1. KEY FINDINGS FOR THE REPORTING PERIOD

Critical State Significant Infrastructure (CSSI) 9406 Condition of Approval (CoA) A26(j) requires that the Environmental Representative (ER) must *'prepare and submit to the Planning Secretary and other relevant regulatory agencies, for information and make publicly available, an Environmental Representative Monthly Report providing the information set out in the Environmental Representative Protocol under the heading "Environmental Representative Monthly Reports". The Environmental Representative Monthly Report must be submitted within seven (7) days following the end of each month for the duration of the ER's engagement for the CSSI.'*

This Environmental Representative (ER) Monthly Report has been prepared in accordance with CoA A26(j), covering the period from 1 to 31 August 2026 (the reporting period).

Works undertaken during the reporting period include bulk earthworks, crushing and screening, minor clearing and grubbing, drill and blast, piling works, fencing, utility relocation, cadastral surveys, installation of culverts and stock crossings, installation and maintenance of erosion and sediment controls, dewatering and CSR works.

During the reporting period:

- One unexpected find was reported
- One non-compliance with the CoA was reported
- No incidents causing or threatening to cause material harm were reported.

Consultation with potentially affected stakeholders continued during the reporting period in the form of meetings, emails, telephone calls, SMS's, notifications, a public information session and website updates. Consultation with other stakeholders such as local businesses, community groups, emergency services, Council and schools, also occurred during the reporting period.

One complaint was received during the reporting period related to construction noise and lighting. No complaints remain open at the time of reporting.

Two documents were approved by the ER during August 2026.

Two inspections were conducted by the ER during the reporting period - 12 and 26 August 2026. Actions identified in the inspection reports have been progressively closed out with evidence provided by the contractor after the inspections. At the time of completing this report close-out of identified actions is continuing.

The ER will continue to report on the progress of the Project each month.

2. BACKGROUND

Inland Rail is a proposed 1,600km freight rail line, comprising 12 sections, which will connect Melbourne and Brisbane via regional Victoria, New South Wales and Queensland. Inland Rail Pty Ltd (IRPL), a subsidiary of Australian Rail Track Corporation (ARTC), is building Inland Rail on

behalf of the Australian Government. As each section of Inland Rail is completed, it will be operated and managed by ARTC.

ARTC obtained approval from the NSW Minister for Planning and Public Spaces for the Inland Rail's Illabo to Stockinbingal (I2S) section (Critical State Significant Infrastructure (CCSI-9406)) on the 4 September 2024 under Section 5.19 of the *Environmental Planning and Assessment Act 1979* (the EP&A Act) (the Project) subject to Conditions of Approval (CoA).

The I2S Project (the Project) involves the construction and operation of approximately 39 Kilometres of new single-track standard gauge railway to accommodate trains with a maximum length of 1,800m. Key features involve:

- connection to other rail lines, including Stockinbingal to Parkes line, Lake Cargelligo line, and Main Southern Railway
- one crossing loop and maintenance siding
- level crossings and stock crossings
- bridges over rivers and other watercourses, floodplains and roads
- upgrade of around 3.5km of existing track for the tie-in works to the existing Main South Line at Illabo

new track to maintain Lake Cargelligo line connection either side of the proposal

- realignment and road-over rail bridge for a section of the Burley Griffin Way at Stockinbingal
- realignment of Ironbong Road to allow for safe sight lines at the new active level crossing
- ancillary infrastructure to support the proposal, inclusive of signalling and communications; drainage, drainage control areas, signage and fencing, and services and utilities; and
- construction infrastructure, including ancillary facilities, and a temporary workforce accommodation facility.

In accordance with CoA A22 – A25, IRPL sought approval to engage WolfPeak's Ricardo Prieto-Curiel, Derek Low and Tim Elder as the Project's primary and alternate ERs respectively. This approval was granted by the Planning Secretary's nominee of the Department of Planning, Housing and Infrastructure (DPHI) on 11 September 2024 and 7 February 2025.

John Holland (JHG) have been engaged as the Principal Contractor to design and construct the Project. The Project is currently in the 'Detailed design and early works (including low impact work) stage.

