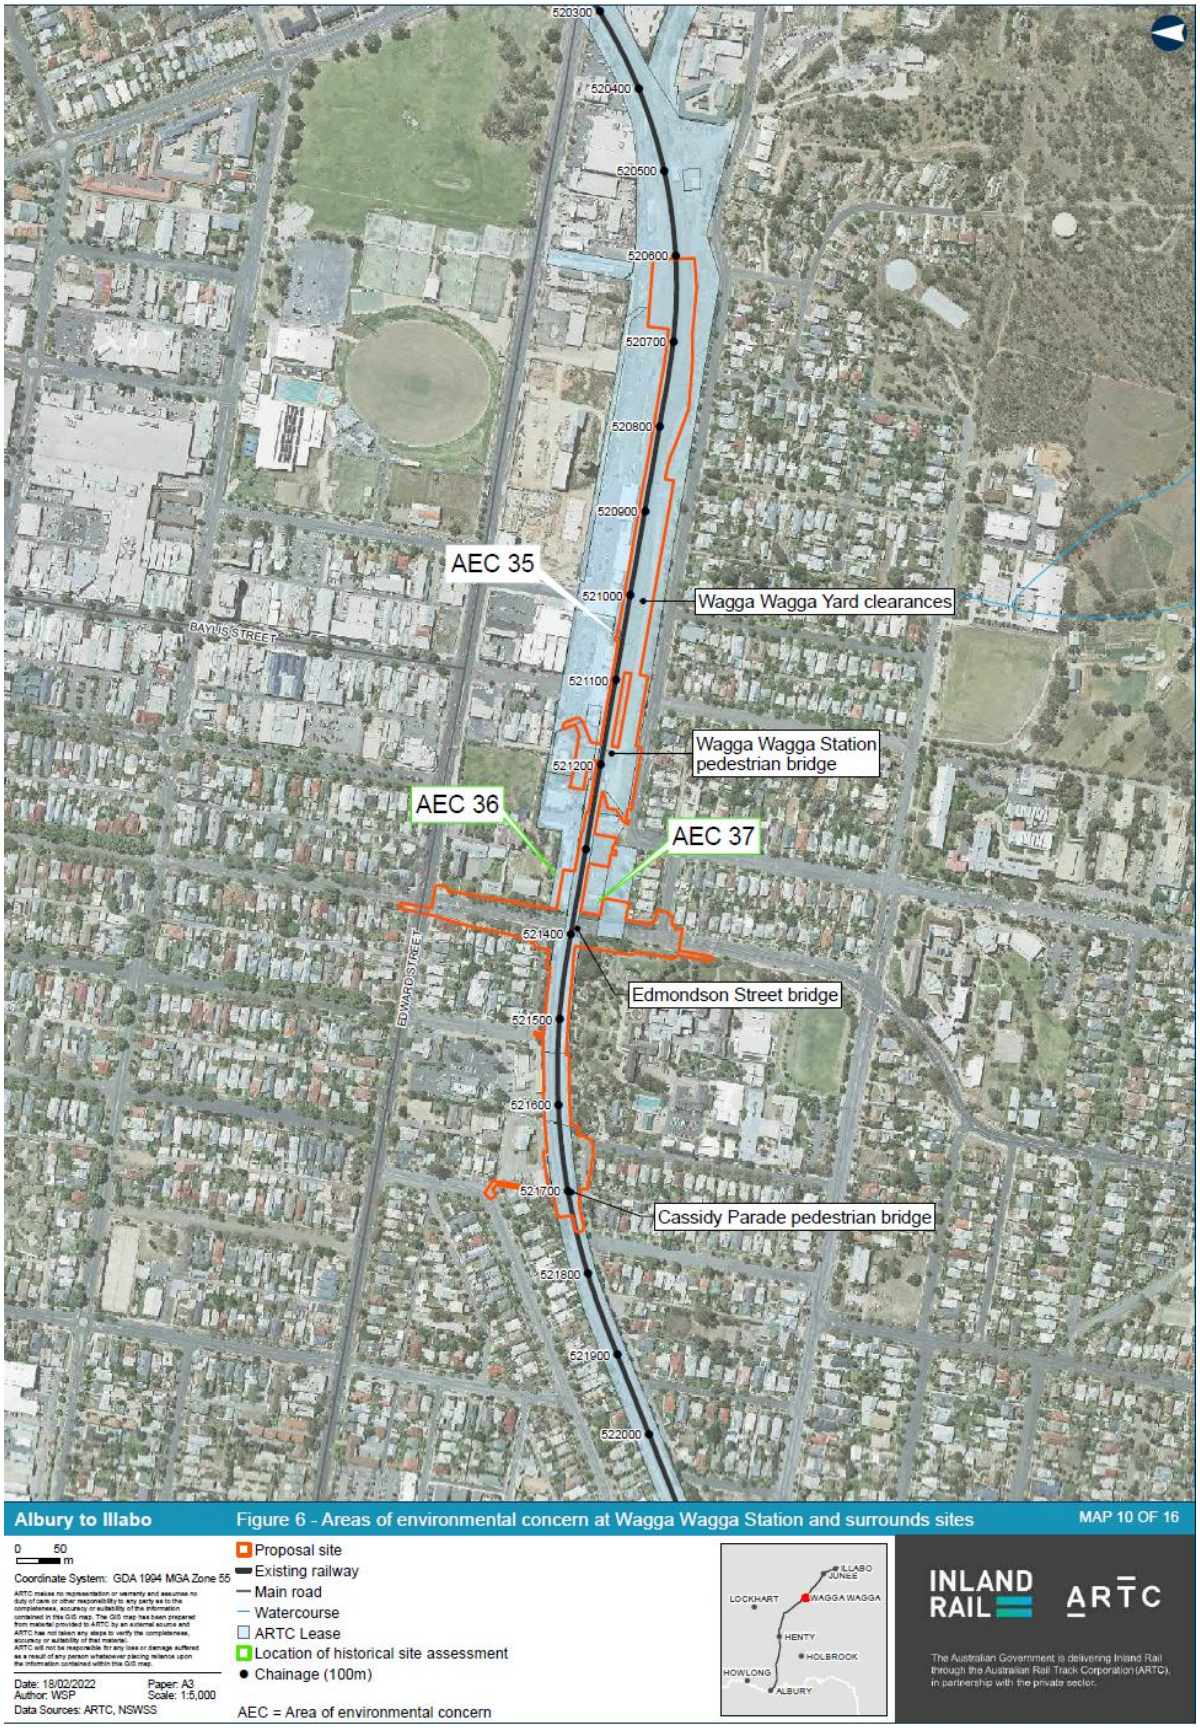

Figure 4-6: EAD areas of environmental concern for Wagga Wagga enhancement sites (refer to AEC 36 and AEC 37)

4.8.2 Impact assessment

Excavation and ground disturbance activities would expose and disturb soils. If not adequately managed, this could result in (EIS, Chapter 20):

- erosion of exposed soil and stockpiled materials
- dust generation
- an increase in sediment loads entering the stormwater system and/or local runoff, and, therefore, nearby receiving waterways
- increase in salinity levels in soil
- ASS conditions
- mobilisation of contaminated sediments, with resultant potential for environmental and human health impacts

Saline soils

The Proposed Change at Pearson Street bridge is required for access and stockpiling, no significant excavation will be conducted in the CIZ extensions, therefore, the Proposed Change is not anticipated to increase the risk of salinity.

Soil erosion

Construction would temporarily expose the natural ground surface and sub-surface through the removal of vegetation, overlying structures (such as existing roads) and excavation. The exposure of soil to runoff and wind can increase soil erosion potential; particularly, where construction activities are undertaken in soil landscapes characterised by dispersive soils, given their susceptibility to erosion.

The potential for erosion impacts would be minimised by implementing standard best-practice soil erosion management measures during construction, with risks associated with dust are discussed further in Section 4.9.

Contamination

There is a general contamination risk present within the Proposed Change area, based on the general setting within an existing rail corridor and land uses that occur in and adjacent to the area.

As noted in the EIS (Chapter 20) the risk of contamination within the Proposed Change area is considered to be low within the context of the continuing railway land use; however, some discrete areas of medium risk have been identified, such as areas of waste within the rail corridor, fill used in the construction of the existing rail line and structures containing hazardous materials (such as lead paint and asbestos).

Based on the intensity of historical activities observed within the rail corridor, including the presence of operational facilities, development in the surrounding area, and the Proposed Change area's proximity to the Wagga Wagga train station, the Proposed Change area is considered to have a higher likelihood of contamination being present.

Further investigation of the area will be undertaken, which would confirm the requirement for further management actions. A Sampling, Analysis, and Quality Plan (SAQP) is currently being developed for all sites across the alignment and would be utilised to inform the scope of any site investigations required prior the commencement of works.

4.8.3 Conclusion

Construction activities at the Proposed Change area would be short term and would be prepared with consideration of the existing soils and contamination characteristic of the area.

These impacts would be generally in accordance with the impacts considered as part of the EAD and would be managed as per all applicable mitigation measures in the CoAs and UMMs, with any identified additional mitigation measures outlined in Table 4-11.

4.9 Air quality

4.9.1 Existing environment

Regional air quality is mainly influenced by rural activities, industrial activities, vehicle emissions, railway operations, power generation, waste management and extraction activities. Dust from paved and unpaved roads, and domestic solid and liquid fuel burning in the region, also contribute to the local air shed.

As noted in the EIS (Chapter 22), air quality data has been sourced from monitoring Wagga Wagga North, with the results summarised in Table 4-9 below, alongside the air quality impact assessment criterion for each pollutant specified in the *Approved Methods for the Modelling and Assessment of Air Pollutants in New South Wales* (NSW EPA, 2016).

Table 4-9: Background air quality (2016 to 2020)

MONITORING STATION	POLLUTANT	AVERAGING PERIOD	AIR QUALITY IMPACT ASSESSMENT CRITERIA	YEAR*				
				2016	2017	2018	2019	2020
Wagga Wagga North	PM_{10} (g/m^3)	Maximum 24-hour average	50	**114.7**	**171.6**	**127.2**	**251.7**	**259.4**
		Annual average	25	20.7	20.4	**26.9**	**34.7**	21.9
	$PM_{2.5}$ (g/m^3)	Maximum 24-hour average	25	Not available	**40.8**	**90.2**	**129.4**	**559.5**
		Annual average	8	Not available	**8.5**	**8.9**	**11.0**	**12.9**

*Exceedances of the air quality impact assessment criteria as shown in **bold**.

4.9.2 Impact assessment

Dust emissions

The following activities have the potential to generate dust during construction:

- vegetation clearing and grubbing
- installation of temporary infrastructure and site compound
- earthworks such as rail formation works
- civil works at road and pedestrian bridges
- dirt, mud, or other materials tracked onto a paved public roadway by a vehicle leaving a construction site (generally referred to as egress)
- erosion of unsealed surfaces
- materials handling and loading at laydown areas, and vehicle movements on unsealed roads/surfaces

The UMMs outlined in the EAD will be implemented to minimise the risk of impacts to air quality during the Proposed Change.

4.9.3 Conclusion

The Proposed Change impacts to air quality have been deemed as negligible to high prior to any mitigation measure implementation (EIS, Chapter 22). Following the implementation of appropriate mitigation measures, the residual air quality impacts would be reduced to negligible to low risk and short-term.

These impacts would be generally in accordance with the impacts considered as part of the EAD and would be managed as per all applicable mitigation measures in the CoAs and UMMs, with any identified additional mitigation measures outlined in Table 4-11.

4.10 Landscape and visual

4.10.1 Existing environment

The Proposed Change area is located at the boundary of the upper slopes of the South-western Bioregion, characterised by steep, hilly and undulating ranges and granite basins, with open forests and woodlands.

A feature of the landscape and visual catchment across the Proposed Change area, includes the operational rail corridor of the Main South Line. This corridor has largely been cleared of native vegetation and generally consists of grassland with a few scattered trees.

Pearson Street is a busy two-lane road providing access over the existing Sydney to Melbourne rail corridor. The rail corridor passes under the Pearson Street bridge and there are groups of mature trees and shrubs, particularly to the south of the bridge. In this location, land use along this corridor is mixed, with light industrial development to the north of the bridge crossing, a Correctional Centre and depot to the south, and residential development, the Alexandra Park sport and recreation facilities to the northwest, and heritage listed Wagga Wagga Showgrounds to the east.

The existing Cassidy Parade pedestrian bridge and rail corridor pass through a predominantly residential area to the south of the Wagga Wagga town centre.

The Wagga Wagga Yard area is centred on the State heritage listed Wagga Wagga railway station precinct, which is a ‘prominent landmark at the end of Wagga Wagga's main street and is an important townscape feature’ (OEH, 2009b). The residential area to the south of the station is also part of the Wagga Wagga Conservation Area and characterised by single storey brick and timber cottages tree lined streets. In this location the rail corridor is in a slight depression, below Railway Street to the south. There are ornamental gardens within the rail corridor, new plaza and streetscape planting to the north of the main station building, and some mature trees along the southeastern boundary of the rail corridor.

4.10.2 Impact assessment

Landscape character

Landscape character impacts will occur, primarily due to the scale of the works occurring during construction and/or due to the higher sensitivity of the landscape character unit, such as:

- Bridge demolition and construction work within and external to the rail corridor, which requires the trimming and removal of vegetation, local diversions and temporary impacts to areas of open space;
- Construction work within non-Aboriginal heritage sites, such as Wagga Wagga Conservation Heritage Area and Wagga Wagga Railway Station and Yard Group (Section 4.4 details impacts to non-Aboriginal heritage items and sites).

The landscape character impact for the Proposed Change area is noted as moderate adverse impact (EIS, Chapter 17) specifically for the Cassidy Parade and Brookong Avenue residential area and Wagga Wagga Railway Station heritage landscapes. The landscape character impact for the Proposed Change area is noted as negligible (EIS, Chapter 17) for the Pearson Street and rail corridor landscape.

Viewpoints

The Proposed Change areas would result in a visual impact at the following viewpoints:

- Pearson Street Bridge
  - Viewpoint 12: View east from Pearson Street bridge

Figure 4-7 Viewpoint 12 (Source: EIS Technical Paper 10)

Overall, the Proposed Change would be consistent with and absorbed into the character of the rail corridor, which already includes stockpiling and associated rail infrastructure. This would result in a low magnitude of change and a negligible visual impact.

  - Viewpoint 13: View west from Urana Street

Figure 4-8 Viewpoint 13 (Source: EIS Technical Paper 10)

As the Proposed Change would be set back from the viewer, seen within the context of the existing rail corridor and backdrop of industrial development and partly screened by existing vegetation, there would be a low magnitude of change during construction and a negligible visual impact.

- Cassidy Parade pedestrian bridge

- Viewpoint 14: View north west from Cassidy Parade

Figure 4-9 Viewpoint 14 (Source: EIS Technical Paper 10)

Overall, the Proposed Change would be seen in the context of the existing construction activity in the approved CIZ; there would be a low magnitude of change during construction and a negligible visual impact.

- Viewpoint 15: View south from Brookong Street

Figure 4-10 Viewpoint 15 (Source: EIS Technical Paper 10)

The Proposed Change includes the establishment of a site compound in the Telstra property. The compound would be partially blocked from view by existing buildings. Overall, there would be a moderate magnitude of change, and a moderate adverse visual impact during construction

- Wagga Wagga Yard and surrounds

- Viewpoint 19: View south west from Station Place

Figure 4-11 Viewpoint 19 (Source: EIS Technical Paper 10)

The Proposed Change extends the CIZ into Station Place, however, the works and visual impacts are consistent with what was assessed in the EAD. There would be a moderate magnitude of change to this view and a moderate adverse visual impact during construction.

Night-time visual

There would be night activity during rail possessions, and during extended construction hours, along the Proposed Change area. This would include task lighting, construction vehicle headlights and lighting associated with site offices, storage and laydown areas.

Minor-to-moderate night-time visual impacts are expected within the Proposed Change area, due to light spill and sky glow from the construction works.

4.10.3 Conclusion

Impacts to landscape character (excluding non-Aboriginal heritage), viewpoints, and night-time visual are considered to be short-term and minor with the implementation of appropriate mitigation measures as per the applicable CoAs and UMMs. For a detailed consideration on the impact of the Proposed Change area to non-Aboriginal heritage items and sites refer to Section 4.4.

The landscape and visual impacts are generally in accordance with the impacts considered as part of the EAD and would be managed as per all applicable mitigation measures in the CoAs and UMMs, with any identified additional mitigation measures outlined in Table 4-11.

4.11 Matters of national environmental significance

As discussed in Section 1.1, the A2I Project was referred to the Australian Government Minister for the Environment under the EPBC Act due to potential for impacts on protected matters on 2 June 2020 (EPBC Referral No 202/8670). On 29 June 2020, DAWE notified that the proposal is not a controlled action, and hence approval under the EPBC Act is not required.

The Proposed Change is considered against matters of national environmental significance and impacts on Commonwealth land in accordance with the EPBC Act in Table 4-10, which determined that there would be no impacts on matters of national environmental significance and no referral is required.

Table 4-10: Matters of national environmental significance

FACTOR	IMPACT (YES/NO)	IMPACT DESCRIPTION
Any impact on a World Heritage property?	No	The Proposed Change would not have a direct or indirect impact on any World Heritage property.
Any impact on a National Heritage place?	No	The Proposed Change would not have a direct or indirect impact on any National Heritage place.
Any impact on a wetland of international importance?	No	The Proposed Change would not have a direct or indirect impact on any wetlands of national importance.
Any impact on a listed threatened species or communities?	TBD	Note: A Biodiversity Assessment Report Memo (BARM) (Appendix D) for the Proposed Change is currently under development and will be provided in the next revision. The existing environment subsection will then be revised as per the BARM's database searches and visual assessment.
Any impacts on listed migratory species?	TBD	Note: A Biodiversity Assessment Report Memo (BARM) (Appendix D) for the Proposed Change is currently under development and will be provided in the next revision. The existing environment subsection will then be revised as per the BARM's database searches and visual assessment.
Any impact on a Commonwealth marine area?	No	The Proposed Change would not have a direct or indirect impact on a Commonwealth marine area.
Does the proposal involve a nuclear action (including uranium mining)?	No	The Proposed Change does not relate to a nuclear action.
Additionally, any impact (direct or indirect) on Commonwealth land?	No	The Proposed Change is not located in proximity to and would not have any direct or indirect impact on, any Commonwealth land, as per a review of the publicly available 'Commonwealth Owned Land' dataset provided by the Commonwealth Department of Finance (dated 27 August 2024).

4.12 Environmental management measures

Table 4-11 outlines any changes to relevant CoAs and UMMs, referred to as Environmental Management Measures (EMMs) in this CA, that will be implemented as additional management measures for the Proposed Change.

Table 4-11: Additional mitigation measures

ASPECT	NATURE AND EXTENT OF IMPACTS (NEGATIVE AND POSITIVE) DURING CONSTRUCTION (IF CONTROL MEASURES IMPLEMENTED) OF THE PROPOSED CHANGE, RELATIVE TO THE APPROVED PROJECT	PROPOSED CONTROL MEASURES IN ADDITION TO PROJECT COA AND UMM	MINIMAL IMPACT YES/NO	ENDORSED	
				YES/NO	COMMENTS
Traffic and transport	The traffic and transport impacts are generally in accordance with the impacts considered as part of the EAD and would be managed in accordance with traffic management as part of the broader A2I	No additional mitigation measures required.	Yes		

	Project and in accordance with the Infrastructure Approval.				
Noise and vibration	Feasible and reasonable management and mitigation measures will be implemented as required to minimise noise, and cumulative impacts for the scope of works as per the Proposed Change. The CNVISs show that there is no significant change between predicted noise and/or vibration levels from EAD approved activities and that of the Proposed Change activities.	No additional mitigation measures required.	Yes		
Non-Aboriginal heritage	This assessment concludes that based on the temporary and low impact nature of the proposed works the heritage fabric and values of items within the LEP and SHR listings will not be impacted. Specific mitigation measures to protect heritage items identified by way of the CIZ extension have been prescribed in Appendix C.	▸ The rail corridor gardens in front of the museum hold significance to the volunteers at the museum. Impact to these gardens should be as minimal as possible. ▸ The heritage-listed 1891 turntable within the Eastern Yard extension should be protected by an exclusion buffer zone and demarcated with bunting. ▸ The proposed works within the Eastern Yard extension should only be placed in areas where there is already a highly disturbed ground surface and must avoid any rail related relics visible on the surface of the yard. This area must be returned to its current state following the construction period. ▸	Yes		
Biodiversity	The Proposed Change is consistent with the level of impact assessed in the EAD. The Proposed Change would have no significant impacts to threatened species, populations or ecological communities.	No additional mitigation measures required.	Yes		
Flood risk	The Proposed Change activities will be short-term and will be prepared with consideration of existing flooding conditions.	No additional mitigation measures required.	Yes		
Soils and contamination	Construction activities at the Proposed Change area would be short term and would be prepared with consideration of	No additional mitigation measures required.	Yes		

	the existing soils and contamination characteristics of the area.				
Air quality	The Proposed Change impacts to air quality have been deemed as negligible to high prior to any mitigation measure implementation (EIS, Chapter 22). Following the implementation of appropriate mitigation measures, the residual air quality impacts would be reduced to negligible to low risk and short-term.	No additional mitigation measures required.	Yes		
Landscape and visual	Impacts to landscape character (excluding non-Aboriginal heritage), viewpoints, and night-time visual are considered to be short-term and minor in nature.	No additional mitigation measures required.	Yes		

5 Consistency Assessment

Table 5-1 presents a set of questions that assist Inland Rail to determine whether the Proposed Change can be considered consistent with the Minister's approval.

Table 5-1: Consistency questions

CONSISTENCY QUESTION	DISCUSSION	CONSISTENT
Q1) Are the proposed works being carried out as part of an approved Project? E.g. Are works "generally in accordance with" Project documents and plans, where relevant?	As considered throughout this document, the Proposed Change is being carried out in accordance with the EAD, particularly the UMF, which involves adjustment and relocation of utilities.	Yes
Q2) Is the modification such a radical transformation of the Project as a whole, as to be, in reality, an entirely new Project? Note: If answered Yes, a new Project application may be required.	The Proposed Change does not constitute a modification and is not a radical transformation of the Project as a whole and is not an entirely new Project.	Yes
Q3) Are the proposed works a modification that is considered "consistent with" the Project as approved? This will require the work in question to have environmental impacts contemplated by the approval (such as EA / EIS, CEMP, spoil management plan, heritage management plan or the like), including documents forming part of the approval, or as a minimum, very few additional impacts.	The Proposed Change, as considered in Chapter 2 is considered "consistent with" the Infrastructure Approval. The Proposed Change is considered to be consistent with the impacts contemplated by the EAD outlined in CoA 1 of the Infrastructure Approval.	Yes
Q4) When considering all previous consistency assessments and the potential cumulative impacts, are the proposed works still considered "consistent with" the Project as approved?	The Proposed Change is considered "consistent with" the Project, including any potential cumulative impacts. Any subsequent consistency assessments would be subject separate consideration for potential cumulative impacts.	Yes

6 Monitoring and Reporting

There are no further monitoring or reporting required as a result of the Proposed Change.

7 Conclusion

Based on the consistency assessment in this report, the Proposed Change is considered:

☒ Consistent with the Ministers Conditions of Approval, and the Updated Mitigation Measures.

☐ ~~Not consistent with the Ministers Conditions of Approval, and the Mitigation Measures. A modification to the Project approval must be prepared and submitted to the Department of Planning Infrastructure and Environment for approval.~~

8 Certification

Author

This consistency assessment provides a true and fair review of the Proposed Change for the Inland Rail – Albury to Illabo Project.

CoA	Requirement	Reference
A1	The Proponent must carry out the CSSI in accordance with the terms of this approval and generally in accordance with the: a) Inland Rail – Albury to Illabo Environmental Impact Statement (ARTC, August 2022) b) Albury to Illabo Response to Submissions (ARTC, November 2023) c) Albury to Illabo Preferred Infrastructure Report (ARTC, November 2023) d) Albury to Illabo Preferred Infrastructure Report Response to Submissions (ARTC, February 2024) e) Inland Rail – Albury to Illabo (SSI-10055) Response to request for additional information – Air Quality Assessment (letter dated 1 May 2024) f) Part 1 - Revised Technical Paper 8: Biodiversity Development Assessment Report (WSP, February 2024) g) Part 2 - Revised Technical Paper 8: Biodiversity Development Assessment Report (WSP, February 2024)	**The CNVMP**
A2	The CSSI must only be carried out in accordance with all procedures, commitments, preventative actions, performance criteria and mitigation measures set out in the documents listed in Condition A1 unless otherwise specified in, or required under, this approval.	**The CNVMP**
C9	The Construction Noise and Vibration Sub-plan must include, but not limited to: a) measures to reduce construction to standard ICNG hours where sensitive land uses are likely to be noise affected for more than 3 months; b) an approach to assess and manage construction fatigue from noise impacts on sensitive receivers on an ongoing basis; c) noise sensitive periods identified by the community, religious, educational institutions, noise and vibration-sensitive businesses and critical working areas and measures to ensure noise levels above the NMLs do not occur during sensitive periods in accordance with Condition E76; d) mitigation for construction traffic noise impacts from additional construction traffic and road diversions; e) the location of all heritage items, non-heritage structures and infrastructure likely to be impacted by vibration and measures to manage vibration impacts at those items and structures; and f) vibration levels at a range of distances from vibration intensive equipment such as excavators and vibratory rollers before undertaking works with the specific type and size of equipment.	**The CNVMP**
E68	A detailed land use survey must be undertaken to confirm sensitive land use(s) (including critical working areas such as operating theatres and precision laboratories) potentially exposed to construction noise and vibration, construction ground-borne noise and operational noise. The survey may be undertaken on a progressive basis but must be undertaken in any one area before the commencement of work which generates construction or operational noise, vibration or ground-borne noise in that area. The results of the survey must be included in the Noise and Vibration CEMP sub-plan required by Condition C8.	**The CNVMP, Section 3.0, Figure 1 Figure 2**

CoA	Requirement	Reference
E69	Work must be undertaken during the following hours: a) 7:00am to 6:00pm Mondays to Fridays, inclusive; b) 7:00am to 6:00pm Saturdays; and c) at no time on Sundays or public holidays.	**Section 2.2**
E70	Except as permitted by an EPL, highly noise intensive works that result in an exceedance of the applicable NML at the same receiver must only be undertaken: a) between the hours of 8:00 am to 6:00 pm Monday to Friday; b) between the hours of 8:00 am to 1:00 pm Saturday; and c) if continuously, then not exceeding three (3) hours, with a minimum cessation of work of not less than one hour. For the purposes of this condition, 'continuously' includes any period during which there is less than one hour between ceasing and recommencing any of the work.	**Section 2.2.1**, **Section 8.2**
E71	Notwithstanding Conditions E69 and E70, work may be undertaken outside the hours specified in the following circumstances (a, b, or c): a) Safety and Emergencies, including: i. for the delivery of materials required by the NSW Police Force or other authority for safety reasons; or ii. where it is required in an emergency to avoid injury or the loss of life, to avoid damage or loss of property or to prevent environmental harm. On becoming aware of the need for emergency work in accordance with Condition E71(a), the AA, the ER, the Planning Secretary and the EPA must be notified of the reasons for such work. Best endeavours must be used to notify all noise and/or vibration affected residents and owners/occupiers of properties identified sensitive land use(s) of the likely impact and duration of those work. b) Work, that meets the following criteria: i. construction that causes $L_{Aeq(15\ minute)}$ noise levels: • no more than 5 dB(A) above the rating background level at any residence in accordance with the ICNG, and • no more than the 'Noise affected' NMLs specified in Table 3 of the ICNG at other sensitive land use(s); and ii. construction that causes L_{AFmax} noise levels no more than 15 dB above the rating background level at any residence during the night period as defined in the ICNG. and iii. construction that causes: • continuous or impulsive vibration values, measured at the most affected residence no more than the preferred values for human exposure to vibration, specified in Table 2.2 of *Assessing Vibration: a technical guideline* (DEC, 2006), or • intermittent vibration values measured at the most affected residence no more than the preferred values for human exposure to vibration, specified in Table 2.4 *of Assessing Vibration: a technical guideline* (DEC, 2006). c) By Approval, including: i. where different construction hours, such as those for a rail possession, are permitted under an EPL in force in respect of the CSSI; or ii. works which are not subject to an EPL that are approved under an Out-of-Hours Work Protocol as required by Condition E72; or iii. negotiated agreements with directly affected residents and sensitive land use(s).	**Section 2.3**

CoA	Requirement	Reference
E72	An Out-of-Hours Work Protocol must be prepared to identify a process for the consideration, management and approval of work which is outside the hours defined in Conditions E69, and that are not subject to an EPL. The Protocol must be approved by the Planning Secretary before commencement of the Out-of-Hours Work. The Protocol must be prepared in consultation with the ER, AA and EPA. The Protocol must include: a) identification of low and high-risk activities and an approval process that considers the risk of activities, proposed mitigation, management, and coordination, including where: i. the ER and AA review all proposed out-of-hours activities and confirm their risk levels, ii. low risk activities can be approved by the ER in consultation with the AA, and iii. high risk activities that are approved by the Planning Secretary; b) a process for the consideration of out-of-hours work against the relevant NML and vibration criteria; c) a process for selecting and implementing mitigation measures for residual impacts in consultation with the community at each affected location, including respite periods. The measures must take into account the predicted noise levels and the likely frequency and duration of the out-of-hours works that sensitive land use(s) would be exposed to, including the number of noise awakening events; d) procedures to facilitate the coordination of out-of-hours work including those approved by an EPL or undertaken by a third party, to ensure appropriate respite is provided; and e) notification arrangements for affected receivers for approved out-of-hours work and notification to the Planning Secretary of approved low risk out-of-hours works. This condition does not apply if the requirements of Condition E71 are met.	**The CNVMP, Section 2.4**
E73	Except as permitted by an EPL, out-of-hours work that may be regulated through the Out-of-Hours Work Protocol as per Condition E72, but is not limited to: a) Carrying out work that if carried out during standard hours would result in a high risk to construction personnel or public safety based on a risk assessment carried out in accordance with AS/NZS ISO 31000:2009: "Risk management; or b) where the relevant roads authority has advised the Proponent in writing that carrying out the work during standard hours would result in a high risk to road network performance and a road occupancy licence will not be issued; or c) where the relevant utility service operator has advised the Proponent in writing that carrying out the work during standard hours would result in a high risk to the operation and integrity of the utility network; or d) work undertaken in a rail possession for operational or safety reasons. *Note: Other out-of-hours works can be undertaken with the approval of an EPL, or through the project's Out-of-Hours Work Protocol for works not subject to an EPL.*	**Section 2.3**

CoA	Requirement	Reference
E74	Mitigation measures must be implemented with the aim of achieving the following construction noise management levels and vibration objectives: a) construction 'Noise affected' NMLs established using the Interim Construction Noise Guideline (DECC, 2009); b) vibration criteria established using *the Assessing vibration: a technical guideline* (DEC, 2006) (for human exposure); c) Australian Standard AS 2187.2 - 2006 "*Explosives - Storage and Use - Use of Explosives*"; d) BS 7385 Part 2-1993 "*Evaluation and measurement for vibration in buildings Part 2*" as they are "applicable to Australian conditions"; and e) the vibration limits set out in the *German Standard DIN 4150-3: Structural Vibration- effects of vibration on structures* (for structural damage). Work that exceeds the noise management levels and/or vibration criteria must be managed in accordance with the Noise and Vibration CEMP sub-plan. *Note: The ICNG identifies 'particularly annoying' activities that require the addition of 5 dB(A) to the predicted level before comparing to the construction NML.*	**The CNVMP, Section 4.0**, **Section 8.0**
E75	Mitigation measures must be applied when the following residential ground-borne noise levels are exceeded: a) evening (6:00 pm to 10:00 pm) — internal $L_{Aeq(15\ minute)}$: 40 dB(A); and b) night (10:00 pm to 7:00 am) — internal $L_{Aeq(15\ minute)}$: 35 dB(A). The mitigation measures must be outlined in the Noise and Vibration CEMP sub-plan, including in any Out-of-Hours Work Protocol, required by Condition E72.	**Section 4.2.3**
E76	Noise generating work in the vicinity of community, religious, educational institutions, noise and vibration-sensitive businesses and critical working areas (such as exam halls, theatres, laboratories and operating theatres) resulting in noise levels above the NMLs must not be timetabled during sensitive periods, unless other reasonable arrangements with the affected institutions are made at no cost to the affected institution.	**Section 8.0**
E77	At no time can noise generated by construction exceed the National Standard for exposure to noise in the occupational environment of an eight-hour (8hr) equivalent continuous A-weighted sound pressure level of $L_{Aeq,8h}$ of 85 dB(A) for any employee working at a location near the CSSI.	**Section 8.6**
E78	Construction Noise and Vibration Impact Statements (CNVIS) must be prepared for work that may exceed the noise management levels, vibration criteria and/or ground-borne noise levels specified in Condition E74 and Condition E75 at any residence outside construction hours identified in Condition E69, or where receivers will be highly noise affected. The CNVIS must include specific mitigation measures identified through consultation with affected sensitive land use(s) and the mitigation measures must be implemented for the duration of the works. A copy of the CNVIS must be provided to the AA and ER prior to the commencement of the associated works. The Planning Secretary may request a copy/ies of CNVIS.	**This report, Section 8.5**
E79	Owners and occupiers of properties at risk of exceeding the screening criteria for cosmetic damage must be notified before work that generates vibration commences in the vicinity of those properties. If the potential exceedance is to occur more than once or extend over a period of 24 hours, owners and occupiers are to be provided a schedule of potential exceedances on a monthly basis for the duration of the potential exceedances, unless otherwise agreed by the owner and occupier. These properties must be identified and considered in the Noise and Vibration CEMP Sub-plan required by Condition C8 and the Community Communication Strategy required by Condition B1.	**Section 8.0**
E80	Vibration testing must be undertaken before and during vibration generating activities that have the potential to impact on heritage items to identify	**Section 6.1,**

CoA	Requirement	Reference
	minimum working distances to prevent cosmetic damage. In the event that the vibration testing and attended monitoring shows that the preferred values for vibration are likely to be exceeded, the construction methodology must be reviewed and, if necessary, additional mitigation measures implemented.	**Section 8.0**
E81	Advice from an independent heritage specialist must be sought on methods and locations for installing equipment used for vibration, movement and noise monitoring at heritage-listed structures. *Note: The heritage specialist is to provide advice prior to installing equipment that may impact the heritage significance or structural integrity of the heritage listed structures.*	**Section 8.0**
E83	All work undertaken for the delivery of the CSSI, including those undertaken by third parties (such as utility relocations), must be coordinated to ensure respite periods are provided. This must include: a) rescheduling work to provide respite to impacted noise sensitive land use(s) so that the respite is achieved; or b) the provision of alternative respite or mitigation to impacted noise sensitive land use(s); and c) the provision of documentary evidence to the AA in support of any decision made in relation to respite or mitigation. The consideration of respite must also include all other CSSI, SSI and SSD projects which may cause cumulative and/or consecutive impacts at receivers affected by the delivery of the CSSI.	**Section 8.0, Section 8.2**
E119	The Proponent must coordinate Work with adjoining Inland Rail Projects, including any work to relocate or connect utilities, to minimise cumulative and consecutive noise and vibration impacts and maximise respite for affected sensitive land uses. Coordination and mitigation measures must be detailed in the Construction Noise and Vibration management Sub-plan required by Condition C9.	**Section 8.0, Section 8.2, Section 9.0**
E122	Property damage caused directly or indirectly (for example from vibration or from groundwater change) by the construction or operation must be rectified at no cost to the owner. Alternatively, compensation may be provided for the property damage as agreed with the property owner.	**Section 6.1**

1.0 Introduction

SLR Consulting Australia Pty Ltd (SLR) has been engaged by Martinus Rail (MR) to prepare a construction noise and vibration impact statement (CNVIS) for the construction work at the Pearson Street Bridge and Cassidy Footbridge enhancement sites in Wagga Wagga, NSW. These sites form part of the Albury to Illabo (A2I) section of Inland Rail (the Project).

This assessment has been prepared in accordance with the Construction Noise and Vibration Management Plan (CNVMP) for the A2I section of the Project.

This report assesses the potential construction noise and vibration impacts for the construction work associated with the Pearson Street Bridge and Cassidy Footbridge enhancement sites. An explanation of the specialist acoustic terminology used in this report is provided in **Appendix A**.

2.0 Project Description

Inland Rail is an approximate 1,600 kilometres (km) freight rail network that will connect Beveridge and Kagaru via regional Victoria, New South Wales and Queensland. The Inland Rail route would involve using approximately 1,000 km of existing track (with enhancements and upgrades where necessary) and 600 km of new track, passing through 30 local government areas. Inland Rail will accommodate double-stacked freight trains up to 1,800 metres (m) long and 6.5 m high.

The Albury to Illabo (A2I) section (the Project) forms a key component of the Inland Rail program. It is a 185 km section of existing rail corridor located in regional NSW between the towns of Albury and Illabo. Works would include track realignment, lowering and/or modification within the existing rail corridor, modification, removal or replacement of bridge structures (rail, road and/or pedestrian bridges), raising or replacing signal gantries, level-crossing modifications and other associated works. This CNVIS is associated with construction work at the Pearson Street Bridge and Cassidy Footbridge enhancement sites in Wagga Wagga.

Relevant noise and vibration conditions from the Conditions of Approval (CoA) are detailed within the compliance table at the beginning of this document and will be complied with during the work.

2.1 Scope of this CNVIS

The focus of this CNVIS is the construction work associated with the Pearson Street Bridge and Cassidy Footbridge enhancement sites in Wagga Wagga. Construction work will include the following:

- Establishment of temporary site facilities, including site office/shed and materials laydown areas
- Site Compound Operation
- Utility works
- Earthworks

Cassidy Footbridge

- Erection of a temporary scaffold pedestrian bridge and demobilisation of the temporary structure at completion of the new Cassidy footbridge.
- Demolition of Cassidy footbridge.
- Construction of the new Cassidy footbridge

Pearson Street Bridge

- Trackwork, including track tamping
- Protection barriers
- Drainage works
- Signalling works

Further details of work activities are outlined in **Section 5.1**. The work areas are surrounded by a combination of urban and suburban residential, commercial, industrial, educational and medical receivers. Additionally, there are several childcare centres, places of worship, hotels, libraries and public buildings at various setbacks from the main areas of work. The Project location, work areas and surrounding receivers are shown in **Figure 1**.

