Out-of-hours activities

- Site compound operation (Illabo and Marinna)
- Excavation and shoulder reconditioning works
- Transportation of materials including ballast and capping between stockpile and site compounds
- Drainage and culvert work
- Track works
- Geotechnical investigations
- Signalling works

Equipment list

Heavy machinery including but not limited to track machinery, elevated work platforms, excavators, front end loader, generators, light vehicles, hand tools, watercarts and lighting towers.

What can I expect

Properties near these areas can expect:

- Noise from excavation activities involving the removal of existing surfaces such as rock, soil, bridge segments, bridge abutments, existing roads and transportation of materials
- Heavy vehicle movements, geotechnical investigations and pavement coring
- Loading, unloading and moving equipment including cranes and materials
- Construction machinery and equipment operation
- Traffic management may be in place to safely direct traffic as needed.

How we're managing impacts

- Works programmed to best minimise noise impacts

- Use of non-tonal reversing alarms on all plant and equipment and turning off equipment when not in use
- Instructing workers to keep noise to a minimum and being respectful of our neighbours
- Water carts onsite to assist with dust suppression and fire risks
- Onsite noise monitoring to be conducted to ensure compliance

Cancellation of works

Work may be cancelled at short notice due to weather and other factors. If this happens, work will be rescheduled and affected neighbours will be notified in advance.
