Construction update
Illabo to Stockinbingal
1-30 November 2026

JOHN HOLLAND

John Holland is continuing construction works along the Illabo to Stockinbingal section of Inland Rail.

Description of works (subject to approval):

- General earthworks, including clearing works, stripping topsoil and tree removal
- Establishing site environmental controls
- Constructing a haul road within the rail corridor
- Continuing formwork, concreting and precast placement for drainage culverts
- Bridge construction works
- Installing utilities, including power relocation work.
- Installing rail signaling and track equipment
- Rock hammering, crushing and screening operations
- Drilling and blasting will occur in select locations. Affected landowners will be notified in advance and appropriate safety exclusion zones will be implemented
- Surveying, utility, environmental, and geotechnical investigations
- Installing fencing and gates along the rail corridor
- Construction of the new Burley Griffin Way rail overpass and road upgrade will progress and be delivered in stages to maintain traffic flow and safely build the new rail infrastructure
- Road widening works on Hibernia Street, Stockinbingal
- Establishing environmental controls, and dewatering from site
- Plant and water truck refuelling may be undertaken outside of standard construction hours
- Authorised drone activity to conduct survey work over the worksite.

Hours of work

Construction is planned to occur during standard working hours: **7am to 6pm**, Monday to Sunday.

Some work may also take place between **6am and 6pm** on any day, with limits on early morning activities and in consultation with affected stakeholders.

What can I expect?

- Traffic management, including reduced speed limits near worksites for safe access.
- Workers operating machinery, equipment, hand tools and service vehicles.
- Temporary increases in noise levels during work activities.

Possession work

A track possession will occur from 6am Saturday, 7 November through to 6am Monday, 9 November, with works occurring continuously throughout this period.

Activities at the Illabo site will include concrete pours and earthworks adjacent to the existing line, track and signalling works.

Activities at the Stockinbingal site will include potholing, trenching and installing conduits.

Expected plant and machinery used

Plant and machinery may include, but are not limited to, excavators, cranes, frannas, dozers, scrapers, articulated dump trucks rollers, loaders, forklifts, prime movers, delivery truck and dogs, drill rigs, small truck mounted drill rig, concrete truck, water carts and support vehicles, survey equipment (including drones), hand tools, piling rig, traffic management equipment and signage.

How we're managing impacts

- Traffic management, including reduced road speeds and Variable Message Sign (VMS) boards, in line with relevant road authority approvals
- Implementing noise and vibration controls such as maintaining respite periods between noisy works, using the smallest plant possible to complete tasks, respite where required and turning off plant and equipment when not in use
- Maintaining access to private properties
- Conducting noise and vibration monitoring where required
- Water carts for dust suppression.

Work locations

Work will occur at various locations within the project boundaries. We will continue to keep you updated on the progress of work in your area.