2.2 Hours of work

In accordance with the Construction Noise and Vibration Management Plan (CNVMP) and CoA E69 construction work must be undertaken within the approved standard construction hours:

a) 7:00am to 6:00pm Monday to Friday, inclusive;

b) 7:00am to 6:00pm Saturday and

c) At no time on Sundays or public holidays.

2.2.1 Highly Noise Intensive Work

As outlined in the CoA E70, any highly noise intensive works that result in an exceedance of the applicable NML at the same receiver must only be undertaken:

a) Between 08:00am – 06:00pm Monday to Friday;

b) Between 08:00am – 01:00pm Saturday; and

c) If continuously, then not exceeding (3) hours, with a maximum cessation of work of not less than one hour.

The CoA defines ‘highly noise intensive works’ as those identified as annoying under the Interim Construction Noise Guideline (ICNG) and include:

- Use of power saws, such as used for cutting timber, rail lines, masonry, road pavement or steel work;
- Grinding metal, concrete or masonry;
- Rock drilling;
- Line drilling;
- Vibratory rolling;
- Bitumen milling or profiling;
- Jackhammering, rock hammering or rock breaking;
- Impact piling; and
- Tamping (for rail projects).

2.3 Variation to hours of work

Notwithstanding CoA E69 and E70, work may be undertaken outside the hours specified in the CoA E71 circumstances (a, b, or c):

a) Safety and Emergencies

b) Work, that meets specific criteria

c) By Approval

Note: refer to **Compliance Table** for further detail.

2.4 Justification of Out of Hours Work (OOHW)

Work activities that may be required or proposed to be undertaken outside of standard working hours will be managed in accordance with the OOHW Protocol as defined in CoA E72 and E73, unless the work is regulated by an EPL.

All work on or adjacent to roads would be carried out in accordance with a relevant Traffic Control Plan (TCP), Road Occupancy Licence (ROL) and/or rail possession to facilitate safe work near live road/rail traffic. Where an ROL/rail possession cannot be obtained for the approved project hours and/or proposed works cannot be undertaken safely during these hours, some works will be required to be undertaken outside of standard hours (ie Out of Hours Work, OOHW).

As outlined in the ICNG, work undertaken on public infrastructure may need to be undertaken outside the recommended standard hours. For this project the need is based on a requirement to sustain the operational integrity of public infrastructure, as works to restore operation of the infrastructure provide benefit to the greater community (ie more than just local residents).

Further detail around the specific work tasks, duration and justification of OOHW must be identified in the OOHW permit, required by the OOHW Protocol or EPL.

3.0 Existing Environment

The existing ambient noise environment was described in Environmental Impact Statement (EIS), Technical Paper 6 – Noise and Vibration (Non-Rail) for the Albury to Illabo project. This section provides details of the existing ambient noise environment relevant to Pearson Street Bridge and Cassidy Footbridge enhancement sites.

The noise catchment areas (NCAs) used are consistent with the NCAs described in the EIS and are shown in **Figure 1** and **Figure 2** with the receiver classifications and approximate noise monitoring locations. Sensitive land uses and receiver classifications within the project area were confirmed through a detailed land use survey undertaken in August 2024. Results of the land use survey have been incorporated into the receiver classifications shown in **Figure 1** and **Figure 2**.

3.1 Background Noise Levels

Background noise levels have been referenced from the baseline noise survey undertaken as part of the EIS and reproduced in the CNVMP. The background noise levels relevant to the Pearson Street Bridge and Cassidy Footbridge enhancement sites are summarised in **Table 1**.

Table 1 Background Noise Levels

Noise Monitoring Location	NCA	Rating background Level (RBL) dBA NPfI defined time periods[1]		
		Daytime period	Evening period	Night-time period
11	NCA10	46	45	38
12	NCA11	48	47	37

Note 1: The assessment periods are the daytime which is 7 am to 6 pm Monday to Saturday and 8 am to 6 pm on Sundays and public holidays, the evening which is 6 pm to 10 pm, and the night-time which is 10 pm to 7 am on Monday to Saturday and 10 pm to 8 am on Sunday and public holidays. See the NSW EPA Noise Policy for Industry (NPfI).

4.0 Assessment Criteria

4.1 Construction Noise and Vibration Guidelines

The standards and guidelines relevant to the Project are listed in **Table 2**. These guidelines aim to protect the community and environment from excessive noise and vibration impacts during construction of projects.

Table 2 Construction Noise and Vibration Standards and Guidelines

Guideline/Policy Name	Where Guideline Used
Inland Rail NSW Construction Noise and Vibration Framework (CNVF)	Assessment and management protocols for airborne noise, ground-borne noise and vibration impacts for construction of NSW Inland Rail projects
Interim Construction Noise Guideline (ICNG) (DECC, 2009)	Assessment of airborne noise impacts on sensitive receivers
Environmental Criteria for Road Traffic Noise (ECRTN) (EPA, 1999)	Contains guidance for assessing potential sleep disturbance impacts
Road Noise Policy (RNP) (DECCW, 2011)	Assessment of construction traffic impacts
BS 7385 Part 2-1993 Evaluation and measurement for vibration in buildings Part 2, BSI, 1993	Assessment of vibration impacts (structural damage) to non-heritage sensitive structures
DIN 4150:Part 3-2016 Structural vibration – Effects of vibration on structures, Deutsches Institut für Normung, 2016	Screening assessment of vibration impacts (structural damage) to heritage sensitive structures, where the structure is found to be unsound
Assessing Vibration: a technical guideline (DEC, 2006)	Assessment of vibration impacts on sensitive receivers
AS2187.2:2006 Explosives – Storage and use Part 2: Use of explosives	Assessment of impacts from blasting activities
*Construction Noise and Vibration Guideline (Public Transport Infrastructure) (*CNVG-PTI) (Transport for NSW, 2023)	Utilised for minimum working distances for vibration intensive work.

4.2 Noise Management Levels

The noise management levels (NMLs) for residential and other sensitive receivers have been adopted from the CNVMP, as determined in the EIS. Receiver types and locations are shown **Figure 1** and **Figure 2**.

4.2.1 Residential Receivers

Project-specific NMLs for residential receivers were determined for each NCA. NMLs for other sensitive receivers are fixed values adopted from the Interim Construction Noise Guideline (ICNG) (DECC, 2009) and outlined in the CNVMP. Residential NMLs for NCAs surrounding the Pearson Street Bridge and Cassidy Footbridge enhancement sites are shown in **Table 3**.

Table 3 Residential Noise Management Levels

NCA	Noise Management Level ($L_{Aeq(15minute)}$ - dB)				Sleep disturbance Screening Level (RBL +15dB or 52 dB)	Sleep Awakening Reaction Level
	Approved Hours (RBL +10dB)	Out of Hours[1,2]				
		Daytime (RBL +5dB)	Evening (RBL +5dB)	Night-time (RBL +5dB)		
NCA10	56	51	50	43	53	65
NCA11	58	53	52	42	52	65

Note 1: Approved Construction Hours are Monday to Saturday 7 am to 6 pm, as defined in CoA E69.

Note 2: Work outside of the Approved Hours is defined as OOHW = Out of Hours Work. Daytime out of hours is Sunday and public holidays between 8 am to 6 pm. Evening is 6pm to 10pm Monday – Sunday (including public holidays). Night-time is 10pm to 7am Monday – Saturday and 10pm to 8am Sunday (including public holidays).

Highly Noise Affected

In addition to the NMLs presented above, the ICNG highly noise affected level (>75 dBA) represents the point above which there may be strong community reaction to noise and is applicable to all residential receivers during approved project hours as outlined in the CNVMP and the ICNG.

Sleep Disturbance

Where the sleep disturbance screening level (RBL + 15 dB or 52 dB L_{Amax}, whichever is greater, see **Table 3**) is exceeded, further assessment is required to determine whether the 'awakening reaction' level of L_{Amax} 65 dBA (external) would be exceeded and the likely number of these events. The awakening reaction level is the level above which residents are likely to be awoken from sleep.

4.2.2 Other Sensitive Land Uses and Commercial Receivers

The ICNG NMLs for 'other sensitive' non-residential land uses are shown in **Table 4**.

The ICNG references *AS2107:2016 Acoustics – Recommended design sound levels and reverberation times for building interiors* for criteria for 'other sensitive' receivers which are not listed in the guideline. Neither the ICNG nor AS2107 provide criteria for child care centres so the Association of Australian Acoustical Consultants *Guideline for Child Care Centre Acoustic Assessment* (GCCCAA) has been referenced.

Table 4 NMLs for 'Other Sensitive' Receivers

Land Use	Noise Management Level $L_{Aeq(15minute)}$ (dB) (Applied when the property is in use)	
	Internal	External
ICNG 'Other Sensitive' Receivers		
Classrooms at schools and other educational institutions	45	55[1,5]
Hospital wards and operating theatres	45	65[2]
Places of worship	45	55[1]
Active recreation areas (characterised by sporting activities which generate noise)	-	65
Passive recreation areas (characterised by contemplative activities that generate little noise)	-	60

Land Use	Noise Management Level $L_{Aeq(15minute)}$ (dB) (Applied when the property is in use)	
	Internal	External
Commercial	-	70
Industrial	-	75
Non-ICNG 'Other Sensitive' Receivers		
Hotel – daytime & evening[3]	50	60[1,5]
Hotel – night-time[3]	35	45[1,5]
Child care centres – activity areas[4]	40	50[1,5]
Child care centres – sleeping areas[4]	35	45[1,5]
Library[3]	45	55[1]
Public Building[3]	50	60[1]
Aged Care	Considered as Residential	

Note 1: It is assumed that these receivers have windows partially open for ventilation which results in internal noise levels being around 10 dB lower than the external noise level.

Note 2: It is assumed that these receivers have fixed windows which conservatively results in internal noise levels being around 20 dB lower than the external noise level.

Note 3: Criteria taken from AS2107.

Note 4: Criteria taken from Association of Australian Acoustical Consultants Guideline for Child Care Centre Acoustic Assessment.

Note 5: Some receivers near highways or rail lines may have building façade mitigation and air-conditioning. Where evidence is provided a 20dB reduction from external to internal may be adopted.

4.2.3 Ground-borne Noise

Construction work can cause ground-borne (structure-borne or regenerated) noise impacts in nearby buildings when vibration intensive equipment is in use, such as during tunnelling or excavation work using tunnel boring machines, roadheaders or rockbreakers. Vibration can be transmitted through the ground and into nearby buildings, which can then create audible noise impacts inside the building.

Ground-borne noise NMLs are applicable where ground-borne noise levels are likely to be higher than airborne noise levels, which can occur where work is underground or where surface work is shielded by noise barriers, other structures or façade mitigation at the receiver. Ground-borne noise is generally found to generate impacts during the evening and night-time periods when ambient noise levels are often much lower, and ground-borne noise is more prominent.

The internal ground-borne noise NMLs for residential receivers are shown in **Table 5**.

Table 5 Internal ground-borne NMLs

Receiver Type	Noise Management Level ($L_{Aeq(15minute)}$ – dBA)		
	Daytime[1]	Evening[2]	Night-time[2]
Residential	n/a	40	35

Note 1: Daytime ground-borne noise NMLs are not specified in the ICNG of CoA.

Note 2: Specified in the ICNG and CoA E75.

For other sensitive receivers, the ICNG does not provide guidance in relation to acceptable ground-borne noise levels. For the purpose of this CNVIS, the internal airborne NMLs presented in **Table 4** will also be adopted for ground-borne noise.

4.3 Vibration Criteria

The effects of vibration from construction work can be divided into three categories:

- Those in which the occupants of buildings are disturbed (**human comfort**). People can sometimes perceive vibration impacts when vibration generating construction work is located close to occupied buildings. Vibration from construction work tends to be intermittent in nature and the EPA's Assessing Vibration: a technical guideline (2006) (AV:ATG) provides criteria for intermittent vibration based on the Vibration Dose Value (VDV), as shown in **Table 6**. While the construction activities for the proposal are generally not expected to result in continuous or impulsive vibration impacts, corresponding criteria are provided in **Table 7**.
- Those where building contents may be affected (**building contents**). People perceive vibration at levels well below those likely to cause damage to building contents. For most receivers, the human comfort vibration criteria are the most stringent and it is generally not necessary to set separate criteria for vibration effects on typical building contents. Exceptions to this can occur when vibration sensitive equipment, such as electron microscopes or medical imaging equipment, are in buildings near to construction work. No such equipment has been identified in the study area.
- Those where the integrity of the building may be compromised (**structural/cosmetic damage**). If vibration from construction work is sufficiently high it can cause cosmetic damage to elements of affected buildings. Industry standard cosmetic damage vibration limits are specified in British Standard BS 7385 and German Standard DIN 4150. The limits are shown in **Table 8** and **Table 9**.

Table 6 Human Comfort Vibration – Vibration Dose Values for Intermittent Vibration

Building Type	Assessment Period	Vibration Dose Value[1] ($m/s^{1.75}$)	
		Preferred	Maximum
Critical Working Areas (eg operating theatres or laboratories)	Day or night-time	0.10	0.20
Residential	Daytime	0.20	0.40
	Night-time	0.13	0.26
Offices, schools, educational institutions and places of worship	Day or night-time	0.40	0.80
Workshops	Day or night-time	0.80	1.60

Note 1: The VDV accumulates vibration energy over the daytime and night-time assessment periods, and is dependent on the level of vibration as well as the duration.

Table 7 Human Comfort Vibration – Preferred and Maximum Weighted Root Mean Square Values for Continuous and Impulsive Vibration Acceleration (m/s^2) 1–80 Hz

Location	Assessment period	Preferred values		Maximum values	
		z-axis	x- and y-axis	z-axis	x- and y-axis
Continuous vibration					
Residential	Daytime	0.010	0.0071	0.020	0.014
	Night-time	0.007	0.005	0.014	0.010
Offices, schools, educational institutions and places of worship	Day or night-time	0.020	0.014	0.040	0.028
Workshops	Day or night-time	0.04	0.029	0.080	0.058
Impulsive vibration					
Residential	Daytime	0.30	0.21	0.60	0.42
	Night-time	0.10	0.071	0.20	0.14
Offices, schools, educational institutions and places of worship	Day or night-time	0.64	0.46	1.28	0.92
Workshops	Day or night-time	0.64	0.46	1.28	0.92

Table 8 Cosmetic Damage – BS 7385 Transient Vibration Values for Minimal Risk of Damage

Group	Type of Building	Peak Component Particle Velocity in Frequency Range of Predominant Pulse	
		4 Hz to 15 Hz	15 Hz and Above
1	Reinforced or framed structures. Industrial and heavy commercial buildings	50 mm/s at 4 Hz and above	
2	Unreinforced or light framed structures. Residential or light commercial type buildings	15 mm/s at 4 Hz increasing to 20 mm/s at 15 Hz	20 mm/s at 15 Hz increasing to 50 mm/s at 40 Hz and above

Note 1: Where the dynamic loading caused by continuous vibration may give rise to dynamic magnification due to resonance, especially at the lower frequencies where lower guide values apply, then the guide values may need to be reduced by up to 50%.

Table 9 Cosmetic Damage – DIN 4150 Guideline Values for Short-term Vibration on Structures

Group	Type of Structure	Guideline Values Vibration Velocity (mm/s)				
		Foundation, All Directions at a Frequency of			Topmost Floor, Horizontal	Floor Slabs, Vertical
		1 to 10 Hz	10 to 50 Hz	50 to 100 Hz	All frequencies	All frequencies
1	Buildings used for commercial purposes, industrial buildings and buildings of similar design	20	20 to 40	40 to 50	40	20
2	Residential buildings and buildings of similar design and/or occupancy	5	5 to 15	15 to 20	15	20

Group	Type of Structure	Guideline Values Vibration Velocity (mm/s)				
		Foundation, All Directions at a Frequency of			Topmost Floor, Horizontal	Floor Slabs, Vertical
		1 to 10 Hz	10 to 50 Hz	50 to 100 Hz	All frequencies	All frequencies
3	Structures that, because of their particular sensitivity to vibration, cannot be classified as Group 1 or 2 **and** are of great intrinsic value (eg heritage listed buildings)	3	3 to 8	8 to 10	8	20[1]

Note 1: It may be necessary to lower the relevant guideline value markedly to prevent minor damage.

4.3.1 Heritage Buildings or Structures

Heritage listed buildings and structures should be considered on a case-by-case basis but BS 7385 notes that buildings of historical value should not be assumed to be more sensitive to vibration, unless structurally unsound. Where a heritage building is deemed to be sensitive, the more stringent DIN 4150 Group 3 guideline values in **Table 9** can be applied.

Heritage Structures

Table 10 includes heritage structures from the State Heritage Register, Local Heritage Items and Local Environment Plan that are within 100 m of construction work areas at Cassidy Footbridge and Pearson Street Bridge.

Table 10 Heritage Items Nearby Construction Work Areas

Heritage Item	Listing	Nearest Work Location	Construction/Condition
Mount Erin Convent Chapel, High School, and Grounds	Local Environment Plan I260	Cassidy Footbridge (50m)	This complex comprises of a number of buildings, many of which date to the late 19th century. Heritage items include the Mount Erin retaining wall and gardens.
Wagga Wagga Railway Station and Yard Group	State Heritage Register 01279, ARTC s170 4280250	Cassidy Footbridge (200m)	The Wagga Wagga Railway Station is a substantial and ornate structure, built in the Victorian Free Classical style. West of the station building is the Wagga Wagga footbridge ('Mothers Footbridge'), which was built in 1936. It is a simple steel girder bridge with a steel post-and-rail safety barrier and straight lateral bracing post). The footbridge is in fair condition. Immediately west of the station building is the Wagga Wagga Railway Museum. The museum is a single-storey brick building with a corrugated iron sheet clad roof and also includes multiple buildings across the corridor, including the Wagga Wagga Rail Heritage Gang Sheds.
Wagga Wagga Showground, Kyeamba Smith Hall and Grandstand[1]	Local Environment Plan I246	Pearson Street Bridge (50m)	The Wagga Wagga Showground includes a number of early and mid-20th century buildings, including the 'Neil Skeers' Grandstand, the 'Kyeamba Smith' Hall and several other contemporary buildings. The Grandstand and the Hall appear to be in fair condition. The small area within the Project site is used as a campground.

Note 1: The Grandstand and Hall are further than 100 m from the Pearson Street Bridge work area, although some buildings within the camping ground Wagga Wagga Showground camping ground may fall within 100 m of the work areas.

The Mount Erin Convent Chapel, Highschool and Grounds and Wagga Wagga Railway Station and Yard group are within the Wagga Wagga Conservation Area. The Wagga Wagga Conservation Area also encompasses many 19th and early 20th century buildings, including the nearest residential dwellings to the Cassidy Footbridge work area (e.g., 2 Kildare St, 1 Norman St, 22 and 24-26 Brookong Ave).

Further information on the heritage items in **Table 10** are provided in the Construction Cultural Heritage Management Plan (CCHMP). No structures nearby the work areas identified in this CNVIS are flagged as structurally unsound in the CCHMP.

Pre- and post-condition surveys of heritage structures are to be conducted when relevant (ie if the heritage buildings are within the minimum working distances for heritage items for nominated vibration-intensive equipment) refer to **Section 4.3.3** and **Section 6.1**.

4.3.2 Buried Pipework and Utilities

The German Standard DIN 4150-3:1999 “Structural Vibration Part 3: Effects of vibration in structures” provides guideline values for evaluating the effect of vibration on buried pipework. The values are based on the assumption that pipes have been manufactured and laid using current technology. Additional considerations may be required at junctions. The recommended limits for short term vibration to ensure minimal risk of damage are presented numerically in **Table 11**.

Table 11 Guideline Values for Short Term Vibration on Buried Pipework

Line	Pipe Material	Guideline value at the Pipe[1,2] (PPV mm/s)
1	Steel (including welded pipes)	100
2	Clay, concrete, reinforced concrete, pre stressed concrete, metal (with or without flange)	80
3	Masonry, plastic[3]	50

Note 1: Mounting equipment directly onto pipes may not be possible. If the vibration source is not immediately next to the pipework, measurements can be made on the ground surface to obtain an estimate. Generally, this vibration level will be greater than the level measured directly on the pipework.

Note 2: The guideline values may be reduced by 50% without further analysis when evaluating the effects of long-term vibration on buried pipework.

Note 3: Drainpipes shall be evaluated using the values given for Line 3.

Buried Pipework and Utilities

In the Pearson Street Bridge Detail Design Report (document no. 5-0052-230-PEN-W2-RP-0001), an APA gas line identified nearby the Pearson St Bridge works and has been identified as requiring relocation. Any work conducted nearby these utilities will be undertaken in accordance with the asset owner’s guidelines to ensure there are no adverse vibration impacts to the utilities. The following vibration limits (outlined in APA Guideline *“Guidelines for Works Near Existing Gas Assets 400-STD-AM-0001”*) must not be exceed at any point on the pipe:

a) For cast iron mains: 5 mm/s maximum Peak Particle Velocity (PPV) measured on the pipe.

b) For steel pipe with a coal tar enamel (CTE) coating or with poor coating health: 10 mm/s maximum PPV measured on the pipe

c) For non-coal tar enamel pipe coatings and other pipe materials (i.e., steel, PE, PVC or Nylon): 20 mm/s maximum PPV measured on the pipe.

The APA guideline document also states:

> *Note: Cast iron mains are particularly susceptible to damage by vibration. The PPV limit may not prevent leaks from cast iron and may require additional gas leakage survey activities during works in accordance with Section 5.3 of the APA guideline*.

Futher detail is provided in SLR report (610.031317-M06-v0.1-20241213).

No other buried pipework or utilities have been identified in this CNVIS at risk of impact from construction vibration. Therefore, no additional consideration or assessment has been undertaken in relation to buried pipework and utilities. Where buried pipework or utilities are uncovered during works, they should be identified and managed in accordance with the measures outlined in the CNVMP.

4.3.3 Minimum Working Distances for Vibration Intensive Work

Minimum working distances for typical vibration intensive construction equipment have been sourced from the Transport for NSW (TfNSW) Construction Noise and Vibration Guideline (Public Transport Infrastructure) (CNVG-PTI) and are shown in **Table 12**. The minimum working distances are for both cosmetic damage (from BS 7385 and DIN 4150) and human comfort (from the NSW EPA Assessing Vibration: a technical guideline). They are calculated from empirical data which suggests that where work is further from receivers than the quoted minimum distances then impacts are not considered likely.

The minimum working distances listed in the CNVG were used to derive the minimum working distances required for cosmetic damage to industrial and heavy commercial buildings (also reinforced or framed structures). The following pseudo-power law relationship has been used in the derivations:

$$V_2 = V_1 \times \left(\frac{D_1}{D_2}\right)^B$$

where a site exponent value of B = 1.6 is adopted for the calculations, as per AS2187.2:2006

Table 12 Recommended Minimum Working Distances from Vibration Intensive Equipment

Plant Item	Rating/Description	Minimum Distance			
		Cosmetic Damage			Human Response (NSW EPA Guideline)[2]
		Residential and Light Commercial (BS 7385)	Heritage Items[1] (DIN 4150, Group 3)	Industrial and Heavy Commercial (BS 7385)	
Vibratory Roller	<50 kN (1–2 tonne)	5 m	11 m	3 m	15 m to 20 m
	<100 kN (2–4 tonne)	6 m	13 m	3 m	20 m
	<200 kN (4–6 tonne)	12 m	25 m	6 m	40 m
	<300 kN (7–13 tonne)	15 m	31 m	8 m	100 m
	>300 kN (13–18 tonne)	20 m	40 m	10 m	100 m
	>300 kN (>18 tonne)	25 m	50 m	12 m	100 m
Small Hydraulic Hammer	300 kg (5 to 12 t excavator)	2 m	5 m	1 m	7 m
Medium Hydraulic Hammer	900 kg (12 to 18 t excavator)	7 m	15 m	4 m	23 m

Plant Item	Rating/Description	Minimum Distance			
		Cosmetic Damage			Human Response (NSW EPA Guideline)[2]
		Residential and Light Commercial (BS 7385)	Heritage Items[1] (DIN 4150, Group 3)	Industrial and Heavy Commercial (BS 7385)	
Large Hydraulic Hammer	1,600 kg (18 to 34 t excavator)	22 m	44 m	11 m	73 m
Vibratory Pile Driver	Sheet piles	2 m to 20 m	5 m to 40 m	1 to 10 m	20 m
Piling Rig – Bored	≤ 800 mm	2 m (nominal)	5 m	1 m	4 m
Jackhammer	Hand held	1 m (nominal)	3 m	1 m	2 m
Ballast Tamping[2]	N/A	5 m	10 m	3 m	30 m

Note 1: Minimum working distances for heritage items that have been identified as structurally unsound or otherwise particularly sensitive to vibration. These distances have been calculated based on the 2.5 mm/s PPV criteria from DIN 4150 and the cosmetic damage minimum working distances presented in the CNVG-PTI with reference to BS 7385.

Note 2: Based on SLR measurement data. The human response minimum working distance for Ballast Tamping is determined based on a residential night-time preferred VDV criterion.

The minimum working distances are indicative and will vary depending on the particular item of equipment and local geotechnical conditions. The distances apply to cosmetic damage of typical buildings under typical geotechnical conditions.

4.4 Traffic on Surrounding Roads

The potential impacts from project related traffic on the surrounding public roads are assessed using the NSW EPA *Road Noise Policy* (RNP). An initial screening test is first applied to evaluate if existing road traffic noise levels are expected to increase by more than 2.0 dB. Where this is considered likely, further assessment is required using the RNP criteria shown in **Table 13**.

Table 13 RNP/NCG Criteria for Assessing Traffic on Public Roads

Road Category	Type of Project/Land Use	Assessment Criteria (dB)	
		Daytime (7 am – 10 pm)	Night-time (10 pm – 7 am)
Freeway/ arterial/ sub-arterial roads	Existing residences affected by additional traffic on existing freeways/arterial/sub-arterial roads generated by land use developments	$L_{Aeq(15hour)}$ 60 (external)	$L_{Aeq(9hour)}$ 55 (external)
Local roads	Existing residences affected by additional traffic on existing local roads generated by land use developments	$L_{Aeq(1hour)}$ 55 (external)	$L_{Aeq(1hour)}$ 50 (external)

5.0 Noise Assessment

The potential construction noise levels from the Project have been predicted using ISO 9613:2 algorithm in SoundPLAN noise modelling software. The model includes ground topography, buildings and representative noise sources from the Project.

5.1 Work Scenarios

Noise modelling scenarios have been determined based on key Project noise generating stages, supplied by the Project team. A detailed description of each work scenario and the total sound power levels (LW) are provided in **Table 14**. A summary of construction work periods and schedule required for each scenario is shown in **Table 15**, as per the working hours defined in the CNVMP. The locations of the various work scenarios are shown in **Figure 3** and **Figure 4**.

Table 14 Work Scenario Descriptions

ID	Scenario	Description	Total Lw
Cassidy Parade Footbridge			
W.001	Site Establishment / Demobilisation	• Site Compound delivery and set up • Access road and laydown construction	116
W.002	Compound Operation	• Operation of the site compound • Delivery of materials/equipment	113
W.003	SAQP	• Contamination sampling	114
W.004	Utility Work	• Installation of proposed drainage	117
W.005	Earthwork	• Earthworks	118
W.006	Temporary Pedestrian Bridge Work	• Ground preparation • Scaffold erection and demobilisation including cranage	116
W.007	Pedestrian Bridge Demolition	• Demolition of existing pedestrian bridge	123
W.008	Pedestrian Bridge Work - Peak	• Construction of new pedestrian bridge including highly noise intensive work	119
W.009	Pedestrian Bridge Work - Typical	• Construction of new pedestrian bridge excluding highly noise intensive work	115
Pearson Street Bridge			
W.010	Site Establishment / Demobilisation	• Site Compound delivery and set up • Access road and laydown construction	116
W.011	Compound Operation	• Operation of the site compound • Delivery of materials/equipment	115

W.019	Drainage Work	✓	✓	✓	✓	Nov-25	4 months
W.020	Signalling Work	✓	✓	✓	✓	Aug-25	4 months

Note 1: Daytime out of hours is 8 am to 6 pm on Sunday and public holidays.

Note 2: Evening is 6 pm to 10 pm Monday – Sunday (including public holidays).

Note 3: Night is 10 pm to 7 am Monday – Saturday and 10pm to 8am Sunday (including public holidays).

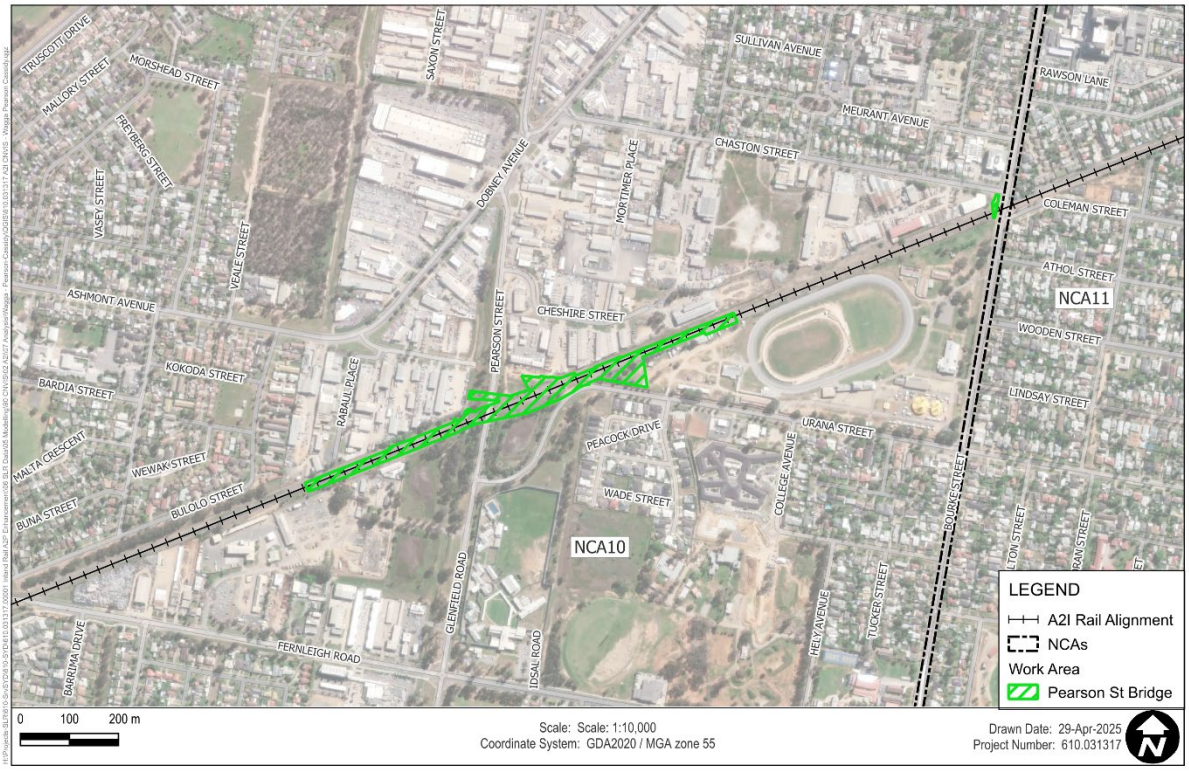
Note 4: Where works are expected to occur outside of the standard working hours, further detail around the specific work tasks, duration and justification of OOHW must be identified in the OOHW permit, required by the OOHW Protocol or EPL.

Note 5: Works scenarios at the enhancement sites may occur simultaneously during enhancement works and the total duration for the completion of all works is expected to be approximately 18 months each.

Note 6: Works will be completed across two work periods at the beginning of works to erect the temporary scaffold pedestrian bridge, and the demobilisation of the structure at the completion of the new Cassidy footbridge. The likely duration is expected for both work periods.

Figure 3 Construction Work Locations (Cassidy Parade Footbridge)

Figure 4 Construction Work Locations (Pearson Street Bridge)



5.1.1 Modelling Scenarios and Equipment

The assessment uses 'realistic worst-case' scenarios to determine the impacts from the noisiest 15-minute period that is likely to occur for each work scenario, as required by the ICNG. Sound power levels (L_W) for the construction equipment used in the modelling are listed in **Appendix B**.

5.2 Predicted Noise Levels

The following overview is based on the predicted impacts at the most affected receivers and is representative of the worst-case noise levels that are likely to occur during construction.

The assessment shows the predicted 'mitigated' impacts based on the exceedance of the noise management levels, as per the categories in **Table 16**. The mitigation and management measures adopted for this CNVIS are provided in **Section 8.0**.

Table 16 Exceedance Bands and Impact Colouring

Subjective Classification	Exceedance of Noise Management Level		Impact Colouring
	Daytime	Out of Hours	
Negligible	No exceedance	No exceedance	
Noticeable	-	1 to 5 dB	
Clearly Audible	1 to 10 dB	6 to 15 dB	
Moderately Intrusive	11 to 20 dB	16 to 25 dB	
Highly Intrusive	> 20 dB	> 25 dB	

A summary of the number of buildings where NML exceedances were predicted for the various work scenarios is shown in **Table 17**. The number of receivers above the 'highly noise affected' (HNA) level are also included in the table. Maps of the predicted worst-case noise impacts are presented in **Appendix C**.

The assessment presents the combined predicted noise impacts for each scenario. Meaning, the worst-case result at each receiver is considered from all potential work areas where each scenario is to be undertaken.

The assessment is generally considered conservative as the calculations assume several items of construction equipment are in use at the same time within individual scenarios. As outlined in **Section 5.1.1,** the assessment uses 'realistic worst-case' scenarios to determine the impacts from the noisiest 15-minute period that is likely to occur for each work scenario.

The exceedances shown in **Table 17** are therefore representative of a 'realistic worst-case' 15-minute period, and are unlikely to occur for extended periods of time throughout the entire construction period at any given receiver.

The indicative work durations presented in **Table 15** represent a window of time where the scenarios could occur, and does not represent the entire duration of the exceedances shown in **Table 17**.

In reality, there would frequently be periods when construction noise levels are much lower than the worst-case levels predicted as well as times when no equipment is in use and no noise impacts occur.

Note 1: Highly noise affected, based on ICNG definition (i.e. predicted LAeq(15minute) noise at residential receiver is greater than 75 dBA).
Note 2: Based on worst-case predicted noise levels

A summary of the predicted worst-case noise levels is shown below for each work area:

Cassidy Parade Footbridge

- 'Highly intrusive' noise impacts are predicted at the nearest residential receivers for all work scenarios during approved daytime and daytime OOHW periods, with the greatest impact occurring during *W.007*. The addresses of the residential receivers impacted by OOHW are provided in **Appendix D**.
- Constructions works on the main span of the Cassidy footbridge will be undertaken during a possession. As a result, OOHWs during the OOH day time, evening and night-time periods are likely to be required. Where bridge works are to occur in these periods, 'highly intrusive' noise impacts are predicted at the nearest residential receivers during scenarios *W.007* to *W.009*.
    - Compound operations outlined in *W.002* are generally expected to be limited to approved daytime hours. Impacts associated with OOHWs presented in **Table 17** are only expected when works on the main bridge span are being undertaken under a rail possession.
- 'Highly noise affected' (HNA) residential receivers are predicted in all work scenarios, with the greatest number of highly noise affected receivers occurring for *W.007*. Up to 11 receivers are expected to be classified as HNA at various stages of the enhancement works.
- 'Highly intrusive' noise impacts are predicted at the closest other sensitive receiver during approved daytime periods during *W.001, W.004, W.*007 and *W.008* works. Worst-case 'moderately intrusive' impacts are predicted during all other works scenarios except *W.006*, where 'clearly audible' impacts are predicted.
    - For the daytime OOH period, 'moderately intrusive' noise impacts are also predicted at the closest other sensitive receivers for all works scenarios except *W.006*, where 'clearly audible' impacts are predicted .
- Worst-case 'moderately intrusive' noise impacts at other sensitive receivers are expected during the evening period for scenario *W.007* and *W.008*. All other scenarios are predicted to generate 'clearly audible' impacts at other sensitive receivers. Noise impacts above the NML at other sensitive receivers during the night-time are only predicted for scenario *W.007* and *W.008,* where 'clearly audible' and 'noticeable' impacts are expected.

Pearson Street Bridge

- 'Highly intrusive' noise impacts are predicted at the nearest residential receivers for *W.011*, *W.015, W.016* and *W.020* during the night-time OOHW period, with the greatest impact occurring during *W.015*. The addresses of the residential receivers impacted by OOHW are provided in **Appendix D**.
    - Worst-case 'moderately intrusive' noise impacts are predicted for all other scenarios with the potential to occur during the night-time period.
- 'Highly intrusive' noise impacts are predicted at the nearest residential receiver for *W.015* and *W.020* during the evening period. 'Moderately intrusive' noise impacts are predicted at the nearest residential receivers for all other scenarios occurring during the evening period, with the exception of *W.018*, where 'clearly audible' impacts are predicted.
- 'Highly intrusive' noise impacts are predicted at the closest residential receiver during *W.020* during approved daytime and daytime OOHW periods.

- Worst-case ‘moderately intrusive’ noise impacts are expected for *W.010*, *W.011*, *W.014* to *W.017* and *W.019*, during the approved daytime and daytime OOHW periods.
    - ‘Clearly audible’ impacts are predicted at nearby residential receivers during *W.012*, *W.013* and *W.019* during approved daytime and daytime OOHW periods.
- The closest residential receivers to works in scenario *W.014, W.015* and *W.020* are predicted to be ‘Highly noise affected’ (HNA). These impacts are predicted when works occur at the closest location to each receiver. When works occur further from these receivers, impacts are expected to be lower.
- ‘Moderately intrusive’ noise impacts are expected to occur at the closest other sensitive receivers to works occurring during *W.014* to *W.017* and *W.020*, during the approved daytime period. For the daytime OOH period, ‘moderately intrusive’ noise impacts are predicted at the closest other sensitive receivers during *W.015*.
    - ‘Clearly audible’ to ‘noticeable’ impacts are predicted for all other works scenarios during the approved daytime and daytime OOHW periods.
- During the night-time period, noise-generating activities occurring during track work (*W.015*) are expected to be ‘moderately intrusive’ at a single other sensitive receiver. ‘Clearly audible’ to ‘noticeable’ impacts are predicted for all other works scenarios during the night-time period.
- During the evening period ‘noticeable’ impacts are expected during *W.015* with ‘clearly audible’ impacts predicted at one other sensitive receiver during W.020. No impact above the NML are predicted at any other sensitive receivers during the evening period.
- Other sensitive receivers should only be considered impacted ‘when in use’.