CoA A26(j) requires that for the duration of the works or as otherwise approved by the Planning Secretary, the ER must *'prepare and submit to the Planning Secretary and other relevant regulatory agencies, for information and make publicly available, an Environmental Representative Monthly Report providing the information set out in the Environmental Representative Protocol under the heading "Environmental Representative Monthly Reports". The Environmental*

Representative Monthly Report must be submitted within seven (7) days following the end of each month for the duration of the ER's engagement for the CSSI.'

This ER Monthly Report has been prepared in accordance with CoA A26(j), covering the period from the 1 to 31 August 2026 (the reporting period).

3. PROJECT ACTIVITIES

3.1 Construction works

3.1.1 Works undertaken during the reporting period

Construction activities continued throughout August 2026. The following activities were completed or underway during the reporting period:

- Corridor boundary fence line construction and rectification
- Crushing and screening
- Drill and blast
- Piling pad construction at Dudauman Creek
- Piling works Isobel Creek, Burley Griffin Way, Dudauman Creek
- Commencement of major earthworks at Burley Griffin Way
- Commencement of culvert construction at Burley Griffin Way
- CSR works Illabo Junction (Section 1)
- Utility relocations
- Bulk earthworks project-wide, including:
 - Topsoil stripping
 - Foundation preparation
 - Open drain excavation
 - Cut excavation and fill installation
- Cadastral survey
- Installation of culverts and stock crossings
- Dewatering works following approximately 86mm of rain throughout August.

3.1.2 Upcoming works

The following works are planned for September 2026:

- Drill and blast
- September 2026 MSL possession

- Bridge piling works
- Bulk earthworks
- Installation of culverts and stock crossings
- Installation of enveloper pipes
- Installation and maintenance of ERSED controls
- Dewatering works
- Completion of utilities relocation works
- Foundation treatments

Proposed Out of Hours Works (OOHW) planned for September 2026 include (to be carried out under the Environment Protection Licence (EPL):

- Sunday works (not affecting the same receiver every second Sunday) for bulk earthworks, culverts, drainage, utilities, and CSR works at Illabo Junction
- Sunday works under negotiated agreements (under the JH EPL)
- Night and evening works (Monday-Saturday) for water carts, refuelling trucks, deliveries, and utilities cutover works.
- Evening works for piling including late concrete finishing works if required.
- Evening and night works throughout the September 2026 MSL possession (12/09-16/09).

3.2 Minor construction ancillary facilities

Nothing to report for August 2026.

3.3 Changes to the Project

3.3.1 Construction Staging

JHG are constructing the Project in two Stages:

Stage 1: Limited scope of works completed during the September 2025 rail possession to conduct maintenance on the existing Main South Line (MSL). This will support the delivery of the Project and to ensure uninterrupted operations of the MSL throughout the construction period.

Stage 2: All other construction activities

A Staging Report was prepared in accordance with CoA A11 and A12 to reflect this staging approach. The ER reviewed and endorsed the Staging Report (Rev 0) on 29 August 2025. Stage 2 construction continued during the reporting period.

3.3.2 Consistency Assessments

One Consistency Assessment (CA) was determined by Inland Rail during the reporting period as follows:

- Consistency Assessment (Minor) - Utilities CIZ Extension | Rev 0 | Document Number: 6-0019-220-EEC-00-SD-0007 | Date: 07 August 2026

3.4 Community consultation and complaints received

3.4.1 Consultation

Consultation with potentially affected stakeholders continued during the reporting period in the form of meetings, emails, telephone calls, SMS's, notifications, a public information session and website updates. Consultation primarily related to upcoming proposed activities and work updates including blasting notifications, access and traffic management, maintenance, livestock movements and addressing complaints and inquiries.

Consultation with other stakeholders such as local businesses, community groups, emergency services, Council and schools, also occurred during the reporting period.

A summary of consultation undertaken during the month is provided in Appendix A.

3.4.2 Complaints

The complaints register current to 31 August 2026 was supplied to the ER. It includes details of all complaints received and the actions undertaken by JHG to resolve each complaint.