Review of the predictions shows that both the sleep disturbance screening level and sleep awakening reaction level are likely to be exceeded when night work occurs near residential receivers occur. Sleep disturbance impacts would generally be caused by heavy vehicle movements and more noise intensive equipment. Where reasonable and feasible, these activities should be limited to the less sensitive periods to avoid noise impacts during more sensitive out-of-hours periods (refer to **Section 8.0**). The number of awakening events would depend on several factors, including the equipment being used, the duration of noisy work and the distance of the work to each residential receiver. Further detail around the specific OOHW, (eg duration and justification) must be identified in the OOHW permit, refer **Section 2.4**. The receivers which would potentially be affected by sleep awakening impacts are generally the same receivers where ‘moderately intrusive’ and ‘highly intrusive’ night-time impacts have been predicted (refer to **Appendix C**). These receivers may be eligible for respite offers (RO), agreements with owners (AO) or alternative accommodation (AltA), refer **Section 8.3**.

Furthermore, for scenarios where 'highly intrusive' impacts are predicted, noisy activities will be scheduled during standard daytime hours, where feasible, to minimise disruption during OOHW periods. It is noted however, that OOH work will occur during a rail possession and will be undertaken within the limitations of the possession.

All appropriate feasible and reasonable construction noise mitigation measures will be applied to work as outlined in **Section 8.0** and **Section 8.1**.

5.3 Ground-borne Noise

Ground-borne construction noise impacts from the Project are not anticipated as vibration intensive work with the potential to generate perceptible ground-borne noise, is not included in the scope of work. Vibration intensive work for the Project will be completed outdoors meaning airborne noise levels at the nearest receivers are expected to be higher than the corresponding internal ground-borne noise levels.

Where airborne noise levels are higher than ground-borne noise levels it is not necessary to evaluate potential ground-borne noise impacts and as such, they have not been considered further for this assessment.

6.0 Vibration Assessment

Vibration intensive items of equipment that would be required during work assessed in this CNVIS include a large hydraulic hammer, vibratory rollers and ballast tampers. These items of equipment are required during the work as shown in **Table 18**.

The potential impacts during vibration intensive work have been assessed using the Transport CNVG-PTI minimum working distances for cosmetic damage and human response shown in **Table 18**.

Table 18 Vibration Intensive Equipment

ID	Scenario	Rating/Description	Minimum Distance			
			Cosmetic Damage			Human Response (NSW EPA Guideline)
			Residential and Light Commercial (BS 7385)	Heritage Items (DIN 4150, Group 3)	Industrial and Heavy Commercial (BS 7385)	
W.007	**Cassidy Parade Footbridge** Pedestrian Bridge Demolition	Large Hydraulic Hammer 1600 kg (18 to 34 t excavator)	22 m	44 m	11 m	73 m
W.019	**Pearson Street Bridge** Drainage Work					
W.008	**Cassidy Parade Footbridge** Pedestrian Bridge Work - Peak	Vibratory Roller: <300 kN (7–13 tonne)	15 m	31 m	8 m	100 m
W.015	**Pearson Street Bridge** Track Work – Peak					
W.017	**Pearson Street Bridge** Track Tamping	Ballast Tamping	5 m	10 m	3 m	30 m
W.019	**Pearson Street Bridge** Drainage Work	Trench roller[1]	5 m	11 m	3 m	15 m to 20 m

Note 1: Minimum working distances for the trench roller are based on Vibratory Roller: <50 kN (1–2 tonne).

Vibration offset distances have been determined from the TfNSW CNVG-PTI minimum working distances for cosmetic damage and human comfort (see **Table 12** and the assessment is summarised in **Figure 5** to **Figure 10**). The offset distances are representative of the highest vibration levels that would likely be experienced by the nearest receivers when work occurs nearby.

In the event that additional work is undertaken which requires the use of other items of plant identified than those identified in **Table 18**, a vibration impact assessment must be conducted prior to the commencement of work.

Figure 5 Large Hydraulic Hammer (1,600 kg) - Minimum Working Distances (Cassidy Parade Footbridge)

Figure 6 Vibratory Roller (7-13 tonne) - Minimum Working Distances (Cassidy Parade Footbridge)

Figure 7 Large Hydraulic Hammer (1,600 kg) - Minimum Working Distances (Pearson Street Bridge)

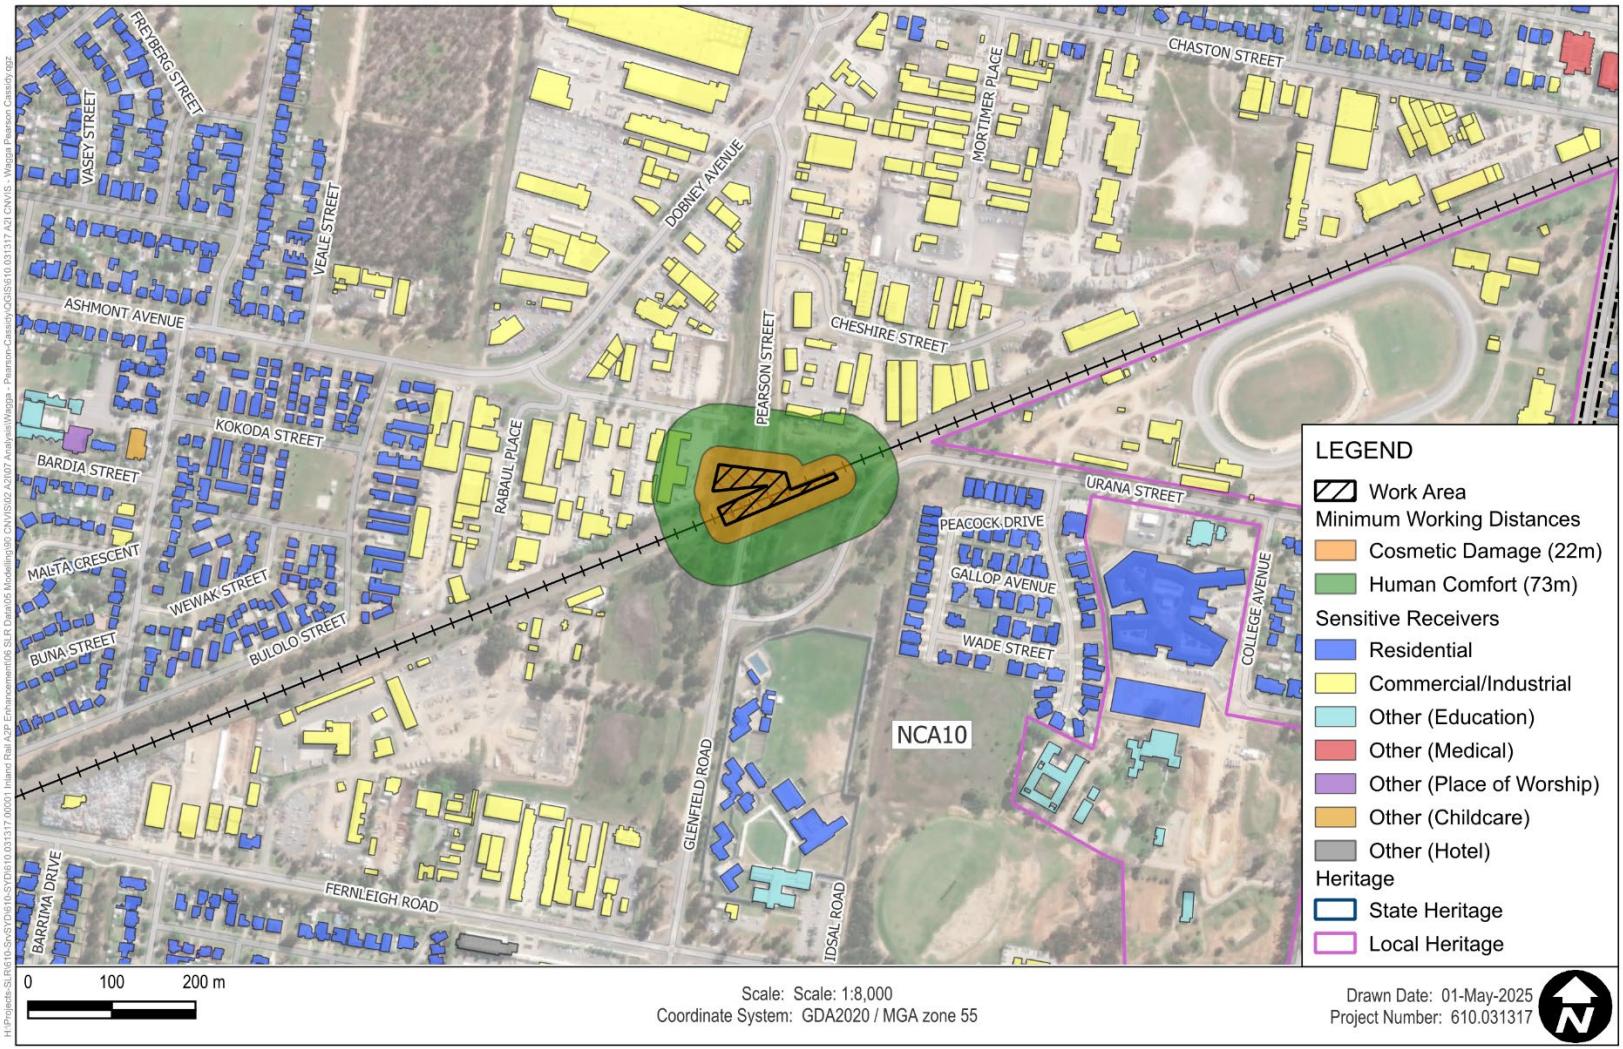

Figure 8 Vibratory Roller (7-13 tonne) - Minimum Working Distances (Pearson Street Bridge)

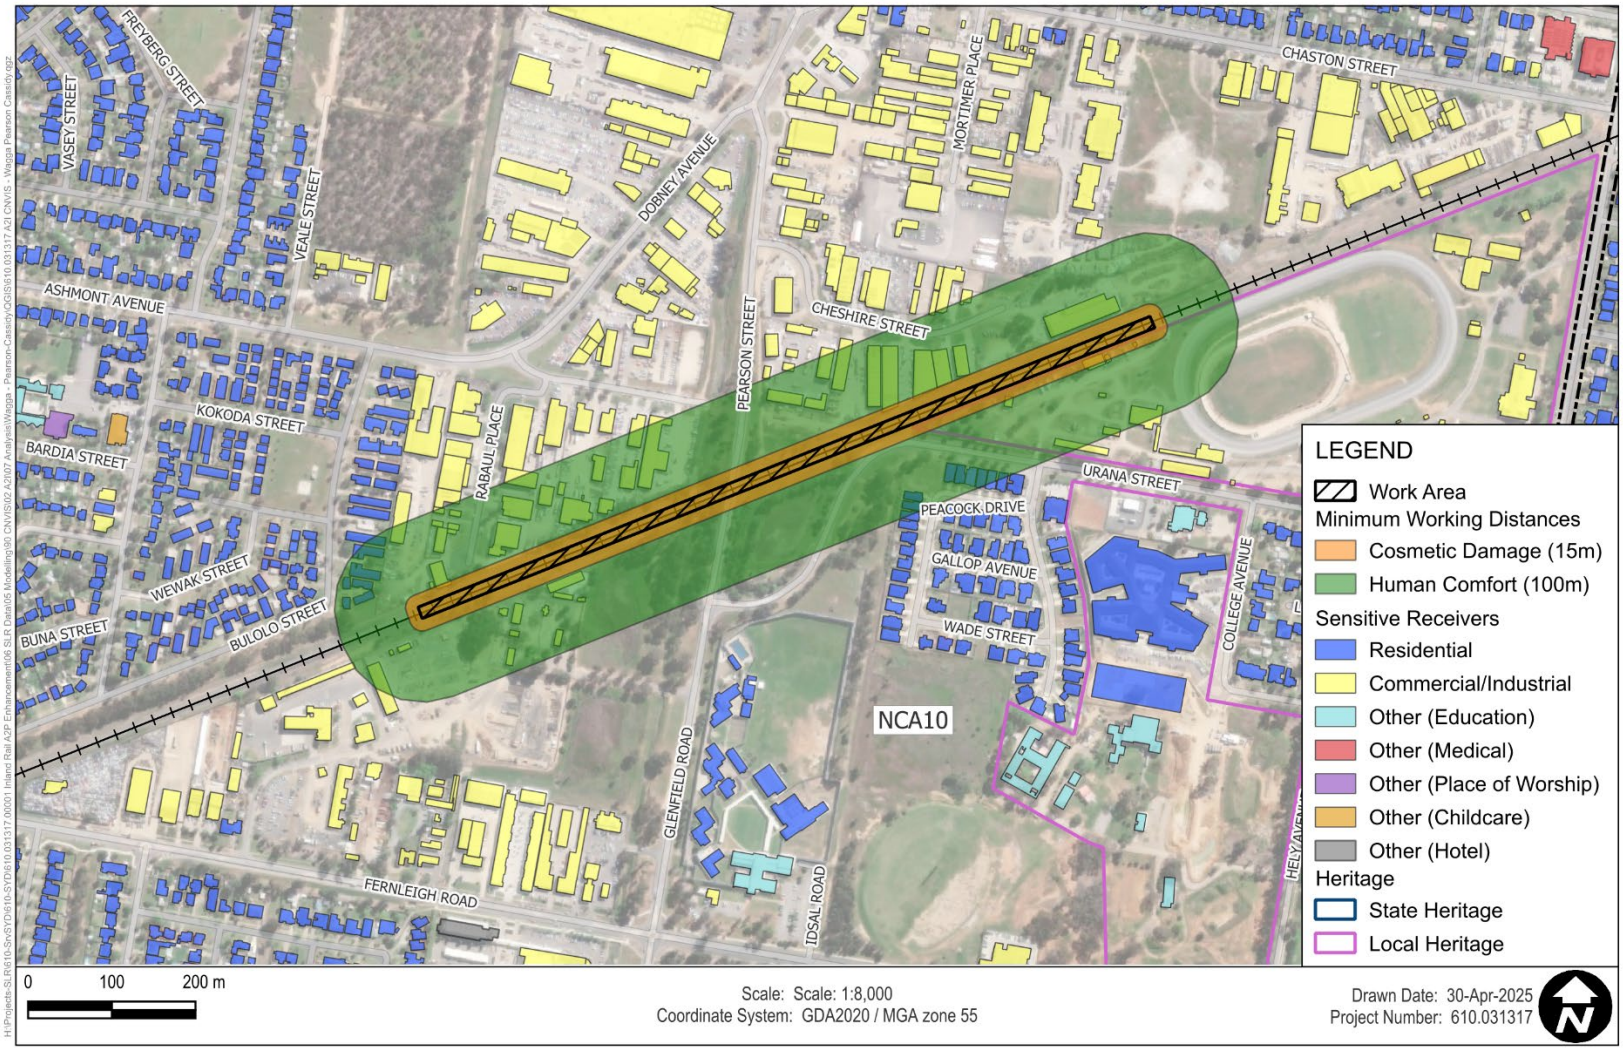

Figure 9 Track Tamping - Minimum Working Distances (Pearson Street Bridge)

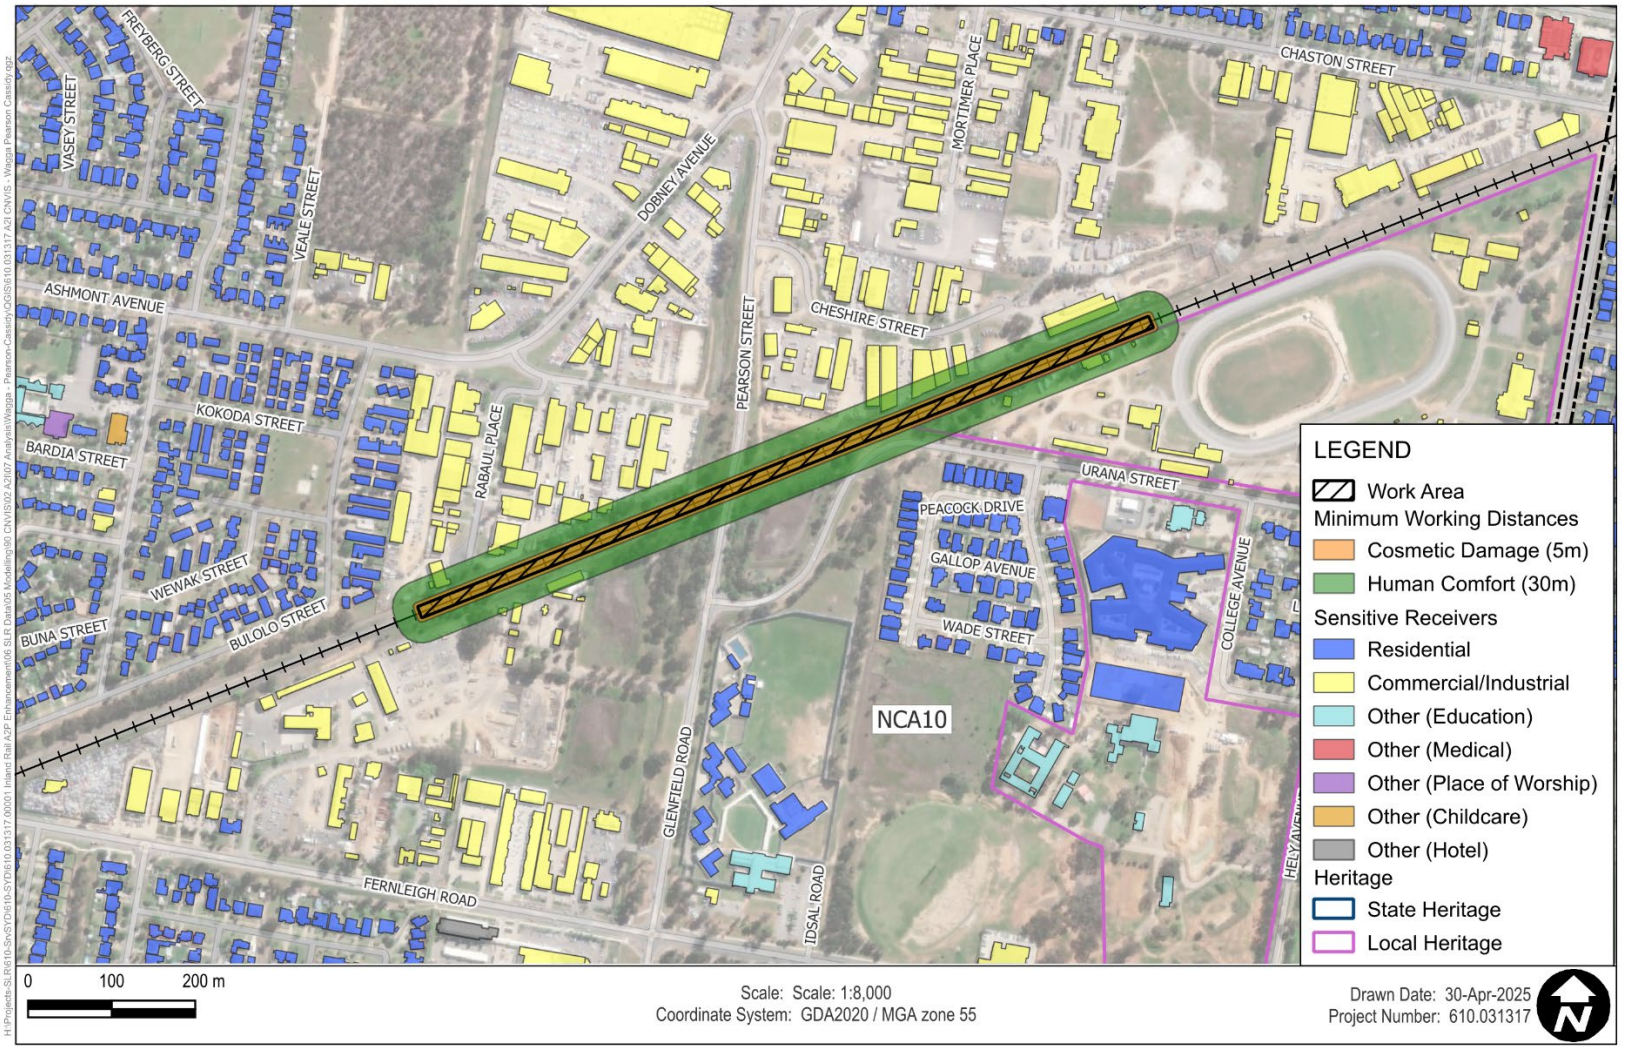

Figure 10 Trench Roller - Minimum Working Distances (Pearson Street Bridge)

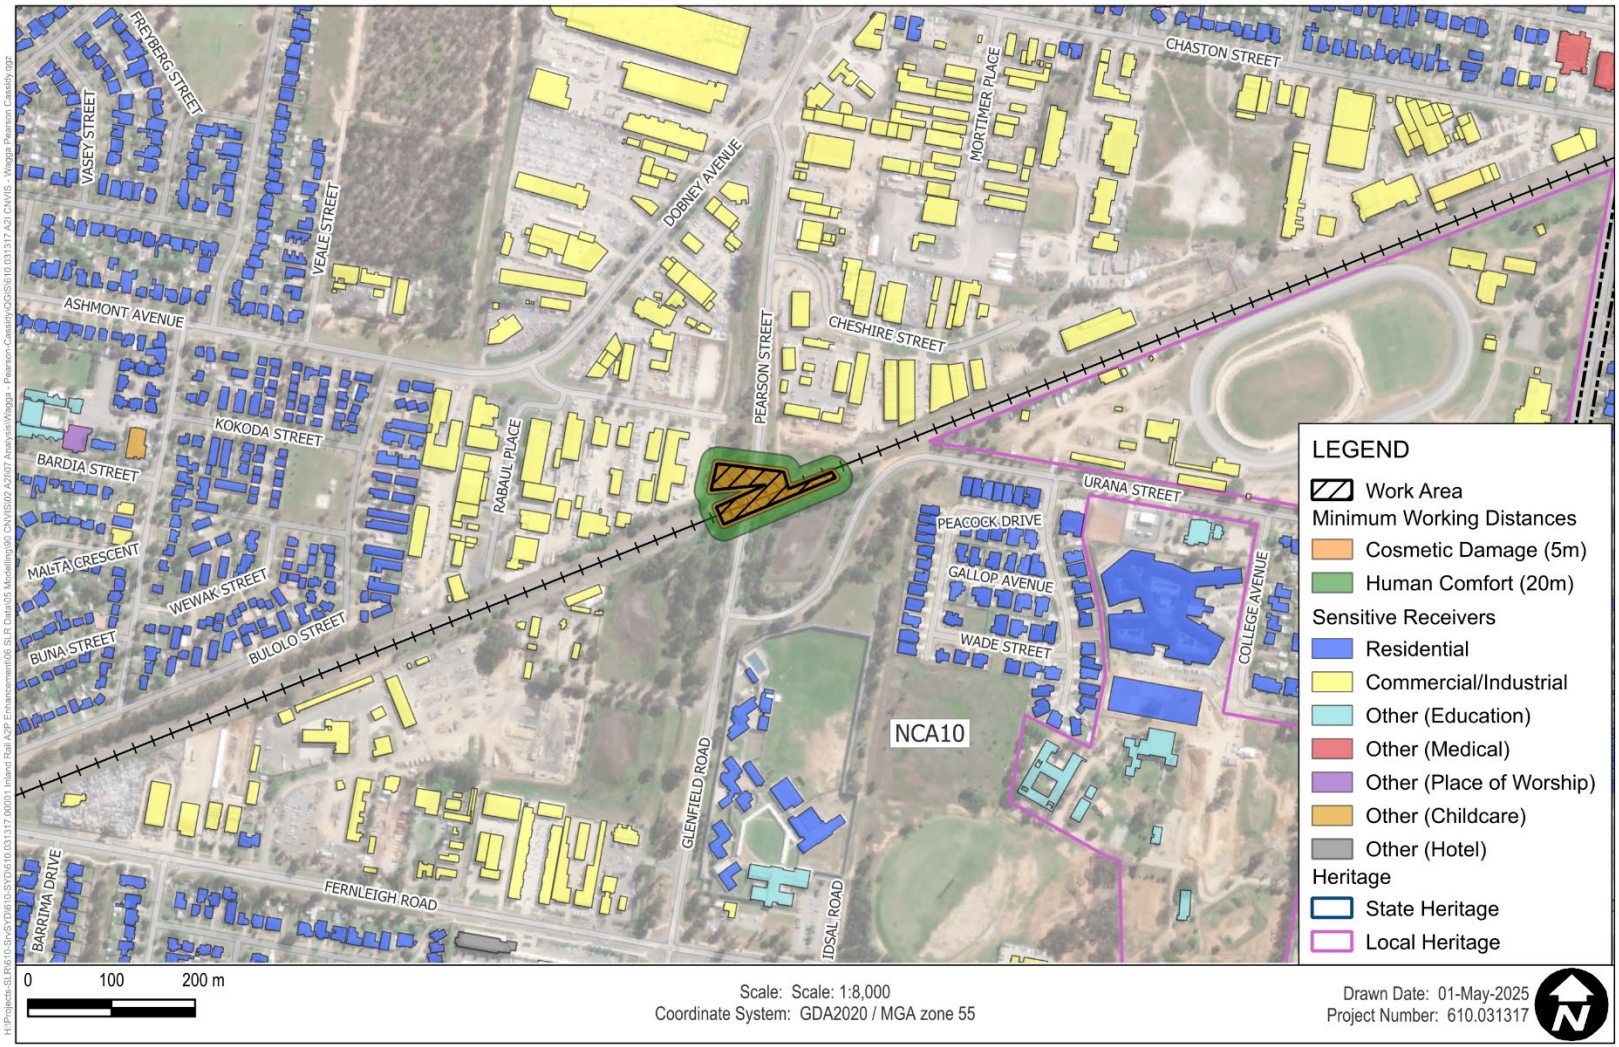


6.1 Cosmetic Damage Assessment

Cassidy Parade Footbridge

Figure 5 shows that that three residential buildings have the potential to fall within the cosmetic damage minimum working distance for residential structures during *W.007* hydraulic hammer works. The residential buildings are located at 2 Kildare St, 22 Brookong Ave and 24-26 Brookong Ave.

Figure 6 shows that four residential structures have the potential to fall within the cosmetic damage minimum working distance for residential structures during *W.008* vibratory roller works. The residential buildings are located at 18, 22, 24 and 24-26 Brookong Ave.

Further, **Figure 5** and **Figure 6** show that one nearby commercial building (20 Brookong Ave) has the potential to fall within the cosmetic damage minimum working distance for light commercial structures during *W.007* and *W.008*.

Pearson Street Bridge

Figure 7 and **Figure 10** show that no buildings lie within the minimum working distances for large hydraulic hammer and trench roller works associated with *W.019*.

Figure 8 identifies that ten industrial-type receivers (four within the Wagga Wagga Showground Camping Grounds) are within the cosmetic damage minimum working distance for light commercial structures for vibratory roller works (*W.015*).

Figure 9 shows that one industrial-type receiver within the Wagga Wagga Showground Camping Grounds falls within the cosmetic damage minimum working distance for track tamping.

If the commercial/industrial buildings identified below are classified as a Line 1-type item from BS 7385 Part 2 (reinforced or framed structure/industrial or heavy commercial structure) then the minimum working distance for cosmetic damage is 8 m for 7-13 tonne vibratory roller works and 11 m for large hydraulic hammer works. For both Cassidy Parade Footbridge and Pearson Street Bridge works, offset distances from specific vibration intensive plant to the nearest receivers and building construction should be confirmed before commencing vibration intensive work during construction.

Before commencement of any work, a structural engineer must undertake condition surveys of all building, structures, utilities and the like as being at risk of damage. For this CNVIS, conditions surveys (based on the 7-13 tonne vibratory roller and 1,600 kg large hydraulic hammer) are required for:

Cassidy Parade Footbridge

- 2 Kildare St, Turvey Park
- 18, 22, 24 and 24-26 Brookong Ave, Wagga Wagga
- 20 Brookong Ave, Wagga Wagga (commercial-type receiver)

Pearson Street Bridge

- 15 Rabaul Pl, Ashmont (both structures)
- Industrial receivers along Cheshire St, Wagga Wagga
- Wagga Wagga Showgrounds (26 Bourke St, Turvey Park)

The results of the surveys must be documented in a Condition Survey Report for each item surveyed. Copies of Condition Survey Reports must be provided to the landowners of the items surveyed, and no later than one month before the commencement of construction and three months following the completion of construction.

After completion of construction, condition surveys must be undertaken by a structural engineer of all items for which pre-condition surveys were undertaken.

Feasible and reasonable construction vibration mitigation measures should be applied where vibration intensive work is required within the minimum working distances. Construction vibration mitigation and management measures are discussed in **Section 8.1**.

In accordance with CoA E122, property damage caused directly or indirectly by the construction or operation must be rectified at no cost to the owner. Alternatively, compensation may be provided for the property damage as agreed with the property owner.

As per CoA E80, vibration testing must be undertaken before and during vibration generating activities that have the potential to impact on heritage items to identify minimum working distances to prevent cosmetic damage. Advice must be sought on methods and locations for installing equipment as per CoA E81.

If other vibration intensive activities are required within minimum working distances to heritage structures, a building condition assessment should be undertaken of the heritage item/s to assess if they are considered to be sensitive to vibration prior to vibration work commencing.

6.2 Human Comfort Assessment

Cassidy Parade Footbridge

Figure 5 and **Figure 6** shows that several receivers (residential, commercial, place of worship and educational) have the potential to fall within the human comfort minimum working distances during vibration-intensive works. Occupants of these buildings may be able to perceive vibration impacts at times when a large hydraulic hammer or 7-13 tonne vibratory roller is in use nearby. Where vibration impacts are perceptible for hydraulic hammering, they would likely only be apparent for relatively short durations when vibration intensive equipment is in use nearby.

Pearson Street Bridge

Figure 7 and **Figure 9** show that only industrial-type receivers are within the minimum working distance for human comfort during large hydraulic hammer (*W.019*) and track tamping (*W.017*) works. Where vibration impacts are perceptible for hydraulic hammering, they would likely only be apparent for relatively short durations when vibration intensive equipment is in use nearby.

Figure 8 shows that the closest residential receivers along Peacock Drive, Turvey Park have the potential to fall within the human comfort minimum working distances during the vibratory roller works (*W.015*).

Figure 10 shows that no human comfort impacts are expected during trench roller works (*W.019*).

Feasible and reasonable construction vibration mitigation measures should be applied where vibration intensive work is required within the minimum working distances. Construction vibration mitigation and management measures are discussed in **Section 8.1**.

7.0 Construction Traffic Assessment

The EIS identified that during the construction phase of the project, heavy vehicles would be required for materials and equipment delivery while light vehicles will transport workers to and from the site. This additional road traffic may impact receivers along the proposed transport routes.

No additional information has been provided regarding construction road traffic, therefore a summary of the predicted daytime traffic noise levels from the EIS is shown in **Table 19**.

Table 19 Construction Traffic Assessment

Traffic Route	Road Type	Predicted Construction Traffic Noise (Both Directions) LAeq (Period)		Exceed base criterion? Day[1] (7am – 10pm)	Potential Increase > 2dB	Potential Noise Impact
		Existing	Existing + Proposed			
Wagga Wagga Precinct						
Cassidy Parade Footbridge						
Edward Street (Sturt Highway)	Arterial	60.2	61.1	Yes	No	No
Fox Street	Local	62.6	63.1	Yes	No	No
Mitchelmore Street	Sub-arterial	56.2	57.4	No	No	No
Edmondson Street	Sub-arterial	57.7	58.8	No	No	No
Norman Street	Local	62.2	62.6	Yes	No	No
Coleman Street	Sub-arterial	53.3	55.9	No	Yes	No
Cassidy Parade	Local	59.1	60.1	Yes	No	No
Erin Street	Local	51.9	55.4	Yes	Yes	Yes
Station Place	Local	49.3	53.7	No	Yes	No
Brookong Avenue	Local	57.6	59.4	Yes	No	No
Pearson Street Bridge						
Edward Street (Sturt Highway)	Arterial	58.9	59.4	No	No	No
Moorong Street (Olympic Highway)	Arterial	63.6	64	Yes	No	No
Pearson Street	Sub-arterial	58.5	58.9	No	No	No
Urana Street	Sub-arterial	54.5	55.4	No	No	No
Cheshire Street	Local	49.2	51.5	No	Yes	No
Alan Turner Depot Access Road	Local	53.4	54.6	No	No	No
Fernleigh Road	Local	61	61.3	Yes	No	No

Note 1: Freeway/arterial/sub-arterial roads: $L_{Aeq(15hour)}$ 60dBA(external)
Local roads: $L_{Aeq(1hour)}$ 55dBA (external)

The EIS found that construction traffic associated with the Cassidy Parade Footbridge and Pearson Street Bridge work stages on public roads is generally likely to comply with the road traffic noise goals. The exception is Erin Street during the daytime period, where construction traffic noise is likely exceed the base criterion by 0.4 dB. This level of exceedance is considered negligible (ie not perceptible by the average listener). Therefore, noise impacts are unlikely to negatively affect the relevant receivers.

The EIS did not assess construction traffic during the night-time period, and no additional information has been provided regarding construction road traffic. Therefore, it is conservatively assumed that where night-time construction traffic is required, impacts would be experienced by residences along construction routes on sub-arterial and local roads within close proximity to the work sites. Night-time noise impacts are not anticipated on arterial roads.

Mitigation and management measures to assist in minimising noise impacts from construction traffic are shown in **Section 8.0**.

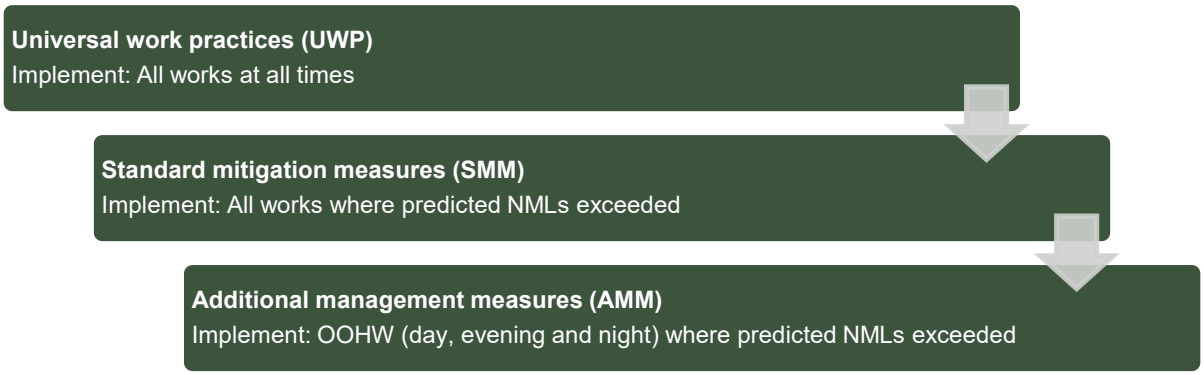
8.0 Mitigation and Management Measures

Noise from the Project may be apparent at the nearest receivers at certain times during construction. The Project should apply all feasible and reasonable mitigation measures to minimise the impacts.

In accordance with CoA E74, works that exceed the noise management levels and/or vibration criteria must be managed in accordance with the CNVMP.

The Inland Rail NSW Construction Noise and Vibration Framework (CNVF) has been adopted as a guideline for this project and outlines a hierarchy of work practices and mitigation measures to minimise the impact of construction noise and vibration on the community. This hierarchy is shown in **Figure 11**.

Figure 11 Hierarchy of Work Practices and Mitigation Measures



The universal work practices (UWP) and standard mitigation measures (SMM) for the overall A2I project are outlined in the CNVMP. All mitigation and management measures outlined in the CNVMP will be adopted in accordance with CoA E74. Site specific mitigation measures are also outlined below in **Section 8.1**. These measures have been incorporated into the noise modelling assessment to provide mitigated results. Additional Management Measures (AMM) are outlined in **Section 8.3**.

8.1 Site Specific Mitigation Measures

Table 20 outlines the mitigation and management measures that will be adopted to minimise potential noise and vibration impacts associated with this CNVIS at surrounding sensitive receivers. These measures have been considered in noise modelling based on the total scenario sound power levels, refer **Appendix B**.

Table 20 Site Specific Mitigation Measures

Measure	Reference / Notes
Project Planning	
Use quieter and less vibration emitting construction methods where feasible and reasonable.	Best practice
Works will be completed during the approved daytime construction hours where possible, as outlined in **Section 2.2.** Some unavoidable OOHW will be required due to road and rail traffic management restrictions, as outlined in **Section 2.3**.	Best practice CoA E69 CoA E71
Where OOHW is required, an OOHW Permit will be prepared, as required by the OOHW Protocol or EPL. Further detail around the specific work tasks, duration and justification of OOHW must be identified in the OOHW permit.	Best practice CoA E71 CoA E72 CoA E73
Scheduling	
Highly noise intensive works that result in an exceedance of the applicable NML at the same receiver must only be undertaken: a) Between 08:00am – 06:00pm Monday to Friday; b) Between 08:00am – 01:00pm Saturday; and c) if continuously, then not exceeding three (3) hours, with a minimum cessation of work of not less than one hour. Refer **Section 8.2**.	Best practice CoA E70
Noise generating work in the vicinity of community, religious, educational institutions, noise and vibration-sensitive businesses and critical working areas (such as exam halls, theatres, laboratories and operating theatres) resulting in noise levels above the NMLs will not be timetabled during sensitive periods, unless other reasonable arrangements with the affected institutions can be made at no cost to the affected institution. Refer to Community Consultation in **Section 8.5**.	Best practice CoA E76
All work undertaken for the delivery of the project including those undertaken by third parties (such as utility relocations), must be coordinated to ensure respite periods are provided.	Best practice, CoA E83
Site Layout	
Compounds and worksites have been designed to promote one-way traffic and minimise the need for vehicle reversing.	Best practice
Construction activities must be planned to minimise vehicle movements around the Site.	
Work compounds, parking areas, and equipment and material stockpiles will be positioned away from noise-sensitive locations and take advantage of existing screening from local topography.	
Equipment that is noisy will be started away from sensitive receivers where practicable.	
Training	
Training will be provided to all personnel on noise and vibration requirements for the project. Inductions and toolbox talks to be used to inform personnel of the location and sensitivity of surrounding receivers.	Best practice

Measure	Reference / Notes
The induction protocols must include awareness of noise generating activities and mitigation measures and techniques that should be implemented.	
Training must be conducted for appropriate community behaviours when access/egress the Site.	
Plant and Equipment Source Mitigation	
All plant and equipment must be maintained in a proper and efficient condition, operated in a proper and efficient manner, and feature standard noise reduction measures where applicable.	Best practice CNVF
Plant and equipment must be selected with options to minimise noise such as covers, mufflers, shrouds and other noise suppression equipment. Low noise emission plant and equipment must be selected where available.	
Non-tonal reversing beepers (or an equivalent mechanism) must be fitted and used on all construction vehicles and mobile plant regularly used on site and for any out-of-hours work, including delivery vehicles.	
Stationary noise sources will be sited behind structures (or temporary screens) that act as barriers, or at the greatest distance from the noise-sensitive area (where practicable). Equipment will be oriented so that noise emissions are directed away from any sensitive areas.	
Noise generating equipment will be regularly checked and effectively maintained, including checking of hatches/enclosures regularly to ensure that seals are in good condition and doors close properly against seals.	
Noise monitoring spot checks of equipment will be completed to ensure individual items are operating as expected	
Dropping materials from a height will be avoided.	
Loading and unloading will be carried out as far as possible from noise sensitive areas.	
Where feasible, alternative methods will be considered for vibration intensive works (eg smaller sized equipment and static rolling, refer **Section 6.0**). Use of these methods will depend on the specific circumstances and therefore the worst-case scenario is included for the purpose of this CNVIS.	Best practice
Construction Traffic	
Construction traffic routes to site will be limited to major roads where possible.	Best practice
Trucks will not queue outside residential properties.	
Truck drivers will be instructed to avoid compression braking as far as practicable.	
Delivery vehicles should be fitted with straps rather than chains for unloading, wherever possible.	
Truck movements will be kept to a minimum where possible (eg trucks are fully loaded on each trip).	
Screening	
Install purpose-built screening or enclosures around long-term fixed plant that has the potential to impact nearby receivers	Best practice CNVF
The layout of the site will take advantage of existing screening from local topography, where possible. Site huts, maintenance sheds and/or containers will be positioned between noisy equipment and the affected receivers.	
Implementation of temporary noise barriers for highly intensive noise activities, such as saw cutting or rock breaking.	
Community Consultation	
Regular communications on the activities and progress of the proposal shall be provided to the community (eg via newsletter, email and/or website).	Best practice CNVF

Measure	Reference / Notes
A telephone, email and web-based community information service shall be established to allow the community to obtain additional information on construction activities, provide feedback or make a complaint.	Best practice CNVF
Owners and occupiers of properties at risk of exceeding the screening criteria for cosmetic damage (and/or human comfort) must be notified before work that generates vibration commences in the vicinity of those properties. If the potential exceedance is to occur more than once or extend over a period of 24 hours, owners and occupiers are to be provided a schedule of potential exceedances on a monthly basis for the duration of the potential exceedances, unless otherwise agreed by the owner and occupier.	Best practice CoA E79
Notification will be provided to all impacted residences along construction traffic routes (including temporary diversions).	Best practice
Where complaints are received, work practices will be reviewed and feasible and reasonable practices applied to minimise any further impacts.	Best practice
Monitoring	
Noise and/or vibration monitoring will be conducted (as appropriate) when noise/vibration intensive works are being undertaken in close proximity to sensitive receivers.	Best practice CNVF CoA E80 CoA E81
Noise and vibration monitoring will be undertaken in accordance with the CNVMP and Monitoring Program.	
Advice from a heritage specialist must be sought on methods and locations for installing equipment used for vibration, movement and noise monitoring at heritage-listed structures.	
See **Section 8.7** for details of monitoring requirements.	
Vibration	
Where vibration generating works are required within the minimum working distances and considered likely to exceed the criteria: • Different construction methods with lower source vibration levels (ie alternative equipment) will be investigated and implemented, where feasible (refer **Table 12**). • Attended vibration measurements will be undertaken at the start of the works to determine actual vibration levels of the item. Vibration intensive works will cease if the monitoring indicates vibration levels are likely to, or do, exceed the relevant cosmetic damage criteria. Work methods will be modified prior to recommencing the activity. Note: Where feasible, small hydraulic hammers and small vibratory rollers or static rolling will be prioritised to reduce vibration impacts to surrounding receivers.	Best practice CoA E80
Vibration intensive works required within the minimum working distance at the same receiver must only be undertaken: a) Between 08:00am – 06:00pm Monday to Friday; b) Between 08:00am – 01:00pm Saturday; and c) if continuously, then not exceeding three (3) hours, with a minimum cessation of work of not less than one hour. Refer to **Section 8.2**.	Best practice CoA E70
Where works are required within the cosmetic damage minimum working distances, building condition surveys will be completed before and after the works to ensure no cosmetic damage has occurred. Condition status of all heritage structures that fall within the unsound heritage minimum working distance for the nominated vibration-intensive equipment should be confirmed prior to the commencement of works.	Best practice CoA C9
Property damage caused directly or indirectly (for example from vibration or from groundwater change) by the construction or operation must be rectified at no cost to the owner. Alternatively, compensation may be provided for the property damage as agreed with the property owner.	Best practice CoA E122

8.2 Respite

In accordance with CoA E70, except as permitted by an EPL, highly noise intensive works that result in an exceedance of the applicable NML at the same receiver must only be undertaken:

a) Between 08:00am – 06:00pm Monday to Friday;

b) Between 08:00am – 01:00pm Saturday; and

c) if continuously, then not exceeding three (3) hours, with a minimum cessation of work of not less than one hour.

For the purposes of this condition, 'continuously' includes any period during which there is less than one hour between ceasing and recommencing any of the work.

In accordance with CoA E72 and E83, the procedure outlined in the OOHW Protocol must be implemented to coordinate OOHW (including those approved by an EPL or undertaken by a third party), to ensure appropriate respite is provided. This coordination must include:

a) rescheduling work to provide respite to impacted noise sensitive land use(s) so that the respite is achieved; or

b) the provision of alternative respite or mitigation to impacted noise sensitive land use(s); and

c) the provision of documentary evidence to the AA in support of any decision made in relation to respite or mitigation.

The consideration of respite must also include all other CSSI, SSI and SSD projects which may cause cumulative and/or consecutive impacts at receivers affected by the delivery of the CSSI.

Highly noise intensive works (as defined in **Section 2.2.1**) are required in various work scenarios. As outlined above, highly noise intensive work that results in an exceedance of the applicable NML is restricted to the hours shown above and must have respite periods as defined above.

CoA E70 applies to the following work scenarios where highly noise intensive works are proposed and the NML is predicted to be exceeded:

Cassidy Parade Footbridge

- W.007 – Pedestrian Bridge Demolition
- W.008 – Pedestrian Bridge Work - Peak

Pearson Street Bridge

- W.013 – Utility Work
- W.015 – Track Work - Peak
- W.017 – Track Tamping
- W.018 – Protection Barriers
- W.019 – Drainage Work
- W.020 – Signalling Work

In accordance with CoA E71, *W.015*, *W.017, W.018*, *W.019* and *W.020* require approval through the OOHW Protocol and/or EPL to occur outside the hours listed above from CoA E70.

Respite offers are also required as part of the additional mitigation measured outlined in **Section 8.3**.

8.3 Additional Mitigation and Management Measures for Out of Hours Work

Where the 'mitigated' construction noise levels remain above the NMLs, the Additional Mitigation Measures Matrix (AMMM) adapted from in the CNVF and CNVMP is to be implemented. The approach, guided by the AMMM, is primarily aimed at pro-active engagement with affected sensitive receptors rather than additional noise reducing mitigation. OOHW has been divided into three periods (Day, Evening and Night) as adapted from the CNVF around the approved project hours (CoA E69).

Additional mitigation measures described in the CNVF and CNVMP are listed in **Table 21**. The additional mitigation measures for airborne noise are shown in **Table 22**. The additional mitigation measures for construction vibration are shown in **Table 23**.

Table 21 Additional Mitigation Measures

Mitigation/Management Measure	Abbreviation
Communication (Category 1)[1]	CO1
Communication (Category 2)[2]	CO2
Respite Offer[3]	RO
Alternative Accommodation	AltA
Agreement with Owners	AO

Note 1: As outlined in the CNVF, Communication to provide information on the OOHW via methods such as letter box drop, email, newsletter, media advertisements and/ or website prior to the works commencing.

Note 2: As outlined in the CNVF, Communication should be personalised (e.g. door knock, meeting, telephone call). Contact with these residents should commence early to enable feedback to be considered by the proposal.

Note 3: As outlined in the CNVF, RO are not applicable to non-residential receivers. RO may comprise of pre-purchased movie tickets, dinner vouchers or similar. RO can also be provided by limiting high noise generating works and allowing at least a one-hour respite period between blocks of work. Where possible, the timing of this respite should be discussed with the impacted community.

Table 22 Airborne Noise – Additional Mitigation Measures Matrix

Time Period		Exceedance of NML	Perception	Duration	Communication Category/ Management Measure
OOHW Daytime Period	Sunday 8am – 6pm (including public holidays)	<5	Noticeable	Any	CO1
		5-15	Clearly audible	Any	CO1
		16-25	Moderately intrusive	Any	CO1, CO2
		>25	Highly intrusive	Any	CO1, CO2
OOHW Evening Period	Monday – Sunday 6pm – 10pm (including public holidays)	<5	Noticeable	Any	CO1
		5-15	Clearly audible	Any	CO1
		16-25	Moderately intrusive	Any	CO1, CO2
		>25	Highly intrusive	Any	CO1, CO2
				>2 consecutive rest periods[1]	CO1, CO2, RO
OOHW Night Period	Monday – Saturday 10pm – 7am Sunday 10pm – 8am (including public holidays)	<5	Noticeable	Any	CO1
		5-15	Clearly audible	Any	CO1
		16-25	Moderately intrusive	Any	CO1, CO2
				>2 consecutive sleep periods[1]	CO1, CO2, RO,AO
		>25	Highly intrusive	Any	CO1, CO2, RO
				>2 consecutive sleep periods[1]	CO1, CO2, RO, AO, AltA

Note 1: Where the duration exceeds 2 consecutive rest/sleep periods, the corresponding additional mitigation measures will be provided for all periods where construction exceedances are expected to occur.

Table 23 Vibration – Additional Mitigation Measures Matrix

Time Period		Duration	Exceedance of 'preferred' value	Exceedance of 'maximum' value
OOHW Daytime Period	Sunday 8am – 6pm (including public holidays)	Any	CO1, CO2	CO1, CO2, RO
OOHW Evening Period	Monday – Sunday 6pm – 10pm (including public holidays)	Any	CO1, CO2	CO1, CO2, RO
OOHW Night Period	Monday – Saturday 10pm – 7am Sunday 10pm – 8am (including public holidays)	Any	CO1, CO2, RO	CO1, CO2, RO, AltA

8.3.1 Receivers Eligible for Additional Mitigation Measures - Noise

The receivers eligible for additional mitigation and management measures due to construction noise from the project work are presented in **Appendix C** and **Appendix D**. Where work occurs for greater than two consecutive evening or nights, receivers may be eligible for respite offers (RO), agreements with owners (AO) or alternative accommodation (AltA) depending on the exceedance level and works period as detailed in **Table 22**.

As outlined in **Section 5.2**, 'highly intrusive' impacts at nearest residential receivers and some other sensitive receivers are predicted for most work scenarios due to the proximity to the work. The addresses of the 'highly intrusive' impacted receivers are provided in **Appendix D**.

All scenarios that are scheduled for OOHW are predicted to create highly intrusive noise levels at residential receivers for the night-time period. Should these works occur for more than two consecutive sleep or rest periods in a row, additional mitigation measures must be offered as outlined in **Table 22**.

Where possible, work would be scheduled to avoid impacting the same receivers for more than two consecutive sleep periods. Receivers that would be impacted for more than two consecutive sleep periods must be identified in the OOHW permit.

8.3.2 Receivers Eligible for Additional Mitigation Measures - Vibration

Based on **Figure 5** to **Figure 10**, the potentially impacted receivers are those receivers nearby work areas where vibration intensive works are occurring, including the use of vibratory rollers, hydraulic hammers and track tamping equipment. The greatest impacts are expected to occur during vibratory roller works (*W.008* for Cassidy Parade Footbridge works and *W.015* for Pearson Street Bridge works). It is noted that the receivers closest to the works also have the potential to fall within the cosmetic damage minimum working distance for residential structures.

As defined in **Section 2.2.1** and **Section 8.2** activities involving high noise generating equipment, such as rock hammering or rock breaking, are limited to specific daytime construction hours only. Respite periods of 1 hour after every 3 hours of high noise/vibration generating work are also required.

Construction vibration mitigation and management measures are discussed in **Section 8.0**. Any proposed works outside of the approved daytime hours will need to be assessed as part of the OOHW permit preparation discussed in **Section 2.4**. Any additional mitigation required (from **Table 23**) for vibration activities must be identified in the OOHW permit.

8.4 Community Notification

As detailed in the standard management measures outlined in the CNVF.

- A telephone, email and web-based community information service has been established to allow the community to obtain additional information on construction activities, provide feedback or make a complaint.
- Regular communications on the activities and progress of the proposal shall be provided to the community (e.g. via newsletter, email and/or website).

8.5 Consultation with Affected Receivers

In accordance with CoA E78, the CNVIS must include specific mitigation measures identified through consultation with affected sensitive land user(s) and the mitigation measures must be implemented for the duration of the Work. Details of this consultation are provided below.

8.5.1 Consultation approach

This section discusses the consultation approach that has been undertaken for the purposes of the work subject to this CNVIS. It is noted that consultation with affected sensitive land users on what specific mitigation measures they may require is considered to be an ongoing and live process and as such, measures that are personal to individual affected sensitive land user(s) will not be regularly documented in this CNVIS. Consultation records will be made available to the AA upon request.

The purpose of this consultation is to identify receivers who have specific circumstances that need further consideration during construction – for example, households who have children undertaking exams (HSC or similar), households who have vulnerable persons with disabilities or medical conditions, shift workers, etc.

The consultation approach utilised by Martinus Rail is in accordance with the Community Communications Strategy (CCS). The approach involved directly contacting the affected sensitive land user identified by this CNVIS through one or more of the following methods:

- Surveys distributed by email and paper notifications
- Door-knocks with a ‘Sorry we missed you’ card for those who were not at home
- Notifications
- Phone calls
- Emails
- Community briefings / group meetings.

Affected sensitive land users contacted by Martinus Rail have been made aware of the anticipated duration and nature of construction works that may affect them, as well as mitigation measures that will be implemented in accordance with the CEMP and CNVMP. Contact information for Martinus Rail’s Community Team have been provided to assist with ongoing consultation during construction.

Depending on individual needs and circumstances, specific mitigation measures offered by Martinus Rail could include but are not limited to:

- Offers of individually agreed respite to highly noise affected sensitive land users (standard construction hours)
- Consultation on timetabling of highly noise intensive works to avoid sensitive periods
- Offers of attended noise monitoring at the premises to confirm actual levels of impact

- Offers of temporary alternative accommodation or work space
- Individual briefings.

Specific mitigation measures identified in consultation with individual affected sensitive land users will be implemented during works subject to this CNVIS. Further mitigation measures may be identified by the affected community as construction progresses and these will be assessed where reasonable and feasible and on a case by-case basis.

8.5.2 Consultation for this CNVIS

The project website includes the following key information:

- Latest approvals
- All management plans, including the CNVMP and the Construction Environmental Management Plan (CEMP), which provide information on the relevant environmental management measures
- Notifications, including three-month lookaheads, monthly updates and specific OOHW notifications
- Contact mechanisms, including requests for feedback and/or complaints on individual circumstances.

As part of the project's program of regular notifications, the following notifications have included information on the OOHW requirements subject to this CNVIS:

- Project-wide monthly notifications distributed to over 25,000 properties
- Work specific notifications
- Three-month lookahead notifications distributed to over 25,000 properties
- Regular email with details of upcoming work or changes.

All notifications include the following:

- Link to project website
- 24/7 phone number and email address for enquiries, complaints or comments
- Requests for the community to provide feedback on their individual needs and circumstances.

Prior to commencement of works subject to this CNVIS, targeted consultation occurred with a total of approximately 7,127 residential properties across the entire project alignment, approximately 3,081 of which were in the Wagga Wagga precinct. These properties received targeted letterbox drops, emails and newspaper adverts from the Community Team and feedback was sought across (3) three weeks, from 7 August to 28 August 2024.

The team requested feedback from the affected community on their individual needs during this targeted consultation.

8.5.3 Consultation outcomes

Feedback received during this consultation was primarily related to the existing operational train line and the disturbance the trains cause.

In Wagga Wagga, no additional management measures relating to construction noise were identified during this consultation (as required by CoA E78); however, the following general sentiments were noted from respondents:

- Limit noise generating work outside of standard construction hours as much as possible
- Limit noise generating work on the weekends as much as possible
- Construction works should be completed as soon as possible.

The CNVIS documents the need to limit noise generating work as much as possible and this will be achieved through the implementation of existing mitigation measures listed in this CNVIS.

Nevertheless, regular consultation with the community will continue throughout construction in accordance with the Community Communications Strategy and the Community Action Plan prepared for the relevant activities. A list of key stakeholders relevant to this CNVIS are included in **Table 24** below.

Table 24 Key Stakeholders for this CNVIS

Precinct Area	Receiver Type	Level of Engagement	Distance from Work Site (m)
Cassidy Parade Footbridge			
Kildare Catholic College	Educational	Consult	30
Mount Erin Boarding School	Residential	Consult	30
Catholic Diocese of Wagga Wagga	Place of Worship	Consult	Various
South Wagga Public School	Educational	Consult	5
Edmonson, Erin and Macleay Streets	Residential	Consult	Various
Kildare, Norman, Fox, Little Best, Best Streets, Brookong Avenue and Cassidy Parade	Residential	Consult	Various
The Penthouse	Residential	Consult	Various
Erin Earth - 1 Kildare Street, Wagga Wagga	Educational	Consult	20
Pearson Street Bridge			
Wagga Show Campground and Wagga & District Greyhound Club	Active Recreation	Consult	10
Peacock Drive, Bulolo Street, Gallop Avenue and Wade Street	Residential	Consult	Various

8.6 Occupational Noise Exposure

In accordance with CoA E77, worksites will be managed to ensure that noise generated by construction will not exceed the National Standard for exposure to noise in the occupational environment of an eight-hour equivalent continuous A-weighted sound pressure level of $L_{Aeq,8h}$ of 85 dBA for any employee working at a location near the project.

It is not anticipated that an exceedance will occur at any point during the project, however occupational exposure to noise will primarily be managed under the Work Health and Safety Management Plan.

8.7 Monitoring

Noise and vibration monitoring will be undertaken in accordance with the CNVMP (including monitoring program) and the CNVF.

CoA E81 requires that advice from an independent heritage specialist must be sought on methods and locations for installing equipment used for vibration, movement and noise monitoring at heritage-listed structures prior to the installation of the equipment.

Construction Noise Monitoring

Construction noise monitoring will be carried out at the commencement of activities to confirm that actual noise levels are consistent with the predictions presented in this CNVIS, and that the management measures that have been implemented are effective or as per the CNVMP.

Monitoring locations will be focused to the most impacted receivers identified in **Appendix C**. Indicative locations are identified in **Table 25**, however, these will be subject to provision of safe access and the specific location of work being undertaken at the time of monitoring.

Noise monitoring will, where practicable, be in a position with unobstructed views of general site activities, whilst shielded as much as possible from non-construction site noise (e.g. road traffic, rail noise and other surrounding noise). The preferred measurement height is 1.2-1.5m above the ground. In accordance with *Australian Standard AS1055:2018*, outdoor noise monitoring is to be undertaken at least 3.5m from any reflecting structure other than the ground.

Noise monitoring will be carried out on or near the property boundary at the locations representative of the nominated receivers in **Table 25** (i.e. in publicly accessible areas near the nominated receivers, if it is safe to do so). Noise monitoring results will be assessed against the noise management levels (NMLs) and predicted exceedance category identified in **Appendix C**.

The results will be documented with discussion about the details of work underway at the time and mitigation in place. Noise monitoring results will be recorded on the MR Noise Monitoring Form in Procore. Noise monitoring data will be made available to the AA and ER for information, upon request.

Construction Vibration monitoring

Attended or unattended vibration monitoring will be undertaken as required. Monitoring locations may vary as work progresses and will be determined on a case-by-case basis or in response to complaints. The focus of monitoring will be at risk buildings, structures and sensitive receivers as identified in **Section 6.0**. If other vibration intensive activities are required, an assessment of their potential impact is required as per the CNVMP.

Indicative locations are identified in **Table 25**, however, these will be subject to provision of safe access and the specific location of work being undertaken at the time of monitoring. Vibration monitoring data will be made available to the AA and ER for information, upon request.

Table 25 Indicative Monitoring Locations

Location	Type	Monitoring	Timing
Noise Monitoring			
Cassidy Parade Footbridge • 2 Kildare St, Turvey Park • 24-26 Brookong Avenue, Wagga Wagga • 1 Kildare St, Turvey Park (ErinEarth and Kildare Catholic College) **Pearson Street Bridge** • 8B Peacock Dr, Turvey Park • 1 Docker St, Wagga Wagga	Activities based noise monitoring	• Confirming that actual noise levels are consistent with predicted noise impacts and that the effectiveness of actions and mitigation measures implemented are satisfactory • In response to a noise related complaint(s) (determined on a case-by-case basis) • Following implementation of mitigation measures or noise attenuation because of exceedance of predicted noise levels	At the commencement of the activities being undertaken
	Out of Hours Work	Attended monitoring as required by the Out of Hours Work (OOHW) plan to validate noise levels are consistent with predicted noise impacts and that the effectiveness of actions and mitigation measures implemented are satisfactory	At the commencement of the range of OOHW activities being undertaken.
	Plant / Equipment Checks	Spot checks would be carried out as required on a case-by-case basis, such as • In response to a specific noise related complaint and • During noise verification monitoring when it is possible to isolate the noise from one piece of plant or equipment.	case-by-case basis
Vibration Monitoring			
Cassidy Parade Footbridge • 2 Kildare St, Turvey Park • 24-26 Brookong Ave, Wagga Wagga • 22 Brookong Ave, Wagga Wagga **Pearson Street Bridge** • 26 Bourke St, Turvey Park • 15 Rabaul Pl, Ashmont (largest structure)	Activities based vibration monitoring	• Confirming that vibration levels are below criteria and that the effectiveness of actions and mitigation measures implemented are satisfactory • In response to a vibration related complaint(s) (determined on a case-by-case basis)	Throughout vibration generating activities being undertaken within minimum working distances to nearby receivers.

9.0 Cumulative Impacts

Cumulative construction noise impacts can occur where multiple work activities are being completed near to a particular receiver at the same time. There is potential for cumulative construction impacts from multiple construction activities being completed in different areas of the project (eg Wagga Wagga Yard, Edmondson Street Bridge, Cassidy Parade Footbridge and Pearson Street Bridge enhancement sites).

Since the construction scenarios required for various stages of the project would generally require similar items of equipment, concurrent construction work being completed near to a particular area could theoretically increase the worst-case noise levels in this report by around 3 dB (ie a logarithmic adding of two sources of noise at the same level).

The likelihood of worst-case noise levels being generated by two different work activities at the same time is, however, considered low and rather than increase construction noise levels, the impact of concurrent work would generally be a limited to a potential increase in the duration, and annoyance, of noise impacts on the affected receivers.

In practice, construction noise levels in any one location would vary and would be frequently much lower than the worst-case scenario assessed due to construction staging moving work around within the study area and, in many cases, only a few items of equipment being used at any one time.

Martinus Rail will take feasible and reasonable steps to consult and coordinate with other construction projects when they become aware of them and if they have the potential to impact the same receivers concurrently, to minimise cumulative impacts of noise and vibration and maximise respite for affected sensitive receivers (in accordance with CoA E72 and E83).

Doc No:
6-0052-210-EEC-W0-AS-0002_0

1. Sound Level or Noise Level

The terms 'sound' and 'noise' are almost interchangeable, except that 'noise' often refers to unwanted sound.

Sound (or noise) consists of minute fluctuations in atmospheric pressure. The human ear responds to changes in sound pressure over a very wide range with the loudest sound pressure to which the human ear can respond being ten million times greater than the softest. The decibel (abbreviated as dB) scale reduces this ratio to a more manageable size by the use of logarithms.

The symbols SPL, L or LP are commonly used to represent Sound Pressure Level. The symbol LA represents A-weighted Sound Pressure Level. The standard reference unit for Sound Pressure Levels expressed in decibels is 2×10^{-5} Pa.

2. 'A' Weighted Sound Pressure Level

The overall level of a sound is usually expressed in terms of dBA, which is measured using a sound level meter with an 'A-weighting' filter. This is an electronic filter having a frequency response corresponding approximately to that of human hearing.

People's hearing is most sensitive to sounds at mid frequencies (500 Hz to 4,000 Hz), and less sensitive at lower and higher frequencies. Different sources having the same dBA level generally sound about equally loud.

A change of 1 dB or 2 dB in the level of a sound is difficult for most people to detect, whilst a 3 dB to 5 dB change corresponds to a small but noticeable change in loudness. A 10 dB change corresponds to an approximate doubling or halving in loudness. The table below lists examples of typical noise levels.

Sound Pressure Level (dBA)	Typical Source	Subjective Evaluation
130	Threshold of pain	Intolerable
120	Heavy rock concert	Extremely noisy
110	Grinding on steel	
100	Loud car horn at 3 m	Very noisy
90	Construction site with pneumatic hammering	
80	Kerbside of busy street	Loud
70	Loud radio or television	
60	Department store	Moderate to quiet
50	General Office	
40	Inside private office	Quiet to very quiet
30	Inside bedroom	
20	Recording studio	Almost silent

Other weightings (eg B, C and D) are less commonly used than A-weighting. Sound Levels measured without any weighting are referred to as 'linear', and the units are expressed as dB(lin) or dB.

3. Sound Power Level

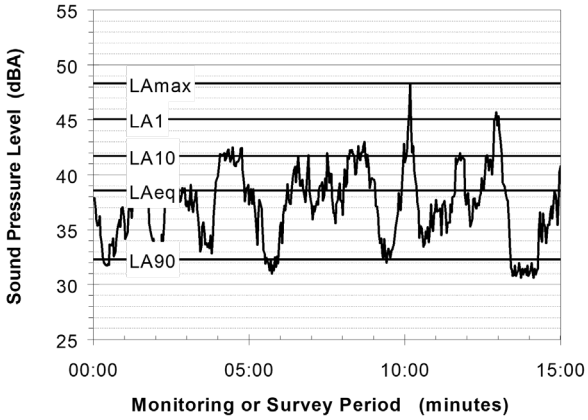
The Sound Power of a source is the rate at which it emits acoustic energy. As with Sound Pressure Levels, Sound Power Levels are expressed in decibel units (dB or dBA), but may be identified by the symbols SWL or LW, or by the reference unit 10^{-12} W.

The relationship between Sound Power and Sound Pressure is similar to the effect of an electric radiator, which is characterised by a power rating but has an effect on the surrounding environment that can be measured in terms of a different parameter, temperature.

4. Statistical Noise Levels

Sounds that vary in level over time, such as road traffic noise and most community noise, are commonly described in terms of the statistical exceedance levels LAN, where LAN is the A-weighted sound pressure level exceeded for N% of a given measurement period. For example, the LA1 is the noise level exceeded for 1% of the time, LA10 the noise exceeded for 10% of the time, and so on.

The following figure presents a hypothetical 15 minute noise survey, illustrating various common statistical indices of interest.



Of particular relevance, are:

- L_{A1} The noise level exceeded for 1% of the 15 minute interval.
- L_{A10} The noise level exceeded for 10% of the 15 minute interval. This is commonly referred to as the average maximum noise level.
- L_{A90} The noise level exceeded for 90% of the sample period. This noise level is described as the average minimum background sound level (in the absence of the source under consideration), or simply the background level.
- L_{Aeq} The A-weighted equivalent noise level (basically, the average noise level). It is defined as the steady sound level that contains the same amount of acoustical energy as the corresponding time-varying sound.
- L_{Amax} The A-weighted maximum sound pressure level of an event measured with a sound level meter.

5. Frequency Analysis

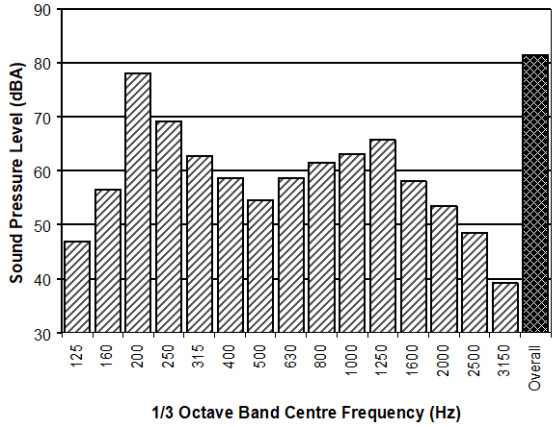
Frequency analysis is the process used to examine the tones (or frequency components) which make up the overall noise or vibration signal.

The units for frequency are Hertz (Hz), which represent the number of cycles per second.

Frequency analysis can be in:

- Octave bands (where the centre frequency and width of each band is double the previous band)
- 1/3 octave bands (three bands in each octave band)
- Narrow band (where the spectrum is divided into 400 or more bands of equal width)

The following figure shows a 1/3 octave band frequency analysis where the noise is dominated by the 200 Hz band. Note that the indicated level of each individual band is less than the overall level, which is the logarithmic sum of the bands.



6. Annoying Noise (Special Audible Characteristics)

A louder noise will generally be more annoying to nearby receivers than a quieter one. However, noise is often also found to be more annoying and result in larger impacts where the following characteristics are apparent:

- **Tonality** - tonal noise contains one or more prominent tones (ie differences in distinct frequency components between adjoining octave or 1/3 octave bands), and is normally regarded as more annoying than 'broad band' noise.
- **Impulsiveness** - an impulsive noise is characterised by one or more short sharp peaks in the time domain, such as occurs during hammering.
- **Intermittency** - intermittent noise varies in level with the change in level being clearly audible. An example would include mechanical plant cycling on and off.
- **Low Frequency Noise** - low frequency noise contains significant energy in the lower frequency bands, which are typically taken to be in the 10 to 160 Hz region.

7. Vibration

Vibration may be defined as cyclic or transient motion. This motion can be measured in terms of its displacement, velocity or acceleration. Most assessments of human response to vibration or the risk of damage to buildings use measurements of vibration velocity. These may be expressed in terms of 'peak' velocity or 'rms' velocity.

The former is the maximum instantaneous velocity, without any averaging, and is sometimes referred to as 'peak particle velocity', or PPV. The latter incorporates 'root mean squared' averaging over some defined time period.

Vibration measurements may be carried out in a single axis or alternatively as triaxial measurements (ie vertical, longitudinal and transverse).

The common units for velocity are millimetres per second (mm/s). As with noise, decibel units can also be used, in which case the reference level should always be stated. A vibration level V, expressed in mm/s can be converted to decibels by the formula 20 log (V/Vo), where Vo is the reference level (10^{-9} m/s). Care is required in this regard, as other reference levels may be used.

8. Human Perception of Vibration

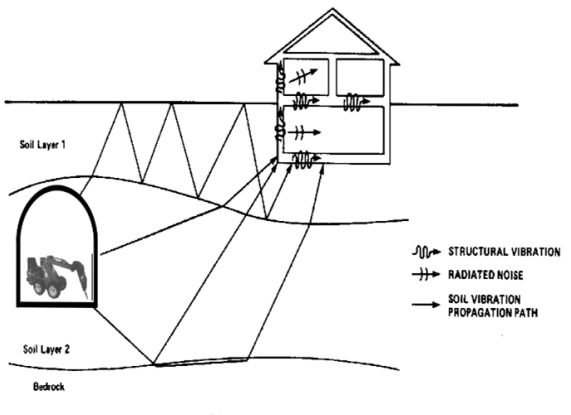
People are able to 'feel' vibration at levels lower than those required to cause even superficial damage to the most susceptible classes of building (even though they may not be disturbed by the motion). An individual's perception of motion or response to vibration depends very strongly on previous experience and expectations, and on other connotations associated with the perceived source of the vibration. For example, the vibration that a person responds to as 'normal' in a car, bus or train is considerably higher than what is perceived as 'normal' in a shop, office or dwelling.

9. Ground-borne Noise, Structure-borne Noise and Regenerated Noise

Noise that propagates through a structure as vibration and is radiated by vibrating wall and floor surfaces is termed 'structure-borne noise', 'ground-borne noise' or 'regenerated noise'. This noise originates as vibration and propagates between the source and receiver through the ground and/or building structural elements, rather than through the air.

Typical sources of ground-borne or structure-borne noise include tunnelling works, underground railways, excavation plant (eg rockbreakers), and building services plant (eg fans, compressors and generators).

The following figure presents an example of the various paths by which vibration and ground-borne noise may be transmitted between a source and receiver for construction activities occurring within a tunnel.



The term 'regenerated noise' is also used in other instances where energy is converted to noise away from the primary source. One example would be a fan blowing air through a discharge grill. The fan is the energy source and primary noise source. Additional noise may be created by the aerodynamic effect of the discharge grill in the airstream. This secondary noise is referred to as regenerated noise.

Acknowledgement

OzArk acknowledge the traditional custodians of the area on which this assessment took place and pay respect to their beliefs, cultural heritage, and continuing connection with the land. We also acknowledge and pay respect to the post-contact experiences of Aboriginal people with attachment to the area and to the Elders, past and present, as the next generation of role models and vessels for memories, traditions, culture and hopes of local Aboriginal people.

1 INTRODUCTION

OzArk Environment & Heritage (OzArk) has been engaged by Martinus Rail (MR, the client), on behalf of Australian Rail Track Corporation (ARTC, the proponent) to complete a Heritage Assessment Report (the report) following a proposal to extend the Construction Impact Zone (CIZ) at Wagga Wagga (the proposal), as part of the Albury to Illabo (A2I) Inland Rail (IR) Project (the Project).

There are four discrete locations, that shall be referred to collectively as the Construction Impact Zone (CIZ) extension of the Wagga Wagga precinct (**Figure 1-1**). The CIZ extension is within the City of Wagga Wagga Local Government Area (LGA). The four discrete locations are individually referred to as:

- Pearson Street CIZ extension area
- Cassidy footbridge CIZ extension area
- Wagga Wagga Station CIZ extension area
- Eastern Yard CIZ extension area.

OzArk has prepared this report with reference to the *Due Diligence Code of Practice for the Protection of Aboriginal Objects in NSW* (Due Diligence Code), Heritage Council's *Investigating Heritage Significance, A guide to identifying and examining heritage items in NSW* and the *Historical Archaeology Code of Practice* to assess whether Aboriginal objects or items of historic significance may be harmed by the proposed CIZ extension.

1.1 BACKGROUND

The A2I section of the project is Critical State Significant Infrastructure (CSSI) and was approved on 8th October 2024 (Infrastructure Approval). The approval covered all works proposed within the CIZ. As a result of the need to provide sufficient space for effective construction in the Wagga Wagga precinct, a CIZ extension has been proposed, the potential heritage impacts of which are addressed in this report. This additional assessment informs a Consistency Assessment for the CIZ extension.

Background information relating to the Wagga Wagga precinct has been comprehensively presented within previous reports associated with the A2I project and will not be repeated within this document.

Figure 1-1: Proposed CIZ extension of the Wagga Wagga precinct broken into four separate assessment areas.

1.2 PROPOSED WORKS WITHIN THE CIZ EXTENSION ZONE

The extension of the CIZ is to enable Martinus Rail and associated contractors to undertake certain works beyond the existing approved CIZ. The proposed works are detailed below:

- Traffic and pedestrian management
- Access
- Parking
- Temporary material laydown and stockpiling
- Site compounds
- Widening of CIZ to allow for movement to complete approved construction works.

Construction plans indicating where the proposed works will take place are presented in **Figure 1-2**, **Figure 1-3** and **Figure 1-4** below.

Figure 1-2: Proposed works for Pearson Street CIZ extension.