One complaint was received during the reporting period related to construction noise and lighting impacting a nearby resident. After consultation with the resident, JH have delayed site compound lighting by one hour in the mornings and offered to undertake additional noise monitoring at the residence. No complaints remain open at the time of completing this report.

A copy of the complaints register can be provided by IRPL to DPHI on request, in accordance with CoA B11.

3.5 Incidents, Emergency Works, Non-compliances and Unexpected Finds

3.5.1 Incidents

No incidents causing or threatening to cause material harm were reported to DPHI during the reporting period.

3.5.2 Emergency Works

No emergency works were reported during the reporting period.

3.5.3 Non-compliances

One administrative non-compliance was reported to DPHI in accordance with CoA A36 during the reporting period.

Description: The noise and vibration monitoring report was not submitted within the timeframe specified in the approved CNVMP.

Action: The CNVMP was updated to align reporting requirements with other monitoring programs, including six monthly reporting and submission of reports within three months of the monitoring period. Any outstanding monitoring information was incorporated into the first six-monthly monitoring report to address the reporting gap.

3.5.4 Unexpected Finds

One unexpected find was reported during August 2026. A pair of raptors, potentially Little Eagle, were exhibiting nesting behaviour in tree adjacent to CIZ - Billabong Creek. First observation on 23/8, subsequent observations of pair 27/8 and 28/8. Raptor subject matter experts (Habitat Innovation and Management) engaged to provide further surveys and species verification for Wednesday 2nd September.

4. ER ACTIVITIES

4.1 Advice provided to the Proponent on the CoA and other authority conditions

Advice has been provided by the ER to IRPL and JHG since late 2024 through to August 2026. Further details of advice provided during the reporting period is provided in Section 4.2.

4.2 Environmental management plans and programs

4.2.1 Development

CEMP and Sub-plans have been developed from late 2024 and submitted to the ER for approval or endorsement.

Amendments to the following documents was approved by the ER during the reporting period:

- Construction Environmental Management Plan, revision 1 (Document Reference: 5-0019-220-PMA-00-PL-0037), dated 25 July 2026). | Approved 07/08/2026
- Sub Plan: Noise and Vibration Management Plan, revision 1 (5-0019-220-PMA-00-PL-0054), dated 24/03/2026 | Approved 14/08/2026

There were no documents endorsed by the ER during the reporting period:

Letters of approval are included in Appendix B.

4.2.2 Implementation

Construction activities continued throughout the reporting period generally in accordance with approved Management Plans and CoAs.

4.2.3 Site inspections

Two site inspections were undertaken by the ER during the reporting period – 12 and 26 August 2026. The ER Inspection Reports have been provided to DPHI – refer to these reports for specific details.

Actions identified in the inspection reports have been progressively addressed with evidence provided by the contractor after the inspections. At the time of completing this report, four actions remained open (or in progress) associated with stabilised gate access and drainage outlet protection management (as documented within the latest ER Inspection Report of 26 August 2026).

ER inspections for next reporting period are scheduled for 14 and 30 September.

Figure 1. Isobel Creek clean water diversion and dewatering (12/08/26)

Figure 2. Burley Griffin Way – additional access stabilisation to be undertaken (26/08/26)

Figure 3. Gate 14 Stockinbingal - additional access stabilisation to be undertaken (26/08/26)

Figure 4. Stockinbingal Accommodation Camp - drainage stabilisation works to be undertaken (26/08/26)

4.2.4 Audits

An internal IRPL HSEQ audit was undertaken on 18-20 August 2026.

4.2.5 Complaint resolution

No complaints remain open at the time of reporting.

4.2.6 Meetings

Meetings with IRPL and JHG, including the involvement of the ER, have been undertaken as required throughout the reporting period to discuss construction works, Project documentation and general Project issues. In addition, weekly meetings with IRPL, JHG and the ER have continued throughout the reporting period covering Project works, progress on post-approval documentation, compliance, incidents, complaints etc.

A meeting between DPHI, IRPL, JHG and the ER was held on 14 August 2026.