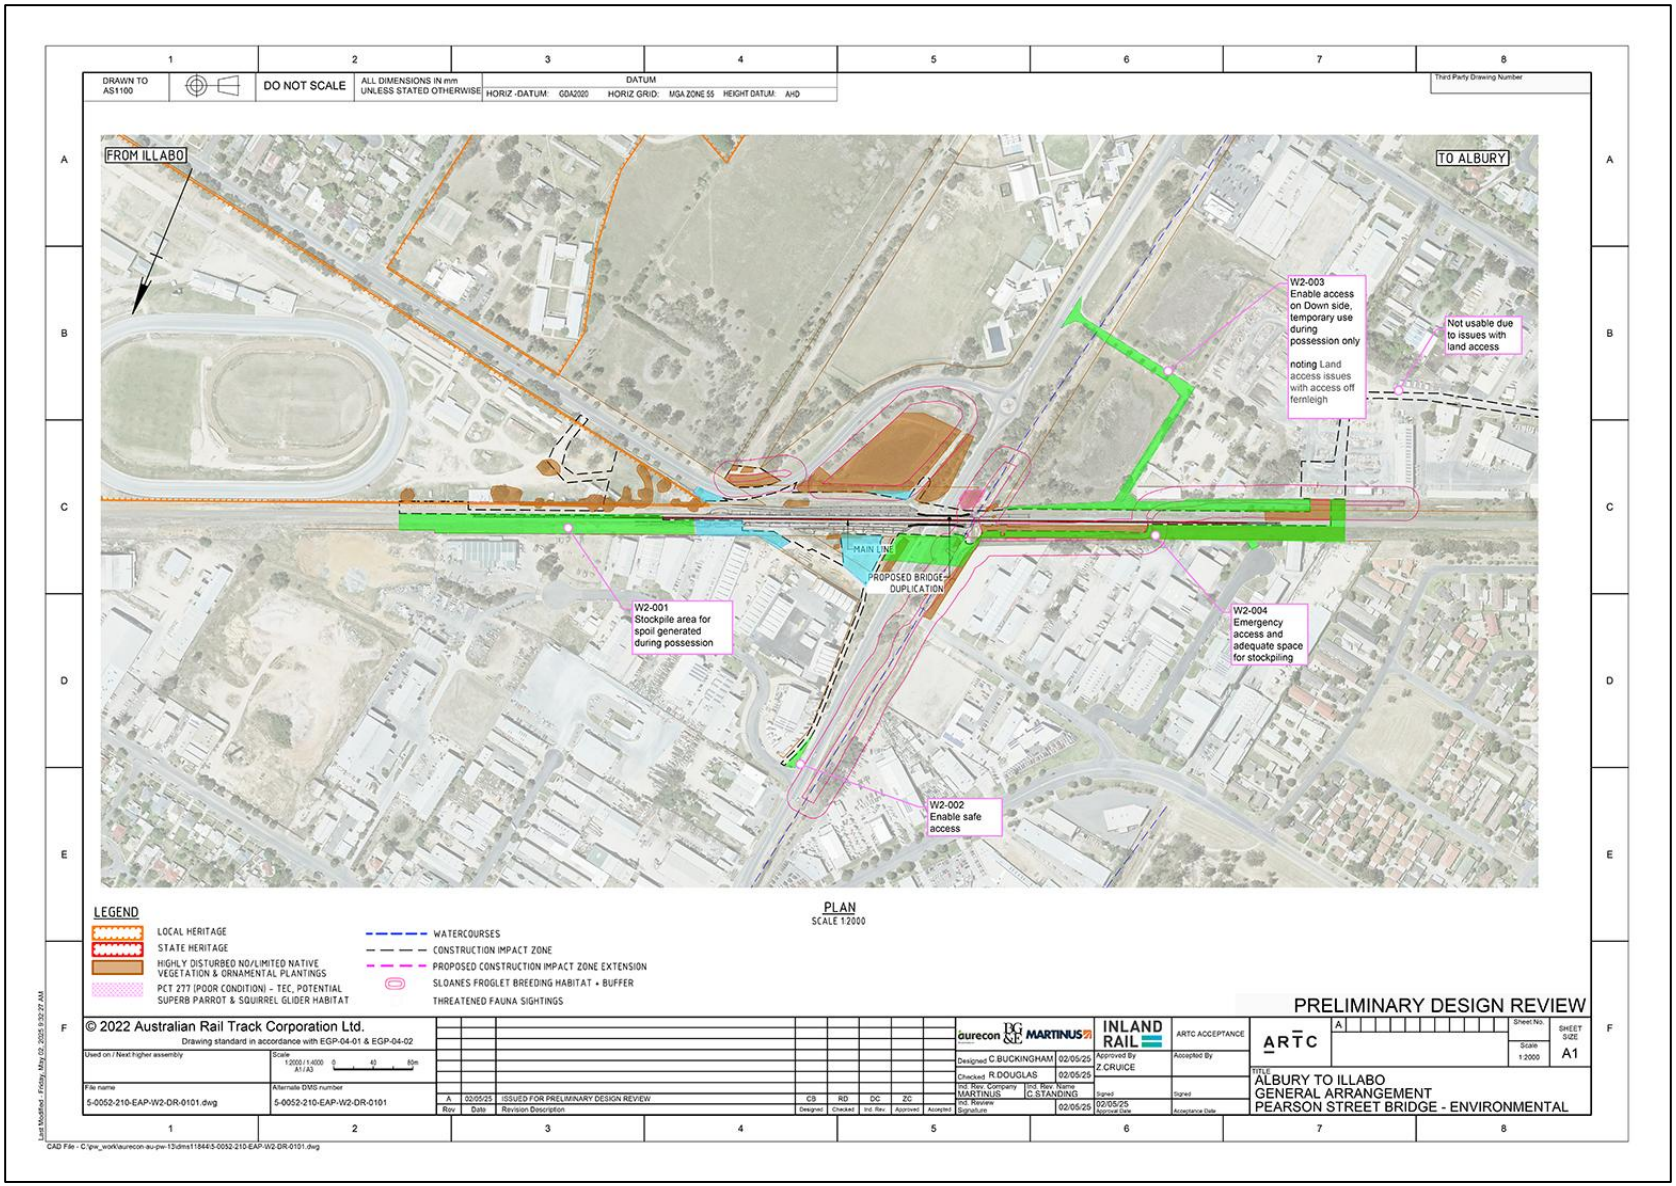

Figure 1-3: Proposed works for Cassidy Footbridge CIZ extension.

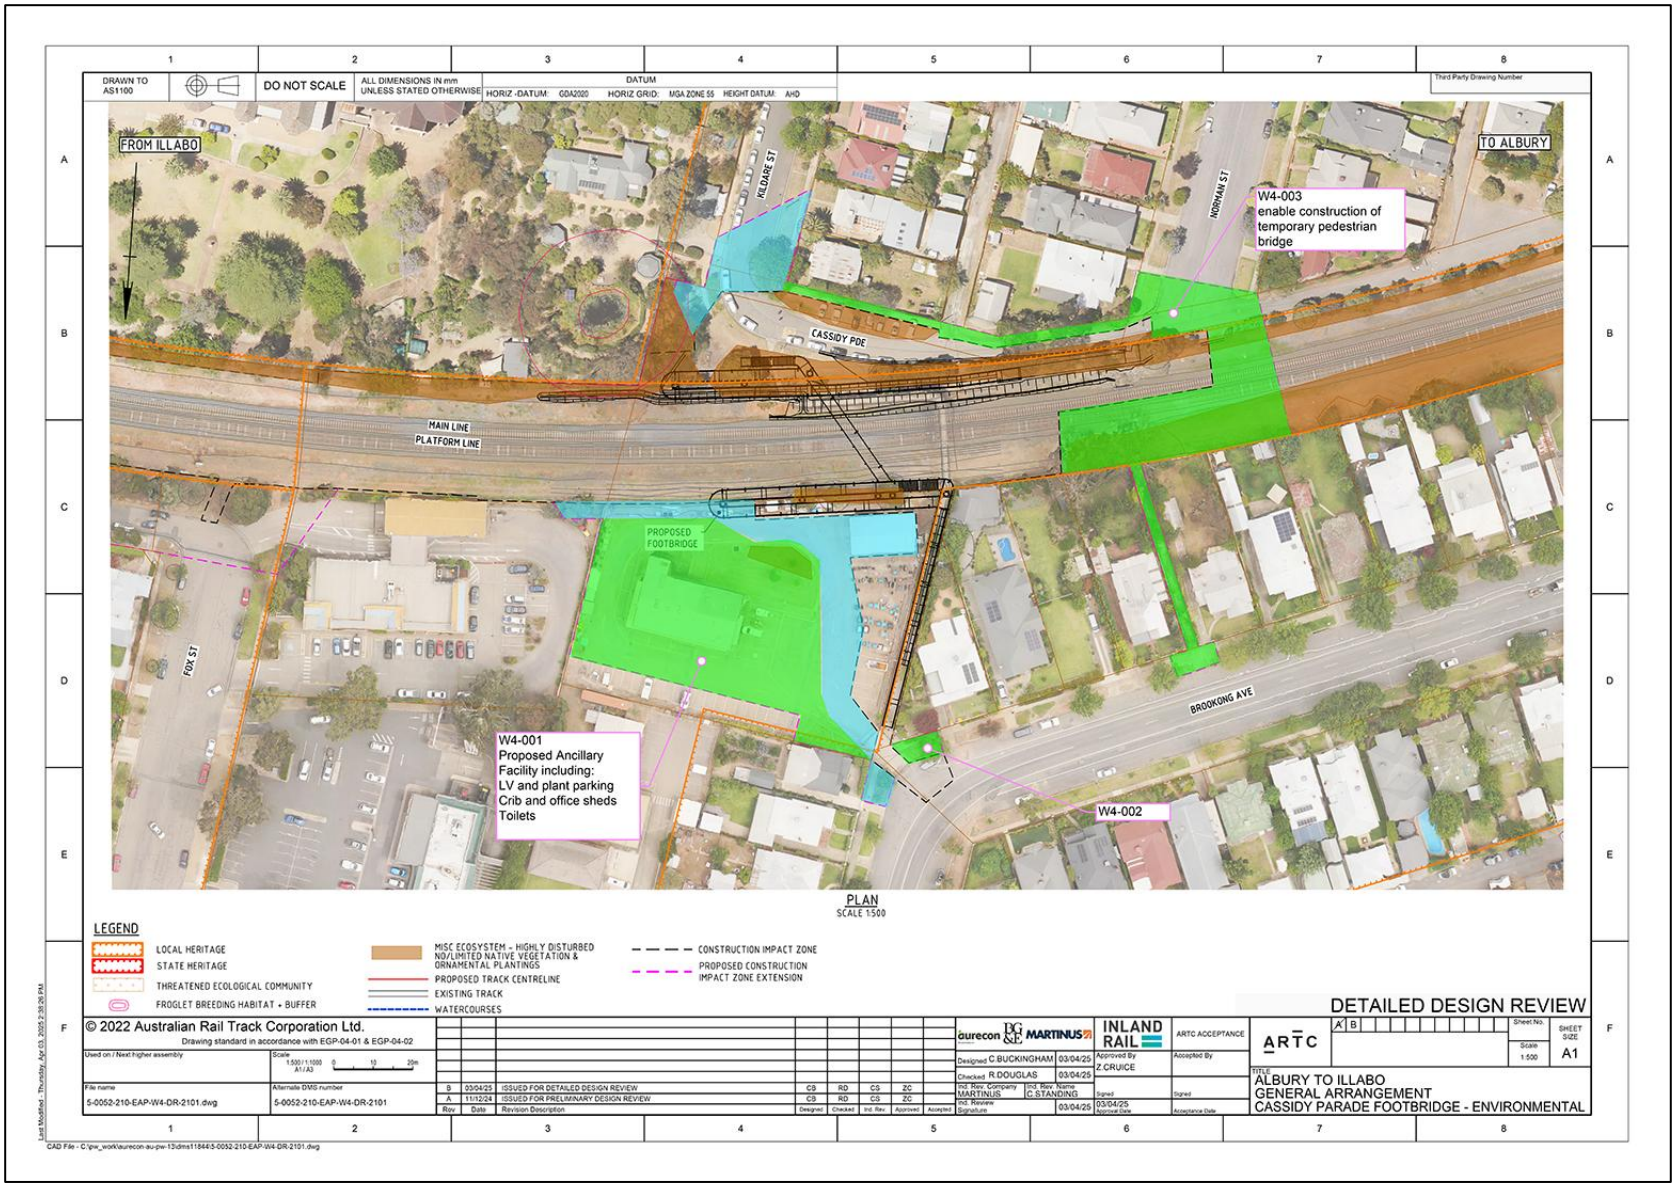

Figure 1-4: Proposed works for the Station and Eastern yard CIZ extensions.

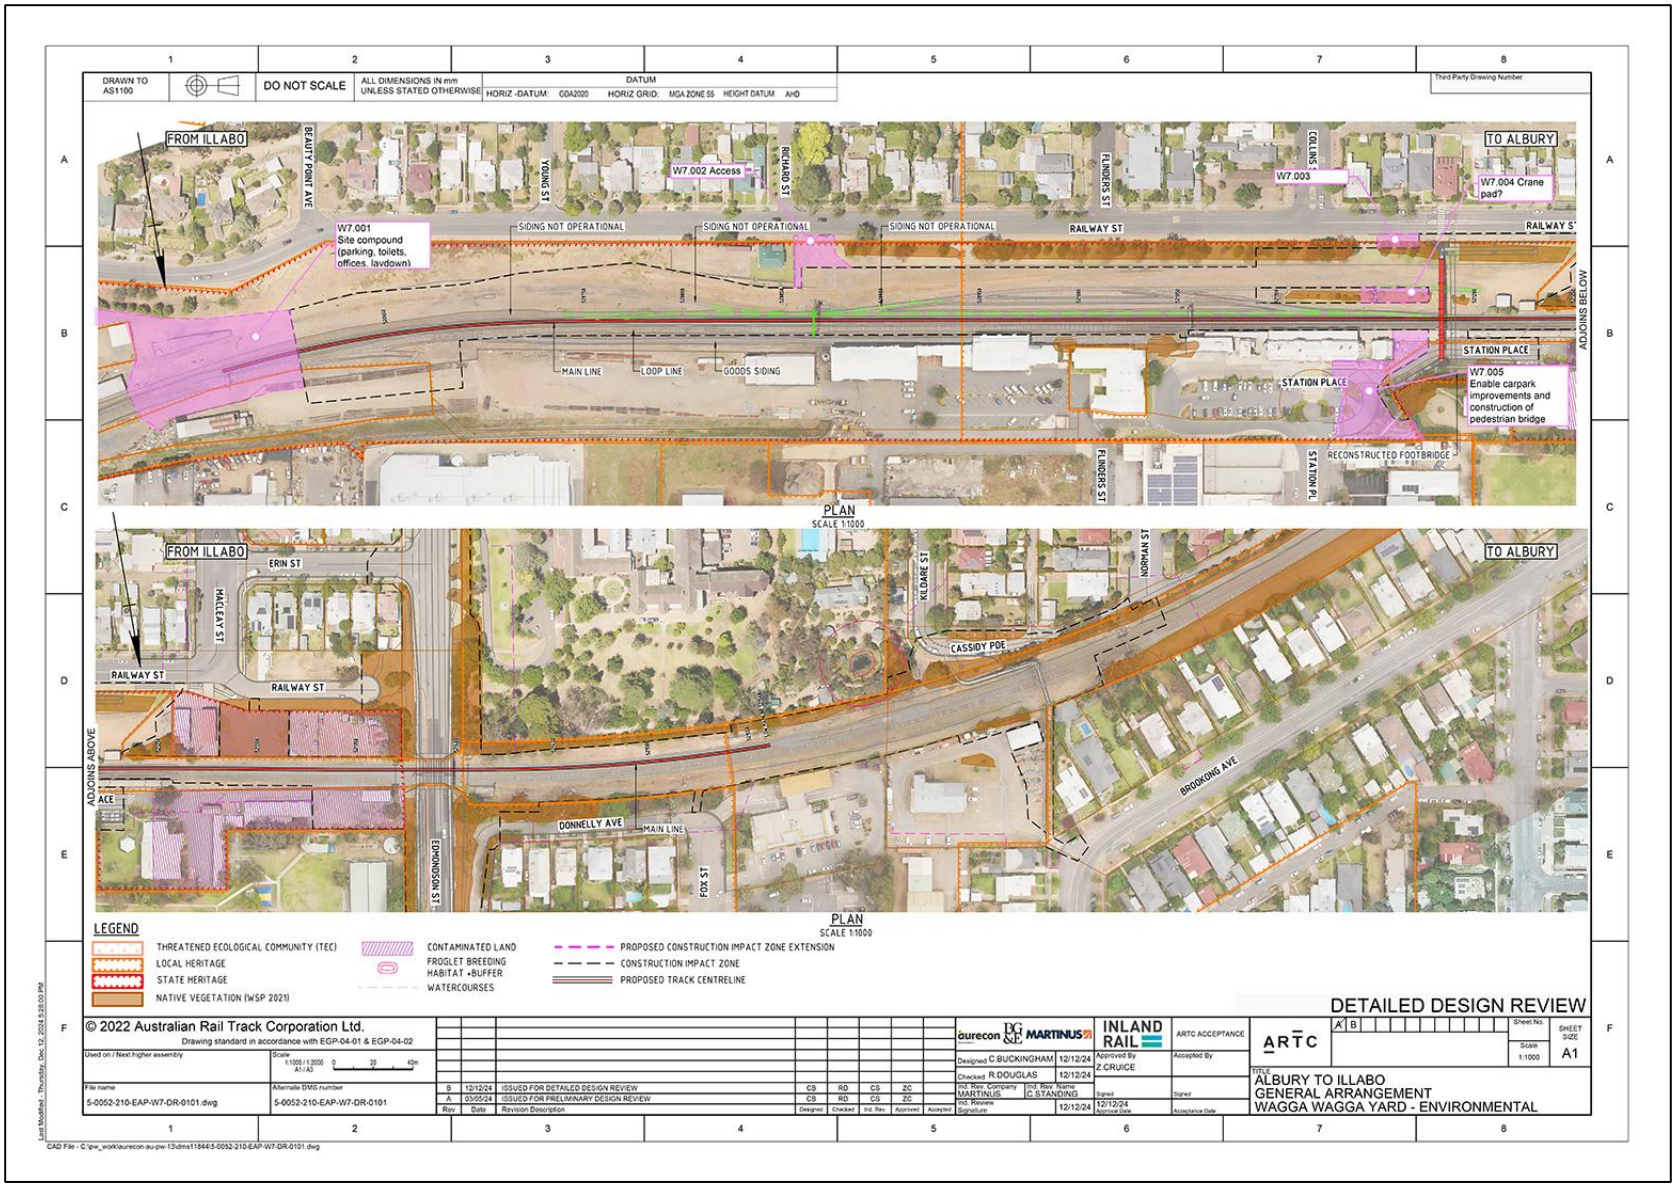


2 ABORIGINAL HERITAGE

2.1 AHIMS SEARCH

On 6 August 2025, a basic search of the Aboriginal Heritage Information Management System (AHIMS) was undertaken over the CIZ extension zones (GDA, Zone: 55, Eastings: 530847 - 534348, Northings: 6112644 - 6113744) (Error! Reference source not found.). The search reported that four A boriginal heritage sites are located in the Wagga Wagga Botanic Gardens approximately 1 km south of the Eastern Yard CIZ Extension. These sites will not be impacted by the proposal.

There are no Aboriginal heritage sites within the four CIZ Extensions or in close proximity.

There are no other sources of information to indicate that Aboriginal objects are likely within the collective CIZ extension proposed for Wagga Wagga.

2.2 LANDFORM

The CIZ extension is located within the developed centre of Wagga Wagga, which is largely situated within an undulating plain landform. The area is dominated by the Becks Land soil landscape but is highly disturbed and unlikely to support the preservation of archaeological deposits.

While there are multiple sites recorded around Wagga Wagga, the entire CIZ extension area is within the existing disturbed rail corridor and urban areas (**Table 2-1**).

The closest named watercourse is the Murrumbidgee River, located 775 m north east of the Eastern Yard CIZ extension zone at its closest point.

Table 2-1: Views of disturbed landforms within the CIZ extension zones.

1. View southwest from Cassidy Bridge looking along the rail corridor towards the CIZ extension zone.	2. View east from the Station platform looking towards the museum and central garden area within the Station CIZ extension zone.

2.3 CONCLUSION – ABORIGINAL HERITAGE

Assessment for Aboriginal heritage via the Due Diligence Code has determined that the proposed CIZ extension is unlikely to harm Aboriginal objects or landscape features with archaeological sensitivity (see **Table 2-2**).

A desktop assessment has determined that due to the significant land use disturbance, there is a low likelihood of intact, subsurface archaeological deposits. As documented in **Table 2-2**, no further archaeological investigation is required.

The works may proceed with caution and in the unlikely event that Aboriginal objects are encountered, refer to the Cultural Heritage Unexpected Find Procedure in Appendix B of the *Inland Rail A2P Albury to Illabo Construction Cultural Heritage Management Plan (CCHMP).*

Table 2-2: Due Diligence Code of Practice application

Step	Reasoning	Answer
Step 1 Will the activity disturb the ground surface or any culturally modified trees?	The proposed activities will not impact any culturally modified trees but may involve limited ground surface disturbance. The proposal is not an exempt activity or a low impact activity.	Yes
If the answer to Step 1 is 'yes', proceed to Step 2		
Step 2a Are there any relevant records of Aboriginal heritage on AHIMS to indicate presence of Aboriginal objects?	AHIMS indicated that there are no Aboriginal sites within the CIZ extension boundaries.	No
Step 2b Are there other sources of information to indicate presence of Aboriginal objects?	There are no other sources of information to indicate that Aboriginal objects are likely within the CIZ extension boundaries	No
Step 2c Will the activity impact landforms with archaeological sensitivity as defined by the Due Diligence Code?	Landforms with identified archaeological sensitivity are not present in CIZ extension boundaries	No
If the answer to any stage of Step 2 is 'yes', proceed to Step 3		
Step 3 Can harm to Aboriginal objects listed on AHIMS or identified by other sources of information and/or can the carrying out of the activity at the relevant landscape features be avoided?	The proposal will avoid harm to known Aboriginal sites, and landforms with identified archaeological sensitivity are not present.	Yes
If the answer to Step 3 is 'no', a visual inspection is required. Proceed to Step 4.		
Step 4 Does the visual inspection confirm that there are Aboriginal objects or that they are likely?	Visual inspection not required as there are no Aboriginal sites or landforms with identified archaeological sensitivity present within the highly disturbed landforms of the rail corridor and urban areas.	No
Conclusion		
Proceed with caution		

3 POTENTIAL IMPACTS TO HERITAGE ITEMS

A study by GML Heritage (2022) assessed both direct impacts to historic heritage items within the approved CIZ boundary and indirect impacts to listed historic heritage items located adjacent to and within 200 m of the approved CIZ boundary.

The proposed CIZ extension involves the boundary moving closer to several heritage-listed items, as well as changing its interaction with the State Heritage Register (SHR) curtilage of Wagga Wagga Railway Station and Yard Group, therefore further assessment is required. The assessment below documents these interactions in line with the *Guidelines for preparing a statement of heritage impact* (DPE 2023a) and *Heritage Council's Historical Archaeology Code of Practice*.

Impacts to heritage items within 200 m of the CIZ extension could be associated with vibration, accidental impact, viewsheds and vistas.

3.1.1 Vibration

The proposed construction works, including compaction, earthworks and piling, can generate vibration, which may cause cosmetic and structural damage to heritage structures. Materials used in historic buildings, such as brickwork and stone, can be vulnerable to vibrations due to an inability to deform without rupturing: however, heritage buildings should not be assumed as being structurally unsound.

Heritage items located in proximity to the proposal could be vulnerable to the effects of vibration from the proposed works, if not properly managed. A conservative assessment threshold (being three millimetres per second (mm/s) has been applied for vibration, to identify potential risks of indirect impacts to heritage items for cosmetic damage. This translates to a safe working distance of around 15 m for vibratory piling and 20 m for vibratory compaction. Recommended safe working distances, derived room the *Construction Noise and Vibration Guideline – Public Transport Infrastructure* (CNVG-PTI) (TfNSW, 2023), are presented in the CCHMP. The vibration risks and impacts will be confirmed via implementation of the Construction Noise and Vibration Monitoring Program (CNVMP), including the development of Construction Nose and Vibration Impact Statements in accordance with Condition of Approval (CoA) E78. The minimum working distances will vary depending on the plant item, building types and foundations and local geotechnical conditions.

Ongoing operational impacts are largely restricted to impacts caused by the vibration of passing trains. These are predicted to be negligible, as items located in proximity to the railway corridor are already subject to continuous vibration as a result of the railway track (GML 2022: 11-23). Where there is risk of impact to identified heritage items during works, these would be considered according to the nature of the works and managed through mitigation measures. These include the selection of equipment and construction methods, pre-construction condition surveys and monitoring of these structures, where risk remains.

Vibration monitoring will be carried out when vibration intensive tasks are occurring within the minimum working distances to heritage structures. In accordance with CoA E81, if vibration monitoring equipment is required to be installed at heritage-listed structures, advice from a heritage specialist will be sought on methods and locations for installing equipment.

Where the monitoring identifies exceedances in the relevant criteria, or where impacts are identified, additional mitigation measures will be identified and implemented to appropriately manage impacts. These include modifying plant specifications and/or work methodology and delineating additional exclusion areas around structures to restrict high-vibration activities occurring too close to sensitive structures (A2I CCHMP 2025: 73).

The exclusion zones for retained heritage items or structures will be marked on the environmental control maps, site plans and avoided.

3.1.2 Accidental impact

There is potential for accidental damage to heritage items in proximity to construction activities. Movement of heavy machinery and intrusive works near heritage structures presents a low risk of inadvertent damage to heritage structures adjacent to the proposal.

Prior to the commencement of construction, retained heritage items will be inspected by suitably qualified person to demarcate the exclusion measures (such as fencing). Items vulnerable to damage would be temporarily relocated or alternative measures implemented to avoid impact. Exclusion measures would be inspected regularly during construction to ensure protection of these heritage items (EIS 11-28, NAH10).

3.1.3 Viewsheds and vistas

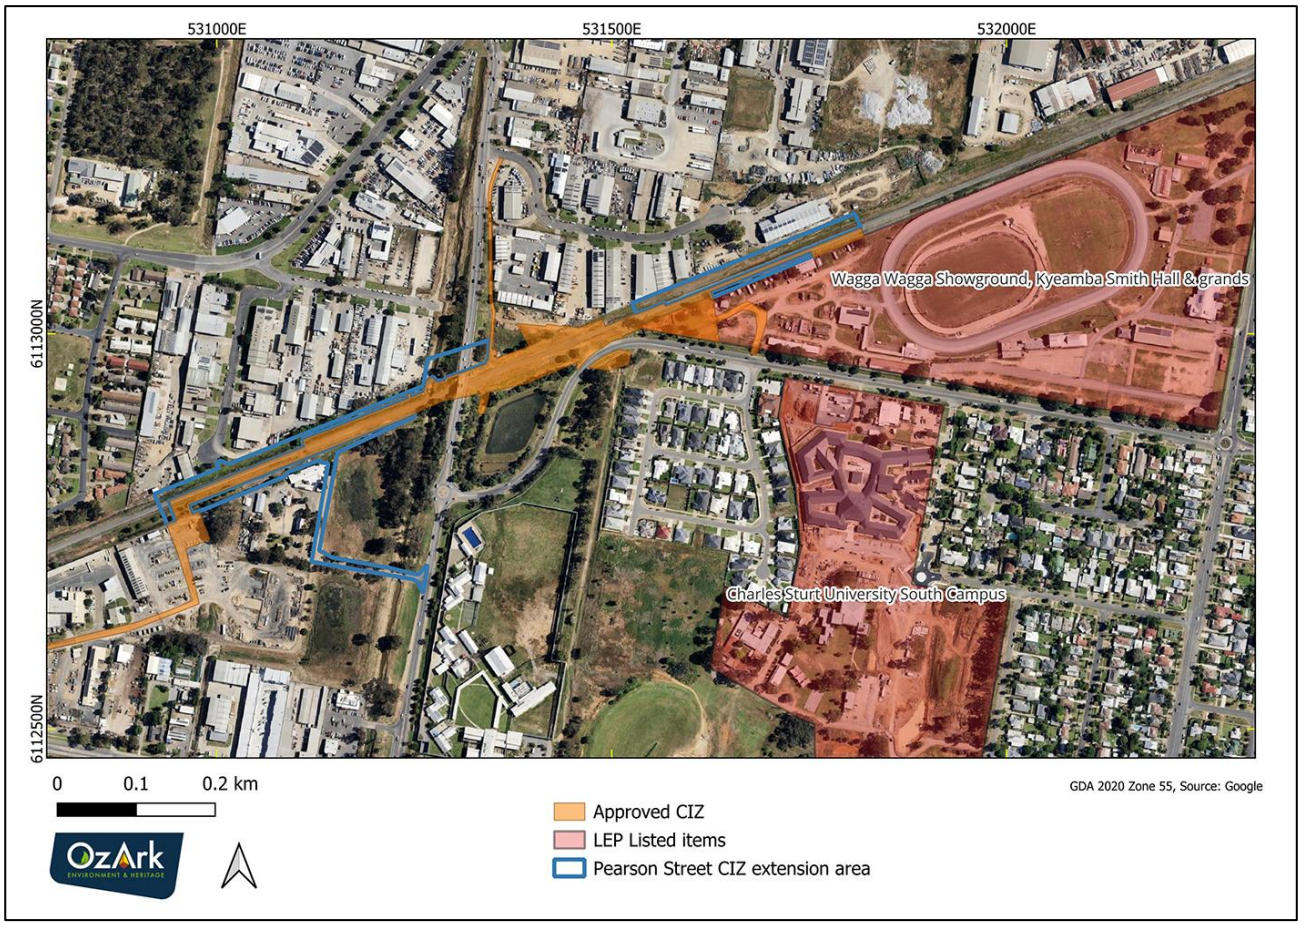
During construction, views of construction activities would be temporary and short-term. This would not have a material impact on heritage items that have views to the proposal site. Viewsheds from heritage items are unlikely to be impacted by the proposal.

3.2 IMPACT TO HERITAGE ITEMS IN RELATION TO PEARSON STREET CIZ EXTENSION AREA

The proposed Pearson Street CIZ extension area interacts with two heritage listed items, the Wagga Wagga Showground, Kyeamba Smith Hall and grandstand (Wagga Wagga LEP 2010 #I246) and the former Charles Sturt University South Campus (Wagga Wagga LEP 2010 #I245) (**Figure 3-2**).

Potential impacts to these items will be assessed below.

Figure 3-1: Heritage items in proximity to Pearson Street CIZ extension area.



3.2.1 Wagga Wagga Showground, 'Kyeamba Smith' Hall and grandstand (LEP #I246)

The Wagga Wagga Showground complex includes a number of early and mid-twentieth century buildings. The 'Neil Skeers' Grandstand is an ornate Federation-style brick structure with decorative cast iron balustrade, timber bench seats, and a timber and corrugated iron sheet, clad roof. The roof is an asymmetrical shape, with a curved hip on its eastern aspect and open gable on the western aspect. The structure may have been altered in the past, removing a portion of the Grandstand. A brick and iron shed adjoins the Grandstand on its eastern side. The 'Kyeamba Smith' Hall is a brick building with a corrugated iron sheet clad roof. It is of a similar style to the Grandstand, suggesting they are likely to be contemporary structures. Several other contemporary buildings are located within the curtilage of the Wagga Wagga Showground.

Potential impacts to Wagga Wagga Showground complex

The proposed works extend along the north western boundary of the Wagga Wagga showground complex where the curtilage abuts the rail corridor. It is proposed that this zone will be used as a temporary stockpile area with materials generated during possession.

It is assessed that impact to the heritage values of the Wagga Wagga Showground complex in relation to the Pearson Street CIZ extension will be negligible.

3.2.2 Former Charles Sturt University South Campus (LEP #I245)

A SoHI prepared for the Subdivision and rezoning at the former Charles Sturt University (CSU) south Campus (former) provides the following Statement of Significance:

The site of the CSU Wagga Wagga South Campus is of local heritage significance. The campus is of historical significance for its role as a RAAF Hospital during World War II, and later when it served as the former Wagga Wagga South Teacher's College. The site holds associations with both the contribution of the region to the WWII war effort and to education… The buildings of the former Wagga Wagga South Teachers College and the former RAAF Hospital buildings are representative of the adaptive reuse of buildings that took place during the mid twentieth century. The buildings have aesthetic value for their design and siting in the campus landscape. The site of the CSU Wagga Wagga South Campus holds social significance for former students, staff and teachers, and in addition the RAAF Hospital buildings are socially significant for the Wagga Wagga community. The site has rarity value for being the first complete 'residential co-educational tertiary institution on a single campus in Australia'.

Potential impacts to the former CSU South Campus

The proposed works extend along the rail corridor approximately 195 m north of the former CSU South Campus. It is proposed that this zone will be used as a temporary stockpile area with materials generated during possession.

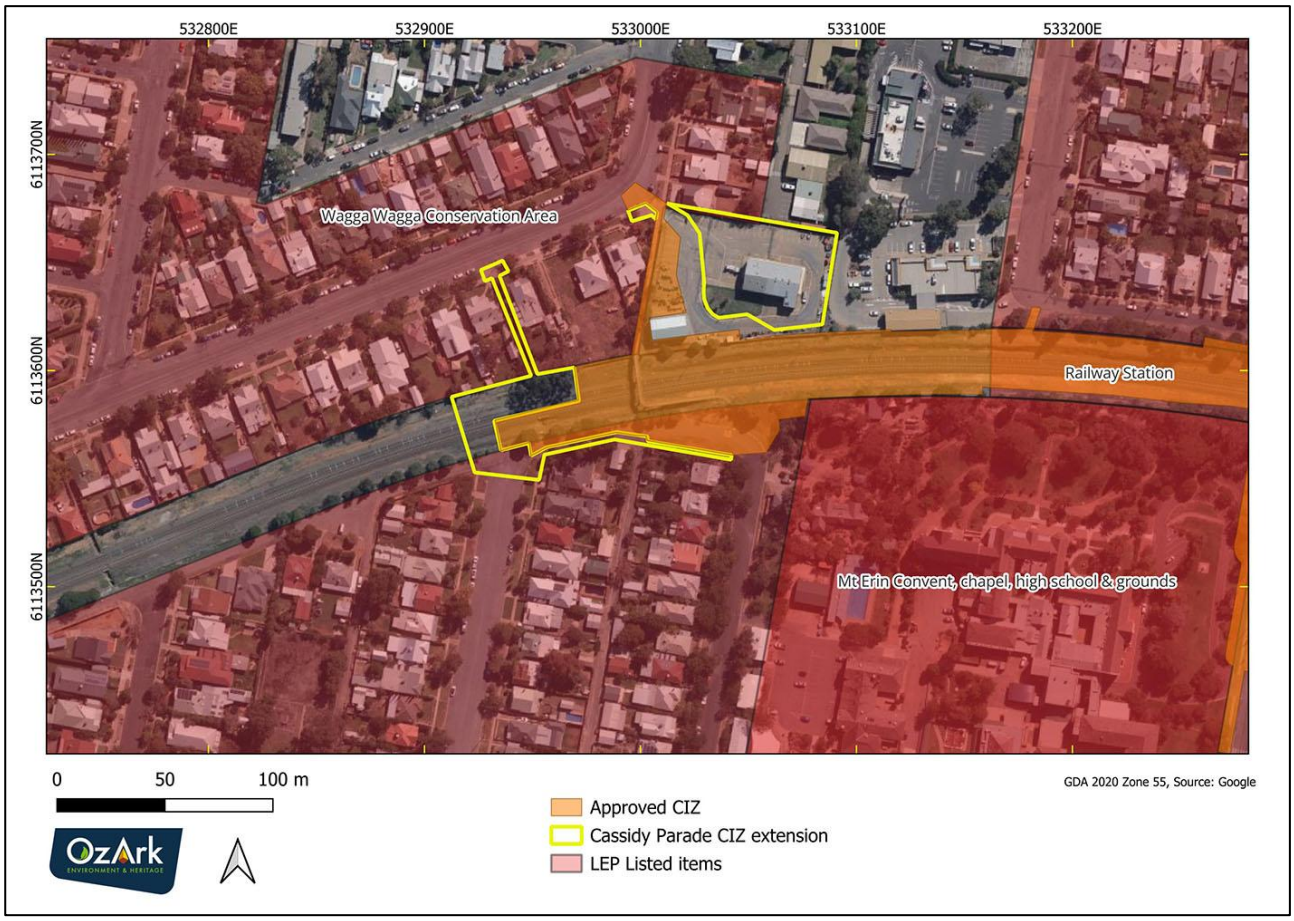
It is assessed that impact to the heritage values of the former CSU South Campus in relation to the CIZ extension will be negligible.

3.3 IMPACT TO HERITAGE ITEMS IN RELATION TO CASSIDY FOOTBRIDGE CIZ EXTENSION AREA

The proposed Cassidy Footbridge CIZ extension area interacts with three listed heritage items, the Wagga Wagga Conservation Area; the Mt Erin Convent, chapel, high school & grounds (Wagga Wagga LEP 2010 #I260; and the Wagga Wagga Railway Station and Yard Group (Wagga Wagga LEP I98, SHR #01279, s170 ID 4280250 (ARTC and TfNSW) (**Figure 3-2**).

Potential impacts to these items will be assessed below.

Figure 3-2: Heritage items in proximity to Cassidy Footbridge CIZ extension area.



3.3.1 Wagga Wagga Conservation Area

The Wagga Wagga Development Control Plan (DCP) notes that the Wagga Wagga Conservation Area incorporates the area of the town's early settlement. The heritage conservation area includes Fitzmaurice Street commercial precinct and the residential precincts to the west and south. The conservation area has cohesive streetscape qualities. Characteristic elements that contribute to the conservation area's thematic significance and character area:

- Buildings from the Victorian, Federation, Edwardian and Interwar periods
- Single storey dwellings, mainly detached dwellings
- Pitched roofs and similar roof styles
- Common use of local red brick with corrugated iron roofing
- Common fencing styles and materials
- Garages and outbuildings located to the rear of dwellings
- Street trees and private garden plantings unify the streetscape, especially the Peter Street palm trees, Gurwood Street plane trees.

Potential impacts to the Wagga Wagga Conservation Area

It is understood that the proposed works outlined in **Section 1.2** will involve the construction of a temporary pedestrian walkway from Cassidy Parade over the rail corridor and along an existing drain between two dwellings on Brookong Avenue during the construction period of the permanent Cassidy footbridge. Additionally, the area currently occupied by Telstra adjacent to the existing footbridge will be utilised as an ancillary facility for LV and plant parking, crib, office sheds and toilets.

It is assessed that impact to the heritage values of the Wagga Wagga Conservation Area in relation to the CIZ extension will be negligible due to the temporary nature of the proposed activities.

3.3.2 Mount Erin Convent, Chapel, high school and grounds (LEP #I260)

The Mount Erin complex comprises of a number of buildings, many of which date to the late nineteenth century. The curtilage also includes extensive mature plantings, which screen much of the site from external views. The historic site is where five Presentation Sisters from Ireland established the Mount Erin Convent and School in 1876.

Potential impacts to the Mount Erin complex

It is understood that the proposed works outlined in **Section 1.2** will involve the construction of a temporary pedestrian walkway from Cassidy Parade to Brookong Avenue bringing the CIZ extension within 32 m of the Mount Erin complex boundary on Kildare Street. As the proposed works for this area primarily involve pedestrian and traffic management it is consider that the impact to the Mount Erin Complex in relation to the CIZ extension will be negligible.

3.4 IMPACT TO HERITAGE ITEMS IN RELATION TO STATION CIZ EXTENSION AREA

The proposed Station CIZ extension area interacts with three heritage listed items, the Wagga Wagga Railway Station and Yard (SHR #01279, LEP #I98 ; ARTC and TfNSW s170 #4280250); the former Stationmaster's Residence (LEP #I99); and the Wagga Wagga Conservation Area (LEP) (**Figure 3-1**). Potential impacts to the Wagga Wagga Conservation Area have been presented in **Section 3.3.1** and as the Station CIZ extension presents no further impacts to this listing it will not be discussed again in this section.

Potential impacts to the Wagga Wagga Railway Station and former Stationmaster's residence will be assessed below.

Figure 3-3: Heritage items in proximity to Station CIZ extension area.

3.4.1 Wagga Wagga Railway Station and Yard Group (SHR # 01279, LEP # I98)

The Wagga Wagga Railway Station is a substantial and ornate structure built in the Victorian Free Classical style. It comprises a highly symmetrical, single-storey building. Immediately west of the station building is the Wagga Wagga Railway Museum. The museum is a single-storey brick building with a corrugated iron sheet clad roof. The existing Mother's footbridge (soon to be replaced) connects the station car park to the opposite side of the railway corridor. Between the lines, mid-corridor the rail workers who currently staff the museum have established a small garden which they tend (pers. comm during community consultation, see A2I Heritage Interpretation Plan (HIP) Section 6.4.2).