4.2.7 Documentation issued

Documentation issued by the ER during the reporting period included:

- ER Monthly Report for June 2026 (issued 7 August 2026)
- ER Inspection Reports issued to IRPL, JHG and DPHI for:
 - 12 August 2026
 - 26 August 2026.
- ER Letters of Approval for:
 - Construction Environmental Management Plan, revision 1 | Approved 07/08/2026
 - Sub Plan: Noise and Vibration Management Plan, revision 1 | Approved 14/08/2026

4.2.8 Communications with the Secretary

There have been no written communications with the Planning Secretary or its representatives during the reporting period, other than issue of the documents listed in section 4.2.7. Informal project discussions have been held with DPHI as required.

5. ENVIRONMENTAL PERFORMANCE OF THE PROJECT

5.1 Environmental Performance

Construction works have been ongoing throughout the reporting period. Works undertaken during the reporting period include bulk earthworks, crushing and screening, minor clearing and grubbing, drill and blast, piling works, fencing, utility relocation, cadastral surveys, installation of culverts and stock crossings, installation and maintenance of erosion and sediment controls, dewatering and CSR.

Environmental risk potential is significant with the continuation of ground disturbing works on site. Site inspection actions are progressively being closed out to ensure risk is minimised, and mitigation and control measures continue to be implemented consistent with approval requirements and approved management plans.

5.2 Key learnings

No lessons learned sessions are scheduled at this time. Ongoing increased oversight from the ER in consultation with IRPL will continue during ground disturbance works.

Limitations

This Document has been provided by WolfPeak Group Pty Ltd (WolfPeak) to the Client and is subject to the following limitations:

This Document has been prepared for the particular purpose/s outlined in the WolfPeak proposal/contract/relevant terms of engagement, or as otherwise agreed, between WolfPeak and the Client.

In preparing this Document, WolfPeak has relied upon data, surveys, analyses, designs, plans and other information provided by the Client and other individuals and organisations (the information). Except as otherwise stated in the Document, WolfPeak has not verified the accuracy or completeness of the information. To the extent that the statements, opinions, facts, findings, conclusions and/or recommendations in this Document (conclusions) are based in whole or part on the information, those conclusions are contingent upon the accuracy and completeness of the information. WolfPeak will not be liable in relation to incorrect conclusions should any information be incomplete, incorrect or have been concealed, withheld, misrepresented or otherwise not fully disclosed to WolfPeak.

This Document has been prepared for the exclusive benefit of the Client and no other party. WolfPeak bears no responsibility for the use of this Document, in whole or in part, in other contexts or for any other purpose. WolfPeak bears no responsibility and will not be liable to any other person or organisation for or in relation to any matter dealt with in this Document, or for any loss or damage suffered by any other person or organisation arising from matters dealt with or conclusions expressed in this Document (including without limitation matters arising from any negligent act or omission of WolfPeak or for any loss or damage suffered by any other party relying upon the matters dealt with or conclusions expressed in this Document). Other parties should not rely upon this Document or the accuracy or completeness of any conclusions and should make their own inquiries and obtain independent advice in relation to such matters.

To the best of WolfPeak's knowledge, the facts and matters described in this Document reasonably represent the Client's intentions at the time of which WolfPeak issued the Document to the Client. However, the passage of time, the manifestation of latent conditions or the impact of future events (including a change in applicable law) may have resulted in a variation of the Document and its possible impact. WolfPeak will not be liable to update or revise the Document to take into account any events or emergent circumstances or facts occurring or becoming apparent after the date of issue of the Document.

APPENDIX B – ER LETTERS OF APPROVAL AND ENDORSEMENT

7 August 2026

Daniel Lumby
Principal Environmental Advisor
Level 6, 180 Ann Street
Brisbane QLD 4000

Dear Daniel,

Inland Rail | SSI-9406 – Environmental Representative approval of minor updates to Construction Environmental Management Plan (CEMP) – Condition A26(i)

Approval of the Inland Rail's Illabo to Stockinbingal Critical State Significant Infrastructure project (SSI 9406) (the Project) was granted by the Minister for Planning and Public Spaces on 4 September 2024, subject to a number of Conditions of Approval (CoA).