Potential impacts to the Wagga Wagga Railway Station and Yard Group

It is understood that the proposed extension adjacent to the museum and station buildings, as outlined in **Section 1.2**, is designed to enable improvements to the existing car park and facilitate the construction of the new pedestrian bridge. The proposed extension within the rail corridor intersects with the workers' gardens and may be used as a crane pad.

The exclusion zones for retained heritage items, structures and significant gardens will be marked on the environmental control maps, site plans and avoided. While views to and from the Wagga

Wagga Railway Station buildings will be impacted during construction, this impact will be temporary and will not be detrimental to the long-term heritage values of the item.

Once the temporary works within the CIZ extension have been completed, Wagga Wagga Railway Station and Yard will revert to its existing condition and use, and the stations' enduring heritage significance will be retained.

During construction, vibration intensive works would occur within safe working distances. This has assumed a more stringent criterion (3 mm/s). Mitigation measures have been identified to manage these risks. This includes the selection of equipment and construction methods, pre-construction condition surveys and monitoring of the structures, where risk remains.

It is assessed that impact to the Wagga Wagga Railway Station in relation to the CIZ extension will be negligible.

3.4.2 Former Stationmaster's residence (LEP # I99)

The former Stationmaster's residence is not within the state heritage curtilage but is listed on the Wagga Wagga LEP and described in the state heritage listing. The listing notes that the Stationmaster's residence is significant for demonstrating the once widespread custom of providing accommodation for railway staff. Combined with the station building and landscaped forecourt the item forms a cohesive group of 19th century railway items. The former stationmaster's residence is located just north-west of the station building and is a two-storey structure, with a symmetrical front façade, hipped corrugated iron roof, and a two-storey cast iron verandah. The structure sits within mature manicured gardens.

Potential impacts to the former Stationmaster's residence

It is understood that the proposed extension adjacent to former Stationmaster's residence, as outlined in **Section 1.2**, is designed to enable improvements to the existing car park and facilitate the construction of the new pedestrian bridge.

The exclusion zones for retained heritage items, structures and significant gardens will be marked on the environmental control maps, site plans and avoided. While views to and from the former Stationmaster's residence and gardens will be impacted during construction, this impact will be temporary and will not be detrimental to the long-term heritage values of the item.

During construction, vibration intensive works would occur within safe working distances. This has assumed a more stringent criterion (3 mm/s). Mitigation measures have been identified to manage these risks. This includes the selection of equipment and construction methods, pre-construction condition surveys and monitoring of the structures, where risk remains.

It is assessed that impact to the former Stationmaster's residence in relation to the CIZ extension will be negligible.

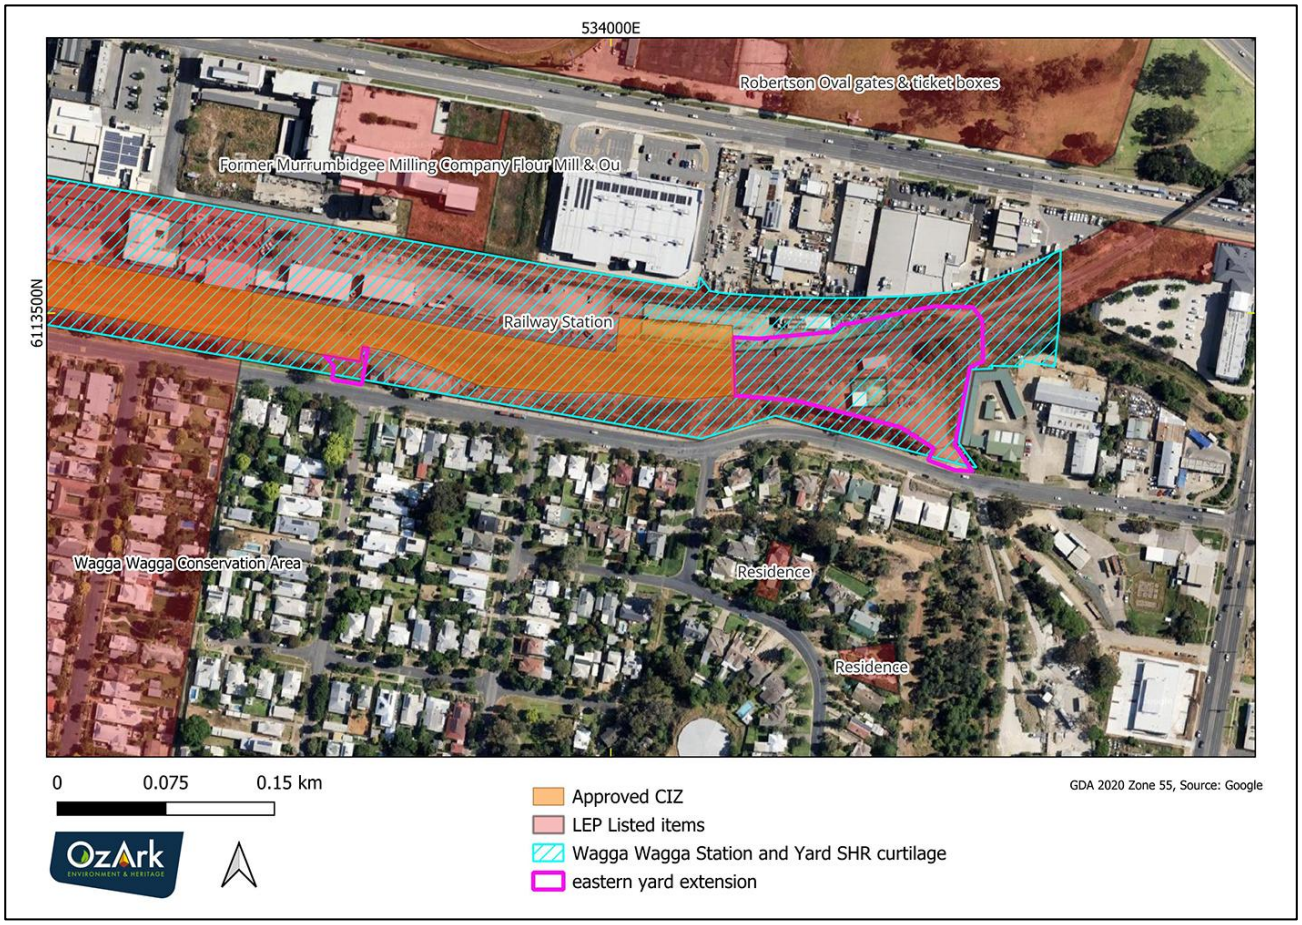
3.5 IMPACT TO HERITAGE ITEMS IN RELATION TO EASTERN YARD CIZ EXTENSION AREA

The proposed Eastern Yard CIZ extension area interacts with six heritage listed items, the Wagga Wagga Railway Station and Yard (SHR #01279, LEP #I98 ; ARTC and TfNSW s170 #4280250); the Wagga Wagga Conservation Area (LEP); the former Murrumbidgee Milling Company Flour Mill (LEP #I100), the Robertson Oval gates and ticket boxes (LEP #I265); Residence on Beauty Point Avenue (LEP #I253) and Residence on Beauty Point Avenue (LEP #I252) (**Figure 3-1**).

Potential impacts to the Wagga Wagga Conservation Area have been presented in **Section 3.3.1** and as the Eastern Yard CIZ extension presents no further impacts to this listing it will not be discussed again in this section.

Potential impacts to these items will be assessed below.

Figure 3-4: Heritage items in proximity to Eastern Yard CIZ extension area.



3.5.1 Wagga Wagga Railway Station and Yard Group (SHR # 01279, LEP # I98)

The Wagga Wagga Railway Station Yard, like other railway yards, contains a variety of infrastructure and equipment essential for train operations. While many of the moveable relics are now contained in the Wagga Wagga Rail Heritage Museum, larger heritage items, such as the turntable, which was

installed in 1891, remain *in situ*. No field survey was undertaken to determine the potential presence of unrecorded archaeological sites in this area.

Potential impacts to the Wagga Wagga Railway Station and Yard Group

It is understood that the proposed eastern yard extension, as outlined in **Section 1.2**, is designed to provide access and a small ancillary area, enabling the construction of a site compound, including parking, toilets, offices and a laydown area. The proposed extension within the rail corridor will be in close proximity to the heritage-listed 1891 turntable, which will be protected by an exclusion buffer zone. The proposed works will only be placed in areas where there is already a highly disturbed surface and potential heritage relics that may exist within this zone will be managed by the Unanticipated Finds Protocol, Appendix B of the CCHMP. On completion of the proposed works the area will be returned to its current state.

It is assessed that impact to the Wagga Wagga Railway Station and Yard Group in relation to the Eastern Yard CIZ extension is negligible.

3.5.2 Former Murrumbidgee Milling Company Flour Mill (LEP #I100)

The red brick Murrumbidgee Millin Company Flour Mill was formed in august 1889 for the purpose of erecting a roller plant at Wagga Wagga on the main line between Sydney and Melbourne. It became the second largest milling company in NSW outside of Sydney. The mill was arranged in two buildings, one block containing the engine, wheat cleaning and flour milling machinery, and the second block was used entirely for the storage of wheat. It ceased operations in the early 1980s, and the grounds were taken over by Goodman Fielder in 1987. Goodman Fielder operated the mill for another ten years before it closed its doors in 2000. The site has been earmarked for future development.

Potential impacts to the former Murrumbidgee Milling Company Flour Mill

It is understood that the proposed eastern yard extension, as outlined in **Section 1.2**, is designed to provide access and a small ancillary area, enabling the construction of a site compound, including parking, toilets, offices and a laydown area.

It is assessed that impact to the Murrumbidgee Milling Company Flour Mill in relation to the Eastern Yard CIZ extension is negligible.

3.5.3 Robertson Oval gates and ticket boxes (LEP #I265)

The Robertson Oval has been a significant sporting ground in Wagga Wagga for many years, serving as a place for recreation, entertainment, and community bonding. The 1930s Art Deco gates and ticket boxes are physical reminders of this history, representing a time when these facilities were central to the oval's operation and visitor experience. The item is listed as UHS49 on the Wagga Wagga Urban Heritage Study 2002. Described as 'simply detailed, rendered masonry gateposts and

a pair of masonry ticket boxes they are brought to life by the exuberance of the wrought iron vehicle and pedestrian gates at the entrance to Robertson Oval'.

Potential impacts to the Robertson Oval gates and ticket boxes

It is understood that the proposed eastern yard extension, as outlined in **Section 1.2**, is designed to provide access and a small ancillary area, enabling the construction of a site compound, including parking, toilets, offices and a laydown area.

It is assessed that impact to the Robertson Oval gates and ticket boxes in relation to the Eastern Yard CIZ extension will be negligible.

3.5.4 Beauty Point Avenue Residences (LEP #I252 and #I253)

The residence at 7 Beauty Point Avenue is listed on the Wagga Wagga LEP and is recorded in the Wagga Wagga Urban Heritage Study 2002 as UHS36. It features a style which appeared during the Inter-War era known as the Functionalist style, with its simple geometric shapes, large areas of glass and flat roofs concealed behind parapet walls. A face brick residence of contrasting brickwork and a hipped roof clad with terracotta tiles. Single storey at the road elevation, the building has a curved two storey section at the rear. The residence is significant as one of several 'modernist' residences which were constructed along Beauty Point Avenue during the post-war period.

The residence at 19 Beauty Point Avenue is one of the other 'modernist' residences of Beauty Point Avenue. It is a rendered brick residence with a terracotta tile clad hipped roof. The main feature of the house is a parapeted front projection which includes the front entrance. The arched porch features a semi-circular recessed panel infilled with face bricks laid diagonally. The residence retains a significant proportion of its original architectural detailing.

Potential impacts to the Beauty Point Avenue residences

It is understood that the proposed eastern yard extension, as outlined in **Section 1.2**, is designed to provide access and a small ancillary area, enabling the construction of a site compound, including parking, toilets, offices and a laydown area.

The residences are approximately 130 m from the Eastern Yard CIZ extension, and it is assessed that impact to the heritage listed residences will be negligible.

3.6 CONCLUSION – NON-ABORIGINAL HERITAGE

The proposed works within the four CIZ extension zones are primarily activities relating to traffic and pedestrian management; access; parking; temporary material laydown and stockpiling; site compounds; and widening of CIZ to allow for movement to complete approved construction works.

This assessment concludes that based on the temporary and low impact nature of the proposed works the heritage fabric and values of items within the LEP and SHR listings will not be impacted.

It can be concluded that the proposed CIZ extension in the Wagga Wagga precinct will have “no impacts on heritage items (including areas of archaeological potential) beyond the impacts approved under the terms of this approval”, as long as the measures outlined in Section 6 of the CCHMP and those listed below are implemented. This will ensure that proposed works will not directly or indirectly impact any identified or potential heritage items, particularly the former Stationmasters residence; the Wagga Wagga Railway Station building and museum; and heritage relics within the Eastern station yard.

4 MANAGEMENT MEASURES

To ensure that the activities within the proposed CIZ extension in the Wagga Wagga precinct do not inadvertently impact Aboriginal or non-Aboriginal heritage, the following recommendations should be adhered to:

1. None of the original fabric of the Wagga Wagga Railway Station, Rail Museum or former Stationmaster's residence is to be harmed in any way and demarcation (using barricading or flagging) of the CIZ extension footprint within or adjacent to listed heritage sites is required to ensure no inadvertent impacts beyond this, as per CCHMP management measure NAH2.
2. The monitoring and inspection requirements in Section 7.3 of the CCHMP and Section 8.4 of the *Construction Noise and Vibration Management Plan* should be followed to reduce the risk of harm to heritage structures and items.
3. The rail corridor gardens in front of the museum hold significance to the volunteers at the museum. Impact to these gardens should be as minimal as possible.
4. The heritage-listed 1891 turntable within the Eastern Yard extension should be protected by an exclusion buffer zone and demarcated with bunting.
5. The proposed works within the Eastern Yard extension should only be placed in areas where there is already a highly disturbed ground surface and must avoid any rail related relics visible on the surface of the yard. This area must be returned to its current state following the construction period.
6. Only the proposed activities (**Section 1.2**) outlined in this document have been assessed for their impacts to heritage within the CIZ extension. If additional activities are proposed, then further heritage impact assessment would be required.
7. If works encounter potential Aboriginal or Non-Aboriginal heritage items, the *Unexpected Heritage Finds and Human Remains Procedures,* Appendix B of the CCHMP should be followed.
8. If further extension of the CIZ is required that interacts with listed heritage places, then further assessment would be required to ensure that the provisions of CoA 15(c) can be met.
9. Other provisions as outlined in the CCHMP, specifically regarding heritage inductions for work crews, should be followed.

Dubbo New South Wales 2830

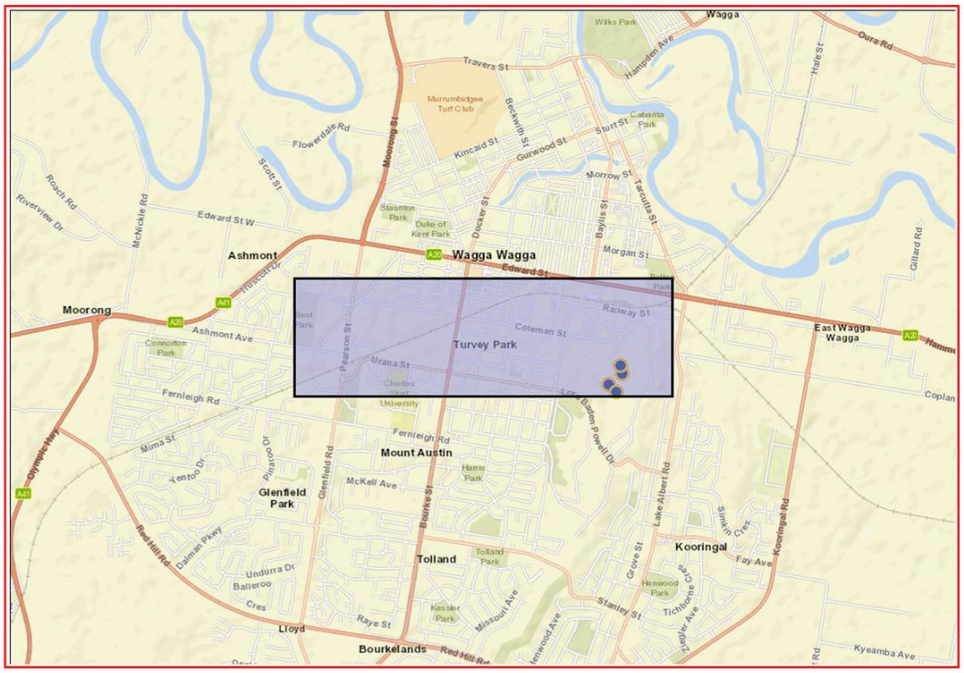
Attention: Eleanore Martin

Email: eleanore@ozarkehm.com.au

Dear Sir or Madam:

AHIMS Web Service search for the following area at Datum :GDA, Zone : 55, Eastings : 530847.0 - 534348.0, Northings : 6112644.0 - 6113744.0 with a Buffer of 0 meters, conducted by Eleanore Martin on 06 August 2025.

The context area of your search is shown in the map below. Please note that the map does not accurately display the exact boundaries of the search as defined in the paragraph above. The map is to be used for general reference purposes only.



A search of Heritage NSW AHIMS Web Services (Aboriginal Heritage Information Management System) has shown that:

4	**Aboriginal sites are recorded in or near the above location.**
0	**Aboriginal places have been declared in or near the above location. ***

If your search shows Aboriginal sites or places what should you do?

- You must do an extensive search if AHIMS has shown that there are Aboriginal sites or places recorded in the search area.
- If you are checking AHIMS as a part of your due diligence, refer to the next steps of the Due Diligence Code of practice.
- You can get further information about Aboriginal places by looking at the gazettal notice that declared it. Aboriginal places gazetted after 2001 are available on the NSW Government Gazette (https://www.legislation.nsw.gov.au/gazette) website. Gazettal notices published prior to 2001 can be obtained from Heritage NSW upon request

Important information about your AHIMS search

- The information derived from the AHIMS search is only to be used for the purpose for which it was requested. It is not be made available to the public.
- AHIMS records information about Aboriginal sites that have been provided to Heritage NSW and Aboriginal places that have been declared by the Minister;
- Information recorded on AHIMS may vary in its accuracy and may not be up to date. Location details are recorded as grid references and it is important to note that there may be errors or omissions in these recordings,
- Some parts of New South Wales have not been investigated in detail and there may be fewer records of Aboriginal sites in those areas. These areas may contain Aboriginal sites which are not recorded on AHIMS.
- Aboriginal objects are protected under the National Parks and Wildlife Act 1974 even if they are not recorded as a site on AHIMS.
- This search can form part of your due diligence and remains valid for 12 months.

Appendix D Biodiversity Assessment Report Memo

Roisin Batch

Environmental Approvals Advisor

Martinus Rail Pty Ltd

11 August 2025

Dear Roisin,

Biodiversity Memorandum: Albury to Illabo Inland Rail (A2I) – Wagga Wagga Precinct.

This memo was developed for Martinus Rail Pty Ltd (Martinus) on behalf of Inland Rail Proprietary Limited to address potential ecological constraints associated with the proposed CIZ extension to the approved construction impact zone (CIZ) in the Wagga Wagga Precinct, NSW, 2650.

Incidentally, the subject site addressed in this memo was not assessed as part of the Inland Rail, Albury to Illabo Revised Technical Paper 8: Biodiversity Assessment Report (BDAR) (WSP, 2022).As a result, this memo is necessary to address requirements of the Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act), NSW Biodiversity Conservation Act 2016 (BC Act), NSW Water Management Act 1994 (WM Act) and NSW Fisheries Management Act 1994 (FM Act) and NSW Biosecurity Act 2015 and relevant State Environmental Planning Policies (SEPPs).

Results of this assessment will determine if additional works are required to address ecological constraints and fulfil legislative requirement of the relevant Acts.

If you have any queries, feel free to contact me.

Kind regards,

Joel Little

Senior Ecologist

1. Scope of assessment

Habitat Innovation and Management has been contracted by Martinus to provide a Biodiversity Memo assessment for the proposed Wagga Wagga Precinct works area. The memo assessment will include a site characterisation, desktop review and flora and fauna survey. The potential constraints and impacts from the Wagga Wagga Precinct Extension to ecological communities listed as threatened under the Biodiversity Conservation Act 2016 (BC Act), Fisheries Management Act 1994 (FM Act) and Matters of National Environmental Significance and listed Areas of Outstanding Biodiversity Value under the Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act) and the requirements of the Biosecurity Act 2015 (NSW), State Environmental Planning Policy (Biodiversity and Conservation) 2016 (SEPP) and will be identified and assessed.

2. Locality and site context

The area of the proposed extension (subject site) covers 3.71 hectares and is located in central Wagga, NSW 2650 within the existing railway corridor and extends into adjacent land and named as the Wagga Wagga Precinct, (Figure 1 and Figure 2). The subject site includes three separate locations in the Pearson Street, Wagga Wagga Yard and Cassidy Parade areas.

The subject site is characterised by the railway corridor, railway works area, existing stockpile areas, existing car parking and works areas, exotic and native garden beds, drainage lines, roadways and footpaths.

The study area is characterised by a mix of highly disturbed vegetation within the existing railway corridor, native and exotic plantings with mowed areas and one main drainage line. Vegetation includes lawns and pasture grasses, small and medium shrubs and small to large trees. The site borders various residential blocks and commercial buildings and roadways.

3. Proposed activities

The activities proposed for the subject site will provide improved and alternate access for the existing CIZ works. The works are not intended to but as the site was not delineated at the time of assessment, HIM's assessment is based on the potential complete removal of vegetative cover and fauna habitat. Offsite biodiversity impacts may include noise, dust and the potential for sediment tracking or sediment migration or pollution from onsite fuels and chemicals.

This assessment is limited to the activities listed.

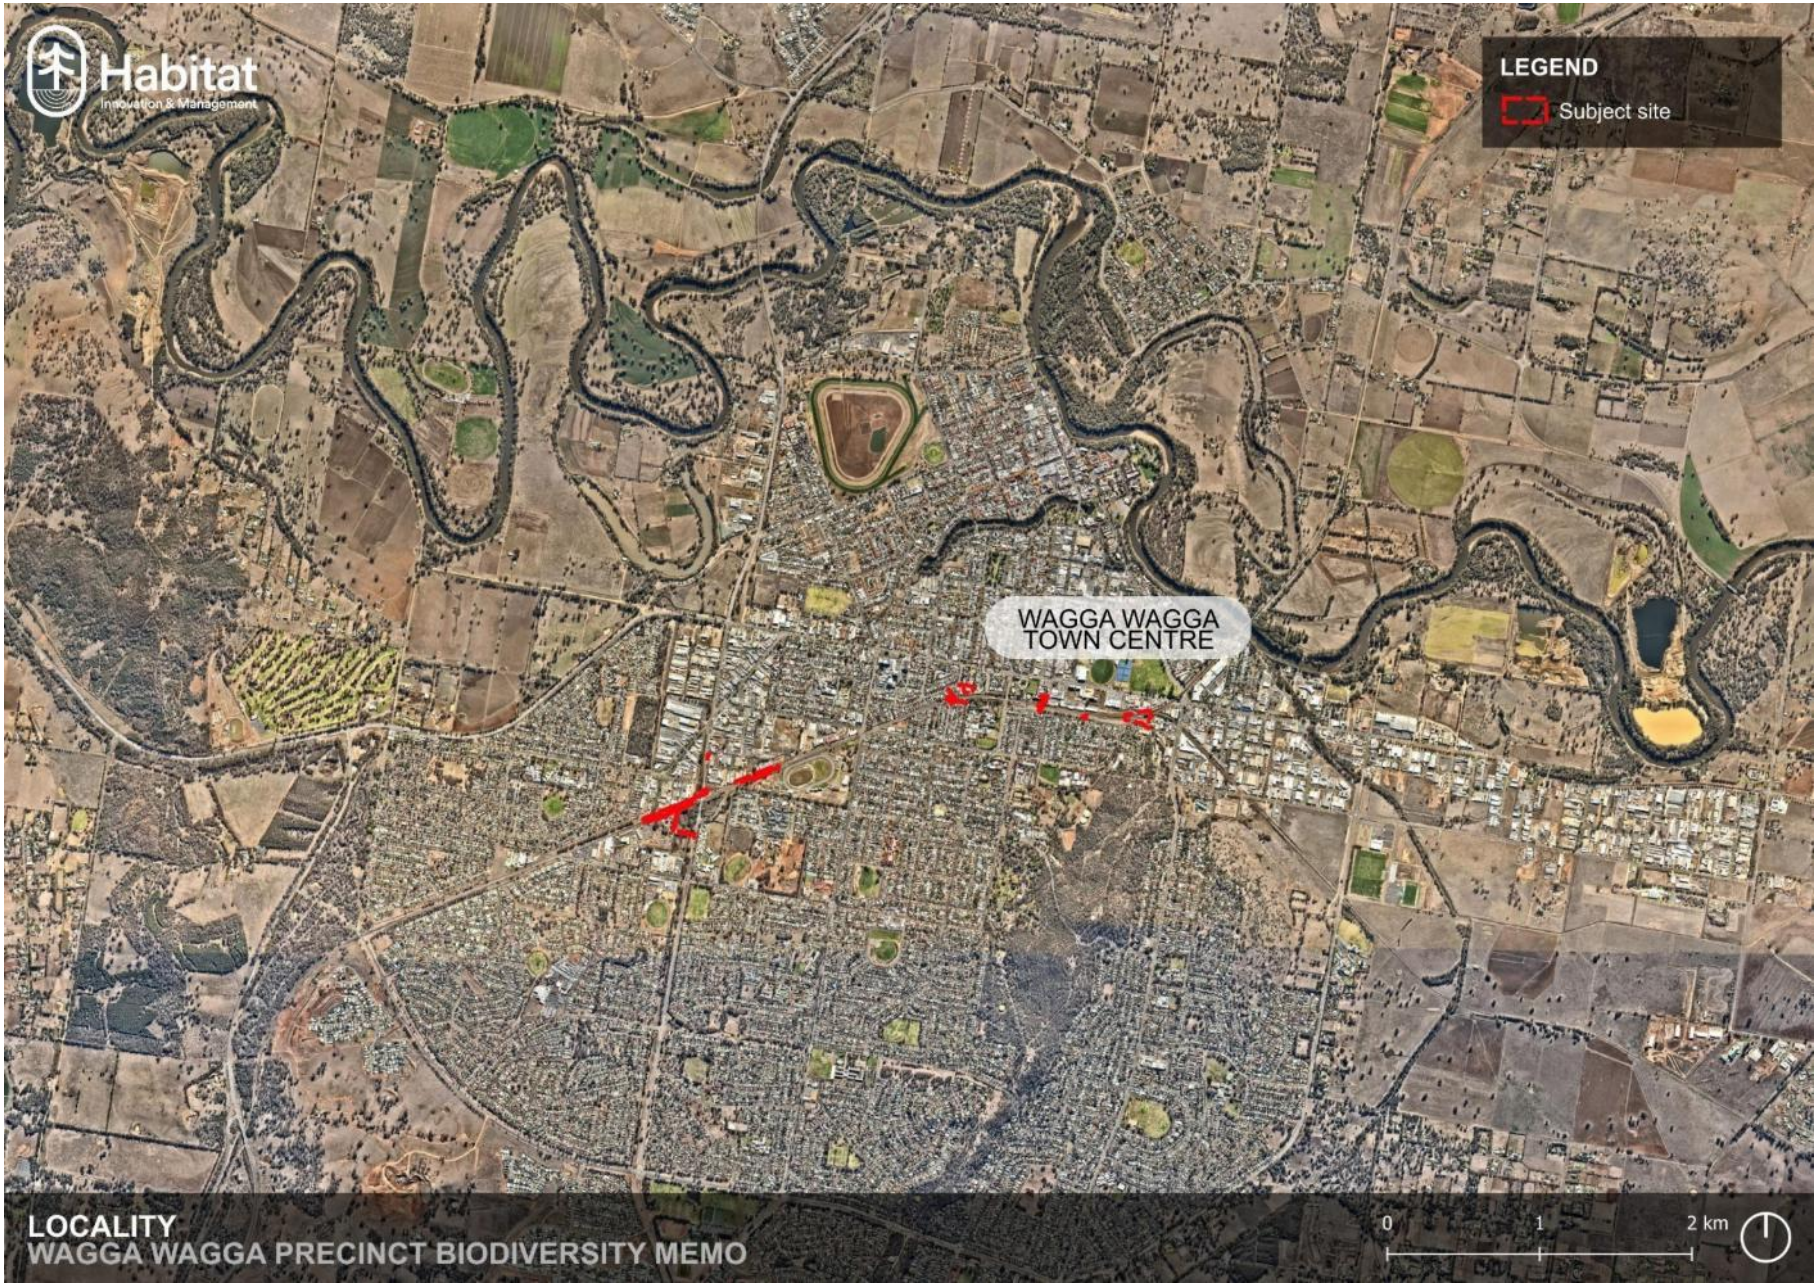

Figure 1: Locality map showing the greater context of the proposed Intermodal Terminal extension.

Figure 2: Subject sites including Pearson Street (west), Wagga Wagga Yard (centre) and Cassidy Parade (east).

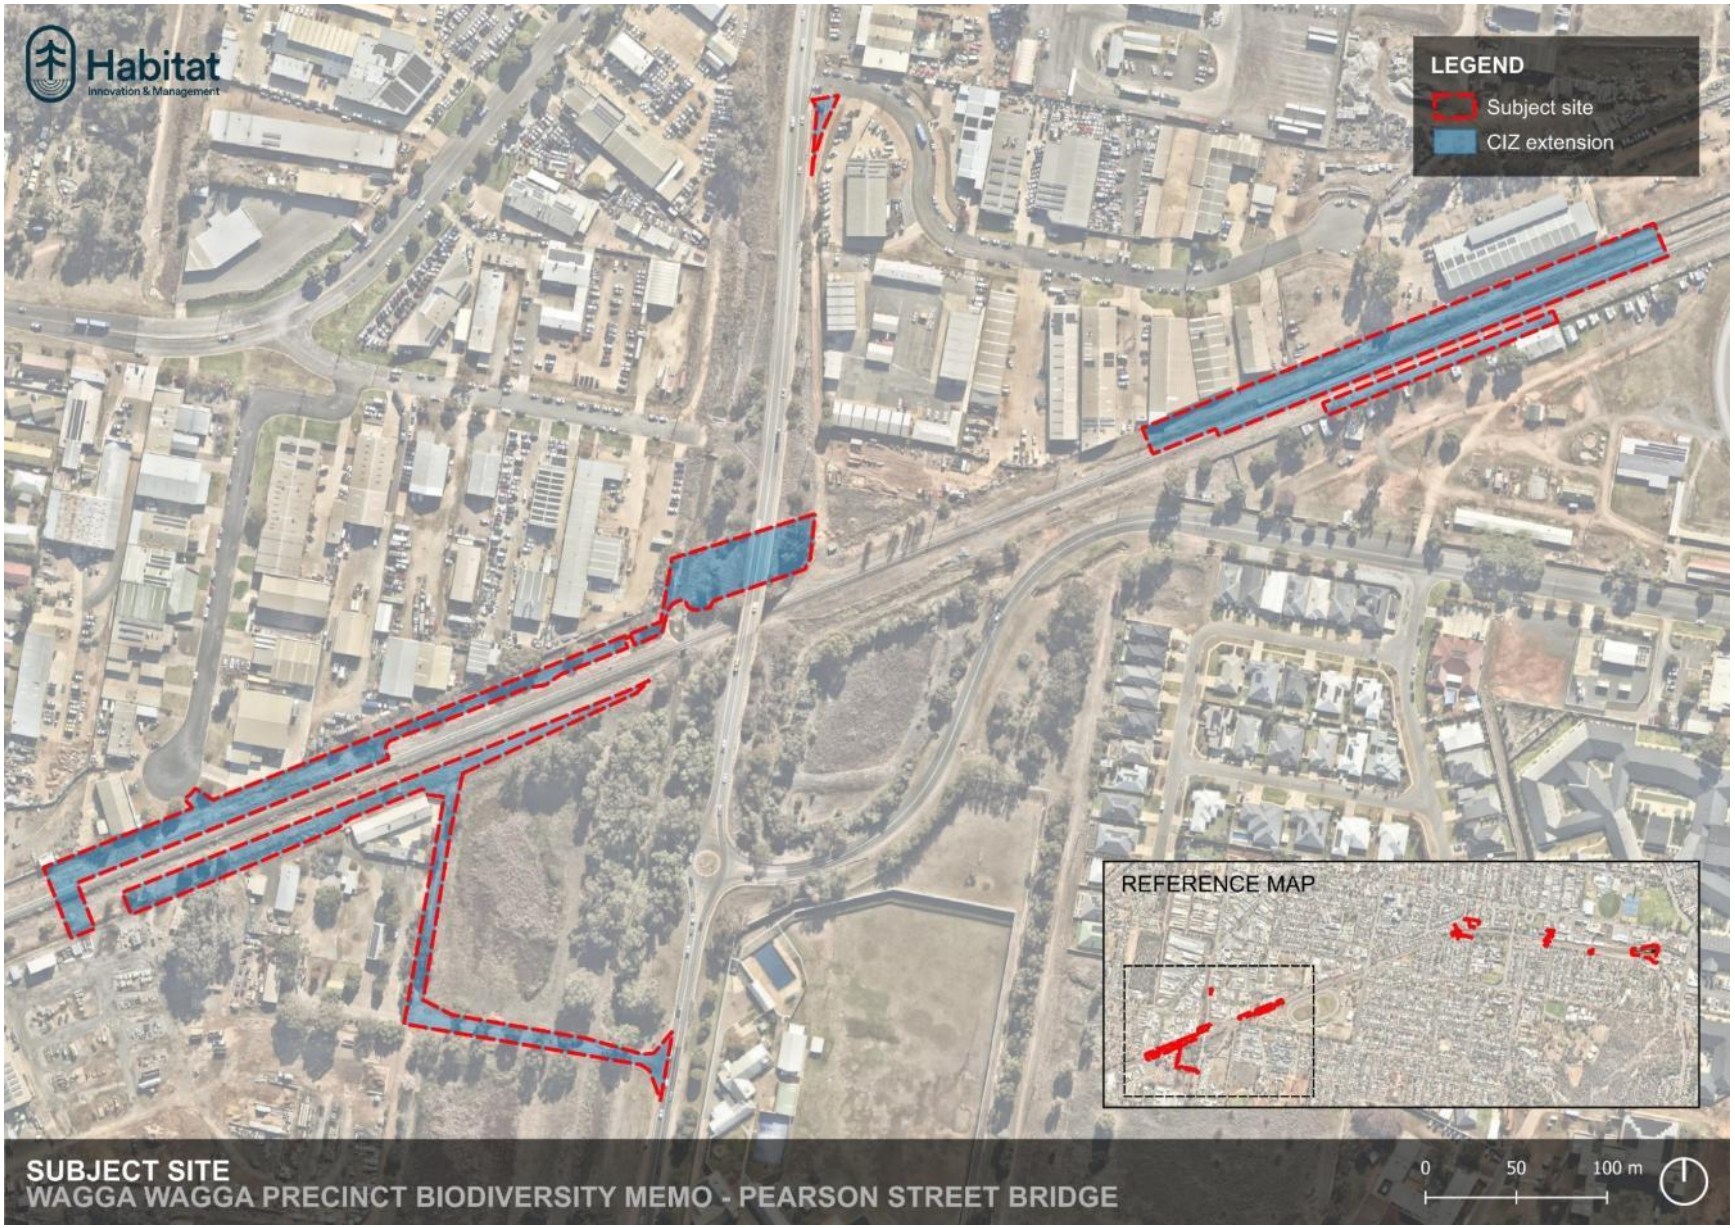

Figure 3: Pearson Street Subject Site in relation to the overall CIZ extension.

Figure 4: Wagga Wagga Yard Subject Site in relation to the overall CIZ Extension.

Figure 5: Cassidy Pde Subject Site in relation to the overall CIZ Extension.

4. Relevant legislation

Table 1 outlines how the project has been considered under relevant Commonwealth and State environmental legislation.

Table 1: Legislation relevant to subject site.

Legislation, policy and Guidelines	Description	Project Relevance
Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act)	The EPBC Act protects Matters of National Environmental Significance (MNES), such as threatened species and ecological communities, migratory species (protected under international agreements), and National Heritage places (among others).	Threatened species (flora and fauna) listed under Commonwealth legislation in and adjacent to the subject site area are protected under the EPBC Act and potential harm must be assessed.
Biodiversity Conservation Act 2016 (BC Act)	Part 7 of the BC Act provides the environmental assessment requirements for activities being assessed under Part 5 of the EP&A Act. If a significant impact is likely, a Species Impact Statement is required. A Biodiversity Development Assessment Report may also be required if the proponent elects for this. Section 7.2(1)(a) and 7.3 describe the assessment requirements and thresholds for what is considered a significant impact.	Threatened species (flora and fauna) listed under NSW legislation in and adjacent to the subject site are protected under the BC Act and potential harm must be assessed.
Water Management Act 2000 (WM Act)	The objects of this Act are to provide for the sustainable and integrated management of the water sources of the State for the benefit of both present and future generations and, in particular— (a) to apply the principles of ecologically sustainable development, and (b) to protect, enhance and restore water sources, their associated ecosystems, ecological processes and biological diversity and their water quality, and (c) to recognise and foster the significant social and economic benefits to the State that result from the sustainable and efficient use of water, including— (i) benefits to the environment, and (ii) benefits to urban communities, agriculture, fisheries, industry and recreation, and (iii) benefits to culture and heritage, and (iv) benefits to the Aboriginal people in relation to their spiritual, social, customary and economic use of land and water, (d) to recognise the role of the community, as a partner with government, in resolving issues relating to the management of water sources, (e) to provide for the orderly, efficient and equitable sharing of water from water sources, (f) to integrate the management of water sources with the management of other aspects of the environment, including the land, its soil, its native vegetation and its native fauna,	No mapped waterways bisect the proposed extension area, although there is one modified waterway that run adjacent to the extension area and falls under the WM Act particularly Division 7 which outlines Environmental Protection. This will relate to the drainage line that bisects the Pearson Street site.

DRAFT

	(g) to encourage the sharing of responsibility for the sustainable and efficient use of water between the Government and water users, (h) to encourage best practice in the management and use of water.	
Fisheries Management Act 1994 (FM Act)	The FM Act aims 'to conserve, develop and share the fishery resources of the State for the benefit of present and future generations and, to: • Conserve fish stocks and key fish habitats • Conserve threatened species, populations and ecological communities of fish and marine vegetation • Promote ecologically sustainable development, including the conservation of biological diversity • Promote viable commercial fishing and aquaculture industries • Promote quality recreational fishing opportunities and appropriately share fisheries resources between the users of those resources and provide social and economic benefits for the wider community of New South Wales.	This Act relates to Key Fish Habitat and threat to aquatic species. There is no land mapped as Key Fish Habitat within the scope of the CIZ extension.
Biosecurity Act 2015	The objectives of the Act are: (1) The primary object of this Act is to provide a framework for the prevention, elimination and minimisation of biosecurity risks posed by biosecurity matter, dealing with biosecurity matter, carriers and potential carriers, and other activities that involve biosecurity matter, carriers or potential carriers. (2) The other objects of this Act are as follows— (a) to promote biosecurity as a shared responsibility between government, industry and communities, (b) to provide a framework for the timely and effective management of the following— (i) pests, diseases, contaminants and other biosecurity matter that are economically significant for primary production industries, (ii) threats to terrestrial and aquatic environments arising from pests, diseases, contaminants and other biosecurity matter, (iii) public health and safety risks arising from contaminants, non-indigenous animals, bees, weeds and other biosecurity matter known to contribute to human health problems, (iv) pests, diseases, contaminants and other biosecurity matter that may have an adverse effect on community activities and infrastructure, (c) to provide a framework for risk-based decision-making in relation to biosecurity, (d) to give effect to intergovernmental biosecurity agreements to which the State is a party, (e) to provide how biosecurity requirements in other jurisdictions can be met, to maintain market access for industry.	The Biosecurity Act 2015 (NSW) provides a framework for the prevention, elimination and minimisation of biosecurity risks posed by an activity as a matter of biosecurity. As defined in Part 3, section 23 of this Act, any non-conformance by an individual is defined as guilty of an offence. No priority weeds were identified within the Subject Land at the time of the survey: All priority weeds are to be appropriately managed in accordance with the *Biosecurity Act 2015*.

DRAFT

5. Method

To assess the potential extent and severity of impacts to flora and fauna associated with the Intermodal Terminal extension, a combination of desktop review and field-based surveys was undertaken. The following sections provide a detailed description of the methods and findings for each component of the assessment.

5.1 Desktop review

Desktop review was conducted prior to field surveys. The purpose of the desktop review is to map any Plant Community Types (PCTs), Threatened Species records, Critically Endangered Ecological Community (CEEC), Threatened Ecological Community (TEC), waterways, Strahler Stream Order and Key Fish Habitat (KFH).

The desktop review included analysis of:

- Environment Impact Statement – Chapter 16 Biodiversity, WSP 2023.
    - Biodiversity Development Assessment Report - Technical Paper 08, WSP 2022.
    - Construction Biodiversity Management Plan – Albury to Illabo (Stage B), Martinus Rail, 2025.
    - Protected Matters Search Tool (2025) – Matters of National Environmental Significance, EPBC Act 1999.
    - SEED spatial map (2025), NSW Government.
    - NSW Hydrology, Hydrology (all types).
    - SVTM NSW Extant PCT, Plant Community Types with labels.
    - BioNet Atlas (2025), NSW Office of Environment and Heritage.
    - BioNet Vegetation Classification (2025), NSW Office of Environment and Heritage.
    - Fisheries Spatial Portal (2025), NSW Department of Primary Industries and Regional Development.
    - SIX Maps (Spatial Information Exchange) spatial services (2025), NSW Government.

Matters of National Environmental Significance

Matters of National Environmental Significance listed under the Commonwealth *Environment Protection and Biodiversity Conservation Act* 1999 (EPBC Act) are identified from the Protected Matters Search Tool (PMST) report as well as the BioNet Atlas/Vegetation Classification database.

The PMST was designed to assist in searching for matters protected under the (EPBC Act) by generating an indicative list of protected matters that may occur in or near a selected area.

The PMST is a generalised search tool, compared to other search tools such as BioNet Atlas, as it incorporates likely habitat as well as species records in the broader area of the mapped location to generate the report. It does not confirm that species or plant communities exist within the search area but rather is a tool to inform further assessment and considerations.

DRAFT

Plant Community Types

A review of NSW SEED mapping State Vegetation Type Mapping (SVTM) extent was undertaken to identify any native PCT within the proposed rail development site. PCT diagnostic data and associated threatened ecological communities are then extracted from the BioNet Vegetation Classification Database.

Threatened flora

Review of the PMST report and BioNet Atlas Vegetation Classification was undertaken to identify any threatened flora species (under the BC Act or EPBC Act) which have previously been recorded within a 10 km radius of the subject site. This is consistent with the method in the BDAR (WSP 2022).

Threatened fauna

Review of the PMST report and BioNet Atlas was undertaken on 23 July 2025 to identify any threatened fauna species (under BC Act and EPBC Act) which have previously been recorded within a 10 km radius of the subject site. This is consistent with the method in the BDAR (WSP 2022).

Also assessed were records of endangered populations or international migratory species listed under the BC Act and EPBC Act which have been recorded within 10km of the subject site.

Strahler stream order

Strahler Stream Order is used to describe the hierarchy of streams from the top of a catchment to the bottom. A first order stream starts at the top of the catchment and has no other streams flowing into it. They are the smallest streams in the system.

When two streams with the same order join, the resulting stream has the next highest order e.g. where two first order streams join, they form a second order stream. Consequently, they are bigger in size due to the water from both streams combining into one. The Strahler system must be applied to streams shown in the *Water Management (General) Regulation* 2018 hydro line spatial data.

Key Fish Habitat

One of the objectives of *the Fisheries Management Act* 1994 (FM Act) is the conservation of 'Key Fish Habitat' (KFH). To support this objective, a policy-based definition of KFH has been developed to inform the preparation of mapping. KFH includes most permanent and semi-permanent freshwater habitats such as rivers, creeks, lakes, lagoons, billabongs, weir pools, and impoundments, generally delineated to the top of the bank.

Field validation of mapped KFH within the unnamed waterway was undertaken in accordance with the framework outlined in the Policy and Guidelines for Fish Habitat Conservation and Management (DPIE Fisheries, 2013). This process allowed for determination of KFH Type and Class based on observed habitat features and the potential presence of threatened species.

The assessment criteria for KFH Type and Class (DPIE Fisheries, 2013) are provided in Table 2 and Table 3. KFH mapping data was sourced from the Fisheries Spatial Data Portal (2024).

Table 2. Extract from Fisheries NSW Policy and Guidelines for Fish Habitat Conservation and Management (NSW Department of Primary Industries 2013) showing KFH type classification.

TYPE 1 - Highly sensitive key fish habitat:

- *Posidonia australis* (strapweed)
- *Zostera, Heterozostera, Halophila and Ruppia* species of seagrass beds >5m^2 in area
- Coastal saltmarsh >5m^2 in area
- Coral communities
- Coastal lakes and lagoons that have a natural opening and closing regime (i.e. are not permanently open or artificially opened or are subject to one off unauthorised openings)
- Marine park, an aquatic reserve or intertidal protected area
- SEPP 14 coastal wetlands, wetlands recognised under international agreements (e.g. Ramsar, JAMBA, CAMBA, ROKAMBA wetlands), wetlands listed in the Directory of Important Wetlands of Australia[2]
- Freshwater habitats that contain in-stream gravel beds, rocks greater than 500 mm in two dimensions, snags greater than 300 mm in diameter or 3 metres in length, or native aquatic plants
- Any known or expected protected or threatened species habitat or area of declared 'critical habitat' under the FM Act
- Mound springs

TYPE 2 – Moderately sensitive key fish habitat:

- *Zostera*, *Heterozostera, Halophila* and *Ruppia* species of seagrass beds <5m^2 in area
- Mangroves
- Coastal saltmarsh <5m^2 in area
- Marine macroalgae such as *Ecklonia* and *Sargassum* species
- Estuarine and marine rocky reefs
- Coastal lakes and lagoons that are permanently open or subject to artificial opening via agreed management arrangements (e.g. managed in line with an entrance management plan)
- Aquatic habitat within 100 m of a marine park, an aquatic reserve or intertidal protected area
- Stable intertidal sand/mud flats, coastal and estuarine sandy beaches with large populations of in-fauna
- Freshwater habitats and brackish wetlands, lakes and lagoons other than those defined in TYPE 1
- Weir pools and dams up to full supply level where the weir or dam is across a natural waterway

TYPE 3 – Minimally sensitive key fish habitat may include:

- Unstable or unvegetated sand or mud substrate, coastal and estuarine sandy beaches with minimal or no in-fauna
- Coastal and freshwater habitats not included in TYPES 1 or 2
- Ephemeral aquatic habitat not supporting native aquatic or wetland vegetation

Notes: For the purposes of these policy and guidelines the following are **not considered key fish habitat**[5]:

- First and second order streams on gaining streams (based on the Strahler method of stream ordering)
- Farm dams on first and second order streams or unmapped gullies
- Agricultural and urban drains
- Urban or other artificial ponds (e.g. evaporation basins, aquaculture ponds)
- Sections of stream that have been concrete-lined or piped (not including a waterway crossing)
- Canal estates

Table 3. Extract from Fisheries NSW Policy and Guidelines for Fish Habitat Conservation and Management (NSW Department of Primary Industries 2013) showing KFH class classification.

CLASS 1 Major key fish habitat	Marine or estuarine waterway or permanently flowing or flooded freshwater waterway (e.g. river or major creek), habitat of a threatened or protected fish species or 'critical habitat'.
CLASS 2 Moderate key fish habitat	Non-permanently flowing (intermittent) stream, creek or waterway (generally named) with clearly defined bed and banks with semi-permanent to permanent waters in pools or in connected wetland areas. Freshwater aquatic vegetation is present. TYPE 1 and 2 habitats present.
CLASS 3 Minimal key fish habitat	Named or unnamed waterway with intermittent flow and sporadic refuge, breeding or feeding areas for aquatic fauna (e.g. fish, yabbies). Semi-permanent pools form within the waterway or adjacent wetlands after a rain event. Otherwise, any minor waterway that interconnects with wetlands or other CLASS 1-3 fish habitats.
CLASS 4 Unlikely key fish habitat	Waterway (generally unnamed) with intermittent flow following rain events only, little or no defined drainage channel, little or no flow or free standing water or pools post rain events (e.g. dry gullies or shallow floodplain depressions with no aquatic flora present).

5.2 Field assessment

Field assessment was undertaken to validate the presence of flora, fauna and habitat constraints identified by the desktop review and provide accurate survey of vegetation condition and habitat suitability.

Diurnal field assessment was undertaken by Mikayla Green (Ecologist) on 21 July 2025 and included mapping of ecological constraints in the development extension zone, recording all fauna incidentally encountered and mapping of any significant habitat features. Weather during the survey was sunny with partial cloud cover.

Opportunistic flora and fauna survey

Flora and fauna surveys were conducted as a meander survey across the extent of the proposed CIZ extension area.

Plant Community Type validation

Any plant community types identified from the SVTM were validated on site during field surveys. This involved traversing the site on foot to map native vegetation of all levels of stratum, to confirm any PCT on site.

Waterway validation

Waterway validation was undertaken by visual assessment of the location of the mapped waterways and determining the presence of key geomorphic features including a defined channel and/or flow path, creek banks and floodplain.

Survey limitations

Survey limitations are mitigated as best as possible with any biodiversity assessment, but due to the nature of undertaking ecological assessments, not all limitations are able to be eliminated. Identified survey limitations have been included below:

- Time of year - Native vegetation species flower and fruit at varying times of the year. Often the flowers, fruit and buds are key features for identification. This was further compounded by winter and drought conditions during the survey period and the resulting lack of seed heads on grasses, and leaves and fruit on trees. As a result, accurate identification of flora can be more challenging.
- Only one diurnal survey was conducted. Often not all species are recorded in one fauna survey and repeat surveys would increase the likelihood of species detection.

DRAFT

6. Results

6.1 Desktop assessment

Native vegetation and Threatened Ecological Communities

A 22 July 2025 review of the Protected Matters Search Tool (PMST report) showed that three Threatened Ecological Communities (TECs) have potential to be in or near the subject site. A summary of these TECs is shown in Table 4.

Table 4: TECs recorded in the PMST report and their likelihood of occurring within the subject site.

Community ID	Community Name	Threatened species listing under EPBC Act	Likeliness to occur
43	White Box-Yellow Box-Blakely's Red Gum Grassy Woodland and Derived Native Grassland	Critically Endangered	Likely
86	Grey Box (*Eucalyptus microcarpa*) Grassy Woodlands and Derived Native Grasslands of South-eastern Australia	Endangered	Likely
98	Weeping Myall	Endangered	May

A review of State Vegetation Type Mapping (SVTM) showed no mapped PCTs within the subject site. The closest mapped PCTs are approximately 200 to 1000 metres from the subject site (

DRAFT

Figure 6). Therefore, there are no associated Threatened Ecological Communities associated within the site and the land within the subject site is mapped as 'not classified'(Figure 6).

Three PCTs were mapped within proximity to the subject site on the SVTM accessed from SEED on 22 July 2025 and classified in the BioNet Vegetation Classification portal. These are:

- PCT 5 - River Red Gum herbaceous-grassy very tall open forest wetland on inner floodplains in the lower slopes sub-region of the NSW South Western Slopes Bioregion and the eastern Riverina Bioregion.
- PCT 277 - Blakely's Red Gum - Yellow Box grassy tall woodland of the NSW South Western Slopes Bioregion.
- PCT 346 - White Box - Blakely's Red Gum - White Cypress Pine shrubby woodland on metamorphic hills in the Wagga Wagga - Cootamundra region of the NSW South Western Slopes Bioregion.

PCT 277 is associated with BC Act and EPBC Act TECs as detailed in Table 7 below.

DRAFT

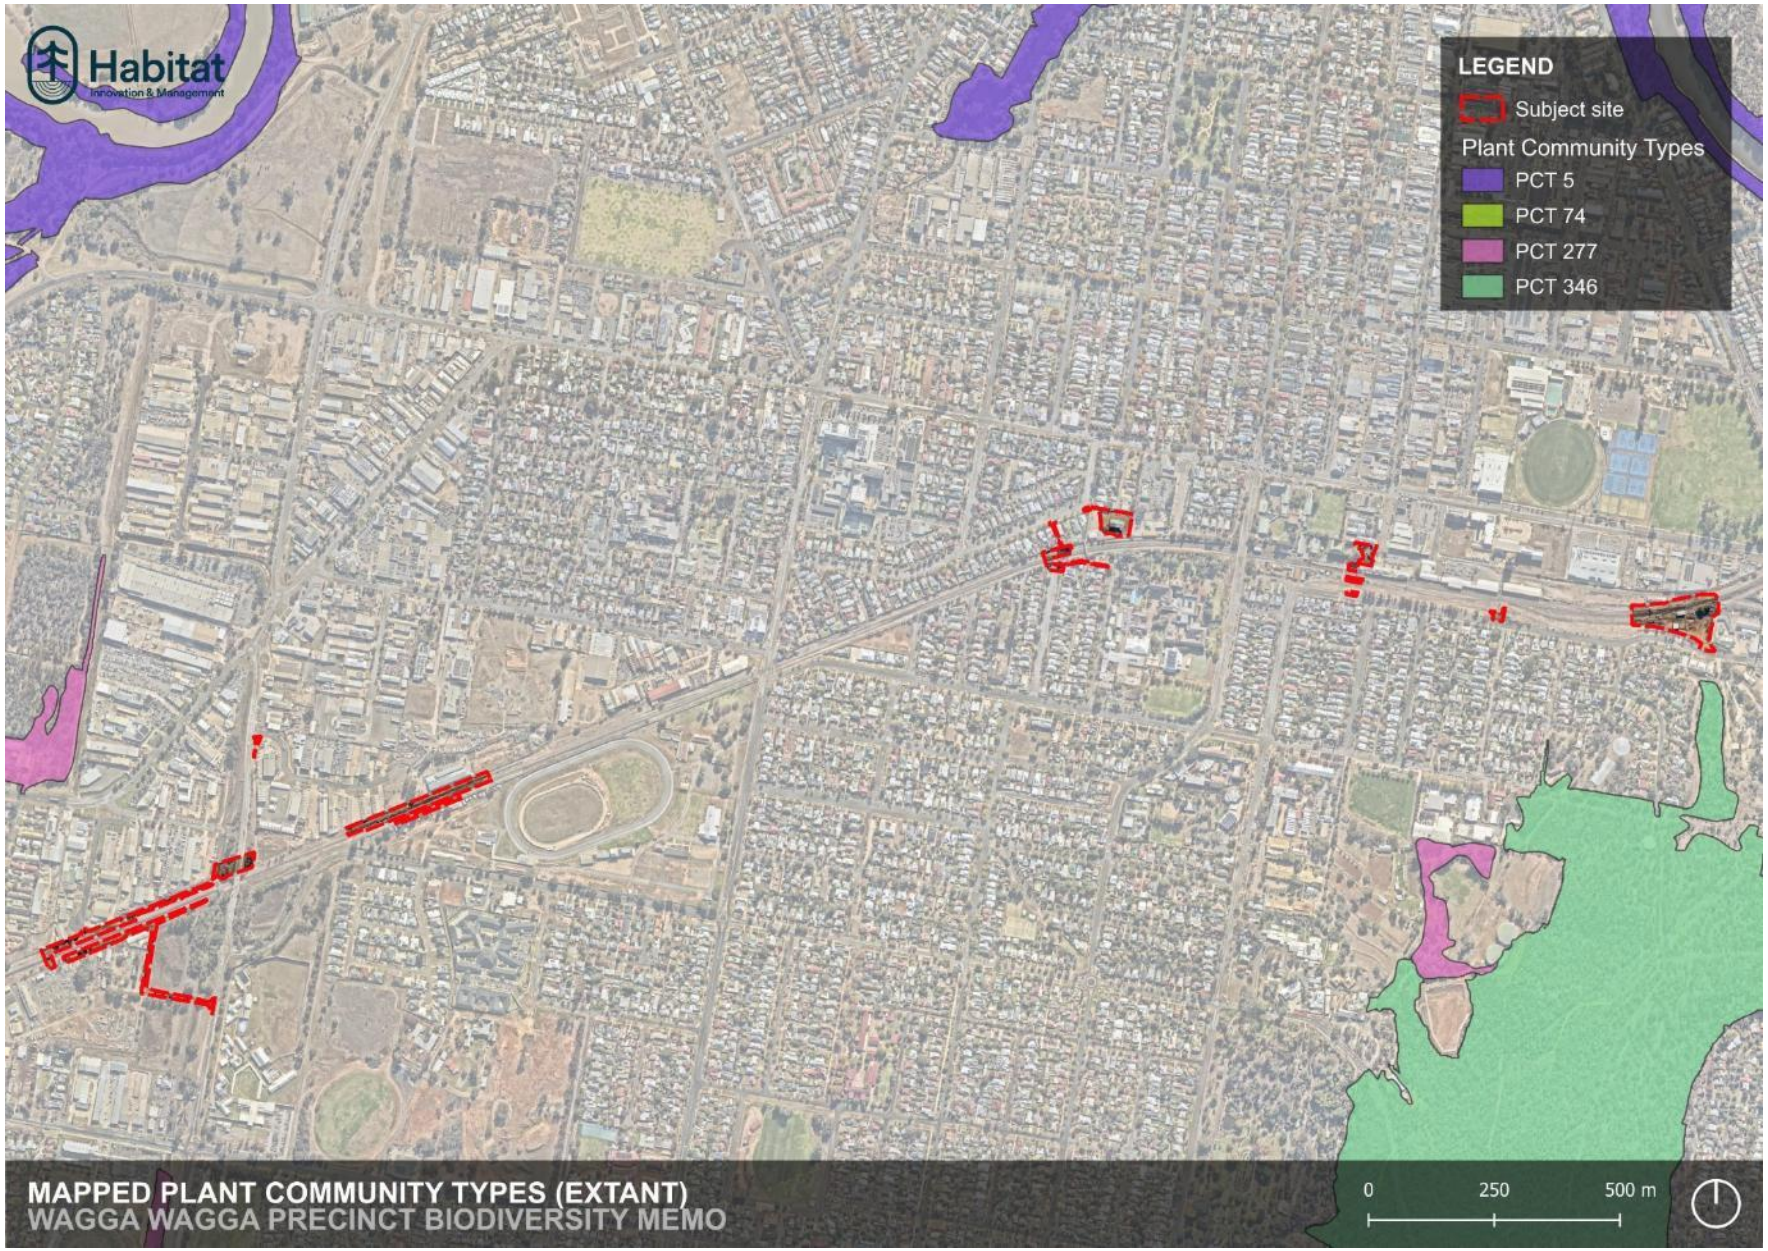

Figure 6: Extant Plant Community Type map.

Threatened flora

A 22 July 2025 review of the Protected Matters Search Tool (PMST) identified six threatened flora species as 'known', 'likely' or 'may' occur in or near the subject site.

Table 5: Threatened species identified in the PMST search.

Scientific Name	Common Name	Class	Expected presence	Listing under EPBC Act
Swainsona recta	Small Purple-pea, Mountain Swainson-pea, Small Purple Pea	Plant	May	Endangered
Lepidium monoplocoides	Winged Pepper-cress	Plant	May	Endangered
Prasophyllum petilum	Tarengo Leek Orchid	Plant	May	Endangered
Caladenia arenaria	Sand-hill Spider-orchid	Plant	May	Endangered
Swainsona murrayana	Slender Darling-pea, Slender Swainson, Murray Swainson-pea	Plant	May	Vulnerable
Caladenia concolor	Crimson Spider-orchid, Maroon Spider-orchid	Plant	May	Vulnerable

A 23 July 2025 search of the NSW BioNet Atlas database within a 10 km radius of the subject site showed that four threatened vegetation species have previously been recorded and uploaded to this database. All four species are listed under the BC Act in NSW and three are also listed under the EPBC Act (Table 6). Only a small number of each of these species have previously been recorded.

Table 6: Vegetation species recorded on BioNet Atlas within a 10 km radius of the subject site.

Scientific Name	Common Name	Listing under NSW BC Act	Listing under EPBC Act	Number of records
Brachyscome muelleroides	Claypan Daisy	Vulnerable	Vulnerable	1
Senecio garlandii	Woolly Ragwort	Vulnerable	Not Listed	2
Swainsona recta	Small Purple-pea	Endangered	Endangered	2
Eucalyptus nicholii	Narrow-leaved Black Peppermint	Vulnerable	Vulnerable	1

A 23 July 2025 search of the NSW BioNet Atlas database identified ten TECs that have been recorded within a 10 km radius of the subject site (Table 7). The only TEC identified in proximity is White Box – Yellow Box – Blakely's Red Gum Grassy Woodlands are endangered under the BC Act and EPBC Act and is associated with PCT 277.

No PCTs or TEC are mapped to occur within the subject site.

DRAFT

Table 7: Threatened Ecological Communities within 10km of the subject site.

Community Name	BC Act status	EPBC Act status	Likelihood of occurrence
Coolac-Tumut Serpentinite Shrubby Woodland in the NSW South Western Slopes and South Eastern Highlands Bioregions	Endangered		Known
Fuzzy Box Woodland on alluvial Soils of the South Western Slopes, Darling Riverine Plains and Brigalow Belt South Bioregions	Endangered		Known
Grey Box (Eucalyptus microcarpa) Grassy Woodlands and Derived Native Grasslands of South-eastern Australia		Endangered	Known
Inland Grey Box Woodland in the Riverina, NSW South Western Slopes, Cobar Peneplain, Nandewar and Brigalow Belt South Bioregions	Endangered		Known
Mallee and Mallee-Broombush dominated woodland and shrubland, lacking Triodia, in the NSW South Western Slopes Bioregion	Critically Endangered		Known
Myall Woodland in the Darling Riverine Plains, Brigalow Belt South, Cobar Peneplain, Murray-Darling Depression, Riverina and NSW South Western Slopes bioregions	Endangered		Known
Sandhill Pine Woodland in the Riverina, Murray-Darling Depression and NSW South Western Slopes bioregions	Endangered		Predicted
Weeping Myall Woodlands		Endangered	Known
White Box - Yellow Box - Blakely's Red Gum Grassy Woodland and Derived Native Grassland in the NSW North Coast, New England Tableland, Nandewar, Brigalow Belt South, Sydney Basin, South Eastern Highlands, NSW South Western Slopes, South East Corner and	Critically Endangered		Known
White Box-Yellow Box-Blakely's Red Gum Grassy Woodland and Derived Native Grassland		Critically Endangered	Known

Threatened fauna

A search on 22 July 2025 of the Protected Matters Search Tool (PMST) listed 30 threatened fauna species listed under the EPBC Act which were categorised as 'known', 'may' or are 'likely' to occur on or near the site (Table 8).

Table 8: EPBC Act Threatened fauna species per the PMST search.

Scientific Name	Common Name	Class	Simple Presence	EPBC Act Status
Anthochaera phrygia	Regent Honeyeater	Bird	May	Critically Endangered
Aphelocephala leucopsis	Southern Whiteface	Bird	Likely	Vulnerable
Botaurus poiciloptilus	Australasian Bittern	Bird	Known	Endangered
Calidris acuminata	Sharp-tailed Sandpiper	Bird	May	Vulnerable
Calidris ferruginea	Curlew Sandpiper	Bird	May	Critically Endangered
Calyptorhynchus lathami lathami	South-eastern Glossy Black-Cockatoo	Bird	May	Vulnerable
Climacteris picumnus victoriae	Brown Treecreeper (south-eastern)	Bird	Known	Vulnerable
Falco hypoleucos	Grey Falcon	Bird	Likely	Vulnerable
Gallinago hardwickii	Latham's Snipe, Japanese Snipe	Bird	May	Vulnerable
Grantiella picta	Painted Honeyeater	Bird	Likely	Vulnerable
Hirundapus caudacutus	White-throated Needletail	Bird	Likely	Vulnerable
Lathamus discolor	Swift Parrot	Bird	Likely	Critically Endangered
Leipoa ocellata	Malleefowl	Bird	May	Vulnerable

DRAFT

Lophochroa leadbeateri leadbeateri	Major Mitchell's Cockatoo (eastern), Eastern Major Mitchell's Cockatoo, Pink Cockatoo (eastern)	Bird	May	Endangered
Melanodryas cucullata cucullata	South-eastern Hooded Robin, Hooded Robin (south-eastern)	Bird	Likely	Endangered
Neophema chrysostoma	Blue-winged Parrot	Bird	Likely	Vulnerable
Pedionomus torquatus	Plains-wanderer	Bird	May	Critically Endangered
Polytelis swainsonii	Superb Parrot	Bird	Known	Vulnerable
Rostratula australis	Australian Painted Snipe	Bird	Likely	Endangered
Stagonopleura guttata	Diamond Firetail	Bird	Known	Vulnerable
Euastacus armatus	Murray Crayfish	Crustacean	May	Vulnerable
Bidyanus bidyanus	Silver Perch, Bidyan	Fish	Likely	Endangered
Galaxias rostratus	Flathead Galaxias, Beaked Minnow, Flat-headed Galaxias, Flat-headed Jollytail, Flat-headed Minnow	Fish	May	Critically Endangered
Macquaria australasica	Macquarie Perch	Fish	May	Endangered
Crinia sloanei	Sloane's Froglet	Frog	May	Endangered
Litoria raniformis	Southern Bell Frog, Growling Grass Frog, Green and Golden Frog, Warty Swamp Frog, Golden Bell Frog	Frog	May	Vulnerable
Nyctophilus corbeni	Corben's Long-eared Bat, South-eastern Long-eared Bat	Mammal	Likely	Vulnerable
Phascolarctos cinereus (combined populations of Qld, NSW and the ACT)	Koala (combined populations of Queensland, New South Wales and the Australian Capital Territory)	Mammal	Likely	Endangered
Pteropus poliocephalus	Grey-headed Flying-fox	Mammal	Likely	Vulnerable
Aprasia parapulchella	Pink-tailed Worm-lizard, Pink-tailed Legless Lizard	Reptile	Likely	Vulnerable

A 23 July 2025 search on the NSW BioNet Atlas database within a 10 km radius of the proposed rail development site showed that 42 threatened species listed under the NSW BC Act and Commonwealth EPBC Act have previously been recorded in the area (Table 9).

Table 9: BioNet Atlas Database threatened species recorded within a 10 km radius of the subject site.

Class	Scientific Name	Common Name	BC Act status	EPBC Act status	Records

Mammal	*Myotis macropus*	Southern Myotis	Vulnerable	Not listed	2
Mammal	*Petaurus norfolcensis*	Squirrel Glider	Vulnerable	Not listed	177
Mammal	*Petaurus norfolcensis*	Squirrel Glider in the Wagga Wagga Local Government Area	Endangered	Not listed	177
Mammal	*Phascolarctos cinereus*	Koala	Endangered	Endangered	5
Mammal	*Pteropus poliocephalus*	Grey-headed Flying-fox	Vulnerable	Vulnerable	109
Mammal	*Saccolaimus flaviventris*	Yellow-bellied Sheathtail-bat	Vulnerable	Not listed	1
Mammal	*Vespadelus baverstocki*	Inland Forest Bat	Vulnerable	Not listed	1

Endangered Populations

The BioNet Atlas identified one BC Act Endangered population for the Squirrel Glider (*Petaurus norfolcensis*) in the Wagga Wagga Local Government Area.

DRAFT

Migratory Species

Six migratory bird species were listed as having potential of visiting the subject site. These are shown in Table 10.

Table 10: Migratory species extracted from the BioNet database.

Class	Scientific Name	Common Name	BC Act status	EPBC Act status	Records
Bird	*Hirundapus caudacutus*	White-throated Needletail	Vulnerable	Vulnerable	2
Bird	*Calidris ferruginea*	Curlew Sandpiper	Endangered	Critically Endangered	3

Bird	*Tringa nebularia*	Common Greenshank	Endangered	Endangered	4
Bird	*Lathamus discolor*	Swift Parrot	Endangered	Critically Endangered	18
Bird	*^Anthochaera phrygia*	Regent Honeyeater	Endangered	Critically Endangered	1

Waterway and Strahler stream order

One waterway is mapped in proximity to the subject site at the Wagga Wagga Precinct CIZ extension area. This is a disconnected first order stream and an unnamed modified waterway that exists as a drainage line, intersecting the Pearson Street subject site (Figure 7).

Key Fish Habitat

A 23 July 2025 review of the SEED and Fisheries NSW mapping indicate that there is no mapped Key Fish Habitat across the subject site. The disconnected unnamed first order waterway exists as a heavily modified drainage line which extends north through the Pearson Street subject site. Though this has the potential to hold water, as it is permanently disconnected from higher order streams and key fish habitat, the potential for this drainage line to support fish is limited. It may still support other aquatic species such as frogs, reptiles and invertebrates and this has been included in this assessment.

DRAFT

Figure 7: Mapped waterways and Strahler stream order across the Pearson Street subject site and in proximity to the CIZ extension area.

Habitat connectivity

The subject site is in central Wagga Wagga, borders major roads, residential and commercial properties. There is variable connectivity among the three subject sites of Pearson Street, Wagga Wagga Yard, and Cassidy Parade.

The Pearson St site does have some connectivity to the greater landscape through the waterway and drainage line which provides temporary and seasonal habitat for native frogs, reptiles and invertebrates. Some of the trees for potential trimming and removal are also generally connected to a small patch of planted native vegetation near the entry to the Glenfield Animal Shelter off Pearson St/Glenfield Rd.

The Wagga Wagga Yard site has limited connectivity due to the railway corridor already being highly disturbed and cleared. Existing shrubs and trees are mostly isolated, in planted rows or in contained garden beds. They may provide stepping stone habitat for larger bird species but other similar habitat exists outside this subject site.

The Cassidy Parade site has some connectivity to the Erin Earth sustainable living education centre which has an abundance of planted native vegetation.

Karst, caves, crevices, cliffs, rocks or other geological features of significance

The subject site does not contain any significant geological features such as karsts, caves, crevices, or cliffs. The land forming the subject site is also not mapped as contaminated land or there being a risk of acid sulfate soils (WSP, 2022).

Areas of outstanding biodiversity

A 23 July 2025 review of the register has indicated that there are no areas of outstanding biodiversity value registered as being located on or near the subject site.

Topography and soils

A 23 July 2025 review of the Australian Soil Classification Type mapping on SEED NSW showed that majority of the subject site is mapped as Chromosol soil, with some sections near Docker Street mapped as Kandosol soil. The eastern section of the subject site is mapped as Kurosol and Dermosol soils.

6.2 Field assessment

Incidental fauna survey

Fauna species were recorded opportunistically by Mikayla Green and Carl Tippler whilst the site was traversed on foot on 21 July 2025. The weather was clear and sunny at the time of surveys.

Twelve fauna species were recorded within the subject site, 11 all of which were birds and one frog species (Table 11, Table 12 & Table 13). Nine bird species are native and two are exotic. None are listed threatened species. The native frog species is not listed as a threatened species.

PCT and vegetation surveys

The vegetation surveyed for the proposed CIZ extension area is located within the existing railway corridor and is highly disturbed due to historical development and clearing. There are no classified Plant Community Types (PCT) within the survey area and majority of the vegetation consists of highly disturbed ground cover species (Figure 8, Figure 9 & Figure 10**Error! Reference source not found.**). Note: Ecologists did not include some eastern sections of the Wagga Wagga Yard in the field surveys as this was not shown to be in the subject site during site inspections and Habitat did not have up to date shapefiles. This area has been assessed as Highly Disturbed Vegetation.

DRAFT

There are scattered large trees across all three site locations, although majority of these are not native. Wagga Wagga Yard has one large Callistemon species, Pearson St has approximately 10 large eucalypts for removal and several others on the boundary of the assessment area and Cassidy Pde has some Melaleuca sp. for removal and other natives for trimming on the boundary of the assessment area. A full vegetation species list for each of the site areas has been broken down below in Table 15, Table 14 and Table 15. As is indicated below, most vegetation species recorded during the field assessment are not native to Australia.

Table 14: Vegetation species recorded at the Pearson St site.

Scientific Name	Common Name	Native? (Y/N)
Acacia decora	Western Silver Wattle	Y
Acaena sp.	Acaena	Y
Acer sp.	Acer Tree	N
Avena sativa	Oats	N
Callistemon sp.	Bottlebrush	Y
Conyza bonariensis	Fleabane	N
Cupressus sp. (ornamental)	Ornamental Cupressus	N
Cynodon dactylon	Couch	Y
Cyperus eragostis	Club Rush	N

DRAFT

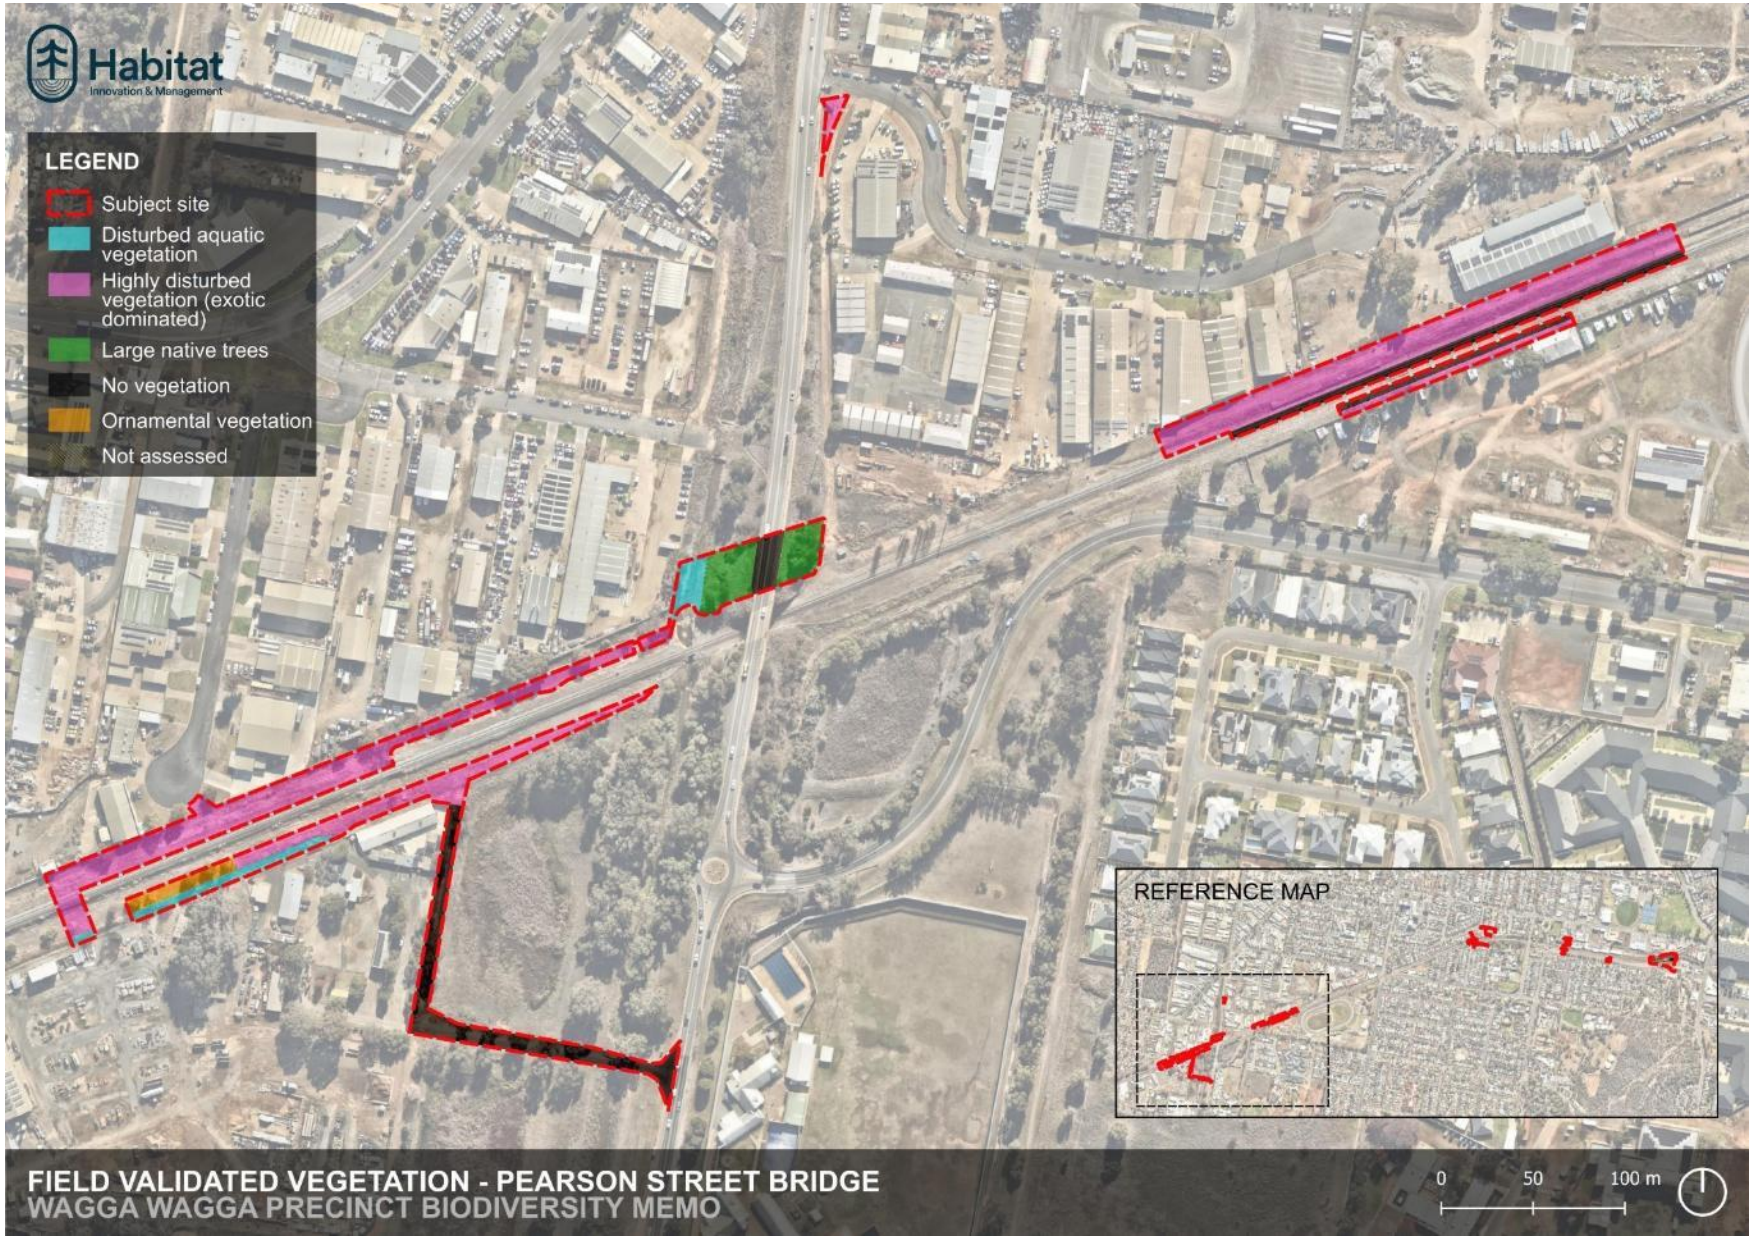

Figure 8: Field validated vegetation types in the proposed Pearson St CIZ extension area.