CoA A22 requires an Environmental Representative (ER) to be nominated by the Proponent and approved by the Planning Secretary prior to the commencement of works. The undersigned was approved as ER for the Project by the Planning Secretary's nominee on the 7 February 2025.

Condition A26 provides the requirements of the ER on the Project. It requires, by way of condition A26(i), that the ER review and approve minor amendments to the plans/strategies required under the Approval. It specifically states:

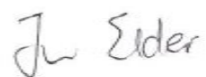

A26(i) *For the duration of Work and for no less than twelve (12) months after the completion of construction of the CSSI, the ER must:*

consider any minor amendments to be made to the CEMP, CEMP Sub-plans and Construction Monitoring Programs that comprise updating or are of an administrative nature, and are consistent with the terms of this approval and the CEMP, CEMP Sub-plans and Construction Monitoring Programs approved by the Planning Secretary and, if satisfied such amendment is necessary, approve the amendment. This does not include any modifications to the terms of this approval;

John Holland Group (JHG) prepared a Construction Environmental Management Plan for the Project (Document Reference: 5-0019-220-PMA-00-PL-0037, revision 0, dated 15 July 2025). The CEMP has been prepared to satisfy the requirements of CoAs C12 and C13 and was endorsed by the ER on 18 July 2025. John Holland has since completed an update to the CEMP (Document Reference: 5-0019-220-PMA-00-PL-0037, revision 1, dated 25 July 2026), as part of periodic review.

In accordance with the requirements of condition A26(i), I consider the changes to be administrative and approve the minor amendments to the CEMP (Document Reference: 5-0019-220-PMA-00-PL-0037, revision 1, dated 25 July 2026).

Yours sincerely,

A handwritten signature in dark ink, appearing to read 'Tim Elder'. The signature is written in a cursive, slightly slanted style.

Dear Daniel,

Inland Rail | SSI-9406 – Environmental Representative approval of minor updates to CNVMP

Approval of the Inland Rail's Illabo to Stockinbingal Critical State Significant Infrastructure project (SSI 9406) (the Project) was granted by the Minister for Planning and Public Spaces on 4 September 2024, subject to a number of Conditions of Approval (CoA).

CoA A22 requires an Environmental Representative (ER) to be nominated by the Proponent and approved by the Planning Secretary prior to the commencement of works. The undersigned was approved as ER for the Project by the Planning Secretary's nominee on the 7 February 2025.

Condition A26 provides the requirements of the ER on the Project. It requires, by way of condition A26(i), that the ER review and approve minor amendments to the plans/strategies required under the Approval. It specifically states:

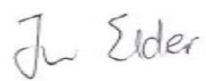

A26(i) *For the duration of Work and for no less than twelve (12) months after the completion of construction of the CSSI, the ER must:*

consider any minor amendments to be made to the CEMP, CEMP Sub-plans and Construction Monitoring Programs that comprise updating or are of an administrative nature, and are consistent with the terms of this approval and the CEMP, CEMP Sub-plans and Construction Monitoring Programs approved by the Planning Secretary and, if satisfied such amendment is necessary, approve the amendment. This does not include any modifications to the terms of this approval;

John Holland Group (JHG) prepared a NVMP for the Project (Document Reference: 5-0019-220-PMA-00-PL-0054, revision 0, dated 1 August 2025). The NVMP, which includes a Noise and Vibration CMP (Appendix G of NVMP) and an Out of Hours Work (OOHW) Protocol (Appendix F of the NVMP, Document Reference: 5-0019-220-EEC-00-PO-0001, revision E dated 17 June 2025), was endorsed by the ER on 1 August 2025. John Holland has since completed an update to the NVMP (Document Reference: 5-0019-220-PMA-00-PL-0054, revision 1, dated 24 March 2026) as part of periodic review.

In accordance with the requirements of condition A26(i), I approve the minor amendments to the NVMP (Document Reference: 5-0019-220-PMA-00-PL-0054, revision 1, dated 24 March 2026).

Yours sincerely,

A handwritten signature in dark ink, appearing to read 'Tim Elder'. The 'T' is large and stylized, with a long horizontal stroke that extends to the right. The 'Elder' is written in a cursive, flowing script.