Figure 9: Field validated vegetation types in the proposed Wagga Wagga Yard CIZ extension area.

Figure 10: Field validated vegetation types in the proposed Cassidy Pde CIZ extension area*.

Habitat features

Various potential habitat features were recorded on site during the field surveys. These have been outlined below, and key habit feature locations have been mapped in Figure 11, Figure 12 & Figure 13 with examples provided in Figure 14, Figure 15 and Figure 16. Habitat features included two small bird nests, various wood/rock stockpiles, cracks/crevices in a large Eucalypt tree, culverts and creeks/drainage lines. Other potential habitat features include the variety of ornamental plantings and artificial habitat such as log piles and garden beds.

The habitat features assessed include:

- Subject site: 37,091 m^2
- Disturbed aquatic (drainage) vegetation: 1,060 m^2
- Large native trees: 1,511 m^2
- Highly disturbed vegetation: 15,046 m^2
- No vegetation: 10,225 m^2
- Ornamental vegetation: 1,359 m^2
- *Not assessed: 7,890 m^2

*In the eastern section of Wagga Wagga Yard that is Not Assessed (Figure 9), desktop analysis has determined that this area is considered Highly Disturbed / No Vegetation but likely to contain log/sleeper piles, ballast stockpiles and at least two mature trees. Though it is unlikely to contain habitat or threatened flora or fauna that triggers additional assessment or offsets, these may provide habitat for fauna species and will need to be inspected as part of pre-clearing surveys.

Vegetation

Numerous shrubs and trees have the potential to provide foraging, shelter and nesting habitat for birds, small mammals and reptiles. This includes exotic and planted native species. One large Eucalyptus species was recorded as containing various cracks and crevices which may provide habitat for smaller species such as microbats and reptiles. This tree is located in the Pearson St section of the site.

Bird Nests

Two small bird nest was recorded at the top of a large mature Callistemon sp. to the south of the train line at the Wagga Wagga Yard site. The nests were not active at the time of surveys but should be monitored for activity prior to any disturbance works.

Wood and rock stockpiles

Piles of rocks and wood often serve as habitat for various reptile and amphibian species as the timber provides refuge and a source of invertebrate prey. Other species such as echidnas will use timber piles for refugia and ground foraging birds may use the structure as a perch or hunting resource.

DRAFT

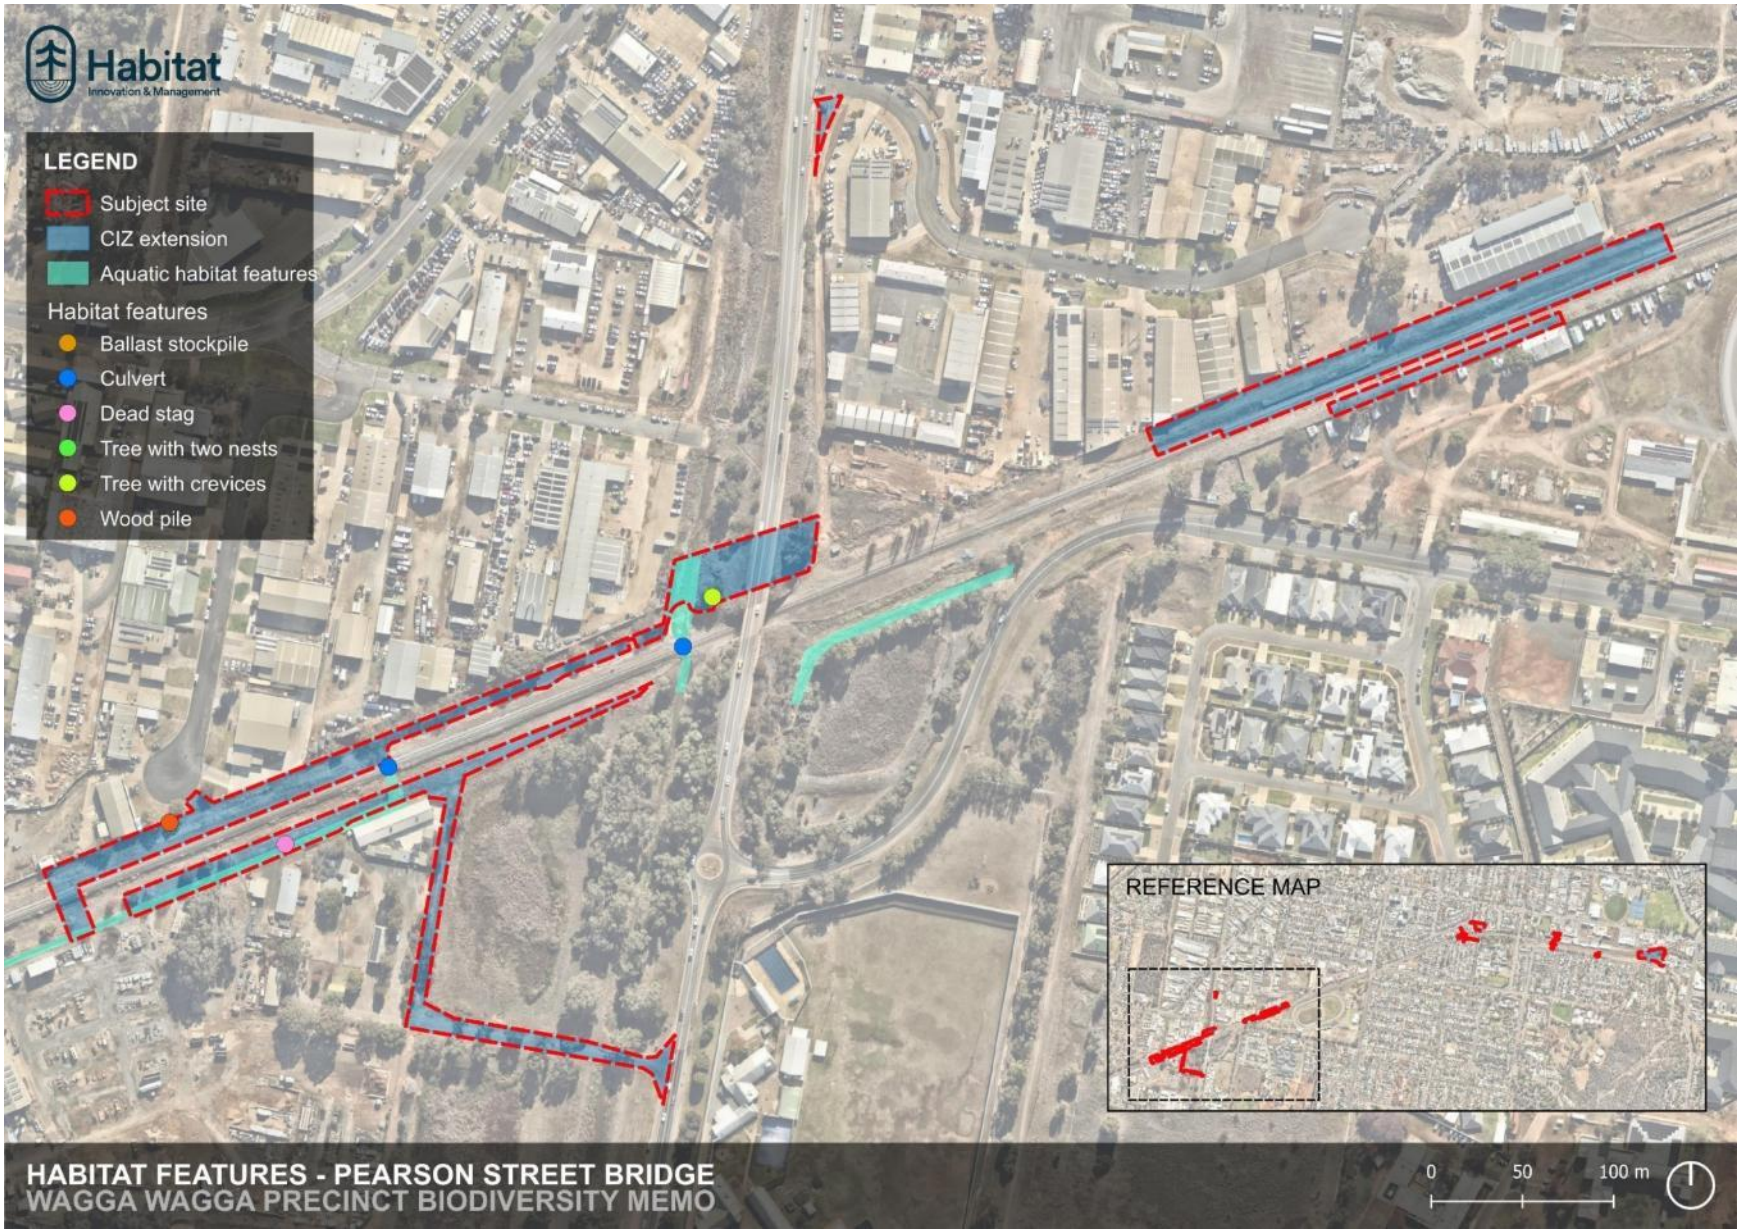

Figure 11: Pearson Street CIZ Extension Area Habitat Features.

Figure 12: Wagga Wagga Yard CIZ Extension Area Habitat Features.

Figure 13: Cassidy Parade CIZ Extension Area Habitat Features.

Figure 14: Pearson St features including bridge and drainage line, eucalypt with loose bark and thick shrub plantings.

Figure 15: Wagga Wagga Yard features including cracked wood on old garden bed, thick exotic shrub and tree with small bird nests.

Figure 16: Cassidy Parade features including ballast stockpile and two private matures trees overhanging the subject site

Table 17: Habitat feature locations

Habitat feature	Latitude	Longitude
Tree with 2 x small stick nests	-35.12069258	147.3678753
Culvert	-35.119923	147.365298
Culvert	-35.126689	147.34145
Ballast stockpile	-35.12021741	147.3614158
Culvert	-35.126088	147.343222
Wood pile	-35.12696812	147.3401343
Dead stag	-35.12707222	147.3408312
Tree with crevices	-35.125842	147.343398

Bridges or culverts

There is a small concrete railway bridge in the Pearson Street CIZ extension area. This has the potential to support Fairy Martin Nests and microbats, though none were observed on the day of the field assessment.

Creek and drainage lines

There are no mapped waterways within the three locations. However, depressions and drainage lines have the potential to provide habitat for fauna species in particular frogs, invertebrates and some reptile species. There is a drainage line in the Pearson Street CIZ extension area and one native (non-threatened) frog species Eastern Sign-bearing Froglet was observed in this works area.

Waterway validation and Key Fish Habitat

The disconnected unnamed first order waterway exists as a heavily modified drainage line which extends north through the Pearson Street subject site. This has the potential to and was holding water during the 21 July 2025 field assessment. As it is permanently disconnected from higher order streams and key fish habitat, the potential for this drainage line to support fish is limited. It may still support other aquatic species such as frogs, reptiles and invertebrates and this has been included in this assessment.

DRAFT

7. Impact Assessment

The footprint of the proposed intermodal extension will occupy a highly modified landscape that has existing rail and road infrastructure, drainage lines, mowed and maintained ornamental landscapes. The vegetation present is dominated by exotic and native ornamental plantings. No native Plant Community Types were identified. No threatened species or threatened ecological communities were identified in this assessment. One unnamed first order waterway exists as a drainage line.

Though the majority of the potential habitat identified was of temporary nature or low quality, native fauna may still use the planted and artificial features on occasion. Key habitat features have been mapped and are to be included in pre-clearance assessments, though other lower quality habitat features should also be surveyed if they are intended for removal or impact. This can be included as a pre-clearance mitigation activity.

Figure 11, Figure 12 & Figure 13 shows the location of habitat features that may be impacted by the Intermodal extension.

The proposed activity may require the removal or disturbance to:

- Disturbed aquatic vegetation: 1,060 m²
- Large native trees: 1,511 m²
- Highly disturbed vegetation: 22,936 m², including 7,890 m²
- No vegetation: 10,225 m²
- Ornamental vegetation: 1,359 m²

Results of this assessment found no threatened fauna species are expected to inhabit the site due to the low-quality foraging habitat this area provides and the presence of higher quality habitat further afield in the surrounding landscape.

In conclusion, the proposed extension of the CIZ works area is not likely to cause harm to threatened species, their habitat or disrupt their breeding cycles or disturb any Threatened Ecological Communities.

However, precautionary actions should be taken when removing any habitat features and the following recommendations have been made to ensure best practice pre-and post-clearance procedures are followed to minimise the potential harm to fauna that may be using these features as refuge.

DRAFT

8. Recommendations

To mitigate the potential impacts to biodiversity caused by the proposed CIZ extension the following mitigation measures and recommendations have been developed in line with the adopted Albury to Illabo A21 Stage B Construction Biodiversity Management Plan (CBMP 2025) The relevant sections of the CBMP are listed alongside the below recommendations:

- The disturbance zone for removal of vegetation and habitat features should be clearly marked for machinery drivers so that all native vegetation outside of the marked disturbance zone is protected (CBMP 6.1).
- Appropriate pre-and post-clearing procedures should be followed when removing or impacting potential habitat to minimise harm to fauna in the area (CBMP 6.1.1 – 6.1.5).
- Works that intersect the mapped waterway adjacent to Pearson Street are to be conducted in accordance with Controlled Activity Guidelines and an Erosion and Sediment Control Plan with works to be conducted when dry (CBMP 6.3).
- If any unexpected finds arise (such as threatened species, tree hollows, nests or burrows) that are likely to be impacted by the works, then works are to stop immediately and the site ecologist should be contacted immediately for advice on how to proceed (CBMP 6.1.7, 6.5, 6.6).
- A site-specific Erosion and Sediment Control Plan Construction Environment Management Plan (CEMP) should be developed and implemented to manage and minimise the impacts from site disturbance (CBMP Table 20, CB-26).
- To avoid the spread of weeds and pathogens during construction, the following mitigation measures are recommended (CBMP 6.4):
    - Exposed areas are to be kept to a minimum to reduce the establishment and spread of weeds, including from entering the drainage lines.
    - All exotic biomass cleared within the impact area should be removed from the study area and disposed of at an approved facility.
    - All equipment brought into the impact area is to be washed/cleaned so that it is free of soil, mud, debris or vegetation which may inadvertently introduce weeds and/or other pathogens into the impact area and study area.
    - Measures should be taken to prevent tracking of soils/sediments from work sites to roadways during work vehicle/machinery movement.

If all mitigation measures and recommendations are followed, it is not expected that the proposed development works will have any long-term significant impacts on the local flora and fauna.

DRAFT

9. Conclusions

This Biodiversity Memo has been developed for Martinus Rail in relation to the proposed CIZ extension at the Wagga Wagga Precinct.

The findings of this study conclude that no significant impacts to threatened species, populations or ecological communities are likely as a result of the proposed activity.

Although outside the assessed construction boundary for the Project, the biodiversity impacts are considered consistent with the initial assessment (WSP, 2024), and no further assessment or offsets (ecosystem or species) would be required.

The potential impacts on biodiversity identified for the proposed CIZ extension can be appropriately managed in accordance with the Conditions of Approval and through implementation of the updated management measures outlined in the Preferred Infrastructure Report Submissions Report for the Project.

Appendix E Unexpected Finds Procedure (Heritage and Human Remains)

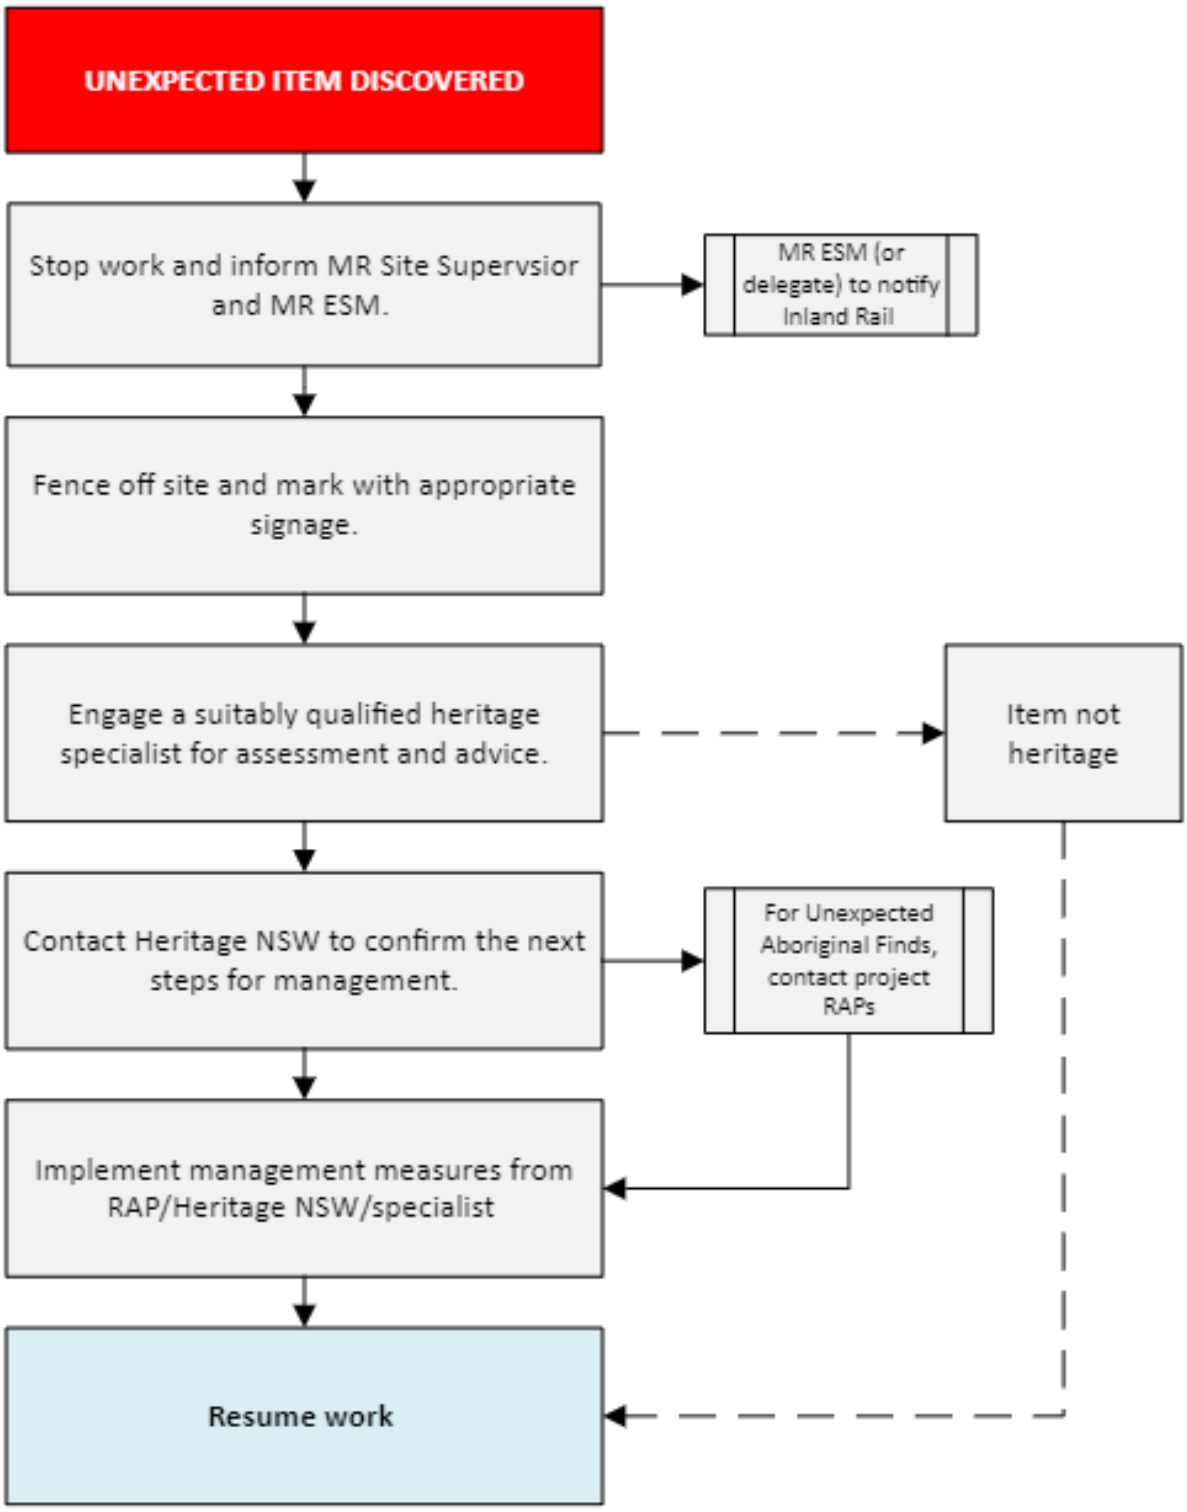
ABORIGINAL AND NON-ABORIGINAL HERITAGE: UNEXPECTED FINDS PROCEDURE

An Aboriginal artefact is anything that is the result of past Aboriginal activity. This includes stone (artefacts, rock engravings etc.), plant (culturally scarred trees) and animal bone (if showing signs of modification; i.e. smoothing, use). Human bone (skeletal remains) may also be uncovered while onsite.

A historic artefact is anything that is the result of past activity not related to Aboriginal occupation. This includes pottery, wood, glass and metal objects as well as the built remains of structures, sometimes heavily ruined.

In the event of an unexpected heritage find, the following protocol will apply:

1. All ground-disturbance work in the vicinity of the find must cease immediately. The Site Supervisor is to be made aware of the object(s) and is to notify the MR Construction Manager and MR ESM. The MR ESM (or delegate) will notify the relevant Inland Rail (IR) representative.
2. The find will be temporarily fenced off as quickly as possible to ensure no damage/further damage to the object(s). Signage on the fencing is to state that the area is subject to environmental protection, that no ground disturbance is allowed, and should include relevant contact details for the MR ESM.
3. The MR ESM (or delegate) will contact a suitably qualified heritage specialist to assess the find. The heritage specialist will then determine the need for further investigation or management. The heritage specialists assessment may be undertaken using good quality images, with a scale and several angles, however, if photographic evidence does not allow for certainty, then a site visit from the suitably qualified heritage specialist will be required.
4. If the find is an Aboriginal object, the MR ESM (or delegate) and/or heritage specialist will contact the RAPs to attend the site to inspect the find and to determine, in consultation, the next steps for management. These measures will include registration of the object in the Aboriginal Heritage Information Management System within a reasonable time.
5. The MR ESM (or delegate) and/or heritage specialist will also contact Heritage NSW (phone 02 9873 8500) to confirm the next steps for management.
6. Ground disturbance work in the vicinity of the find can only continue under supervision of a suitably qualified heritage specialist, having regard to any advice from Heritage NSW and RAPs.



Flow Chart: Unexpected heritage finds

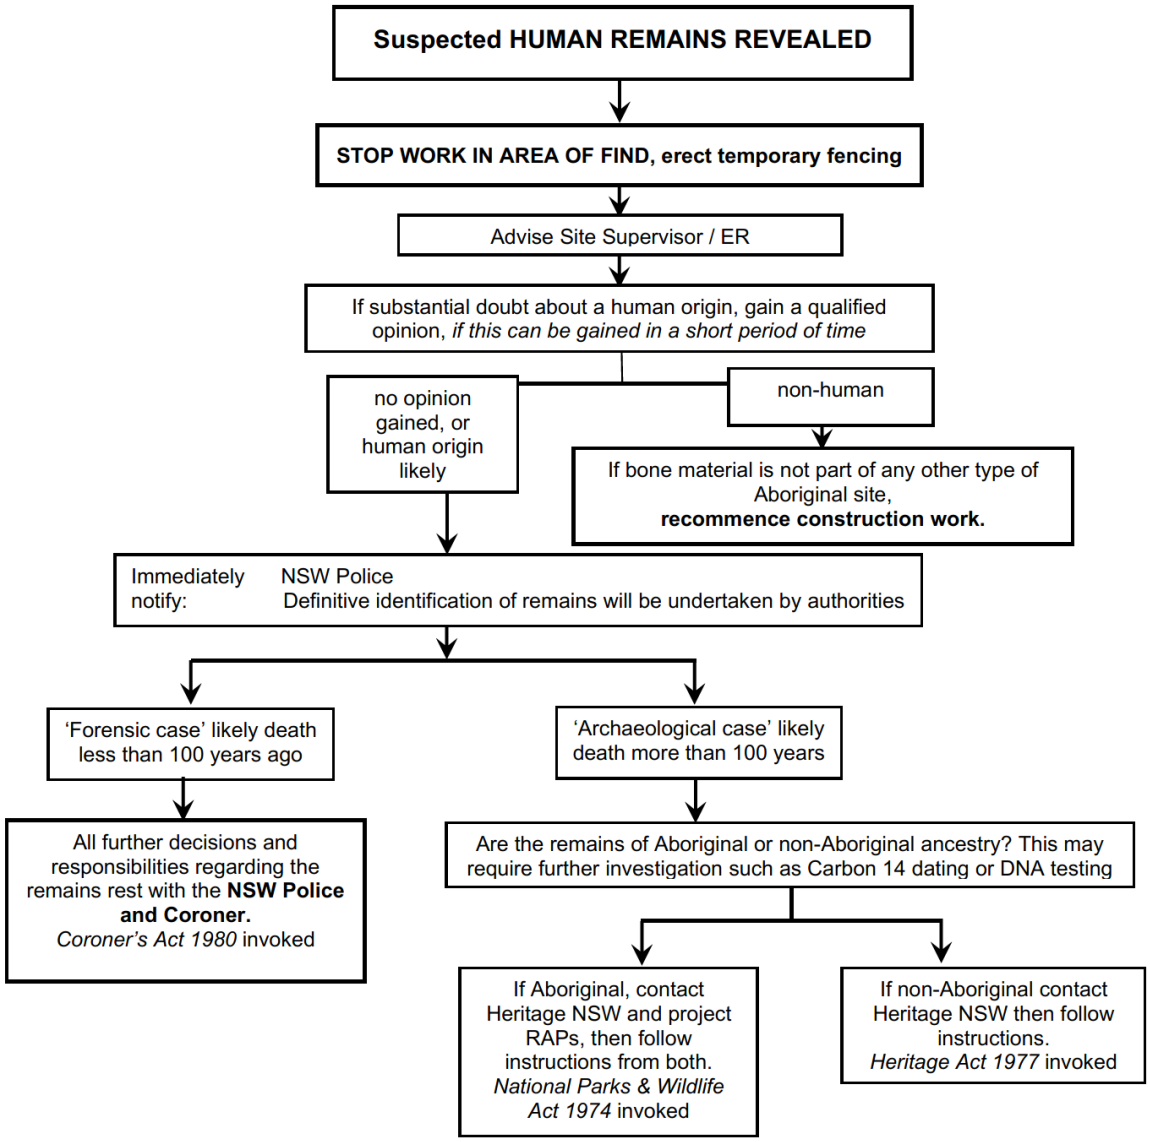
UNEXPECTED HUMAN REMAINS PROCEDURE

The procedure related to the discovery of suspected human skeletal material is based on Requirement 25 of the *Code of Practice for Archaeological Investigation of Aboriginal objects in NSW* (DECCW 2010b) and the *Skeletal Remains: Guidelines for the management of human skeletal remains under Heritage Act 1977* (NSW Heritage Office1998). A flow chart is supplied below.

If known, or suspected skeletal remains are encountered during the construction and/or operation of the project, the following procedure will be followed:

1. The area will be temporarily fenced immediately to ensure no damage/further damage to skeletal material. No skeletal material that remains in place should be disturbed from its location;
2. Works in the vicinity are to be stopped immediately;
3. The Site Supervisor is to be made aware of the skeletal material and is to notify the MR Environmental Manager and MR Construction Manager. Inland Rail Representatives are to be contacted at this stage;
4. Attempt to determine if the bones are animal or human. May require photos of the bones to be sent to the MR Heritage Consultant to determine if the remains are likely to be human or not;
5. If a qualified opinion concludes the bones are not human in origin and are unlikely to be part of an archaeological site works may recommence;
6. If no qualified opinion can be gained or the bones are suspected of being human, undertake the following:
    i) MR will contact Police, allowing Police to conduct an assessment to determine if the remains are part of a forensic case (less than 100 years old), or are archaeological (more than 100 years old);
    ii) If the remains are assessed as ‘archaeological’, there then needs to be an attempt to determine if they are Aboriginal or non-Aboriginal;
    iii) Inland Rail will contact the relevant stakeholders, including Heritage NSW (phone 02 9873 8500) and RAPs (if the remains are Aboriginal);
    iv) All further activities will be determined by Heritage NSW and the RAPs (if the remains are Aboriginal);
    v) No work may recommence in the area of the find until Heritage NSW provides the approval to do so.

Flow Chart: Suspected Human remains



Appendix F Unexpected Finds Procedure (Flora and Fauna)

Discovery of unexpected threatened entity i.e.
(a) any additional impact to threatened species or ecological communities that were included in the assessment but have been found at a new location
(b) to any threatened entity that was not offset.

Stop all work which is likely to impact on the threatened entity.
The person who discovered the find is to notify all project personnel woking in the immediate vicinity of the find(s) so that any potential disturbance activity can be halted.

Notify Site Supervisor and Environmental Manager

All personnel

Notify and consult the project ecologist and install deliniation (for flora and/ or fauna habitat)
Project ecologist to confirm if the threatened entity would be potentially impacted and confirm appropriateness of deliniation/ initial measures.

Is the species or community a listed threatened entity under State or Commonwealth legislation?

No

Yes

Has impact to the species or community in that location been assessed in the EAD and will the absolute clearing extent be within the restrictions posed by Condition E23?

Yes

The impact to the species or community was a assessed by the EAD and is permissible in that location (Any conditions of the Infrastructure Approval must also be considered). **The impact is therefore permissible**

Notify DPHI and BCS in writing on any additional mitigation measures to be implemented

No

The impact to the species or community was NOT addressed in the EAD , follow up investigation is required

Martinus Rail to consult with the Project Ecologist and ARTC when developing actions to assess and manage the find.

For EPBC Act species (and as required under the BC Act) conduct and assessment of significance and review controls to mitigate impacts. Where relevant consider additional controls to minimise impacts to the unexpected find

Consult with DPHI/BCS as relevant regarding propsed measures, impacts and follow up actions

Record find and follow up actions

Confirm with DPHI/BCS (as relevant) that proposed controls are adequate to proceed.

Records of the find to be submitted to BioNet.

Biodiversity assessment to be prepared and implemented (or alternatively the BDAR is to be updated with new impacts) and additional approval documents to be prepared as required.

Measures which can be implemented prior to impact are to be implemented.

Measures required to be implemented at a later date (i.e. any revision to the offsets) with be implemented following impacts

Records of the find to be submitted to BioNet

Martinus Rail Environment Manager or delegate authorises Unexpected Finds Hold Point Release

Recommence works with updated controls where necessary

Appendix G Unexpected Finds Procedure (Contamination)

UNEXPECTED FINDS PROCEDURE

MANAGEMENT AND RESPONSIBILITY

INDUCTION/ TOOLBOX TALKS
All personnel are to receive Project/ Site Inductions and on-going training via Toolbox Talks

All personnel

EVIDENCE OF CONTAMINATION OBSERVED

STOP ALL WORK IN THE AREA IMMEDIATELY AND

PREVENT FURTHER ACTIVITY IN THE AREA.

NOTIFY THE SITE SUPERVISOR AND SAFETY MANAGER , ENVIRONMENT MANAGER AND CORDON OFF AREA.

Site Supervisor
Project Manager
Lead Safety Manager
Environment Manager

- Do not touch or disturb the item/ material
- Delineate the find from the rest of the worksite
- Inform the Environment Manager regarding the potential contamination find. The following detail should be provided:
  - The location of the potential contamination
  - Visual appearance
  - Odour (if any)
  - Depth
  - Surrounding material and works being undertaken at the time of discovering the material
- WHS and EM to determine immediate actions to prevent WHS and ENV issues
- EM to notify IR of Unexpected Find

ASSESSMENT

Contamination Consultant to assess and classify the unexpected find in accordance with the NSW regulatory requirements, including sampling and laboratory analysis.

Contamination Consultant

MANAGEMENT STRATEGY

- Contamination Consultant to develop a provide a plan for managing and/or remediating the material. The strategy may involve a site auditor if required under the relevant CoAs.
- IR/ARTC to review and accept the proposed strategy

Environment Manager
Contamination Consultant
IR/ARTC

STRATEGY IMPLEMENTATION

- Implement the approved management and/or remediation as per the Contamination consultants direction
- IR/ARTC to review and accept the proposed strategy (if required)

Contamination Consultant
Site Supervisor
Environment Manager

Once the contamination find has been mitigated and clearance report received from the contamination consultant. EM is to notify Project Manager who is to approve re-commencement of works in the vicinity of the remediation site.
IR/ARTC will review clearance report and must provide approval/acceptance prior to recommencing works

Environment Manager
Project Manager
IR/ARTC

Recommence works

Asbestos

An unexpected find occurs when Asbestos Containing Material (ACM) not identified in the Asbestos Register is found on site. In the event of an unexpected find the below steps are to be followed:

1. The area is to be demarcated, works in the area to cease and workers notified
2. Notify the Site Supervisor first. Site Supervisor will then notify the Project Manager, Safety Manager and Environment Manager.
3. Notify IR/ARTC within five (5) business days after the discovery.
4. Control dust by with dust suppression
5. A certified occupational hygienist is to be engaged to provide recommendations to manage the area
6. Occupational hygienist arrange for testing of the suspected ACM and monitoring of the area (if required)
7. The area is to be made safe as per the certified

Contamination Consultant

Works undertaken in relation to Contamination to investigate, assess, remediate or validate remediation or land use suitability shall be undertaken by a suitably qualified person holding valid 'Site Contamination' certification under the Certified Environment Practitioners Scheme (CEnvP) - Environment Institute of Australia and New Zealand or Certified Professional Soil Scientist – Contaminated Site Assessment and Management under the Soil Science Australia Certification Scheme.

With relevant qualifications and experience in keeping with the National Environmental Protection (Assessment of Site Contamination) Measure 1999 Amendment 2013 (ASC NEPM 2013).

Procedure

1) Potential contaminated soil/material encountered during construction activities. STOP ALL WORK AND NOTIFY IMMEDITELY
2) Undertake a site/area contamination investigation. The Environment Manager (EM) is to assess the situation and if considered necessary, commission a suitably qualified contamination specialist to undertake a contamination investigation in the area of the find.
3) The consultation specialists in consultation with the EM will determine the appropriate management measures to be implemented. This may include leaving contamination undisturbed if it does not pose unacceptable risks to human health or the environment, capping of contamination, treatment or offsite disposal. If the material is to be disposed of offsite, ensure the waste facility is appropriately licensed. Contaminated material requiring off-site disposal is to be classified in accordance with the Waste Classification Guidelines – Part 1: Classification of Waste, NSW EPA 2014. Maintain records to demonstrate waste material was appropriately managed
4) If the material is determined to be Acid Sulfate Soil (ASS) or Potential Acid Sulfate Soil (PASS), an Acid Sulfate Soil Management Plan would be prepared and implemented in accordance with the Acid Sulfate Soil Manual (Acid Sulfate Soil Management Advisory Committee, August 1998).
5) Prior to any contamination investigation, management or remediation activities appropriate work method documentation encompassing safety and environmental risk management will be prepared for review and approval by the EM and IR
6) If required a Remedial Action Plan (RAP) will be prepared in accordance with legislative requirements
7) If material is to be treated and reused or left in situ ensure appropriate records are maintained and location of material (survey) is undertaken and provided to IR
8) Once the contamination find has been mitigated and clearance report received from the contamination consultant. This report is to be submitted to IR/ARTC for acceptance prior to recommencement of work
9) EM is to notify Project Manager who is to approve re-commencement of works in the vicinity of the remediation site.
